*New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 April 1919 it is 56·319 ft. above M. S.-L.

†To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. October 1909).

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From the 1st November 1915 the zero of gauge was 2·48 ft. above M.S.-L. Previous to that the zero was at M.S.-L. zero is 1·509 ft above M.-S.L.

(c) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 30·89 ft. above M.S.-L. From 3rd June 1910. From 4th June 1919 the zero is 1·51 ft. above M.S.-L.

(d) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at

(e) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1919.

The 2nd January 1920.

RESOLUTION ON THE REPORT ON PUBLIC INSTRUCTION IN BENGAL FOR THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

GENERAL DEPARTMENT.

Education Branch.

CALCUTTA, THE 12TH JANUARY 1920.

RESOLUTION—No. 72Edn.

READ—

The Report on Public Instruction in Bengal for the year 1918-19.

1. During the year 1918-19 the total number of educational institutions, both public and private, rose from 50,887 to 51,701, but the pupils attending them decreased by 33,738, viz., from 1,965,273 to 1,931,535, a result attributed by the Director of Public Instruction to adverse economic conditions, failure of crops and the prevalence of influenza and other diseases.

The total expenditure rose by 22¾ lakhs and aggregated 277½ lakhs, of which 86 lakhs were granted from Provincial revenues, 15½ lakhs were contributed by local bodies (mainly from grants placed at their disposal by Government), 126½ lakhs were realized from fees and 49½ lakhs were obtained from private sources, such as subscriptions, donations, etc.

2. **Controlling Agency.**—There was no change in the Indian Educational Service cadre, but 10 posts were added to the Provincial Educational Service cadre and 92 posts to that of the Subordinate Educational Service. Seven officers joined the Indian Army Reserve of Officers and 11 returned from military duty.

3. **Collegiate Education.**—Two new arts colleges, teaching up to the intermediate standard, were established, one at Faridpur and the other at Bagerhat, the number of arts colleges for Indian male students consequently rising from 31 to 33. Of these, seven were under Government management, one was under municipal management, 12 were aided and 13 unaided. The number of students rose from 20,318 to 20,616 and the expenditure increased by Rs. 1,02,754, bringing up the total to 19½ lakhs, of which nearly a third was derived from provincial revenues. The new system of post graduate teaching undertaken by the University of Calcutta led to a considerable decrease in the number of post-graduate students in the Presidency College.

4. **Secondary Education.**—While the number of high schools for boys showed an increase of 81, the number of middle schools fell by 46, owing mainly to the conversion of a number of those institutions to high schools. The middle vernacular schools are steadily losing popularity and, as the Director of Public Instruction observes, there is now little demand for them. On the other hand, there has been a steady increase of high schools, the number of which has arisen by 114, or 16 per cent., in the last two years. The increase of pupils has, however, been scarcely commensurate, the total of those under instruction rising in the same period by only 14,406, or 6·6 per cent.; there is reason to believe that in some places this disproportionate growth of schools and pupils is due to rival high schools springing up with consequent overlapping. The manual instruction classes which were opened in 1915-16 as an experimental measure in selected secondary schools having proved successful, Government sanctioned their permanent retention during the year under review. The question of improving the secondary schools in the Presidency has long been engaging the attention of Government, and a scheme for their improvement involving a cost of Rs. 4,47,000 has recently been sanctioned.

5. **Primary Education.**—The number of primary schools for boys increased by no less than 1,486 in 1917-18, but during the year under review there was an addition of only 197 schools, while enrolment fell by 38,277 (8,068 in upper primary schools and 30,209 in lower primary schools). The decrease in the number of pupils is shared by all the divisions in the Presidency and is ascribed by the Director of Public Instruction to economic stress and the ravages of epidemic diseases. The number of Hindu pupils in primary schools for boys fell by 4·3 per cent. and that of Muhammadan pupils by 2·3 per cent.

During the year the Government of India sanctioned a recurring grant of 5½ lakhs for the improvement of primary education, and with the help of this grant the Education Department was able to resume the panchayati union scheme which was started some years ago in Eastern Bengal with the object of providing each union with a decent primary school, but had to be suspended owing to financial stringency. Under this scheme 119 primary schools for boys and 30 for girls were established during the year, and the grant will ensure similar progress each year, so that in course of time every union will have a primary school conducted on improved lines. Owing to this and other Imperial grants the proportion of the expenditure on primary education met from public funds has risen, with a corresponding lessening of the ratio borne by fees. On the creation of the Presidency public funds contributed under 30 per cent.,

but in the year under review they contributed nearly half of the expenditure. Large additional resources are required for further expansion. The number of schools is still inadequate, the provision for the training of teachers is insufficient, while the housing and equipment of the schools are poor.

6. **Training of male teachers for Indian schools.**—There were 125 institutions for the training of teachers for Indian schools at the end of the year, viz. 2 training colleges, 6 normal schools and 117 *guru*, *muallim* and special training schools. A number of improvements were effected in the David Hare Training College, viz., the opening of L.T. classes, the appointment of an additional professor, the creation of a number of stipends for the training of intending teachers and the provision of allowances for teachers under training from aided high schools. The college is still accommodated in a hired house, and a scheme has been drawn up for its re-establishment on improved lines in a building of its own. Altogether 134 trained teachers were turned out from the training schools for vernacular teachers, while 954 trained teachers passed successfully from the *guru*-training schools and special training schools. An important scheme designed to secure an increased outturn of trained teachers for primary schools received the assent of the Secretary of State after the close of the year.

7. **Professional and Technical Education.**—The study of law continues to maintain popularity, the number of students rising from 3,054 to 3,149. Out of 1,131 candidates who appeared at the B.L. final examination, 495 passed during the year. Owing to the demand for trained artizans consequent on the industrial development of the country, the number of students in technical and industrial schools increased. With the object of improving the training of mechanical engineers a committee was appointed by Government to work out a scheme for recruiting students for the mechanical engineering classes of the Civil Engineering College at Sibpur from among apprentices trained at the Eastern Bengal Railway workshops at Kanchrapara. A system by which visiting lecturers deliver courses of lectures in special subjects, such as municipal engineering, river engineering and structural engineering, has been instituted in the college. Proposals for the improvement of the Dacca School of Engineering, which have since been sanctioned, were submitted to Government during the year under review; a three years' course for the overseer department was introduced in the school as an experimental measure. Owing to the rise in the price of cloth, there was a demand for the development of hand-loom weaving, and six peripatetic centres of instruction were established. A scheme for giving practical training in mine surveying at the collieries to passed students of the survey school at Mainamati has been brought into effect.

8. **Education of Indian girls and women.**—There was noticeable expansion of female education during the year under review, the number of institutions for Indian girls increasing by 622 and the number of scholars by 8,215. The number of Hindu girls declined by 1,635, while that of the Muhammadan girls increased by 9,918. Progress is still hampered by the inadequate salaries paid to female teachers and by want of facilities for training them, while the female inspecting agency is not sufficiently strong and the school buildings are generally poor. With the help, however, of the Imperial recurring grants of 9 lakhs and 5½ lakhs some improvements have been effected, such as the enhancement of the pay of teachers in certain classes of primary schools, the extension of the scheme of panchayati union schools for girls, the appointment of two additional assistant inspectresses of schools, the improvement of the buildings of model primary schools for girls, etc. The work of zanana teachers is reported to have been unsatisfactory owing to the prevalence of epidemics, in consequence of which many teachers were absent on medical leave and a number of centres were closed for want of teachers. Peripatetic needlework teachers have done useful work which is appreciated by the Indian community, while the industrial and technical schools for girls and women, of which the most important are those at Kalimpong, Baranagar and Berhampore, are working satisfactorily.

On the creation of the Presidency the Hindu girls under instruction outnumbered the Muhammadan girls by 40,000; but since then the Moslem community has shown an increasing readiness to take advantage of the opportunities offered them for the education of the girls, while the Hindus have lagged behind. Since 1912-13 the number of the latter has risen by only 21,000 or 17 per cent.—during the year under review there was actually a small decrease—whereas the enrolment of Muhammadan girls in the same period has risen by 63,000, or a little over 70 per cent.

9. **Education of Europeans.**—There were altogether 10,005 European and Anglo-Indian pupils under instruction in schools working under the code for European schools. A munificent donation of 10 lakhs, intended mainly for the progress of education among the domiciled community, was received from a European citizen of Calcutta, and a trust fund was created for which a scheme of management was drawn up during the year. The trust provides, *inter alia*, for the creation of a number of scholarships for European and Anglo-Indian boys and girls for both general and professional education, either in India or in the United Kingdom.

10. **Muhammadan education.**—The total number of Muhammadan pupils in institutions of all kinds decreased by 8,561, the net result of an addition of 9,455 female scholars and a loss of 18,016 male scholars; but the falling off, which represents under 1 per cent., was less than among the Hindus, who lost 24,853 scholars or 2½ per cent. There was a regrettable decrease of 5,642 Moslem students in secondary schools, but there was no falling off either in professional colleges or in medical, engineering, technical and industrial schools, while in madrasahs the number increased by 1,571, or a little over 7 per cent. Additional grants were sanctioned during the year to enable District Boards to aid maktabs at a higher rate, and the number of these institutions rose by 1,600 and their enrolment by 36,000.

Sanction was given to the establishment of Islamic intermediate classes attached to the Dacca Madrasah and regulations were approved for Islamic Matriculation and Intermediate examinations, in conducting which the Education Department will be assisted by an Advisory Board.

11. The report of the Director is published for general information.

By order of the Governor in Council,

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

REPORT

ON

PUBLIC INSTRUCTION IN BENGAL

FOR

1918-19.

CHAPTER I.

Introductory.

Total number of institutions and pupils.

1. The total number of all classes of institutions, both public and private, increased from 50,887 to 51,701, or by 814; while that of pupils attending them decreased from 1,965,273 to 1,931,535, or by 33,738. The increase of 814 institutions is the net result of a loss of 106 in the number of private institutions and a gain of 920 in that of public institutions. Public institutions increased from 48,303 to 49,223, while private institutions decreased from 2,584 to 2,478. A decrease in the number of pupils is recorded in the case of both public and private institutions. The number of pupils in public institutions decreased from 1,892,951 to 1,862,326, or by 30,625; and that of pupils in private institutions from 72,322 to 69,209, or by 3,113. The decrease was due to adverse economic conditions, failure of crops and the prevalence of influenza and other diseases. Of the total number of pupils in all classes of schools, 1,605,646 were males and 325,889 were females as compared with 1,648,078 and 317,195, respectively, in the preceding year.

Different classes of public institutions.

2. The number of public institutions, returned on the 31st March 1919, included 53 arts and professional colleges, 847 high schools, 1,966 middle schools, 44,925 primary and 1,432 special schools. The corresponding figures for the previous year were 52; 767; 2,019; 44,111 and 1,354, respectively. Classified according to management 412 of these institutions were under the direct management of Government and 2,976 under that of district boards and municipalities, while 38,671 were aided and 7,164 unaided. The corresponding figures for the preceding year were 416; 2,954; 37,096 and 7,837 respectively.

Total expenditure on public instruction.

3. The total expenditure on public instruction increased during the year from Rs. 25,493,539 in 1917-18 to Rs. 27,757,635, or by Rs. 2,264,096. Of this amount Rs. 19,427,078 represented direct and Rs. 8,330,557 indirect expenditure as compared with Rs. 18,478,285 and Rs. 7,015,254, respectively, in the previous year. The expenditure incurred from different sources during the years 1917-18 and 1918-19 is shown below :—

Head.	1918-19.	1917-18.	Difference—increase.
	Rs.	Rs.	Rs.
1. Provincial revenues ...	8,627,261	8,246,905	380,356
2. District funds ...	1,336,207	1,249,321	86,386
3. Municipal funds ...	194,703	187,082	7,621
4. Fees	12,664,883	11,395,876	1,269,007
5. Other private sources ...	4,934,581	4,413,855	520,726
Total ...	27,757,635	25,493,539	2,264,096

The above table shows an all round increase of expenditure during the year, the most marked increases having been under the heads of "Provincial revenues" and "Fees" and "Other private sources." The increase under "Provincial revenues" was almost entirely due to the Imperial grants. The enhanced fee receipts testify to the ever-increasing popular demand for certain grades of education—a demand which persists in spite of economic distress.

CHAPTER II.

Controlling Agencies.

Indian Educational Service.

4. The strength of the Indian Educational Service cadre on the 31st March 1919 was the same as at the close of the year 1917-18, viz.—49 permanent posts on ordinary rates of pay, 4 on special rates of pay and 1 temporary post on the ordinary rate of pay.

Provincial Educational Service.

5. On the 31st March 1918 the Provincial Educational Service cadre contained 162 appointments : 161 permanent and 1 temporary. Eleven posts—10 permanent and 1 temporary—were added during the year under review. The cadre thus contained 173 appointments—171 permanent and 2 temporary—at the close of the year 1918-19. Among the additions during the year 3 appointments were created for certain secondary schools for girls, 2 for additional assistant inspectresses of schools and 6 for professors in colleges.

Subordinate Educational Service.

6. The Subordinate Educational Service cadre consisted of 809 appointments at the close of the year 1917-18. During the year under review 92 posts were added. Of these 53 appointments were created in consequence of the permanent provincialisation of the four high schools at Jhalakati, Bhola and Perojpur in the district of Bakarganj and at Jamalpur in the district of Mymensingh. The remaining 39 posts were created to improve the staff of certain colleges and secondary schools. The strength of the service on the 31st March 1919 was thus 901 posts.

Lower Subordinate Educational Service.

7. On the 31st March 1919, the number of appointments in the Lower Subordinate Educational Service was 728 as against 733 on the corresponding date of the preceding year, 16 posts having been abolished and 11 added during the year.

Officers not Within the classified lists.

8. The number of posts outside the graded educational services was 485 on the 31st March 1919, against 527 at the close of the previous year. During the year 9 posts were created and 51 abolished. Of the officers 32 drew salaries of Rs. 200 a month or more and 453 salaries ranging from Rs. 15 to Rs. 175. Besides these there were 393 additional appointments for teachers of *guru*-training schools (including *muallim* training schools) and model girls' schools carrying salaries ranging from Rs. 6 to Rs. 30 a month.

Direction.

9. During the year under review the Assistant Director of Public Instruction for Muhammadan Education returned from military duty.

Inspecting Agency.

10. The subjoined table shows the strength of the inspecting agency on the 31st March 1919 :—

Division.	Inspectors and 2nd Inspectors.	Assistant Inspectors.	Deputy Inspectors.	Sub-Inspectors.	Assistant Sub-Inspectors.	Assistant Inspectresses.	Inspectresses.
Burdwan	3	5	21	73	19	2	1
Presidency (excluding Calcutta.)	3	4	11	44	9	2	1
Calcutta	1	...	2	3	...	1	
Dacca	3	4	18	54	7	3	
Chittagong ...	2	3	9	34	2	1	1
Rajshahi	1	3	14	41	2	2	
Total ...	13	19	75	249	39	12	2

In addition to the above 409 officers there were 10 assistant sub-inspectors and 146 inspecting *pandits* (including inspecting *maulvis* and *munshis*) or *guru* instructors.

Indian Army Reserve of Officers.

11. During the year under review 7 officers were permitted to join the Indian Army Reserve of Officers and 11 returned from military duty. Their names are given below :—

Officers permitted to join the I. A. R. O.	Officers returned from military duty.
(1) Mr. E. E. Biss.	(1) Mr. W. Saunders.
(2) „ T. P. Williams.	(2) „ J. A. Taylor
(3) „ J. M. Bottomley.	(3) „ E. E. Biss.
(4) „ W. A. Jenkins.	(4) „ J. M. Bottomley.
(5) „ M. P. West.	(5) „ M.P. West.
(6) „ T. G. Barker.	(6) „ W. A. Jenkins.
(7) „ J. J. Elliot.	(7) „ P. M. O'Riordan.
	(8) „ J. V. Francies.
	(9) „ H. Landeman.
	(10) „ G. R. Ballantine.
	(11) „ A. Gabriel.

CHAPTER III.

Collegiate Education.

Arts Colleges.

General statistics.

12. The number of arts colleges for males and females, returned on the 31st March 1919, stood at 36 against 34 returned on the corresponding date of the preceding year. Attendance at and expenditure on those institutions increased from 20,479 to 20,780 and from Rs. 19,98,661 to Rs. 21,07,604, respectively. Of the total number of arts colleges 8 were under Government management, 1 under municipal management, 13 aided and 14 unaided. During the year the average cost of an arts college was Rs. 58,545 and that of educating a student was Rs. 101-12-6 of which Rs. 32-2-7 came from provincial revenues.

Arts Colleges for Indian Males.*

Number of colleges.

13. In the year under review two new colleges teaching up to the intermediate standard were established, one at Faridpur and the other at Bagerhat. Thus the number of arts colleges for Indian males was 33. Of these Government maintained seven, a municipal body one and private associations twenty-five.

Number of students.

14. The number of students rose from 20,318 to 20,616. Of these 18,160 were Hindus and 2,076 Muhammadans, while 380 belonged to other communities. The corresponding figures for the preceding year were 17,901, 2,051 and 366, respectively.

Expenditure.

15. The total expenditure on arts colleges for males, which amounted to Rs. 20,38,827, showed an increase of Rs. 1,02,754 over the expenditure of the preceding year. The table below gives the details of the expenditure for the two years :—

	1917-18.	1918-19.
	Rs.	Rs.
Provincial revenues	6,25,622	6,17,069
Municipal funds	209	54
Fees	11,23,766	12,35,310
Endowments	57,411	1,30,539
Other sources	1,29,065	55,855
Total	19,36,073	20,38,827

Special non-recurring grants.

16. A grant of Rs. 40,000 was paid to the Carmichael College, Rangpur, for the construction of hostels and other buildings. Serampore College received a grant of one lakh of rupees for the general improvement of the institution.

* Arts Colleges for Indian females are dealt with in Chapter VIII.

Government colleges—(1) Presidency College.

17. On the 31st March 1919 there were 927 students on the rolls of the college against 1,035 of the previous year. This number included 788 Hindus, 133 Muhammadans, while 6 students belonged to other communities. The total expenditure on the college was Rs. 3, 51, 831 towards which Provincial revenues contributed Rs. 2. 15. 487. The average cost of educating a student was Rs. 368-6-7 of which Government paid Rs. 225-10-3.

The new system of post-graduate studies considerably decreased the number of post-graduate students in the college. The *seminars* which had hitherto been worked only with the post-graduate students were thrown open, as an experimental measure, to the B.A. honours students.

Proposals for the extension of affiliation in botany to the intermediate standard were placed before the Government of India. This proposal was sanctioned after the close of the year. The provision for excursions, previously confined to geology students, was extended to the students of botany. Chemistry students paid a number of visits to factories of various kinds.

An attempt was made to increase the space available for games by levelling a fairly large plot of ground near the Baker Laboratory. The college sports which had not been held for a good many years were revived. Discipline in the college and the hostel was satisfactory throughout the year.

Dacca College.

18. The Dacca College returned 800 students on the last day of the year 1918-19, against 943 in the previous year. Of the total number of students 614 were Hindus, 185 Muhammadans and 1 Christian. Government spent Rs. 1, 91, 262 on the college and received Rs. 57, 810 from fees, the net cost to Provincial revenues being Rs. 1, 33, 452. The gross cost of educating a student was Rs. 216-9-8, of which Provincial revenues met Rs. 151-2-2. Discipline was satisfactory.

(2) Hooghly College.

19. The number of students in the Hooghly College increased from 247 to 249. The total direct expenditure on the college amounted to Rs. 53,933 towards which Government contributed Rs. 34,800. The average cost per student was Rs. 229-8 of which Government provided Rs. 148-1-4.

The college applied for affiliation in economics and philosophy up to the B.A. pass standard.

(4) Sanskrit College.

20. There were 168 students on the rolls of the college on the 31st March 1919, against 184 on the same date of the preceding year. The gross expenditure on the college and the net cost to Government were Rs. 28, 216 and Rs. 15,772 respectively. Every student, on the average, cost Rs. 147-11-8 towards which Government contributed Rs. 82-9-3.

(5) Krishnagar College.

21. On the 31st March 1919 the college had 264 students on its rolls, against 234 on the corresponding date of the previous year. The total direct expenditure was Rs. 67, 487. The cost to Government of the college during the year and the cost of educating each student were Rs. 42, 932 and Rs. 171-11-8, respectively.

During the year the affiliation of the college was extended in English to the B.A. honours, in mathematics to the B. A. and B.Sc. honours, and in philosophy to the B.A. pass standard. Many structural improvements were effected and extensions were made to the new annexe buildings. Increased accommodation was provided for the practical work of the intermediate chemistry classes.

(6) Chittagong College.

22. The college returned 370 students against 311 in the previous year. The number of Muhammadan students increased from 93 to 115. The total direct expenditure amounted to Rs. 43,368 towards which Provincial revenues contributed Rs. 13,130. The annual average cost per scholar was Rs. 123-8-10 of which Government paid Rs. 37-6-6. The college received affiliation in logic up to the intermediate standard, in English to the B. A. honours, and in political economy and political philosophy to the B. A. pass standard.

There were several cases of breach of discipline. In one case the student concerned was expelled.

(7) Rajshahi College.

23. The number of pupils on the 31st of March 1919 was 760, against 786 of the preceding year. Of these 617 were Hindus and 143 were Muhammadans. The total expenditure on the institution was Rs. 95,361, the cost to Government being Rs. 27,238. The cost of educating a student was Rs. 128-5-7, of which the net cost to Provincial revenues was Rs. 36-10-7.

Municipal College.

24. The Midnapore College is the only college managed by a municipal board. In addition to the annual grant of Rs. 7,848 for the maintenance of the college, Government paid Rs. 6,428 for the improvement of its buildings. The college had 223 students on its rolls of whom 209 were Hindus and 14 Muhammadans. The total expenditure of the college amounted to Rs. 18,858 and the average cost of educating a student was Rs. 86-1-9.

Aided Colleges.

25. The number of "aided" private colleges during the year was the same as in 1917-18, viz., 12. The number on the rolls of those colleges was 6,412 of whom 5,601 were Hindus, 648 Muhammadans, while 163 came from other communities. Government contributed Rs. 1,25,227 towards the total expenditnre of Rs. 5,81,802 during the year. The corresponding figures for the previous year were Rs. 1,24,135 and Rs. 5,36,336, respectively. The average cost of educating a student in aided colleges was Rs. 91-8-1 towards which Government contributed Rs. 19-11-2.

CHAPTER IV.

Secondary Education.

General statistics.

26. The total number of secondary schools of all types and grades showed an increase of 27 only, viz., from 2,786 to 2,813. The number of pupils declined from 413,162 to 404,469, that is by 8,693. The gross direct expenditure increased from Rs. 91,77,686 to Rs. 96,27,419. The average cost of a secondary school was Rs. 3,422-7-7 and the cost of educating a pupil Rs. 24-7-1.

Secondary Education for Indian Boys.*

Schools and pupils.

27. During the year under review there was an increase of 35 schools in the total number of secondary schools for Indian boys. The high schools increased from 731 to 812, or by 81, while middle schools decreased from 1,942 to 1,896 or by 46. The decrease of 26 in the number of middle English schools was mainly due to the raising of a number of those institutions to the high school status. The fall of 20 in the number of middle vernacular schools requires no explanation. There is now little demand for these institutions.

In spite of the increase in the number of schools, the number of pupils under instruction during the year fell from 396,465 to 388,038. The loss of 8,427 pupils was the net result of a gain of 8,532 pupils in high schools and a fall of 16,959 pupils in middle schools.

Expenditure.

28. The total expenditure on secondary schools for Indian boys was Rs. 80,42,831. Towards this amount public funds contributed Rs. 9,65,937 and private sources Rs. 70,76,894. A comparison with the corresponding figures for 1917-18 reveals an increase in expenditure of Rs. 28,668 from public funds and of Rs. 3,59,748 from private sources. High schools cost Rs. 58,69,488, middle English schools Rs. 19,95,716 and middle vernacular schools Rs. 1,77,627. The corresponding figures for the previous year were Rs. 54,33,861, Rs. 20,37,483 and Rs. 1,83,071. The increase in expenditure was, therefore, due to the increased number of high schools.

Improvements.

29. During the year under review proposals for the improvement of Government middle English schools and of high schools under municipal management were given effect to at an increased annual cost of Rs. 18,192. The main scheme of which these formed a part is still under the consideration of the Government of India.

High schools.

30. The number of high schools is increasing rapidly. In 1916-17 the number of such schools was 698, in 1917-18 it was 731 and in 1918-19 it rose to 812. Thus during the course of two years the number of high schools increased by 114, or by more than 16 per cent. The rise in the number of pupils has not been commensurate with that of the number of

* The secondary education of Indian girls and Europeans is dealt with in the respective chapters.

schools. In 1916-17 there were 2,18,070 pupils in high schools, in 1917-18—223,944 and in 1918-19—232,476. Thus during the course of the last two years the number of pupils under instruction in high schools increased by 14,406 only, or by 6·6 per cent. A remark which occurs in the report of the Inspector of Schools, Chittagong Division, viz., that in his area rival high schools are springing up at the detriment of efficiency and discipline would seem to be not without bearing on this disproportionate growth of schools and pupils.

The Hastings School, Alipore.

31. The school had 48 pupils on its rolls on the 31st of March 1919. Of these 24 were boarders and the rest day scholars. The gross income from school fees was Rs. 37,064, and the expenditure Rs. 49,231, the deficit of Rs. 12,167 being met from Provincial revenues. The question of the permanent retention of this school is under consideration.

Manual instruction.

32. During the year under review manual instruction classes were conducted in 9 Government and 11 aided high schools and in one middle English school. The experiment has proved a success and Government sanction was obtained for the permanent retention of those classes.

CHAPTER V.

Primary Education.

General statistics.

33. The total number of primary schools for boys and girls rose from 44,111 to 44,925, while the number of pupils fell from 1,409,316 to 1,384,201. The expenditure rose from Rs. 46,66,615 to Rs. 48,02,756. The average cost of a primary school and of educating a pupil in it during the year was Rs. 106-14-6 and Rs. 3-9-9, respectively.

Primary Education of Indian Boys.*

Schools.

34. The number of primary schools for Indian boys increased from 34,074 to 34,271, that is, by 197. Of these 3,138 were returned as upper primary and 31,133 as lower primary schools. The corresponding figures for the previous year were 3,174 and 30,900. A comparison of these figures shows that upper primary schools decreased by 36 while lower primary schools increased by 233. The table below compares the numbers of these schools in each division for 1917-18 and 1918-19 :—

	1917-18.		1918-19.	
	Upper Primary Schools.	Lower Primary Schools.	Upper Primary Schools.	Lower Primary Schools.
Burdwan Division ...	1,085	7,743	1,066	7,390
Presidency Division (excluding Calcutta).	690	5,206	669	5,256
Calcutta ...	21	327	22	358
Dacca Division ...	551	7,704	545	7,793
Chittagong „ ...	265	3,954	267	4,102
Rajshahi „ ...	562	5,966	569	6,234
Total ...	3,174	30,900	3,138	31,133

Pupils.

35. The number of pupils attending primary schools for Indian boys on the 31st March 1919 was returned as 1,144,383 as against 1,182,660 on the same date of the preceding year, these figures showing a decrease of 38,277 pupils. Of the total number of pupils 148,914 were in upper primary and 995,469 in lower primary schools. The corresponding figures for the

* Primary education of Indian girls and Europeans is dealt with in the respective chapters.

No. 12285/dt. 28. 3. 59
National Library,
Calcutta-27.

previous year were 156,982 and 1,025,678. On comparison of these figures it is noticed that there was a decrease of 8,068 in the number of pupils attending upper primary schools and of 30,209 in that of the pupils attending lower primary schools, the net loss being 38,277. The decrease in the number of pupils was shared by all the divisions in the Presidency, Calcutta alone showing an increase and that of 405 pupils only. The loss of pupils is attributed to the rise in the cost of living, failure of crops and also to the ravages of epidemic diseases. The figures quoted above refer to primary schools only; they do not take into account the pupils reading in primary classes of secondary schools. The number of such pupils was 179,647. The total number, therefore, of pupils in the primary stages of instruction was 1,324,030. The figure for the preceding year was 1,372,959 of whom 190,299 were in secondary schools and 1,182,660 were in primary schools. These figures show a decrease of 48,929 in the total number of pupils in the primary stages of instruction in secondary and primary schools for Indian boys.

Progress of education among Hindus and Muhammadans.

36. Of the total enrolment in primary schools for Indian boys Hindus contributed 539,164 and Muhammadans 584,917 pupils. The corresponding figures for the preceding year were respectively 563,459 and 598,443. Thus the number of Hindu pupils fell by 24,295 or by 4·3 per cent. and of Muhammadan pupils by 13,526 or 2·3 per cent. Of the total male Hindu population 5·11 per cent. were in primary schools and of the Muhammadans 4·78 per cent. The percentages for 1917-18 stood at 5·34 and 4·80, respectively.

Expenditure.

37. In spite of the fall in the number of pupils in primary schools the total direct expenditure on these institutions increased, during the year under review, from Rs. 39,68,560 to Rs. 40,24,826. Of this amount Rs. 19,88,397, or 49·4 per cent. came from public funds and Rs. 20,36,429, or 50·6 per cent. from private sources. In the preceding year public funds contributed 45·6 per cent. and other sources 54·4 per cent. of the total expenditure. Almost one-half of the entire cost of primary education for Indian boys is now met from public funds. The figures in the table below, show the gradual rise in the cost to public revenues on account of primary education :—

Year.	Percentage of total cost for primary education for Indian boys met from public funds.	Percentage of total cost for primary education for Indian boys met from private funds.
1916-17	43·4	56·6
1917-18	45·6	54·4
1918-19	49·4	50·6

The increase in the proportion of the expenditure from public funds is almost entirely due to the additional contributions received from time to time from the Imperial Government. A short description of these grants is given below.

Imperial grants—

38. The entire assignment was spent during the year through the district and municipal boards, the allotments for various objects remaining the same as in the year previous.

(I) The Durbar grant of Rs. 500,000.

Of the Imperial recurring grant of Rs. 3,65,000, a sum of Rs. 1,63,524 was permanently made over with effect from 1917-18 to district boards and municipalities for the maintenance of board primary schools and for the increase of the pay of the trained teachers employed in the aided primary schools and *maktabs*. The entire allotment of Rs. 1,63,524 was spent during the year under review by the boards. In addition to these disbursements a sum of Rs. 1,03,651 was spent during the year on various recurring and non-recurring objects. A portion of the grant of Rs. 3,65,000 has also been set apart for the provision of improved staffs for the *guru*-training schools. Proposals in regard to this much-needed improvement are still under the consideration of the Government of India.

(II) The grant of Rs. 3,65,000.

(III) The special Imperial grant of Rs. 2,85,000 for Eastern Bengal districts.

The entire amount of this special Imperial recurring grant was made over to district boards for expenditure on specified objects.

(iv) The grant of Rs. 4,50,000.

Out of the grant of Rs. 4,50,000 the aggregate expenditure during the year amounted to Rs. 2,87,665 as detailed below :—

	Rs.
(*a*) Special grant to the Midnapore District Board	15,000
(*b*) Enhancement of pay of trained teachers in aided primary schools and *maktabs* ...	1,83,365
(*c*) Increase of pay of teachers in girls' primary schools	34,800
(*d*) Increased stipends to *guru* pupils	37,000
(*e*) Construction of *guru*-training schools ...	17,500
Total ...	2,87,665

(v) The grant of Rs. 5,50,000.

During the year under review Bengal received a fresh Imperial recurring grant of Rs. 5,50,000 for the development of primary education. About two-thirds of this grant has been devoted to the improvement of primary education for boys and the balance to that for girls. During the year the following expenditure was sanctioned :—

	Rs.
(*a*) Increase of pay of teachers in primary schools for girls	41,640
(*b*) Equipment grant to girls' primary schools ...	2,280
(*c*) Increased grants to girls' primary schools ...	34,000
(*d*) Establishment of *panchayati* union schools ...	1,49,000
(*e*) Acquisition of site for model girl's school at Bankura	2,074
(*f*) Strengthening the female inspecting staff ...	12,134
(*g*) Education of daughters of Indian midwives ...	5,400
(*h*) Increased grants to *maktabs*	52,021
(*i*) Increase of pay of teachers in aided primary schools	48,371
(*j*) Sonthali education in Dinajpur	3,924
(*k*) Grants to the society for the improvement of backward classes	8,000
(*l*) Construction of buildings for *guru*-training schools	5,206
Total ...	3,64,050

Improvements effected.

39. The new grant of Rs. 5,50,000 enabled the Education Department to proceed with the *panchayati* union school scheme, progress in which had long been held up for want of funds. One hundred and nineteen board primary schools for boys and 30 such schools for girls were established during the year The provision made under this head will ensure similar progress every year and in a few years every union in the Presidency will be provided with a comparatively effective primary school. The income of untrained teachers in aided primary schools from public funds has been raised to a minimum rate of Rs. 2 per mensem. The district boards have been provided with funds which will enable them to increase their grants to *maktabs* to 50 per cent. in excess of the grants paid to the ordinary primary schools.

Curricula.

40. Two distinct curricula still remained in force in Eastern and Western Bengal, respectively. A co-ordinated curriculum for the whole Presidency was drawn up during the year. It is now under the consideration of Government.

Primary Education Act of 1919.

41. The Primary Education Bill introduced in the Legislative Council by the Hon'ble Babu Surendra Nath Ray was passed into law in February 1919. The object of the Act is to secure a gradual extension of facilities for primary education in municipal and other selected areas. If local bodies can take advantage of this Act, the condition of primary education should benefit materially.

Conclusion.

42. The Imperial recurring grants which amount to Rs. 22,50,000 have made it possible to start some useful schemes. But the number of primary schools is still hopelessly inadequate—there are areas and communities still practically untouched; the provision for training elementary school teachers is insufficient and their remuneration is below the minimum which efficiency demands; the housing of schools is bad and their equipment is poor. In short, the provision of an adequate system of elementary education for the masses is still one of the many unsolved problems of the Bengal Presidency. Large additional resources are an essential condition of any real advance.

CHAPTER VI.

The Training of Male Teachers for Indian Schools.

Number of institutions and pupils.

43. On the 31st March 1919 there were 125 institutions for the training of masters for Indian schools and their attendance stood at 2,563. The corresponding figures for the previous year were 128 and 2,634, respectively. The decline in the number of institutions was due to the discontinuance of a small training class at Bhowanipur, conducted by the London Missionary Society, to the abolition of the Kola *guru*-training school in the district of Jessore and to the amalgamation of the two *guru*-training schools at Agla and Dacca for the establishment, at the latter place, of a training school of the improved type. Of the total number of training institutions 2 are training colleges, 6 normal schools and 117 *guru*, *muallim* and special training institutions.

Training College.

44. Both the training colleges in Bengal are affiliated to the University of Calcutta for the degree of Bachelor of Teaching and for the Licence in Teaching. The courses prescribed for those examinations require thorough revision. They are far too comprehensive for a one-year course and are to a large extent divorced from the actual conditions of school work.

(i) David Hare Training College.

45. The David Hare Training College opened an L. T. class for the first time during the year under review. There were on the rolls on the 31st of March, 1919, 42 students, 26 in the B. T. and 16 in the L. T. class. Of these 2 were Indian Christians, 31 Hindus and 9 Muhammadans. Twenty-six candidates appeared in the B. T examination of whom 18 passed, 8 being placed in the first division. The number of passes in the L. T. examination was 9 out of 16 examinees. The direct expenditure on the college amounted to Rs. 37,741. The average cost for training each student was Rs. 898-9-6, the entire amount being met from Provincial revenues.

The year under review witnessed various improvements, the most important of which were the extension of affiliation, the appointment of an additional professor, the creation of a number of stipends for the training of intending teachers, the provision of allowances for teachers under training from aided high schools and the inauguration of a scheme for the payment of honoraria to the headmasters and certain selected trained teachers in the practising schools with a view to improving the arrangements for the practical work of the students. The college continued in its old premises and the question of accommodation still remains unsolved.

(ii) The Dacca Training College.

46. At the close of the year the Dacca Training College had 56 students on its rolls. Of these one was an Indian Christian, 37 were Hindus and 18 Muhammadans. The session opened with 61 students, 28 in the B. T. and 33 in the L. T. class, but one B. T. student withdrew owing to a breakdown in health and three L. T. students retired before the completion of the course; one student died of small-pox. Three of the B. T. students came on deputation from the Government of His Exalted Highness the Nizam of Hyderadad. Twenty-five students sat for the B. T. examination of whom 21 passed, 13 obtaining first classes. Of 26 candidates who appeared at the L. T. examination 22 were successful, one gaining distinction. The total direct expenditure on the college was Rs. 60,549 of which Provincial revenues met Rs. 59,199 and private sources the balance of Rs. 1,350. The average cost of training each student was Rs. 1,026-4-1.

The practical work of the college was carried on in the Dacca Collegiate, the Moslem High and the Armenitola High School. As in the case of its

sister institution in Calcutta, honoraria were paid to certain members of the staff of the practising schools for their assistance in the practical work of the students.

Training Schools for Vernacular teachers—(i) General statistics.

47. The number of these schools continued to be the same as before, viz., 6, five of which are managed by Government, and one, an aided institution, by the Church Missionary Society. These schools had 509 pupils on the 31st of March 1919, as compared with 513 on the same date of the preceding year. The expenditure on them increased from Rs. 83,021 in 1917-18 to Rs. 87,051 in 1918-19 of which as much as Rs. 82,125 came from Provincial revenues. The number of trained teachers turned out from these institutions was 134 against 136 in the year before.

(ii) Improvements effected.

48. During the year under review the Muhammadan hostel of the Dacca Normal School, which occupied a portion of the school building, was removed to a rented house and in the room, set free, a practising school was formed by the transfer of one section of each of the lower forms of the Collegiate School. Thus the training school has now been provided with a practising school on its own premises. The sanitary arrangements of the Chittagong Normal School were improved. The practising school attached to the Rangpur Normal School was raised to the status of a middle English school. A special capital grant was made to the Calcutta Training School for the provision of books and appliances for the improved teaching of geography.

The accommodation of the Rangpur and Calcutta Schools remains unsatisfactory. The question is mainly one of funds and the question of providing both with better quarters is under consideration.

Guru-Training schools.

49. The number of *guru*-training schools and special training classes returned on the 31st March 1919 was 117 of which 112 were Government and 5 were aided institutions. During the year under review, the number of Government schools decreased by 2. This was due to the abolition of one school in the Presidency Division and the amalgamation of two schools in the Dacca Division. The number of schools reserved for the training of Moslem teachers remained the same as in the previous year viz., 6. The number of *gurus* and *muallims* under-training on the last date of the year was 1,956 against 2,014 in 1917-18. Out of 1,352 candidates 954 were successful in the final examination. The maintenance charges of all the institutions amounted to Rs. 2,35,500 towards which Provincial revenues contributed Rs. 2,10,873.

A sum of Rs. 1,50,000 was made available during the year from the Imperial grants of Rs. 9,00,000 and Rs. 5,50,000 for the provision of improved buildings for *guru*-training schools. With this money the work of construction was started in connection with two building schemes, one for the *guru*-training school at Bankura the other for the *muallim* training school at Hooghly and building operations, begun in the previous year, at Thakurgaon and Kurigram were continued.

CHAPTER VII.

Professional and Technical Education.

Law colleges and classes.

50. The institutions for the study of law were, during the year, the University Law College, Calcutta, and the law classes attached to the arts colleges at Hooghly, Krishnagar, Dacca, Rajshahi, Chittagong, Midnapore, Berhampore and the Ripon College, Calcutta. Of these 9 institutions the law classes at the Hooghly College remained closed for want of students. The total number of law students returned on the 31st of March 1919 was 3,148 against 3,054 on the corresponding date of the year previous. Of these 2,878 were Hindus, 257 Muhammadans, while 13 came from other sections of the community against 2,820; 224 and 10, respectively, in the preceding year. The total direct expenditure on law institutions amounted during the year to Rs. 2,73,006 of which Rs. 30,000 was paid from Provincial revenues. At the B. L. Final Examination 1,131 candidates appeared of whom 493 passed.

Pleaders' Survey Examination Board.

51. The short training classes at Dacca and Sibpur continued. Out of 8 registered candidates 3 appeared at the examination held in February 1919 and one passed.

During the year the board formulated a scheme for teaching pleaders the uses and relative values of the old and new revenue maps and plans by a series of lectures. The matter is now under the consideration of Government. The question of the training of an agency to execute Civil Court Commissions was also considered by the board.

Amin Examination Board.

52. The first examination under the auspices of the board was held in September 1918. The number of candidates appearing in the examination was 59 of whom 48 passed. The cost of the examination amounted to Rs. 758 inclusive of the travelling allowances of the touring examiner in practical surveying.

Civil Engineering College, Sibpur.

53. The number of students attending the engineering department of the college was 91, being an increase of 5 over the figure in the previous year. In the apprentice department the number of students was 237 against 214 in the preceding year. The artizan classes had 58 pupils against 53 in the year before. Of the total number of students 310 were Hindus, 20 Muhammadans, 54 Christians, 1 Buddhist and 1 Parsee. The total net expenditure on the college amounted to Rs. 2,30,096, of which Rs. 2,02,561 came from Provincial revenues. The corresponding figures for the previous year were, respectively, Rs. 2,16,076 and Rs. 1,93,477. The average cost of educating a student was Rs. 707-15-9 of which Rs. 623-4-3 came from public funds. The total value of the work turned out in the college workshops aggregated to Rs. 17,931.

During the year Government appointed a committee to work out the scheme propounded by the governing body of the college for recruiting students for the mechanical engineering classes from amongst those apprentices who had completed 4 years of their apprenticeship at the Eastern Bengal Railway workshop at Kanchrapara. The scheme is to be capable of extension to other railway workshops. A proposal to secure the services of practising engineers and other experts to deliver courses of special lectures in various subjects to the students of the college was submitted to Government, and sanction was obtained to the appointment of a visiting lecturer in architecture. The appointment of such lecturers in other subjects has been sanctioned by Government since the close of the period under review. The college rules were revised during the year.

Dacca School of Engineering.

54. The school had 275 pupils on its rolls as compared with 252 in the previous year. The artizan classes had 81 students, of whom 15 completed the course during the year. This department is becoming popular. The total expenditure on the school amounted to Rs. 58,757 against Rs. 52,613 for the previous year. The total value of the work turned out was Rs. 3,092 for outside work, and Rs. 2,983 for work done to the school and its workshops. The discipline on the whole was satisfactory.

A scheme for the general improvement of the Dacca School of Engineering was submitted to Government during the year under report and is under consideration. It has been decided to reserve annually from the next session five places in the sub-overseer classes and one in the first-year overseer class for qualified candidates from Assam. The three-year course for the overseer department, sanctioned by Government, was introduced from the beginning of the session on an experimental basis for three years. Rules for the artizan department of the school were revised during the year.

Serampore Weaving Institute and Outlying Centres.

55. In the artizan classes the total number of students was 91 of whom 43 passed out. Of these, 28 are working at their own homes on fly-shuttle looms, 8 have taken employment in hand-loom factories or under Government and the remaining 7 left the institute before the completion of their course. The higher classes had 31 students during the year. The course for these classes has been extended with effect from the year under report from 2 to 3 years. Also the course of the outlying district schools has been extended from 6 months to 1 year. Dyeing classes have been opened during the year. The total direct expenditure on the institute amounted to Rs. 26,718 of which Government met Rs. 26,254.

The following statement furnishes particulars regarding the outlying centres :—

Centre.	Total expenditure of Government.	Number of students under training in 1918-19.	Number passed.	How employed.		
				Working at home on fly-shuttle looms.	Opened factory.	Taken service.
	Rs.					
Pabna	1,845	40	29	28	1	...
Tangail	1,667	61	33(a)	28	...	...
Malda	1,751	60	24(b)	18	...	...
Bankura	1,778	40	40	38	...	2
Cox's Bazar	1,449	28	20	20	...	...

(a) Three passed students joined the Serampore Weaving Institute for further training, and the present occupation of 2 others is not known.
(b) Three joined the Serampore Weaving Institute and the present occupation of the other 8 is not known.

Government have sanctioned the establishment of six peripatetic centres of instruction in weaving at Bankura, Pabna, Tangail, Malda, Dacca and Khulna. The instructors were directed to make a survey of their districts and to ascertain the actual condition of the hand-loom weaving industry before they began operations. This they have now done.

Government Commercial Institute, Calcutta.

56. The number of pupils who joined the day classes was 61 in the first year and 10 in the second year, and the students in the evening classes totalled 89, the great majority of whom took shorthand, typewriting and book-keeping. No class could be formed during the year either in banking and currency or in annuities and insurance. At the final examination 4 candidates passed out of 10, and at the special examinations 38 passed out of 79. The total expenditure during the year was Rs. 24,320 and the income Rs. 4,475. Sanction has been obtained to the creation of a special post outside the Indian Educational Service for the Principal of the institute.

Government School of Art, Calcutta.

57. The total number of students on the 31st March 1919 was 246 against 267 in the previous year. The decrease was mainly due to the influenza epidemic, on account of which the school was practically closed for three months. The elementary, industrial, draftsman, fine art and teachers' departments had 102 ; 46 ; 35 ; 59 and 4 pupils, respectively. The modelling section of the industrial department undertook a few useful outside commissions, which were successfully executed. Of the total number of students 143 were Hindus, 11 Muhammadans, 6 Christians, 1 Buddhist and 85 belonged to other communities. In the hostel there were 38 boarders. During the year the direct expenditure on the institution aggregated Rs. 32,780, of which Rs. 28,232 came from Provincial revenues. A number of passed students secured employment on salaries ranging from Rs. 20 to Rs. 150 per month.

Joint Technical Examination Board.

58. There were two sub-overseer examinations in the year under review, the first in July 1918 and the second in March 1919. The first was a supplementary examination for the candidates from Sibpur who commenced the course in November 1917. The total number of candidates at the two examinations was 167 of whom 90 passed, the percentage of passes being 53·9 against 60 in the year before. In the overseer examination 58 passed out of 71, or 81·7 per cent. against 70 per cent. in the previous year. The figures for the overseer examination include 16 candidates appearing in mechanical and electrical branch of whom 13 were successful. The numbers appearing in this branch are increasing. The syllabuses of the overseer and sub-overseer courses, as well as the rules for these examinations were revised during the year.

The figures in this paragraph include the candidates from Bihar and Orissa.

Mining Instruction in the Coal Fields.

59. During the year under review the Mining Education Advisory Board controlled the three centres at Deshergarh, Jamuria and Raniganj in Bengal, besides the two centres at Jharia and Sijua in Bihar and Orissa. Out of 107

students eligible for the sessional examination from the five centres only 43 appeared, of whom 26 passed. The number on the rolls of those classes aggregated 288 against 312 in the previous year. The vernacular classes under Babu Hemanta Kumar Sen had an average attendance of 79.

The scheme for the practical training in mine surveying at collieries of passed students of the survey school at Mainamati was given effect to during the year under report. One student of the school was posted for training at the Ghersick colliery.

City and Guilds London Institute Technological examinations.

60. Forty-three candidates appeared in textile subjects and an equal number in other subjects. The numbers are increasing steadily. Thirty-one passed in the textile subjects and 11 in non-textile subjects. As in the year before, special examinations in domestic subjects were held in November 1918 at Kurseong and Calcutta. Thirty-five appeared in these examinations of whom 30 passed. An examination in practical cookery was held for the first time. Encouraging and instructive reports were received from London on the results of these domestic examinations.

"B" Classes.

61. At the school final examination of "B" class held in 1919, 44 candidates appeared and 24 passed. These figures do not include candidates from Bihar and Orissa. The corresponding figures for the preceding year were 52 and 34, respectively.

Technological Institute, Calcutta.

62. The original proposals of 1913 for the establishment of a Technological Institute in Calcutta were reconsidered by the Department during the year and a reduced scheme was submitted to Government.

The Bengal Technical Institute.

63. The Bengal Technical Institute rendered valuable assistance in the manufacture of munitions by placing its machinery at the disposal of Government.

State Technical Scholarships.

64. During the year under review State scholarships of the annual value of £150 for the promotion of technical training were awarded to Mr. Jatindra Mohan Das and Mr. E. C. Burlow, for iron-smelting and leather tanning, respectively.

CHAPTER VIII.

Education of Indian Girls and Women.

Institutions.

65. The number of public institutions of all classes for Indian girls returned on the 31st of March 1919 was 10,811 against 10,189 on the corresponding date of the previous year. Of these 3 were arts colleges, 2 training colleges, 13 high schools, 48 middle schools, 10,636 primary schools, 9 training schools and 100 other special schools. The corresponding figures for the year before were, respectively, 3 ; 2 ; 14 ; 54 ; 10,020 ; 9 and 87. The Gardner Memorial school, Calcutta, was permanently closed during the year and this accounts for the loss of a high school. The fall in the number of middle schools was not a real loss. Five such schools were returned as primary schools for want of pupils in the secondary stages. Only one aided middle vernacular school in the Rajshahi Division was closed. The primary schools increased by 616 ; this is a hopeful feature considering the economic stress through which the country passed during the year.

Pupils.

66. The number of pupils including those reading in mixed schools increased from 299,558 to 307,773 or by 8,215. Of the total number of girls and women 148,859 were Hindus, 151,084 were Muhammadans and 7,830 belonged to other communities. It is to be noticed that while the number of Hindu girls declined by 1,635 that of the Muhammadans increased by 9,948.

Controlling Agency.

67. During the year under review the female inspecting agency was strengthened by the addition of 2 assistant inspectresses for work in the eastern part of the Presidency. The total strength of the female inspecting staff now comprises 2 inspectresses and 12 assistant inspectresses.

Collegiate Education—Arts Colleges.

68. The Bethune College still occupies the same building as the collegiate school and suffers from lack of accommodation. The removal of the old stables and the erection of an airy and convenient block of laboratories would relieve the pressure on the existing botanical laboratory. But no further improvements or extension of the college are possible in its present site. The

Principal reports that for want of affiliation in mathematics and botany up to the B. A. standard and in history up to the honours standard the college is losing some of its best students.

During the year under review a Company of Girl Guides was established as a result of a course of lectures on first-aid delivered to the ladies of the staff by Lady Stewart.

The college had 85 students on its rolls against 81 on the same date of the year before. The total direct expenditure on the college amounted to Rs. 46,663 towards which Government contributed Rs. 41,750. The gross average cost of educating a student was Rs. 566-5-8 of which Rs. 479-14-2 came from Provincial revenues. The library grant of the college was raised from Rs. 500 to Rs. 1,000 per annum.

In addition to the Bethune College there are two other arts colleges for Indian girls ; *viz.*, the Diocesan College and the Loreto House. The former had 68 pupils on its rolls and the latter 11.

Secondary Education—(1) High Schools.

69. Of the 13 high schools for Indian girls 4 are under Government management and 9 are aided. They had 2,356 scholars on the rolls against 2,339 in the previous year. The loss of one school has not, therefore, reduced the number of pupils. As in the previous year the Secretary to the St. John's Ambulance Association delivered a course of lectures in first-aid to the staff of the Eden High School, Dacca. Five teachers and 7 pupils went in for the first-aid examination and gained certificates.

(2) Middle schools.

70. Of the total number of middle schools returned on the 31st of March 1919, 5 were under public management and 43 were aided institutions. There were 5,475 pupils in them against 5,626 in the preceding year. Twenty-four schools were of the middle English status and an equal number taught the middle vernacular course.

Primary Education.

71. With the help of the allotments from the Imperial recurring grants of Rs. 9,00,000 and Rs. 5,50,000 it was possible to effect the following improvements in the primary education for girls :—

(*a*) The pay of whole-time teachers working in primary schools for girls which were in receipt of aid from local bodies was increased by Rs. 2 per mensem.

(*b*) The grant-in-aid allotments of the inspectresses were increased by Rs. 34,000 per annum for new and enhanced grants to schools.

(*c*) Provision was made for the extension of the scheme of *panchayati* schools for girls. Funds were allotted during the year under review for the construction of 30 such schools and it is hoped to build same number of schools every year until the scheme is complete. These schools work under the direct control of district boards, necessary funds for both capital and recurring expenditure being provided by Government.

(*d*) A scheme for educating the daughters of indigenous midwives was inaugurated during the year. The object of the scheme is to attract such girls into ordinary primary schools for girls and also to induce teachers to take them in. It was introduced, in the first instance, on an experimental basis, in the Presidency and Dacca divisions only.

(*e*) Provision was made for the improvement of buildings of model primary schools for girls. The scheme which was given effect to in 1918-19 contemplates the provision of improved accommodation for two model girls' schools every year.

(*f*) A scheme for the establishment in Calcutta of a training class for Muhammadan women teachers has been sanctioned by Government.

(*g*) The number of assistant inspectresses of schools in the eastern part of the Presidency was increased by two. This has tended to improve and stimulate education throughout the circle.

(*h*) Provision was made for certain minor schemes which included, among others, the grant of an increased number of stipends to the Ballyganj Training School and the establishment of a training class attached to the Brahmo Girls' School, Calcutta.

Zanana Education.

72. During the year 64 zanana teachers worked in the Presidency. Except in a few centres the work was reported to be unsatisfactory, the main cause being the prevalence of epidemics. Many teachers frequently went on medical leave and many centres remained closed for want of suitable teachers. The zanana central gatherings, however, worked well. These gatherings are ordinarily intended for primary work, but at the central gathering at Krishnagar an interesting experiment was made in secondary as well as primary work. Miss Brock reports on this class as follows :—

"The class is composed of young married girls and women for the most part of good family and an education is being given them in both English and Bengali. The work is managed by a committee of educated Indian ladies and is in a most satisfactory condition. Such classes could be started in any large town if any cultivated and energetic Indian woman could be found for this pioneer work."

Education of Muhammadan girls.

73. The annually increasing number of girls under instruction is a sure indication of the increasing demand for the education of girls. The greatest obstacle to progress is the lack of competent trained women teachers. The proposed Muhammadan female training class in Calcutta is urgently needed.

Training of teachers—(a) Secondary training.

74. With the exception of the training classes attached to the Diocesan College there is no college in Bengal for the training of women teachers for secondary schools. It has not yet been possible to give effect to the proposed secondary training college scheme already approved by Government. The establishment of a training college is urgently needed.

(b) Primary training.

75. The number of training institutions for teachers of primary schools for girls remained the same as in the year before, viz., 9. Two of these are managed by Government and the remaining 7 are conducted on an aided basis. In Western Bengal 10 girls passed the senior examination and 40 the junior. At the Dacca departmental examination 13 passed the teachers' test.

Industrial and Technical education.

76. The number of industrial and technical schools for girls and women increased from 24 to 29, and that of pupils attending them from 714 to 820. All these institutions are doing good work. The most important of them are the Industrial School at Kalimpong, the Industrial Home at Baranagar and the Industrial School at Berhampore.

Needle work.

77. The peripatetic needle work teaching scheme is proving a success and it is proposed to extend its scope.

Physical education.

78. Physical education is, as a rule, neglected. A few high schools teach drill, but the teachers are not competent. This is one of the most important questions to which extended training facilities must be directed.

Conclusion.

79. During the year the progress of girls' education was in many respects very satisfactory. Much, however, remains to be done especially in the matter of training women teachers. The supply of trained women teachers lags far behind the demand which grows daily more insistent.

CHAPTER IX.

Education of Europeans.

Schools.

80. The number of European schools in Bengal working in accordance with the code of regulations remained the same as in the year before, viz., 80. Of these 62 were for general instruction and 18 for special. Of the institutions for general instruction 14 are graded as higher secondary, 8 as secondary, 17 as higher elementary and 23 as elementary schools.

Pupils.

81. On the 31st of March 1919 there were 10,005 pupils under instruction; the figure for the corresponding date of the previous year was 10,046. Of the total number of pupils 3,772 were in higher secondary schools, 1,045 in secondary schools and 4,737 in elementary and higher elementary schools. The corresponding figures for the previous year were 3,679; 1,185 and 4,823, respectively. Special schools had 451 pupils as against 379 in 1917-18.

The total number of European and Anglo-Indian pupils was 9,259 as compared with 9,561 in the preceding year. Of these 4,947 were boys and

4,312 girls. The corresponding figures for the last year were 5,242 and 4,319, respectively. The number of non-European pupils was, 746 of whom 614 were boys and 132 girls.

Expenditure.

82. The total direct expenditure on the education of European and Anglo-Indian children for the year 1918-19 was returned at Rs. 13,20,512 as compared with Rs. 12,27,915 for the preceding year. The money spent was derived from the following sources :—

	Rs.
(*a*) Provincial revenues	5,33,228
(*b*) Municipal funds	12,510
(*c*) Fees	5,30,001 and
(*d*) Subscriptions, endowments, etc.	2,44,773

The corresponding figures for the year before were, respectively, Rs. 4,96,142 ; Rs. 19,081 ; Rs. 5,12,180 and Rs. 2,00,562.

Scholarships.

83. The total value of scholarships and stipends paid during the year was Rs. 33,665 as against Rs. 28,689 during 1917-18. Besides the scholarships paid from Provincial revenues, 10 scholarships at rates varying from Rs. 10 to Rs. 20 a month were awarded from the Doveton Trust Fund.

A generous gift of Rs. 10,00,000 was received in 1918-19 from a European citizen of Calcutta. The scheme of management of the fund was drawn up during the year under review. Among other objects the trust provides for the creation of a number of scholarships for European and Anglo-Indian boys and girls for both general and professional education either in India or in the United Kingdom. The operations of the trust began after the close of the year under review.

Teachers.

84. There were 626 teachers in European schools against 630 in the previous year. Of these 285 were trained and 341 untrained. The figures for the preceding year were 284 and 346, respectively. There was one teacher employed on an average for every 16 pupils. This is satisfactory numerically, but the quality of the personnel leaves much to be desired from the point of view of training and of pedagogic and academic attainments.

Training of teachers.

85. During the year under review the Inspector of European Schools conducted a survey of the European teaching profession in Bengal and submitted his report to the Director.

There is only one recognised institution for the training of European teachers in Bengal, viz., the training class for women attached to the Dow Hill School, Kurseong. There were 16 students in residence during the year. The annual examination held by the Inspector of European Schools, Bengal, and the Inspectress of schools, Presidency and Burdwan divisions, was satisfactory in its results.

The training classes held at the Young Women's Christians Association by the Diocesan Board worked throughout the year. The syllabuses for these classes were revised.

Vocational Training.

86. The number of higher elementary schools with a class or classes following the recognised supplementary courses was 11. Of these five were for boys and six for girls. The number of pupils on the rolls on the 31st of March 1919 was 135 (89 boys and 46 girls).

There were 57 students on the rolls of the commercial and technical classes attached to the Young Women's Christian Association, Calcutta. During the year these classes were affiliated to the Government Commercial Institute. Of the 57 students, 25 were learning shorthand and the remaining 32 typewriting. The staff consisted of two whole-time and two part-time teachers. The Bengal-Nagpur Railway Apprentices' Night School at Kharagpur had 45 students on its rolls. Towards the total maintenance cost of this school which amounted to Rs. 2,898 Government contributed Rs. 470. The sessions of the Calcutta Technical School were held in the premises of the Government School of Art. There were 178 students learning mathematics, building construction, mechanics, steam, electricity etc. The cost of maintaining the school during the year was Rs. 7,593 including the Government grant of Rs. 2,000. A class for

teaching telegraphy was started at the St. Andrew's Colonial Homes as an experimental measure. The Government Telegraph Department provided the apparatus and the instructor.

Domestic training.

87. The Dow Hill School and St. Helen's Convent held classes in domestic science subjects during the year. These classes had 14 students undergoing special training. The Entally Convent and the St. Andrew's Colonial Homes continued to hold special classes for probationary sick nurses. Special classes for children's nurses were held at the Calcutta Free School, Kidderpore House and at the St. Andrew's Colonial Homes, Kalimpong.

At the City and Guilds examinations held in November 1918, 35 candidates appeared; 11 in plain needlework, 21 in plain cookery and 3 in dress-making. In needlework 9 passed, 3 obtaining prizes. In cookery 20 candidates were successful of whom 11 won prizes. In dress-making only one candidate passed.

Examinations.

88. The Cambridge Examination Syndicate agreed during the year to accept modern Indian vernacular languages in lieu of French and Latin in the senior Cambridge examination. Syllabuses in Hindi, Urdu and Bengali were drawn up by the Inspector of European Schools and approved by the Syndicate. This change is consistent with the wishes of the Government of India and the findings of the Calcutta University Commission.

The Calcutta University decided that the Cambridge senior local examination should be accepted as equivalent to the matriculation, and the higher school certificate examination as equivalent to the intermediate arts or science examination.

Controlling Agency.

89. Mr. G. D.'O. Maclear, the permanent Inspector of European Schools, Bengal, who joined the Indian Army Reserve of Officers in 1915, died in London on the 29th January 1919. He was a man of the highest character and attainments. His premature death is deeply regretted.

Mr. A. Mercer officiated as the Inspector of European Schools, Bengal, throughout the year.

CHAPTER X.

Muhammadan Education.

Statistics of Muhammadan pupils.

90. The total number of Muhammadan pupils in institutions of all kinds for the education of Indians decreased from 899,679 to 891,118; or by 8,561. The loss is due to the causes which led to the general decline in the school population during the year under report. In spite of this falling off the proportion of Muhammadan pupils to the total number of pupils increased from 46·0 per cent. to 46·4 per cent. The proportion of Moslem students in arts colleges remained the same as in the year before, viz., 10 per cent., in professional colleges it rose from 7·2 per cent. to 8·0 per cent., in primary schools from 50·6 per cent. to 51·4 per cent. and in special schools from 64·4 per cent. to 64·6 per cent., while it declined in high schools from 20·2 per cent. to 20·1 per cent., and in middle schools from 32·1 per cent. to 31·1 per cent. It thus appears that it is in primary schools only that the Muhammadans have made any real advance. Their proportion in those institutions approximates the proportion of Muhammadans in the total population, viz., 52·7 per cent. In secondary schools their progress is far from satisfactory. In those institutions the number of Moslem pupils fell from 103,038 to 97,396, or by 5,642. However, the number of Moslem pupils in professional colleges increased from 349 to 403 and in medical, engineering and surveying, technical and industrial and commercial schools from 753 to 764.

Number of Hindu and Muhammadan pupils compared.

91. Of the total number of Muhammadan pupils, returned on the 31st March 1919 by public and private institutions for Indians, 729,966 were males and 161,152 were females. The corresponding figures for the previous year were 747,982 and 151,697, respectively. Thus the Muhammadans gained during the year 9,455 female scholars, while they lost 18,016 male scholars, their net loss being 8,561 pupils only. In 1917-18 the Hindus returned 1,020,314 scholars of whom 867,347 were males and 152,967 were females. During the year under review the number of Hindu pupils totalled 995,461

of whom 843,481 were males and 151,980 were females. The Hindus, therefore, lost during the year 23,866 male scholars and 987 female scholars, their gross loss amounting to 24,853 scholars. On examining these figures it is found that in the year 1918-19 the Muhammadans lost less than 1 per cent. of their total school population; their loss in male scholars constituted 2·4 per cent., while their gain in female scholars amounted to 6·2 per cent. of their total numbers of male and female scholars, respectively. The Hindus have sustained a considerable decrease in the number of pupils. They lost 2·4 per cent. of their total strength in all kinds of institutions. The number of male Hindu scholars decreased by 2·8 per cent. and that of female scholars by ·6 per cent. Comparatively speaking, therefore, the loss to the Muhammadan community on account of the general fall in the number of pupils was not great.

Madrassahs.

92. The returns show that on the 31st March 1919 there were 273 madrassahs—13 senior and 260 junior—with an enrolment of 22,792. The corresponding figures for the previous year were 260 and 21,222. In madrassahs, therefore, the number of pupils increased by 1,570 or by a little more than 7 per cent. Towards the total expenditure on these institutions amounting to Rs. 4,31,790, public funds contributed Rs. 1,92,715. The entire additional grant of Rs. 25,000 was utilized during the year. The courses of studies for the junior department of madrassahs were revised.

Proposals for the establishment of Islamic intermediate classes attached to the Dacca Madrassah were sanctioned by Government during the year under report. The scheme provides for—

(1) the establishment of an Islamic matriculation examination with effect from 1919;
(2) the establishment of an Islamic intermediate examination from 1921;
(3) the constitution of an advisory board to assist the Education Department in conducting those examinations;
(4) the establishment of Islamic intermediate classes in the Dacca Madrassah; and
(5) the appointment of 3 additional professors in the Dacca Madrassah for the proposed intermediate classes.

Regulations for the conduct of the Islamic matriculation and the intermediate examinations were also approved by Government.

Maktabs.

93. The number of *maktabs* (recognised and unrecognised) increased from 9,502 to 11,120 of these 8,312 were for boys and 2,808 were for girls. The number of pupils attending those institutions increased from 274,267 to 310,044. Of these 236,808 were boys and 73,236 were girls, as against 214,482 and 59,785 in the preceding year. The total expenditure on *maktabs* rose from Rs. 6,54,868 to Rs. 7,91,129. Contributions from public funds increased from Rs. 2,98,064 to Rs. 4,15,742. The increase in expenditure from public funds was due to the additional grants sanctioned during the year. The purpose of these additional grants was to enable district funds to aid *maktabs* at a 50 per cent. higher rate than that at which ordinary primary schools are aided.

CHAPTER XI.

Education of Special Classes.

Education of Chiefs and Nobles.

94. The special provision for teaching the boys of the Nizamat family in the Nawab Bahadur's Institution at Murshidabad was continued; 26 boys of the family were being educated in this way during the year.

Education of aborigines and other backward races.

95. During the year under review Government approved a scheme for the improvement and expansion of education among the Sonthals in the district of Dinajpur and assigned a sum of Rs. 3,924 per annum for its introduction. The scheme proceeds on the same lines as the one already introduced in the Burdwan Division. In the Chittagong Division the Government Middle School at Bandarban had 46 pupils on its rolls, all of whom

were Maghs. Primay schools for Tipras in the district of Tippera and for the Arrakanese-Magh settlers in the Cox's Bazar subdivision totalled 11.

In the Dacca Division the District Boards of Bakarganj and Mymensingh maintained 22 primary schools for the education of Maghs and aboriginal classes.

In the Burdwan Division the Sarenga Mission continued their activities and the number of primary schools for aborigines under their control was 164.

In the Presidency Division, no special facilities worth record exist. But a large number of pupils belonging to the backward classes resort to the ordinary primary schools.

The society for the improvement of backward classes maintain a number of institutions for the education of children of the various poorer communities and sects. To encourage the educational activities of this association Government sanctioned during the year an annual grant of Rs. 3,000 and a non-recurring grant of Rs. 5,000.

Education of the defective.

96. The schools for the deaf and dumb and the blind in Calcutta are the most important institutions for the education of the physically defective. At the end of the year the Calcutta Deaf and Dumb School had 85 pupils on its rolls. A printing press was started in connection with this school, Government making a grant of Rs. 1,110 for the purpose. The deaf-mutes work in the press as compositors and printers.

The Calcutta Blind School had 33 pupils on its rolls on the 31st of March 1919. Of the total expenditure during the year amounting to Rs. 23,130, a sum of Rs. 3,800 was met from public funds. Besides the ordinary primary school course the school teaches cane-work, basket-making and music.

Education of children in tea gaarden.

97. There were 106 schools, 41 in the Jalpaiguri District and 65 in the Darjeeling District, for the education of children of labourers employed in tea gardens. Of these 5 schools in the district of Jalpaiguri are managed by Government. The total number of pupils in these schools was 2,083. The total cost to Government for tea garden schools amounted to Rs. 5,386, against the gross expenditure of Rs. 8,412.

Education of Factory children.

98. The school established at Tittagarh for educating the children of operatives in the local mills is reported to have done good work during the year.

CHAPTER XII.

Private Institutions.

99. The purely indigenous education of the country is carried on in unrecognised *tôls*, *Quoran* schools, *Kyaungs* or monastic schools conducted by Buddhist teachers and other schools not conforming to any recognized system of public instruction. The number and attendance of those institutions are subject to fluctuation as most of them are opened and closed spasmodically. From the divisional reports it appears that there is a tendency among institutions of this class to adopt standards recognised by the Department; this is the main cause of the gradual decrease in the number of private institutions. During the year under review the number of private schools declined from 2,584 to 2,478 and that of the pupils attending them from 72,322 to 69,209. Of the total number of attendance 17,125 were Hindus and 50,084 Muhammadans, while the rest belonged to other communities.

CHAPTER XIII.

Physical and Moral Training.

Hostels.

100. The number of hostels and boarding houses for boys increased form 775 to 809 and of boarders from 22,629 to 22,896. Besides these there were 70 boarding houses for girls with 4,594 inmates. With the exception of hostels and messes attached to Government institutions and to a few of the aided and unaided institutions the general condition of boarding houses leaves much to be desired both in respect of sanitary arrangements and in the matter of control and supervision.

The boarding allowances paid in the hostels attached to the high schools for girls at Mymensingh, Chittagong and Dacca were revised during the year.

Messes.

101. In Calcutta and Dacca the same arrangements continued for the accommodation of students in messes as were mentioned in the previous report.

Physical training.

102. During the year under report, the Advisor in Physical Education visited a number of institutions, inspected their hygienic and sanitary conditions, examined the work of the drill master and demonstrated to pupils and teachers certain types of physical training and games. He also lectured in the two training colleges in Calcutta and Dacca on personal and school hygiene. The scheme for the appointment of a whole-time Advisor in Physical Education is still under consideration.

It appears from divisional reports that though physical training receives increasing attention, it is practically neglected in many unaided schools. Some of these institutions run football and cricket teams, but the large majority of the boys have no games provided for them. In many places the lack of adequate playing-fields is keenly felt.

Drill continues to be taught under the system introduced by Dr. Grey and Dr. Segard. The subject forms a part of the curriculum of most schools but competent drill instructors are rare. As in previous years a number of drill masters were given a special course of training for six weeks under Dr. Segard at the Young Men's Christian Association, Calcutta. The scheme is an excellent one but its scope needs wide extension if it is to do more than touch the fringe of the problem.

Discipline.

103. During the year under review a few cases of breach of discipline were reported. Some students were arrested in Rajshahi, Chittagong, Calcutta and Khulna under the Defence of India Act. The number of national schools remained the same as in the previous year, viz., 4, but their attendance increased from 322 to 369. No unfavourable report was received against any teacher or pupil in them.

CHAPTER XIV.

Conferences.

104. No conference of educational officers was held during the year under the presidency of the Director of Public Instruction. Conferences of inspecting officers and teachers were held at divisional headquarters and various educational topics of interest and importance were discussed. Many of the district deputy inspectors also held conferences at district headquarters to discuss educational matters relating to their respective areas. In the Chittagong Division many sub-inspectors of schools held conferences of primary school teachers.

CHAPTER XV.

Text-book Committees.

105. There are still two separate Text-book Committees in the Presidency, one at Calcutta and the other at Dacca. During the year under report the Calcutta Committee received 591 books of which 177 were approved, 198 were rejected, 201 are under consideration and the remaining 15 were sent to this office for disposal. The Dacca Committee examined 846 books of which 615 were approved.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 8th January 1920.

Summary.—The week was rainless. Harvesting of winter paddy is nearly over. Prospects of standing crops are generally good. The average price of common rice has risen by about 0·65 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

DEPARTMENT OF AGRICULTURE, BENGAL.

FIRST FORECAST OF THE WHEAT CROP OF BENGAL, 1919-20.

(Note.—On an average of the five years ending 1917-18, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the territory now reported on, has in the five years ending 1917-18 averaged (a) 40·7 and (b) 17·8 per cent., respectively.)

Explanatory.—Three forecasts of the wheat crop are published. This forecast deals only with the area sown and the general condition of the crop in its early stages.

Area sown.—According to the estimates of the District Officers the total area sown amounts to 115,900 acres against 109,700 and 114,600 acres (now revised) returned in last year's first and final forecasts, respectively.

Character of the season and condition of the crop.—The rainfall in September was sufficient for the preparatory tillage, which began at the normal time. Light rain in October delayed the sowings to a certain extent but rainfall in the middle of November greatly facilitated the operation. The present condition and prospects of the crop are generally reported to be fair.

CALCUTTA ; R. S. FINLOW,
The 16th January 1920. *Offg. Director of Agriculture, Bengal.*

APPENDIX I.

First Forecast of the Wheat Crop of Bengal 1919-20.

District.	Approximate normal area under the wheat crop.	Approximate area under wheat last year (1918-19).	Estimated area under wheat this year (1919-20).	Date on which the sowing of the crop was begun this year.	Remarks by District Officers.
	Acres.	Acres.	Acres.		
Nadia ...	23,100	9,400	11,700	October to November.	The sowings were late in the Ranaghat subdivision and in some thanas of the Sadar subdivision. The weather and rainfall conditions have not been favourable in all the subdivisions. The condition of the crop is fair.
Murshidabad ...	69,300	23,600	24,200	Ditto ...	The sowings were normal. The weather has been favourable. The condition of the crop is fair.
Jessore ...	2,300	1,100*	900	Ditto ...	The sowings were normal. The weather has been favourable and the condition of the crop is fair.
Burdwan ...	2,000*	2,000*	2,000*	End of October to November.	The sowings were normal. The weather and the general condition of the crop have been fair.
Birbhum ...	5,000	4,100*	4,100*	Beginning of November.	The sowings were early. The weather has been favourable. The condition of the crop is fair.
Bankura ...	3,600*	3,600*	3,600*	Third week of October.	The sowings were normal. The weather has been favourable. The condition of the crop is fair.
Midnapore ...	1,200*	1,200*	1,200*	.....	The sowings were normal. The weather has not been favourable as there has been practically no rain since September last. The condition of the crop is poor.
Hooghly ...	3,400	1,700*	1,700*	Beginning of November.	The sowings were late. The weather and the condition of the crop have been fair.
Rajshahi ...	8,800	6,800	6,900	Middle of November.	The sowings were normal. The weather has been favourable. The condition of the crop is fair.
Dinajpur ...	1,000	1,200	1,200	By the end of October.	The sowings were normal. The weather has not been favourable. The condition of the crop is poor.
Jalpaiguri ...	600	500	600	First week of November.	The increase in area is due to sowing of the crop in the Alipur Duars subdivision this year. The sowings were normal. The weather has been favourable. The condition of the crop is fair.
Darjeeling ...	4,800	2,800	2,800	Last week of September.	The sowings were normal. The weather has been favourable. The condition of the crop is fair.
Rangpur ...	3,000	3,400*	3,400*	Beginning of November. Normal.	The sowings were normal. The weather has been seasonable. The condition of the crop is fair.
Bogra ...	100	100	100	Middle of November.	The sowings were normal. The weather has been favourable. The condition of the crop is fair.
Pabna ...	16,000	13,000	10,000	Middle of November.	The sowings were normal. The weather and rainfall conditions have been favourable for the growth of the crop.
Maida ...	60,000	35,000	35,000	End of October ...	The sowings were normal. The weather has not been favourable. The condition of the crop is fair.
Dacca ...	4,100	3,900	4,100	Middle of November.	The sowings were normal. The weather and conditions have been favourable.
Faridpur ...	2,700*	2,700*	2,700*	Ditto ...	The sowings were normal. The weather has been favourable. The condition of the crop is good.
Total Bengal ...	209,600	114,600	115,000		

* Conventional area.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR THE MONTH OF DECEMBER 1919.

I. **Character of the season.**—During the month under review there was no rainfall throughout the province except some scattered showers in Darjeeling, Bakarganj, Chittagong, Tippera and the Chittagong Hill Tracts. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of winter paddy and sugarcane was in full swing. Sowing of spring crops was completed.

III. **State of standing crops.**—The condition of standing crops was reported to be generally favourable.

IV. **Prospects and probable outturn.**—The prospects of spring crops were reported to be generally promising. Autumn crops yielded an outturn of 85 per cent. and winter *til* (sesamum) 68 per cent. The winter rice crop is generally expected to be satisfactory.

V. **Damage to standing crops.**—No report of any damage to the standing crops was received from any district.

VI. **Condition of agricultural stock.**—The condition of live-stock was reported to be fair on the whole. Cattle-disease, however, existed in parts of Murshidabad, Khulna, Burdwan, Darjeeling, Rangpur, Malda, Mymensingh, Noakhali and the Chittagong Hill Tracts.

VII. **Failure of pasturage and fodder.**—The supply of fodder was reported to be sufficient throughout the province. The price, however, was a little dear in the Munshiganj subdivision of the Dacca district.

VIII. **Prices of food-grains.**—During the second fortnight of the month the retail price of common rice rose in the districts of Howrah, Rajshahi and Bogra, fell in fourteen districts and remained stationary in the rest of the province. It varied from 5 seers a rupee in the headquarters of the 24-Parganas to 7½ seers a rupee in the headquarters of Jalpaiguri.

IX. **Condition of agricultural people.**—The condition of the agricultural population is improving owing to gradual falling off in the price of rice by the influx of new rice into the market.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

APPOINTMENT OF A COMMITTEE TO CONSIDER CERTAIN QUESTIONS CONNECTED WITH THE CONSTITUTION AND FUNCTIONS OF TEXT-BOOK COMMITTEE IN BENGAL.

GOVERNMENT OF BENGAL.

GENERAL DEPARTMENT.

Education Branch.

CALCUTTA, THE 20TH JANUARY 1920.

RESOLUTION—No. 130Edn.

In Government resolution No. 1286Edn., dated the 29th July 1919, a committee consisting of officials and non-officials was formed to advise Government on certain questions connected with the constitution and functions of Text-Book Committee in Bengal. The Governor in Council is now pleased to reconstitute the Committee as follows :—

(1) Mr. W. E. Griffith, Secretary, Dacca Text-Book Committee, President.

(2) Mr. M. P. West, officiating Inspector of Schools, Presidency Division.

(3) Shams-ul-Ulama Abu Nasr Muhammad Wahid, Superintendent, Dacca Madrasah.

(4) Hon'ble Babu Brojendra Kishore Ray Chaudhury.

(5) Hon'ble Dr. A. Suhrawardi.

(6) Babu G. C. Bose, Principal, Bangabasi College.

(7) Babu S. C. Bose, Headmaster, Mitra Institution, Bhawanipur.

(8) Babu S. C. Sanyal, Secretary, Calcutta Historical Society.

(9) Mr. E. S. Gasper, of Messrs. Macmillan & Co., Calcutta.

(10) Mr. J. C. Allen, Messrs. Longmans, Green & Co.

(11) Babu Santosh Kumar Lahiri, of Messrs. S. K. Lahiri and Co., Calcutta.

(12) Babu Bama Charan Auddy, of Messrs. S. C. Auddy & Co., Calcutta.

(13) Babu Brojendra Mohan Dutt, of the Students' Library, Dacca.

(14) Mr. J. W. Gunn, Assistant Director of Public Instruction, Bengal, *Secretary.*

ORDER.—Ordered that the Resolution be published in the *Calcutta Gazette* and that copies be forwarded to the President and the members of the Committee for information. Ordered also that a copy be forwarded to the Director of Public Instruction, Bengal, for information.

By order of the Governor in Council,

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 15th January 1920.

Summary.—No rain fell during the week. Transplantation of summer rice is progressing satisfactorily. Harvesting of spring crops and preparation of fields for jute and autumn paddy have commenced in Eastern Bengal. The standing crops are doing well. The average price of common rice for the Province has risen by about 1·6 per cent as compared with that of the previous week.

FARIDPUR, R. K. GHOSE,
The 18th January 1920. for *Subdivisional Officer, P. W. D., Faridpur.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 22nd January 1920.

Summary.—The week was rainless. Transplanting of summer paddy and harvesting of sugarcane, potatoes and early oilseeds are proceeding. Preparatory tillage for jute and autumn paddy continues in Eastern Bengal. Prospects of standing crops are fair to good. The average price of common rice has risen by about 2·2 per cent. as compared with that of the last week.

Wholesale—Chetla Hat, Ramkrishnapur Hat, Sealdah Fish and Milk Markets, Posta Bazar.

Retail.—Sir Stuart Hogg Market, Orphanganj Market, Sobha Bazar, Nutan Bazar, Raja Babu's Bazar, Bow Bazar, Jogu Babu's Bazar, Taltolla Bazar.

S. C. GHOSH.

for *President, Advisory Food Committee.*

CALCUTTA, *the 24th January 1920.*

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA TRADE FLUCTUATIONS

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the eight months, April to November, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the eight months, April to November, 1919, amounted to 15,710,000 maunds, as against 9,314,000 maunds in the corresponding period of the preceding year—an increase of 69 per cent. There was an increase (17 per cent) in the imports of coal and coke (65,693,000 maunds as against 56,328,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piece goods showed an increase of 78 per cent, the total value amounting to Rs. 6,82,95,000 as against Rs. 3,84,52,000 in 1918. The quantity of indigo imported during the eight months, April to November, 1919, decreased from 9,152 maunds to 7,989 maunds. The imports of raw jute amounted to 3,232,000 bales as against 3,512,000 bales—a decrease of 8 per cent. The importations of gunny bags also showed a decrease of 17 per cent (267 million bags as against 323 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) decreased by 5 per cent, from 5,115,000 maunds to 4,843,000 maunds. The imports of sugar decreased by 17 per cent, from 436,000 maunds to 363,000 maunds, and those of tea by 4 per cent, from 2,374,000 maunds to 2,271,000 maunds.

Exports.—The exports of cotton piece goods, foreign, from Calcutta by all routes during the eight months, April to November, 1919, increased by 28 per cent (Rs. 19,22,42,000 as against Rs. 15,03,38,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 924 million to 720 million bags, and the shipments of gunny bags to other Indian ports decreased from 25 millions to 23 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 3,266,000 maunds to 3,845,000 maunds, or by 18 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles in the eight months, April to November, 1919, compared with the corresponding months of 1918.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN THE BENGAL PRESIDENCY (EXCEPT CALCUTTA) DURING 1918-19.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Municipal Branch.

CALCUTTA, THE 2ND FEBRUARY 1920.

RESOLUTION—No. 212M.

READ—

Reports from the Commissioners of Divisions on the working of municipalities in the Bengal Presidency (except Calcutta) during the year 1918-19.

1. **Number of municipalities.**—The number of municipalities remained unchanged, viz., 115.

2. **Elections.**—The elective system was introduced in Budge Budge and general elections were held in 68 municipalities. They were, as a rule, keenly contested, but there was no poll in 9 towns, and in three others the ratepayers having failed to elect some of the Commissioners, Government had to appoint them under section 16 of the Bengal Municipal Act. Eight elections were followed by litigation in the civil courts or objections before the District Magistrate. Pending the decision of the civil suits, new municipal boards could not be formed at Rishra-Konnagar and Sirajganj. In the former town an *ex-parte* injunction issued by a Munsif restraining the Chairman from forming a new Board had unfortunate results, as it tied the hands of the municipal authorities in dealing with an outbreak of cholera. Fortunately the officers of an adjoining mill gave prompt and valuable assistance, but there was a regrettable loss of life. The case, as the District Magistrate remarks, illustrates the pressing need for the establishment of special tribunals to deal promptly and effectively with election disputes. Government are contemplating legislation to remedy the present state of affairs.

3. **Meetings.**—Altogether 150 meetings, or one in every 15, failed for want of a quorum. At Murshidabad 7 out of 19 meetings proved abortive. The Commissioners of seven municipalities failed to hold one meeting a month.

4. **Ratepayers and Voters.**—The total number of ratepayers rose from 316,563 to 317,117, or a little over 16 per cent. of the population residing within municipal limits. The ratio varied from 38·7 per cent. in Bogra to 3·6 per cent. in Titagarh, a mill town with a large cooly population. The average number of voters per elected Commissioner is 159. It falls below 100 in 37 municipalities, the minimum being 31, and it is over 300 in only 13 towns: the maximum (892) is reached in Howrah.

5. **Assessment and taxation.**—The average incidence of taxation per head of the population rose from Rs. 2-4-11 to Rs. 2-9-1. Latrine rates were levied in 99 municipalities, water rates in 23 and a lighting rate in 4 municipalities. A water rate and a latrine rate were imposed for the first time in Uttarpara and a latrine rate in Ghatal. The threats of the Calcutta Corporation to cut off the water-supply in consequence of non-payment of its dues compelled the Commissioners of Tollygunge to raise the water rate to the maximum permissible under the law. There was an increase in the water rate at Narayanganj, in the latrine rates at Netrakona and Sherpur, in the house rate at Baranagar and in the tax on persons at Jamalpur. In Comilla a rate on holdings was introduced in lieu of the tax on persons.

6. **Revision of assessment.**—General or partial revisions of assessment took place in 68 municipalities. New assessments were responsible for an increase in the demand in 14 municipalities, but 22 municipalities report a net reduction of revenue due to remissions on appeal or poverty or other reasons not properly explained. The number of appeals is sometimes abnormal; in one ward of Howrah, for instance, there were 2,335 revised valuations and 2,096 appeals were made; in such circumstances delay in disposal of appeals is inevitable and collections suffer.

7. **Collections.**—There was a satisfactory increase of 5 lakhs in collections, the average percentage on the current demand rising from 92·3 to 97·7. Remissions represented 3·6 per cent. on the current demand. In Bansberia, Burdwan, Taki and Serampore the ratio varied from 10 to 16 per cent. In the Presidency, as a whole, the outstanding balances fell from Rs. 6,12,128 to Rs. 5,40,076. Eight municipalities had no outstanding balances and in 16 other cases they were less than Rs. 100, but they were heavy in 12 towns. Rampore-Boalia had nearly one-third of its current demand in arrear in the beginning of the year and so far from any improvement being effected, there was a further increase at its end.

8. **Income and expenditure.**—The aggregate receipts including opening balances rose from Rs. 83,58,974 to Rs. 89,06,396, the income from rates and taxes rising by nearly 5¾ lakhs. The aggregate expenditure rose from Rs. 66,74,302 to Rs. 69,67,662. the largest increase, viz., Rs. 1,61,922, being under the head of "Public Health and Convenience".

9. **General administration and collection charges.**—The expenditure under this head was practically stationary and represented 8 per cent. of the total expenditure. The highest percentages were returned by Taki (27·7), North Dum-Dum (23·5) and Debhatta (20·4).

10. **Public Instruction.**—The amount spent on education was Rs. 2,94,718 or 4⅓ per cent. of the municipal income. The actual increase was Rs. 33,204, and as Government grants exceeded those for the previous year by only Rs. 9,143, it may be inferred that the municipalities are showing greater readiness to discharge their obligations towards primary education. Twenty-four municipalities, however, or one in every five (as against 17 in the previous year) failed to spend even 3·2 per cent. of their ordinary income—this percentage is taken to represent the amount required for the education of half the boys of primary school-going age. On the other hand, 44 municipalities spent more than 5 per cent. of their income, and nine over 10 per cent., on primary education. The largest proportion of municipal income devoted to this object was 18 per cent. in Muktagacha.

11. **Water supply.**—The Uttarpara water-works scheme was completed during the year and substantial progress was made with those designed for Dacca, Mymensingh and Satkhira. The construction of the water-works at Nator was impeded by the rains setting in unusually early, but the project was nearly completed by the end of the year. The Midnapore water-supply scheme has been revised and the cost is now estimated at Rs. 4,73,000, towards which Government is making a grant of Rs. 2,23,000, while the municipality is also taking a loan of one lakh from Government. A scheme for the supply of filtered water to Krishnagar received the final sanction of Government, which is making grants totalling Rs. 2,06,800. Cossipore-Chitpur extended its pipe system and Berhampore carried out improvements in its water-works. The Commissioners of Faridpur resolved to introduce a piped water supply, for which a scheme is being prepared. A sketch project for Patuakhali received the administrative sanction of Government; a scheme for Comilla was under preparation. The problem of water supply in the town of Noakhali became acute owing to the threatened erosion by the sea of the tank which is the only source of water supply.

12. **Drainage.**—Minor works were carried out in Asansol, Garden Reach, Midnapore, Serampore, Champdani, Berhampore and Madaripur. A drainage scheme in Bhatpara is nearing completion, and some progress was made in Mymensingh, where the Municipal Commissioners are carrying out a comprehensive project in instalments. The drainage schemes of Suri and Hooghly-Chinsura could not be taken up for want of funds and the execution of those prepared for Faridpur and Comilla had also to be postponed.

13. **Conservancy.**—There was an increase of Rs. 83,268 under this head, the Howrah Municipality being responsible for Rs. 58,448. A sewerage scheme, for which Government are making a grant of Rs. 50,000 and a loan of Rs. 30,000, is being carried out at Kurseong by the Sanitary Engineer. A beginning was made with the Dacca sewerage scheme, the total cost of which will aggregate Rs. 30 lakhs, of which Rs. 25 lakhs will be met by Government grants and the balance by a loan.

14. **Public Health.**—A gratifying feature of the year under review is the increasing interest displayed by most municipalities in public health. Measures were taken in many municipalities for the improvement of sanitation by filling up or clearing insanitary tanks, ditches and *dobas* and by removing jungle and noxious vegetation. Nawabganj is contemplating the adoption of a flood-flush scheme, for which a detailed survey has been begun.

A detailed project has been prepared for a similar scheme at Budge-Budge. In Panihati three anti-malarial co-operative societies were formed, which did useful work in filling up insanitary tanks and clearing away jungle and undergrowth on the holdings of their members.

There was a serious epidemic of influenza during the year. Steps were taken to check the spread of the disease by free distribution of medicine, and in some cases of diet, and by the circulation of printed instructions as well as by the appointment of special doctors. Epidemics of cholera were combated by disinfection, the protection of sources of water-supply and the employment of a special staff of medical officers. The number of vaccinators employed is reported to have been sufficient in the majority of cases and free vaccination has been introduced in several municipalities. Lantern lectures on hygiene and public health were given by Health Officers, and in some places quinine was distributed free to school boys and others during the malarial season.

15. **Improvement Schemes.**—Towards the end of the year the companies owning mills along the east bank of the Hooghly between Halishahar and Kamarhati initiated an important scheme involving combined action for the improvement of municipal sanitation. They decided to contribute at the rate of Rs. 100 per loom in the case of jute mills, and proportionately on the basis of the number of hands employed in the case of paper mills, towards such schemes of improvement as might be prepared by the Sanitary Engineer for the municipalities in which their mills are situated. The contributing companies made the reasonable stipulation that they should approve of the details of the projects on which their money is to be spent, and Government are naturally expected to contribute. Nearly 19 lakhs were deposited by them for improvement schemes in the towns of Halishahar, Naihati, Bhatpara, Garulia, Titaghar, Kamarhati and Bhadreswar. The mill companies have done much for municipal sanitation in the past, but their action has not been always co-ordinated; and the idea that they should co-operate to carry out large schemes of improvement is a new departure capable of great and lasting results.

16. **Public Works.**—The construction and maintenance of roads and buildings were handicapped by the high cost of materials and the difficulty of obtaining them. The proportion which the outlay on public works bore to the total expenditure varied in the smaller towns from 2·4 per cent. in Birnagar to 46·2 per cent. in Debhatta and in the larger towns from 3·5 in Bhadreswar to 40·3 in the South Suburban municipality.

17. **Loans.**—Altogether 39 municipalities were in debt to Government at the end of the year, the total amount of their outstanding liabilities on the 31st March 1919 being Rs. 41,48,994 in addition to Rs. 7,361 due for loans taken from private sources. The largest outstanding liabilities were those of Howrah (Rs. 20,57,351), Darjeeling (Rs. 6,18,145), and Dacca (Rs. 4,23,557). Meherpur and English Bazar liquidated their loans during the year. The Commissioners of Birnagar were directed by the Divisional Commissioner to refund a sum of Rs. 7,500 which was taken by them as a loan from private sources without the sanction of Government.

18. **Closing Balances.**—The closing balances rose from Rs. 16,84,672 to Rs. 19,38,734, the largest being held by Howrah (Rs. 2,39,084), Dacca (Rs. 2,34,079), Midnapore (Rs. 1,98,138), Maniktala (Rs. 1,22,253), Cossipore-Chitpur (Rs. 1,20,571) and Darjeeling (Rs. 1,18,850). No explanation has been furnished for the large balance in Howrah; in other cases they were mainly due to unexpended grants and the accumulation of funds for water-supply and drainage schemes. In ten municipalities, as against 15 in the previous year, the outstanding liabilities exceeded the closing balances.

19. **Audit of accounts and embezzlements.**—Embezzlements occurred in Burdwan, Raniganj, Baranagar, Basirhat, Rajpur and Mymensingh. The accounts of Barasat were found to be in such confusion that Government had

to pass special orders in exercise of its power of superior control. Even then the municipal executive pleaded inability to remove all the defects, as the irregularities extended over several years and some of the registers and papers had been eaten by white-ants.

20. **General Remarks.**—One of the most noticeable features of the reports for the year is the reiterated and general complaint of the inadequacy of municipal funds to maintain any high standard of administration combined with a general disinclination on the part of Municipal Boards to raise funds for the purpose. As shown however in paragraph 5 of this resolution, the rates have been enhanced in some cases, and allowance must also be made for the economic stress of the year, in consequence of which Municipal Commissioners were naturally averse to impose extra taxation. This aversion, however, persists during times of prosperity as well as in lean years; and the fact remains that many Boards have only elementary ideas of the duties and responsibilities of municipal administration. The incidence of taxation is below Re. 1 per head in more than one-fourth of the municipalities, and at this figure it is impossible to expect much in the way of civic amenities. In this connection it is of interest to observe the difference between the systems of rating followed in England and Bengal. In England local bodies have a keen idea of their requirements, prepare their budgets accordingly and proceed to impose rates sufficient to meet their needs. In Bengal the rates rarely vary, and estimates of work to be done each year are framed in accordance with the known income and not in accordance with the needs of the town. To borrow a colloquialism, the municipalities in Bengal cut their coat according to a limited amount of cloth; in England they decide on the coat required and devise means for getting the cloth.

21. Frequent reference is made in the reports to the presence or absence of party spirit and faction. In some towns party spirit is carried to extreme lengths and has deplorable results. Too often there is opposition to the executive simply for the sake of obstructiveness with the result that the administration is paralyzed. In one municipality, for instance, it is reported that "between the two factions prevailing scarcely any practical work can be extracted either from the clerical or out-door staff." Party spirit, however, if based on principles and not on personal considerations and interests, is not to be deprecated. Healthy opposition is necessary to sound municipal life; where it is absent, administration is apt to be ineffective and slack. One of the great needs of municipal life in Bengal at present is the awakening of public spirit among the ratepayers so as to enforce the responsibility of the Municipal Commissioners for feeble or bad administration. A few ratepayers' associations have been started, but so far they are not very enlightened or effective. Want of public spirit on the part of the Commissioners themselves is frequently noticeable. In one municipality the Commissioners are reported to be always anxious to keep the approaches to their own houses in repair at the expense of more deserving roads. In another encroachments on the roads, already too narrow, are common and action is seldom taken because the Chairman and some of the Commissioners are themselves the worst offenders. In another district the Magistrate suggests that simple sanitary lectures should be given to Municipal Commissioners illustrated with magic lantern slides, in order to stimulate their interest in and knowledge of questions of public health.

22. Another regrettable feature of the reports is the failure of many municipal authorities to act on the suggestions made by inspecting officers and to remedy defects pointed out by them. This is especially the case in regard to public health. One District Magistrate, for instance, writes:—"Deputy Sanitary Commissioners come and inspect and record notes showing what should be done, and little is done. District Magistrates achieve similar results." He suggests that the present state of affairs shows the necessity for giving the sanitary authorities greater power of control.

23. **Howrah.**—A general election which was held in December 1918 caused considerable excitement, but the Commissioner of the Division observes that it was decided on purely personal considerations, and that there is nothing to show that the voters were influenced in any way by questions either of policy or principle.

The valuation of the town has been steadily rising since 1911, viz., from 37½ lakhs to nearly 66½ lakhs; and during the year under review the total ordinary income rose by over 3 lakhs, viz., from Rs. 10,31,000 to Rs. 13,46,000. Part of this increase, however, is accounted for by a lakh which was paid by the East Indian Railway on the last working day of the preceding year having been credited to the municipal fund during the year under review. The current demand on account of taxes rose by about Rs. 80,000 and amounted to Rs. 11,78,043. The percentage of total collections on the current demand reached the high figure of 100·8 and the remissions amounted to Rs. 60,000 or 5·6 per cent. of the current demand. The total ordinary expenditure grew from 10 to 12 lakhs. The balance outstanding at the close of the year was reduced from Rs. 2,21,000 to Rs. 1,42,000.

As in the previous year, normal receipts exceeded normal expenditure, but many schemes for the improvement of the municipality remain in abeyance. An increase in the supply of filtered water and the improvement of the drainage system are urgently required, and so long as these and other reforms are not carried out it is difficult to subscribe to the view expressed by the Chairman that the municipality is in a position to meet its ordinary requirements without raising the rates. There was very little capital outlay on water-supply, while the maintenance charges went up by over Rs. 44,000. The supply is reported to have been excellent in quality but deficient in quantity, and the Sanitary Engineer complains of very great waste of water due to insufficient metering of private connections within the municipality. No new drainage works were executed within the year and the canal scheme had again to be postponed as the loan received from Government for the purpose has been spent on the water-works. The powers of the Municipal Commissioners in respect of general conservancy arrangements and the cleaning of roads, *bastis* and drains were delegated to ten ward committees which were formed experimentally for one year from September 1918. The Chairman is of opinion that the conservancy of the town has perceptibly improved under the new arrangements. The expenditure on conservancy rose by over half a lakh and it is not clear how much of the increase was due to the change of system. There was a satisfactory increase in the expenditure on the maintenance of roads, which had been neglected for some time, but shortage of wagons and the high price of road metal caused difficulties similar to those experienced in the preceding year.

The Chairman, the Hon'ble Babu Mahendra Nath Ray, C.I.E., continued to devote to the administration of municipal affairs such time as he could spare from his other public and professional duties. After the close of the year the Municipal Commissioners applied for the appointment of a whole-time salaried officer as Deputy Chairman in order that the Chairman might be relieved of a portion of his work. This request was acceded to by Government.

24. **Burdwan Division.**—The Commissioner of the Burdwan Division remarks that the working of the municipalities in his Division was on the whole fairly satisfactory.

The Burdwan and Hooghly-Chinsura municipalities were under the administration of the local officers of Government for the last six months of the year in consequence of the supersession of the Municipal Commissioners. The first step to be taken was to put the finances of the municipalities in order. In the case of Burdwan the assessment was found to be inadequate

and inequitable, and a special revision was undertaken under the orders of Government which resulted in an increase of Rs. 27,000 or 22 per cent. over the previous demand—this, however, is liable to reduction on appeal. Before the end of the year the financial condition of the municipality had been substantially improved.

When the Hooghly-Chinsura municipality was taken over by Government, the office was found to be in a chaotic condition and it took some time to reduce it to order. The ascertained liabilities, apart from loans, amounted to Rs. 32,027, whilst the cash balance was only Rs. 850. Further liabilities continued to come to light and by the close of the year it had been ascertained that at the time of assumption of charge they had amounted to nearly Rs. 37,000. A sum of Rs. 30,000 was advanced by Government at the end of December to meet the liabilities and other urgent requirements. The steps taken to improve collections met with considerable success and the realizations exceeded the current demand. The District Magistrate reports :—

"A policy of economy was followed and retrenchments were effected wherever possible. The valuation of holdings has been revised under an order of Government, and the water rate has been raised to the maximum permissible. It was largely due to the reluctance of the Commissioners to effect the necessary enhancement of the water rate that the waterworks was mismanaged and that the water-supply fund continually drew on the general fund and caused the starvation of other necessary works, such as repairs to roads and repairs to and cleaning of drains. The arrangements for the supply of coal, which were extravagant and defective, were remedied immediately charge was assumed. It is of course out of the question that funds should be immediately available to repair the neglect of years, but there is no reason why with careful supervision the municipality should not be gradually brought into thoroughly good order."

Since the close of the year the orders superseding both these municipalities have been withdrawn and the Governor in Council trusts that the new boards of Municipal Commissioners will steadily pursue the policy of reform and improvement initiated by his officers.

In the last annual resolution it was found necessary to administer a warning to the Municipal Commissioners of Serampore and Bansberia as to the necessity of reform. It appears that in both towns this warning has been effectual in securing some improvement. In Serampore steps are being taken to realize recoverable demands, but the Commissioner reports that the municipality is working at a deficit of over Rs. 6,500 and living on unauthorized advances from subsidiary funds. If, however, the dues of the municipality were realized, it would be in a strong position financially. The need for improving the collections is obviously imperative.

In Bansberia a revision of assessment resulted in a decreased demand and at the end of the year the liabilities exceeded the cash balance. Since the close of the year however a new Board has been formed. There has been some improvement in the financial position and the outlook is said to be hopeful. The substitution of a tax on holdings for the personal tax now imposed appears however to be necessary in order to secure funds adequate for the needs of the town, and the Municipal Commissioners have been requested to consider this suggestion.

In Rishra-Kōnnager work was brought to a standstill by the issue of an *ex parte* injunction of the Munsif of Serampore restraining the Chairman from forming a new Board. It is pleasant to notice the cordial relations between the European and Indian members of the Bhadreswar Board, all of whom take a lively interest in municipal affairs. Champdani is settling down to useful work. Notwithstanding its small income Kotrung continues to be efficiently managed.

In Bankura there was considerable discontent with the administration of the Municipal Board. The action taken by Government in the case of Burdwan and Hooghly-Chinsura is said to have spurred the residents into forming a Ratepayers' Association, and an organised effort to infuse new blood into the management proved successful, the result of the elections being to change almost entirely the personnel of the Board.

25. **Presidency Division.**—The following extracts are quoted from the report of the Magistrate of the 24-Parganas on the working of municipalities in that district :—"The past year has not seen any very marked improvement in the general level of municipal administration. While the affairs of the larger municipalities continued on the whole to be managed satisfactorily, in several of the rural municipalities there was a failure on the part of the Municipal Commissioners and the executive to realise their responsibilities. In Garden Reach, Cossipore-Chitpur, Baranagar, Titagarh, Bhatpara, Naihati and Baruipur a real effort is made by the Commissioners to improve gradually the standard of administration.

It is regretted that the proposal for a joint water-supply scheme for the riparian municipalities was not approved by most of the mill municipalities. Without such a scheme small riverside municipalities like North Barrackpore and Pánihati cannot hope, under present circumstances, ever to have a satisfactory water-supply. Individual schemes are impossible from a financial point of view. Very little was done in rural areas towards improvement of water supply. Generally Municipal Commissioners approved in principle of reserving tanks but were unwilling to do so in practice. Gobardanga and Baruipur were exceptions.

"Want of money prevents most of the smaller municipalities from carrying out pucca drainage schemes and in any case, such drains are not of much use without arrangements for a regular flush. The condition of markets was one of the most unsatisfactory features in a number of municipalities. Too often the interests of the proprietors, who were well represented on the Municipal Board, were allowed to outweigh the interests of the public health.

"Many of the defects cannot be remedied because many of the municipalities are too poor to be able to afford an up-to-date administration, but in too many cases the defects are due to a failure on the part of the Commissioners and their executive to realise their responsibility to the rate-payers. There are too many Chairmen and Vice-Chairmen who are too busy with their public or private business to be able to afford the time required to look after municipal business, and, in consequence, everything is left to a badly paid and inferior subordinate staff with the natural results. But there are signs here and there that the rate-payers are awaking to the fact that under present conditions they are not getting the best possible results and are inclined to demand from their Commissioners and executive more attention to their local duties."

The administration of municipalities in the Nadia district has shown some improvement except in the unhealthy and decadent towns of Chakdaha and Birnagar. Party faction of a bad type is said to be rampant among the Commissioners of Santipur, Nabadwip and Ranaghat. The Chairmen of the two former towns are non-resident practising pleaders who live in Calcutta and Krishnagar, respectively.

The general complaint of all the municipalities in Murshidabad is want of funds, which handicaps their efforts to improve their systems of drainage and water-supply.

26. **Dacca Division.**—In the Dacca Division the public and the Municipal Commissioners are taking an increased interest in municipal work. Some advance has been made in the direction of recognizing the advantages of a good water-supply and there are signs that the value of efficient drainage is beginning to be understood.

The insufficiency of funds for carrying out ordinary work remains the most marked general characteristic of the municipalities of Mymensingh. In towns where the Municipal Commissioners are trying to improve matters, the results are uneven. For instance in one town the trenching ground was very well managed but there was only one rubbish cart. In Mymensingh progress has been made with the improvement of the water-supply. Of the other municipalities Sherpur and Jamalpur are reported to be the most progressive. Excluding Bajitpur, which is little more than a village, Kishorganj, a future headquarters of a district, is said to be the worst. Roads are bad, conservancy is inefficient and lighting is defective, but the Commissioners seem to be content with a small income, the incidence of taxation being only 10 annas and 8 pies.

The health of Barisal has improved owing to the introduction of the waterworks, but adequate steps are not taken by the Commissioners to prevent waste of water. Its requirements necessitate an increase of taxation to which the majority of the present Commissioners are averse. In Jhalakati and Patuakhali the sanitary arrangements are inadequate and a more energetic administration is desirable. The waterworks of Pirojpur proved a failure and had to be closed down, but the filter-beds have since been repaired under the supervision of the Sanitary Engineer and the supply has been resumed.

27. **Chittagong Division.**—No marked progress was made by the Chittagong municipality during the year. The water rate levied was insufficient, and the total expenditure exceeded the receipts by Rs. 14,930. The Municipal Commissioners have however raised the rate from April 1919. Difficulties were caused by house-owners refusing to fix meters at their own cost. They contested the legality of the statutory rule prescribing this procedure; an appeal to the High Court has been decided in favour of the Municipal Commissioners. Cox's Bazar and Comilla were efficiently administered. In Chandpur the roads were in bad order, and no important work could be taken up for want of funds. In Brahmanbaria an epidemic of cholera which broke out is ascribed to the absence of a supply of good drinking water: a waterworks scheme was prepared in 1915 but is apparently pending with the Municipal Board. Noakhali suffered from the erosion of the sea, which if continued may cause its disappearance; in the meantime the destruction of property is seriously diminishing its income.

28. **Rajshahi Division.**—The Commissioner observes that with two exceptions all the municipalities of the division have shown some progress but much more is required. The Municipal Commissioners as a rule are lacking in that sense of public spirit and responsibility which is necessary to good municipal administration. The two exceptions to which the Commissioner refers are Pabna and Rampur Boalia. Pabna suffered from bad collections and want of initiative and energy on the part of the municipal executive. Rampur Boalia was, as usual, characterized by lack of method and effective control and its financial position remained unsatisfactory: the uncollected taxes at the end of the year amounted to more than one-third of the current demand for the year. Bogra carried out a general revision of assessment, and collections were good in Sherpur, but the financial position of both municipalities still leaves room for improvement. The administration of Nator and Dinajpur was satisfactory. The Chairman and Vice-Chairman of Kurseong took a keen interest in municipal affairs and did much for the improvement of the sanitary condition of the town. Darjeeling with an able Chairman and Secretary maintained a high standard of administration. The death of the Vice-Chairman, Dr. Seal, whose experience of municipal work had extended over almost a quarter of a century, was a great loss to the town. In the three municipalities of Malda the Municipal Commissioners work harmoniously; two of them, however, are so small and their resources so limited that there can be no

dispute as to how the funds should be employed. At the same time it is gratifying to observe that they are making the most of their opportunities.

29. The names of the following Chairmen and Vice-Chairmen have been specially brought to the notice of Government by the Commissioners of Divisions on account of the good work done by them; and the Governor in Council desires to express his appreciation of their public spirit :—

Dr. G. L. Johnston, Dr. N. Chaudhuri } Vice-Chairmen, Asansol.
Babu Nrisingha Das Bose, Vice-Chairman, Rishra-Konnagar.
The Hon'ble Babu Siv Narain Mukherjee, Chairman, Uttarpara.
Babu Debendra Nath Mukherjee, Vice-Chairman, Baidyabati.
Mr. R. B. Laird, Chairman, Bhadreswar.
Babu Jatindra Nath Banerjee, Vice-Chairman, Bhadreswar.
Mr. W. Allan, Chairman, Champdani.
Babu Kumud Bandhab Mukherjee, Vice-Chairman, Champdani.
Babu Jyoti Prosad Banerjee, Chairman, Kotrung.
Mr. J. E. Prain, Chairman, Bally.
Major S. H. Ashworth, Chairman, Naihati.
Mr. C. L. Thomson, late Chairman, Titagarh.
Rai Shama Charan Bhattacharji Bahadur, Vice-Chairman, Bhatpara.
Babu Hem Chandra De, Chairman, Cossipore-Chitpur.
Mr. W. F. Davie, late Chairman, Garden Reach.
Mr. W. Cuthbert, Chairman, Baranagar.
Babu Panchu Gopal Chakravarti, Vice-Chairman, Baranagar.
Babu Sivadas Ray Choudhuri, Chairman, Baruipur.
Babu Ramani Mohan Sen, Chairman, Berhampur.
Babu Nilmani Bhattacharji, Vice-Chairman, Berhampur.
Rai Saheb Saroda Kumar Dutt, Vice-Chairman, Cox's Bazar.
Babu Upendra Nath Mitra, Chairman, Comilla.
Rev. J. Takle, Chairman, Brahmanbaria.
Rai Saheb Bhabadeb Chatterji, Vice-Chairman, Brahmanbaria.
Babu Ganesh Chandra Sanyal, Vice-Chairman, Jalpaiguri.
Babu Surendra Kumar Sen, late Vice-Chairman, Dinajpur.
Babu Baroda Kanta Ganguly, Vice-Chairman, Dinajpur.
Mr. H. Quinton, Chairman, Kurseong.
Mr. R. B. Addis, Vice-Chairman, Kurseong.

By order of the Governor in Council,

L. S. S. O'MALLEY,

Secretary to the Government of Bengal.

FORM NO. I.—*Statement showing the constitution of the Municipalities in the Bengal Presidency during the year 1918-19.*

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Sugarcane crop of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under sugarcane in Bengal has represented some 8·8 per cent. of the total area under sugarcane in British India.)

Character of the season.—At planting time the germination of the crop was retarded in places owing to insufficient rainfall. Subsequently up till the end of September the weather conditions were generally good, though some damage was caused by excessive rainfall in parts of Nadia, Jessore, Burdwan, Pabna, Faridpur and Noakhali. The cyclone in Eastern Bengal did some harm to the crop in Dacca, Faridpur and parts of Mymensingh. Lack of rain since the beginning of October has also tended to rather spoil what was otherwise a good season.

Acreage.—The area planted with sugarcane is estimated at 217,900 acres this year for the province, against 219,000 acres (revised) last year.

Outturn.—From the appendix attached to the report, it will be seen that three districts (namely Bankura, Mymensingh and Bakarganj) report a crop above the normal, five districts a normal crop, and fifteen districts a crop varying from 75 to 94 per cent. Four districts only, namely, Nadia, Pabna, Noakhali and the Chittagong Hill Tracts, report a crop as low as between 55 and 67 per cent.

According to the above estimates, the average outturn of the crop for the province works out at 89 per cent. of the normal against 77 per cent. last year.

Taking 36 maunds as the normal rate of cane-*gur* per acre, the gross outturn for the province is estimated at 5,129,300 cwts. this year against 4,460,100 cwts. (revised) last year.

Other sources of gur.—The total quantity of *gur* likely to be obtained from date-palm juice is estimated at 2,018,100 cwts. this year against 1,952,700 cwts. (revised) last year.

The total quantity of *gur* in the province from all sources is thus estimated at 7,147,400 cwts. against 6,412,800 cwts. last year.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA,
The 28th January 1920.

APPENDIX I.

Final Forecast of the Sugarcane Crop of Bengal, 1919-20.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the harvesting of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.		
	Acres.	Acres.	Acres.				
24-Parganas ...	8,000	4,100	4,300	87	100	Beginning of November to December.-Normal.	The increase in area is due to the high price of sugar. The weather has been favourable.
Nadia	7,900	5,800	6,100	67	67	December. Normal ...	The increase in area is due to high price of sugar. The weather has not been favourable as heavy rains damaged the crop to a certain extent.
Murshidabad ...	3,600	3,100	2,800	58	83	In Jangipur, November to December. Normal. Elsewhere not begun yet.	The decrease in area was due to want of rain during the planting time. The weather has been fair. The drought at planting time affected the growth of the crop and has reduced the outturn by about 17 per cent.
Jessore	3,900	2,600	3,100	75	75	December. Normal ...	The increase in area was due to high price of sugar. The weather was favourable at planting time, but the outturn has fallen below the normal owing to insufficient rain in June and September.
Khulna	1,500	1,100	1,000	77	75	Beginning of November. Normal.	The decrease in area was due to want of rainfall at sowing time. The weather has been favourable. The outturn is expected to be below the normal for want of timely rain.
Burdwan	25,800	19,000	18,100	75	83	Not yet commenced ...	The weather was not favourable at the beginning but subsequently it has become favourable except in places where the growth of the crop has been affected by heavy rainfall in August and by absence of rainfall thereafter. This has caused the outturn to fall below the normal.
Birbhum	9,000	11,000	11,000	75	100	Ditto	The weather has been favourable.
Bankura	15,000	11,500	10,500	75	117	Ditto	The planting was delayed owing to want of rainfall at the beginning. The weather has since been good.
Midnapore	6,500	3,000	4,200	80	88	December	The increase in area was due to favourable conditions at sowing time and to high price of *gur*. Since the submission of the second forecast, the weather was not favourable owing to want of rain in October. Hence the outturn has fallen below the normal.
Hooghly	7,200	5,000	4,900	67	94	Not yet commenced ...	From October to December the weather has not been favourable for want of rain, which has caused slight damage in the Arambagh and Sadar subdivisions.
Howrah	8,500	5,300	5,200	71	86	Ditto	Since the submission of the second forecast, the weather has not been favourable owing to drought which has caused some damage.
Rajshahi	19,000	13,300	13,300	70	75	Middle of November. Normal.	The weather was fair from October to December. The outturn is below the normal owing to unfavourable weather at planting time.
Dinajpur	25,000	30,500	30,600	75	87·5	By the end of November. Early.	The increase in area is due to high price of sugar. The weather has been fair, but want of rain retarded the growth of the crop.
Jalpaiguri	5,000	4,000	3,700	80	88	Last week of November. Normal.	The decrease in area was due to want of rain at planting time. Unfavourable weather and want of rain since the planting time caused the outturn to fall below the normal. From October to December the weather was favourable.
Darjeeling	200	200*	200*	46	83	Middle of February ...	Favourable weather from October to December has improved the outturn.
Rangpur	10,500	11,000	12,600	100	100	First week of December. Normal.	The effects of the weather on the growth of the crop have been good on the whole.
Bogra	5,000	3,700	4,200	67	93	By the middle of January. Normal.	At the beginning the weather was not favourable but subsequently it has been favourable to the growth of the crop.
Pabna	10,000	9,700	4,600	65	55	By the end of December. Normal.	The decrease in area if due to want of rain at planting time. Since then want of timely rainfall retarded the growth of the crop. Subsequently owing to excessive rain up to end of September and to want of rain in October to December the condition of the crop was not favourable.
Malda	300	300*	300*	100	100	October. Normal ...	The weather was dry at planting time, but it has since been favourable. A normal outturn is expected.
Dacca	21,100	23,900	23,700	74	75	Middle of July last. Normal.	Seasonable rain at sowing time and subsequently frequent showers did much good to the crop. The cyclone of the 24th September last and want of rain since then have reduced the outturn.
Mymensingh ...	11,100	10,300	10,300	80	108	December. Normal ...	Since the submission of the second forecast, the weather has been generally favourable from October to December. Some damage was caused by the cyclone in the Kishoreganj subdivision.

Faridpur	7,100	7,400	7,400	87	85	End of September. Normal.	The weather was favourable at planting time, but subsequently the growth was affected by heavy rainfall, high water and the cyclone to some extent.
Bakarganj	14,000	20,000	23,000	80	108	September to December. A little early.	The weather was favourable at sowing time, but became a little unfavourable afterwards. The flood in the first part of August did slight damage to the crop. Since then the weather has been favourable.
Chittagong ...	6,400	5,400	6,000	96	100	November. Normal ...	The rainfall at planting time was deficient, but subsequent conditions have on the whole been favourable to the growth of the crop.
Tippera	6,000	6,100	6,000	70	75	December. Normal ...	The weather was dry at planting time, but since then the weather has been fair. The outturn is below the normal owing to damage caused by the cyclone.
Noakhali	900	900*	900*	90	65	End of September. Normal.	The weather has been favourable. Owing to heavy rainfall in June, July and August the growth of the plant in the Sadar subdivision was stunted to a considerable extent.
Chittagong Hill Tracts.	1,000	1,000	1,000	63	60	Not yet harvested ...	The weather has not been favourable. Insufficient rainfall retarded the growth of the crop. The outturn is therefore below the normal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 29th January 1920.

Summary.—The week was practically rainless. Transplanting of summer paddy is approaching completion. Harvesting of sugarcane, potatoes, early oilseeds and pulses continues. Preparation of lands for autumn paddy and jute is progressing in Eastern Bengal. The prospects of standing crops are generally reported to be favourable. The average price of common rice for the province has risen by about 1·69 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Report on the Cotton Crops of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under the Cotton Crops in Bengal has represented some 0·2 per cent. of the total area under Cotton in India).

The "early" crop is chiefly grown in the Chittagong Hill Tracts, in the State of Hill Tippera and, to a small extent, in orther districts. The "late" crop is unimportant and is mainly grown in Bankura and Midnapore.

Character of the season.—Since the issue of the third forecast, the dry weather has been generally favourable to the late crop. The early crop which suffered considerably from excessive rain at the time of maturity has not fared well specially in the State of Hill Tippera, where the outturn is reported to have further decreased owing to bad effects of the rain in September and October. On the whole the season may be regarded as fair for the late crop but unfavourable for the early crop.

Area sown.—The total area sown with the early crop is returned at 66,693 acres and that with the late crop 2,159 acres against 70,786 and 2,203 acres, respectively, in the corresponding forecast of last year.

Outturn.—The estimated outturn of the early crop is returned at 23,613 bales this year against 30,908 bales in the corresponding forecast of last year. The outturn of the late crop is estimated at 999 bales this year against 737 bales for last year.

DACCA,
The 6th February 1920.

ROBERT S. FINLOW,
Offg. Director of Agriculture, Bengal.

APPENDIX.

Final Report on the Cotton Crops of Bengal, 1919-20.

(b) For Nadia, Murshidabad, Jessore, Khulna, Burdwan, Birbhum, Hooghly, Bogra, Malda, Tippera and Noakhali.

* Conventional area.

(1) The weather has been favourable especially for the high lands. The date of harvesting of the early crop was normal.
(2) The condition of the crops has not been good owing to excessive rain.
(3) The weather has been generally fair and the condition of the crop is good.
(4) The weather and general condition of the crop have been fair. the date of harvesting was normal.
(5) Though unfavourable at the outset, the weather was favourable to the crop subsequently, but the rain in September and October proved to have a bad effect on the outturn. The general condition is fair and the date of harvesting was normal.
(6) In Burdwan, the weather has not been favourable. Elsewhere it has been favourable and the present condition of the crops is fair. In Khulna, the plants have all been destroyed by the cyclone in September.

MEASURES FOR DISCOURAGING PROFESSIONAL BEGGARY.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Police Branch.

CALCUTTA THE 10TH FEBRUARY 1920.

RESOLUTION—No. 588P.J.

ON the 3rd July 1918 a resolution was moved in the Bengal Legislative Council by the Hon'ble Babu Kishori Mohan Chaudhuri, recommending that a committee should be appointed to consider the desirability of legislative action to discourage professional beggary in the different provincial municipalities. The resolution was withdrawn on the assurance that a preliminary enquiry would be made from those interested in the subject with a view to ascertaining some more definite data as to whether professional beggary was

assuming serious proportions, and as to the best lines of grappling with it. It was added that, if the results showed that there was room for further enquiry, it would be undertaken.

A general reference was accordingly made to those most likely to have knowledge of the question, and replies have now been received. Since their receipt some time has been lost in ascertaining whether it would be practicable to take a census, through the police, of the mendicant population of Calcutta, but it appears unlikely that, without an elaborate organisation, any sufficiently accurate results would be forthcoming, and with the regular census of 1921 impending it would seem sufficient to await the enumeration which will then be effected.

2. The general trend of opinion in the *mufassil* municipalities is to the effect that professional mendicancy has not increased in recent years, or as yet attained such dimensions as to justify any special remedial measures, and that view the local Government would be prepared to accept. The whole problem of effective organised effort to cope with the prevalence of begging is still novel in this country, as there is common agreement that the enforcement of such legal penal provisions as obtain has achieved but little. There is also general recognition of the difficulties which surround the question. Hence it will facilitate a solution to concentrate attention upon that area in which the matter has assumed most prominence and in which there are the greatest facilities for dealing with it. That area is, of course, Calcutta.

3. With few exceptions (though noticeably among them are the British Indian Association and the Commissioner of the Presidency Division), the weight of opinion is clearly to the effect that professional begging in Calcutta is on the increase, though a wish for more exact figures is expressed in more than one quarter. The difficulty of obtaining these at the moment has been already mentioned, but whatever the precise numerical total, the majority are agreed that it is sufficiently large to justify the taking of special action. Among the majority are to be found the Calcutta Corporation (which, in its turn made a fairly extended enquiry), the District Charitable Society, the Bengal Chamber of Commerce, the Trades Association, the Social Study Society, the Chief Presidency Magistrate and Commissioner Booth Tucker.

4. In the suggestion of remedies opinion has apparently been largely influenced by action taken recently in Bombay and Ceylon. A succinct account of this is given in a report of a special committee of the Corporation, from which the following quotation is made :

"The proposals which have been adopted by the Corporation of Bombay and have been submitted to Government are—

(*i*) To establish a refuge, an infirmary and a work-house.

(*ii*) To pass a Vagrancy Act applicable to particular areas in the first instance, but liable to extension to any area in the Presidency at the discretion of Government, and containing provisions—

(*a*) enabling the Magistrate to send a vagrant on second conviction to a work-house if he is able-bodied, or to an alms-house or an infirmary, if he is disabled ;

(*b*) exempting religious mendicants ;

(*c*) allotting a portion of the expenses of working the Act to the Bombay Corporation and other municipalities, the contribution of the former being determined on the same principles on which other municipalities are called upon to contribute towards poor relief from local rates. It is proposed that the cost of maintenance of foreign beggars should be borne by the district from which they hail.

"Under the Ceylon Vagrancy Ordinance, beggars are arrested by the police by whom they are brought before a Magistrate. If the Magistrate declares them to be vagrants, they are taken by the police to the house of detention which is under police control. The vagrants are here sorted and medically examined. Those who are feeble, sick and aged are passed on to the home for vagrants which is in charge of the Salvation Army. Those who are able-bodied are either sent to the tea estates and other places of employment (persons refusing to work being liable to imprisonment), or are made to sign an agreement to leave Ceylon and not to return for five years, and are removed from the island, if they fail to do so. The cost of the upkeep of the home for vagrants is divided

equally between the Colombo Municipal Council and the Ceylon Government. Other towns which send vagrants to the home pay the cost of their vagrants. Priests and pilgrims who are required to gather alms, or who are prohibited from working for their livelihood, by their religion or order or in the performance of any religious vow or obligation, are exempted from the operation of the Ordinance."

5. Following these lines there is practical unanimity (and to this extent only the British Indian Association also concurs) that an infirmary, home or refuge should be established for the disabled poor—the halt, the maimed and the blind, who are prevented by physical disability from earning a living and who are without friends or relatives to support them. Lepers would come within this category (though in their case there are additional reasons for preventing their association with the general community), but their treatment is under separate consideration and is best regarded as a special case.

There is also, seemingly, a general consensus of opinion (though some have dealt with the point in greater detail than others) that arrangements on the lines of industrial schools (either combined with or separate from the infirmary) are required for the reclaiming of beggar children, so that they can be taught some form of labour likely to enable them hereafter to maintain themselves.

As regards the able-bodied loafer, who can work but will not work, there is agreement that he deserves more drastic treatment than he now gets, and the majority would give this in a house of detention or workhouse. The Corporation, looking to the many demands for labour that are available, thinks that (at any rate at first) it would suffice to penalise such men by enhancing the maximum term of imprisonment which may be awarded to them to six months, the theory being, presumably, that in the face of a deterrent punishment they would seek work of their own accord (with such assistance as the prison authorities may be able to give them).

For the aged, respectable poor, the Trades Association would favour an alms-house, but others, though referring, in some instances, to the case of *bhadralok* poverty, have not suggested any specific provision therefor.

6. To meet the cost of any such institution, three sources of revenue are mentioned, namely, grants from the State, contributions from the Corporation and private generosity, and to these recourse is suggested in varying degrees. Thus the British Indian Association would build a refuge by private effort, supplemented by Government, and have it maintained by the Government and the Corporation in equal proportions: the Trades Association regards the construction and up-keep of a refuge and workhouse as an obligation of the State, the Corporation maintaining an alms-house out of the proceeds of a poor rate. The Chamber of Commerce, though not finally committing themselves, seems to favour the Bombay scheme of dividing the cost between Government and the different municipalities concerned; the District Charitable Society advocates the division of the cost between Government and the Corporation, and the latter body, while accepting one-third of the expenditure, would leave the balance to the State, basing their recommendation on the relative proportion of strictly Calcutta poor and those who drift into the city from outside.

7. Such, in brief, is the upshot of the definite proposals which have reached the local Government, and in the opinion of the Governor in Council they point to the conclusion that some action in Calcutta is required; that developments should be effected gradually, making a beginning with the institutions most urgently required and being guided by the experience gained: and that, preferably, whatever the incidence of cost, the agency of management (other than of a workhouse, which seems to be primarily the affair of the police) should not be Governmental. (The Chamber of Commerce would entrust control to the Salvation Army.)

In this view, the Governor in Council would like to see a beginning made with a scheme for (1) an infirmary, and (2) an industrial school (either separately or in conjunction) leaving the rest to wait, and he proposes to appoint a committee to work out practical details on these lines. An appropriate constitution of such a committee would be three members nominated by the Corporation, one member (three in all) nominated each by the

Chamber of Commerce, the Trades Association and the British Indian Association, and three members selected by Government from those interested in philanthropic work. Government might also conveniently nominate a chairman, and the public bodies concerned will now be addressed on these lines.

The recent correspondence will afford a nucleus for the committee's deliberations, although in their further procedure they will be left a free hand.

The terms of reference to them would embrace the elaboration of practical proposals for dealing with the problem of professional mendicancy in Calcutta. While the present resolution may afford them some assistance in their proceedings, they need not consider themselves bound by it or confined within its *primâ facie* conclusions. But in any report submitted the Governor in Council would like to find specific recommendations formulating—

(*a*) the nature of any institutions to be started ;
(*b*) their location, size and probable cost (capital and recurring) ;
(*c*) the incidence of the expenditure involved (including in particular the question of contributions by outside local bodies) ;
(*d*) the agency of control ;
(*e*) the lines of legislation which may be required (if any). (A useful suggestion of the Calcutta Corporation contemplates the punishment of those who employ children to beg and live upon their earnings);
(*f*) the treatment of religious mendicants (though there seems to be general agreement that these should be exempted, notwithstanding the risk of the unscrupulous falsely assuming this garb. The Corporation, on the other hand, think that as the religious mendicant ordinarily begs from house to house, he need not be exempted from any measures aimed at the suppression of street begging).

ORDER.—Ordered that the resolution be published in the *Calcutta Gazette* for general information, and that the different public bodies indicated above be addressed regarding the nomination of members to the committee suggested.

By order of the Governor in Council,

H. L. STEPHENSON,
Offg. Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE SURVEY AND SETTLEMENT REPORTS FOR THE YEAR ENDING 30TH SEPTEMBER, 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Land Revenue.

CALCUTTA, THE 13TH FEBRUARY, 1920.

RESOLUTION—No. 1719L.R.

READ—

The Survey and Settlement Reports for the year ending the 30th September, 1919.

DURING the year under review no new district was brought under survey, but settlement operations were commenced in the district of Nadia. Both the Survey and Settlement Departments continued to work with three parties in accordance with the curtailed programme temporarily adopted as a measure of economy during the war. Steps have, however, been already taken to revert to the full programme with four survey parties in the current year and consequently four settlement parties in the ensuing year.

2. The main programme of the Survey Department lay in the traverse survey of an area of 2,611 square miles in the districts of Bankura, Nadia and Jessore including the riverain areas of the district of Nadia and of the neighbouring portions of Hooghly, Burdwan, Murshidabad and the 24-Parganas down to the Jubilee Bridge at Naihati. One survey party dealt with an area of 777 square miles falling in thanas Gangajalghati, Bankura and Onda in the district of Bankura. Another survey party completed the traverse of 1,185 square miles in Nadia and the diara areas on the river Bhagirathi mentioned above. The third survey party traversed an area of 649 square miles in thanas Maheshpur, Bongaon, Gaihatta and Sarsa in the district of Jessore.

3. Eight hundred and thirty-two thousand one hundred and twenty-six copies of maps were prepared during the year. Satisfactory progress was made in the production of large scale (4") jurisdiction maps in the districts of Noakhali, Tippera and Rajshahi, but the production of small scale jurisdiction maps generally requires acceleration. Progress was also made in the preparation of comparative maps in diara areas. The Survey Department had in hand a substantial programme of miscellaneous surveys and mapping comprising the survey of the Howrah Municipality and of scattered areas in various parts of the Presidency. A special demarcation of the Nadia rivers has been undertaken in connection with recent proposals for watching these rivers and their effect on the river Hooghly.

4. No district kanungoes were sent for training to the Government Survey School near Comilla; but three candidates for such posts received their training in the school. The number of students admitted into the school was 51 against 28 in the preceding year.

5. Major settlement operations were in progress in the districts of Midnapore, Mymensingh, Rajshahi, Tippera, Noakhali, Jessore, Bankura and Nadia. Two settlement parties were fully employed in the districts of Jessore and Bankura; one settlement party was divided between the joint operations in the districts of Tippera and Noakhali and the operations in Nadia; in the remaining districts only the staff necessary for the concluding stages of a settlement was employed. Altogether 2,375 square miles were cadastrally surveyed as against 2,517 in the previous year. Records for 2,024 square miles were attested and final records for 2,098 square miles were prepared, against 1,676 and 3,142 square miles, respectively, in the previous year. Minor

operations were continued in the districts of Howrah, Hooghly, the 24-Parganas, Khulna, Mymensingh, Faridpur and Dinajpur; altogether records for about 31 square miles were finally published in these operations. The total area for which a record-of-rights has now been completed in this Presidency amounts to 32,132 square miles out of an area of about 65,960 square miles to which the Bengal Tenancy Act applies, that is to say, nearly one-half of that area.

6. In Midnapore the arrears of statistics, preparation of 16-inch maps and printing of records were all completed. Good progress was made in the main item of the year's programme which is the last stage of the operations, viz., the disposal of cases; only a comparatively small number of cases is now pending for disposal. The proceedings for the settlement of rents under section 112 of the Bengal Tenancy Act in pargana Silda were confirmed by the Government of India, and the new rents came into effect from the Amli year commencing on the 7th September, 1919. The settlement proceedings in this district are almost complete.

7. The principal items of work remaining in Mymensingh consisted of a few arrears of printing, computation and recovery and case-work. The programme of diara resumption proceedings covered nearly 418 new estates, of which 50 with a total land revenue demand of Rs. 13,082 were completed. With the exception of the balance of this programme the settlement work is practically finished in this district.

8. In the district of Rajshahi, progress in all stages, except that of case-work, was in advance of the programme. In the final stage of case-work the total number of tenancies dealt with under section 105 of the Bengal Tenancy Act was 40,730; the result was an increase of the rent of raiyats by 18 per cent. and of tenure-holders by 34 per cent. A heavy programme of diara resumption proceedings has protracted the final stages into the current settlement year.

9. Performance was well ahead of the programme in Tippera and Noakhali in all the stages subsequent to and including attestation, except in respect of recovery and case-work. The arrears in these two stages are due to the postponement of recovery in Brahmanbaria thana twice on account of floods and economic distress in that subdivision. The total area under resettlement of land revenue was 318 square miles.

10. In Jessore and Bankura, only the intermediate stages of the operations have been reached. The main items of the programme in Bankura were 968 square miles of attestation in the first block and 797 square miles of cadastral survey and field *bujharat* (field-to-field verification of the map and record) in the second block. Attestation was easily completed, but the programme in the second block, which also includes the industrial subdivision of Asansol in the district of Burdwan, was finished only after a severe struggle which told heavily upon the health and energy of the staff. The settlement staff were faced with both difficulties caused by outbreaks of fever and influenza and difficulties in securing labour. Steps were taken to resume all unresumed *ghatwali* lands in the district of Bankura.

11. In Jessore the programme comprised 656 square miles of cadastral survey and preliminary record-writing, 936 square miles of field *bujharat* and 812 square miles of attestation. This included arrears from the previous year. Apart from the notoriously unhealthy climate of the district the main difficulty of the work lay in its bulk; 16½ lakhs of plots were dealt with during field *bujharat* and 6½ lakhs of interests during attestation. In spite of these difficulties the whole programme was completed.

12. Settlement operations were commenced in the district of Nadia and the adjoining riverain areas. In this area too the staff had to combat with sickness. Altogether 953 square miles were surveyed in the year, of which 94 square miles lay on the west bank of the Bhagirathi. The area is remarkable for the large number of tenancies described in the landlords' records as *utbandi*. Preliminary enquiries were made into the incidents of these tenancies, and it was found that they comprised many different grades

and classes, all of which could not be real *utbandi*. The nature of these tenancies will be recorded during attestation in the current year. Government have recently had occasion to deal again with the principles on which such tenancies should be recorded, but they have found no justification for departing from the principles which were adopted in 1917 after much deliberation and consultation with the legal advisers of Government, including the then Advocate-General. The rules based on these principles, it may be observed, inflict no hardship on the landlord who is content to accept along with the conveniences of the *utbandi* system its attendant inconveniences.

13. In Mymensingh, Bankura and Nadia the expenditure was kept well within the sanctioned estimates, but the expenditure exceeded the estimates in other districts. In Midnapore the excess, which is due to the institution of a large number of cases, is more than compensated for by the excess in receipts. In Rajshahi the increase in expenditure was accounted for by the fact that performance was ahead of the programme. In Tippera-Noakhali the work done was also largely in excess of the sanctioned programme; on the total estimate a considerable saving is expected. On the other hand, in Jessore, the numbers of plots and interests were found to be so much in excess of what was anticipated that in this district it is expected that the original estimate for the whole operations will be largely exceeded. A fresh estimate has been called for.

14. Two schemes for the maintenance of records are in operation, viz., one in the Fatehsingh estate belonging to the Nawab Bahadur of Murshidabad and the other introduced during the year in the 10-annas share of the Mathurapur estate in the district of Malda. In both estates the proprietors have been granted the privilege of collecting rents through the medium of the certificate procedure. The expenditure in these operations was within the sanctioned estimates; and the work, except for the unsatisfactory attendance of parties, proceeded smoothly and quickly.

15. The report of the Director of Land Records contains a gratifying account of the steady increase in the popularity of the settlement records and maps. No less than 14 lakhs of copies of *khatians* and nearly 17,000 copies of maps were sold to the public.

16. Mr. C. A. O'Donel held charge of the Bengal Survey Department until Major F. C. Hirst, I.A., returned from military duty and resumed charge of the Department on the 31st March, 1919. Mr. W. H. Nelson, I.C.S., officiated as Director of Land Records till the 5th November, 1918 and Mr. F. A. Sachse, I.C.S., was in charge of the Department for the rest of the year. The Governor in Council has much pleasure in acknowledging the services rendered by these officers. The good work of these officers and of those mentioned in the last two paragraphs of the survey and settlement reports will be noted.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette* and that a copy of it, together with copies of the two reports, be submitted to the Government of India.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Third and Final Report on the Winter Rice Crop of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under winter rice in Bengal has represented some 19·1 per cent. of the total area under rice in British India.)

Character of the Season.—The second forecast issued in December last included a review of weather conditions up to the end of October 1919. The rainfall in the middle of November, though somewhat retarding the harvesting of the early crop, proved beneficial to the late transplanted paddy. The subsequent dry weather has been favourable for harvesting.

Acreage.—The area figures are now returned at 15,606,100 acres, as against 15,551,400 in the second, and 15,895,800 in the final, forecast of last year. The increase of 54,700 acres over the figures of the second forecast is due mainly to the revision of estimates in Midnapore.

Outturn.—From the district returns appended, it will be seen that Bankura, Malda and Bakarganj report more than a normal crop, and Darjeeling a normal one. Sixteen districts report a crop between 92 and 80 per cent., and six between 75 and 67 per cent., while Chittagong Hill Tracts reports as low as 56 per cent.. In Murshidabad, Jessore, Darjeeling, Rajshahi, Bogra, Bakarganj, Chittagong, Noakhali and the Chittagong Hill Tracts, a better crop has been harvested than was expected, when the second forecast was issued; but in Khulna, Hooghly, Howrah, Dinajpur, Jalpaiguri, Pabna and Faridpur the outturn falls below the previous estimates. There has been no change in the remaining districts. On the basis of the above figures, the provincial outturn works out to 89 per cent. of the normal, against 72 per cent. in the final report for the last year.

Accepting 90 per cent. as a fair estimate for the province, the gross yield of cleaned grain from the winter rice crop, on the basis of a normal yield of 12½ mds. per acre, amounts to 128,989,200 cwts., against 105,106,900 cwts. reported in the final forecast of last year. This is equivalent to an increase of about 23 per cent.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA,
The 12th February 1920.

APPENDIX I.

Third and Final Report on the Winter Rice Crop of Bengal, 1919-20.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.		
	Acres.	Acres.	Acres.				
24-Parganas ...	1,041,500	893,200	825,100	83	92	November. Normal.	Slight damage was done to the crop owing to excessive rainfall in the Sadar and Diamond Harbour subdivisions. Want of timely rainfall damaged the crop on high lands in Barasat subdivision. Unusual heavy rainfall in the Basirhat subdivision damaged to some extent the plants in the Sundarbans tracts owing to breaches in the embankments. Hence the outturn is below normal.
Nadia ...	136,600	125,800	130,100	58	67	November to December. Normal.	The increase in area sown is due to the favourable weather at the sowing time. The outturn is much below the normal owing to damage done by drought.
Murshidabad ...	351,400*	336,300	318,700	58	63	November. Normal.	Drought adversely affected the crop. The rainfall in November last, however, improved the situation somewhat.
Jessore ...	568,100	462,300	455,300	67	83	Ditto ...	The cyclone of September caused much damage to the crop in the Narail subdivision. Insect-pests affected the crops in Bongong and Magura subdivisions.
Khulna ...	826,900	734,100	702,900*	85	83	Ditto ...	The outturn has fallen below normal owing to the damage caused by the cyclone.
Burdwan ...	874,800	700,000	736,000	66	75	Middle of November to the beginning of December. Normal.	Insufficient rainfall in the latter part of September and in October considerably reduced the outturn of the late transplanted crop. The weather was not favourable except in Asansol and in parts of the Katwa subdivisions. The rainfall in November did some harm.
Birbhum ...	604,600	601,500	601,500	67	92	Beginning of December. Normal.	The weather was fairly good.
Bankura ...	510,600	520,000	525,000	62·5	125	Second week of November. Normal.	Insufficient rainfall in the latter part of September and in October affected the crop on high lands in parts of the district. Abundant and seasonable rainfall in the earlier months did great good to the crop.
Midnapore ...	1,537,100	1,648,000	1,549,200*	60	83	First week of December. Normal.	Want of rainfall in October adversely affected the growth of crops.
Hooghly ...	276,700	196,800	206,400	75	70	Serampur and Arambag—End of November. Early. Sadar—December. Normal.	Insufficient rainfall affected the crop seriously. The outturn is much below the normal owing to long continued drought.
Howrah ...	126,200	114,400	119,500	79	...	Third week of November. Normal.	Want of rain in the latter part of the season adversely affected the outturn.
Rajshahi ...	697,000	620,000	656,300	53	99	Middle of December. Normal.	The outturn is below normal owing to insufficient rainfall at the sowing time.
Dinajpur ...	1,120,300	1,019,100	1,029,000	57·3	80	Middle of November. Normal.	Owing to the weather being not favourable the outturn is below the normal.
Jalpaiguri ...	564,300*	497,400	417,500	85	75	First week of December. Normal.	The outturn is below the normal owing to unfavourable weather and want of sufficient rainfall at the time of transplantation. Some damage was done to the crop by drought.
Darjeeling ...	65,200	25,900	25,800*	92	100	Ditto ...	The weather was good on the whole.
Rangpur ...	822,300	674,000	600,000	...	75	End of November. Normal.	The outturn is much below normal owing to drought in August.
Bogra ...	303,000	450,000	447,000	44	90	Ditto ...	The weather was favourable up to the third week of October, but continued absence of rain since then has done injury to the late transplanted paddy. On account of low flood paddy on high lands in the eastern part of the district was damaged. The situation improved a little late in the season.
Pabna ...	566,000	520,000	532,500	50	...	First week of November. Normal.	Some damage was done by flood and the subsequent sudden falling down of water.
Malda ...	396,200	220,000	303,000	60	117	Latter part of November. Normal.	The weather was favourable on the whole, though in some places crop suffered a little for want of rain in the latter part of October. More than normal outturn is expected.

* Revised.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		The date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.		
	Acres.	Acres.	Acres.				
Dacca ...	647,900	649,000	655,300	75	85	Beginning of November. Normal.	Owing to favourable weather the outturn would have reached 110 per cent. but for the damage to the extent of 25 per cent. caused by the cyclone of the 24th September last.
Mymensingh ...	1,196,700	969,700	969,700	75	92	Latter part of November. Normal.	The weather was generally favourable. The outturn is below the normal owing to cyclone and want of rain in some parts of the district.
Faridpur ...	770,100	740,000	754,700	69	68	Middle of November. Normal.	Considerable damage was done by cyclone which accounts for the estimated outturn to fall below the normal.
Bakarganj ...	1,900,000	1,340,000	1,342,500	120	125	November and December. Normal.	The weather was on the whole good.
Chittagong ...	418,400	426,100	420,600	95	92	Ditto ...	The outturn is below the normal owing to insufficient rainfall in October. The rainfall in November, however, improved the late crop.
Tippera ...	724,800	780,800	806,500	60	92	November. Normal.	Slight damage was, however, done to the crop by the cyclone of September causing the outturn to fall below the normal.
Noakhali ...	610,000	600,000	600,000	65	85	Ditto ...	The rainfall in November did some good to the crop. Some damage was caused by *ufra* disease.
Chittagong Hill Tracts.	47,500	41,600	46,000	100	96	.....	The outturn was much affected for want of sufficient rainfall, specially in the month of November last.
Total Bengal ...	16,862,700	15,895,800	15,606,100*	72	89		

* Revised.

APPENDIX II.

Abstract Statement of the Estimated Acreage and Outturn of the Winter Rice Crop of Bengal, 1919-20.

Province.	Area (in acres).				Percentage by which column 2 exceeds (+), or is less than (−), area in—		Yield (in cwt.).				Percentage by which column exceeds (+), or is less than (−), yield in—	
	Of current year's crop (1919-20).	Of previous year's crop (1918-19).	Average of preceding—		Column 3.	Column 4.	Estimated yield of current year, i.e., of area in column 2.	Yield of previous year, i.e., of area in column 3.	Average of preceding—		Column 8.	Column 9.
			Five years.	Ten years.	Five years.	Ten years.			Five years.	Ten years.	Five years.	Ten years.

J. C. ROY,
for Director of Agriculture, Bengal.

DACCA;
The 13th February 1920.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 5th February 1920.

Summary.—Light to moderate rain was general over the Province. It has greatly benefited the standing crops and facilitated the preparatory tillage for jute and other autumn crops in Eastern Bengal. Transplantation of summer paddy and harvesting of sugarcane, potatoes and early oilseeds are in progress. The average price of common rice has risen by 1·75 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

NOTIFICATION.

No. 484M.—The 24th February 1920.—The following papers are published for general information :—

(1) Report of the Committee appointed to enquire into land values and rents in Calcutta, and

(2) Letter No. 200R.C., dated the 21st February 1920, from the Hon'ble Raja Reshee Kesh Law, C.I.E., Rai Saheb Ramdeo Chokani, Mr. A. D. Pickford, the Revd. A. Gille, S.J., Mr. J. H. Rundlett, Rai P. N. Mukharji Bahadur, Mr. F. C. French, C.S.I., I.C.S., Mr. A. deBois Shrosbree, Mr. J. A. Woodhead, I.C.S., and Mr. J. F. Graham, I.C.S.

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

REPORT OF THE COMMITTEE APPOINTED TO ENQUIRE INTO LAND VALUES AND RENTS IN CALCUTTA.

SUMMARY.

We present herewith our report. We were instructed—

(1) to enquire into the remarkable enhancement in land values and house rents which has recently occurred in Calcutta;

(2) to investigate the causes;

(3) to define its extent and degree;

(4) to examine the charge of profiteering against landlords, and

(5) to suggest remedies if we considered it practicable to control or limit the rise in rents.

The report deals specifically with each of the above points, but it may be stated generally—

(1) that we have been able to obtain comparatively little help by way of direct evidence;

(2) that the rise in values and rents must be considered to be at least in part permanent, due to the readjustment in values consequent on the war;

(3) that the greater rise is post-war in date;

(4) that the only real remedy will be found in the immediate provision of additional housing accommodation, which necessitates the provision of new building sites forthwith;

(5) that some temporary measure to deal with cases of hardship is desirable, and we propose the creation of an authority with power to extend the period of a notice to quit up to one year.

CHAPTER I.

General.

Appointment of the Committee and terms of reference.

1. The Committee was appointed by the Governor in Council by Resolution No. 3554 M., dated the 30th September 1919. This resolution is reproduced below:—

"At the meeting of the Bengal Legislative Council held on the 3rd September 1919, the Hon'ble Mr. W. H. Phelps moved that the Governor in Council be recommended to appoint a Commission to enquire into the causes of excessive land values and high rents in Calcutta, and, if possible, to suggest remedies." The resolution was accepted by Government and duly carried. The Governor in Council has accordingly directed that a Committee, representative of the various interests involved, should be appointed to enquire into the remarkable enhancement in land values and house rents which has recently occurred in Calcutta.

He desires that the causes of this enhancement may be investigated and its extent and degree defined; that the charge of "profiteering" made against landlords should be examined, and that, if in the opinion of the Committee it is desirable and practicable to control or limit the rise in rents, definite proposals in this behalf may be submitted for the consideration of Government at an early date.

Constitution of the Committee.

2. The Committee was composed of the following members:—

(1) The Hon'ble Mr. W. E. Crum, O.B.E., *Chairman.*
(2) F. C. French, Esq., C.S.I., I.C.S.
(3) The Hon'ble Raja Reshee Kesh Law, C.I.E.
(4) The Hon'ble Mr. Abdur Rahim.
(5) Revd. A. Gille, S.J.
(6) The Hon'ble Mr. W. H. Phelps.
(7) A. de Bois Shrosbree, Esq.
(8) Rai P. N. Mukharji Bahadur.
(9) Rai Sahib Ramdeo Chokani.
(10) J. H. Rundlett, Esq.
(11) A. D. Pickford, Esq.
(12) R. C. Bonnerjee, Esq., Barrister-at-Law.
(13) J. F. Graham, Esq., I.C.S.
(14) J. A. Woodhead, Esq., I.C.S., *Secretary.*

Procedure.

3. In November last we published an advertisement in the principal English and Indian newspapers (English and vernacular) inviting all persons desirous of giving evidence to communicate with the Secretary, from whom a form giving details of the main points on which information was required could be obtained. The advertisement is reproduced in Appendix I. We also drew up a form for distribution to tenants, asking for information as regards the increase in rents. These forms were supplied to all persons, who applied, and were also distributed by members of the Committee and local gentlemen. One thousand and ten of these forms were issued, but only 230 forms were returned duly filled in. This form is reproduced in Appendix II. Letters were at the same time addressed to the Calcutta Corporation, to the Commissioners for the Port of Calcutta, to the Commissioners of the Howrah and Suburban Municipalities, to representative public associations and to prominent landlords, requesting them to favour us with their opinions, and to state whether they or their representatives would be willing to give oral evidence before the Committee. This letter is reproduced in Appendix III; 367 copies of it were issued. We received written opinions from only 13 public bodies and associations and 33 private persons; 19 persons expressed their willingness to give oral evidence and we examined 10 witnesses. We held 18 meetings.

We wish to acknowledge our indebtedness to all those who have assisted us by furnishing us with written opinions or by giving evidence before us.

We desire to record our appreciation of the services of Mr. J. A. Woodhead, a member of the Committee who, in addition to his ordinary duties, acted as Secretary. In connection with the preparation of matter, the drafting of the report and in other ways Mr. Woodhead gave us very great assistance.

CHAPTER II.

The causes of the recent remarkable rise in land values and rents.

General.

1. We are agreed that there has been a recent and remarkable rise in land values and rents in and around Calcutta and that the majority of the abnormal cases have taken place during the latter half of the year 1919. The rise has been preceded by an increase, which except for occasional halts due to exceptional causes, has been gradual and persistent over a long period of years. A similar rise has been experienced at about the same time in other

cities in India. The papers which we have obtained from Rangoon disclose the interesting fact that a rise very similar to the one with which we are dealing manifested itself in that city from about May 1919. Public attention has also been drawn to the recent increase in rents in the city of Madras. The situation in Bombay is indicated by the extension of the Bombay Rent Acts for a further period of two years. In England the Rent Act of 1915, purely a war measure passed for the duration of the war and six months after, has been extended to the year 1921, and dwelling-houses of a higher rental value have been brought under legislative control.

The character of the main causes.

2. We consider the main causes of the rise are exceptional, not purely local in character, and beyond the general causes referred to in the next paragraph.

Causes of the general rise in the past.

3. The causes which have operated in past years to produce a general rise—a rise so continuous as to warrant the theory of a 5 per cent. rise yearly in the value of land being frequently accepted as a standard by persons dealing in and valuing land—are, we believe, well known. They may be summarized as follows—a city growing in wealth and in health, and prevented from expanding beyond certain narrow and well-defined limits by the unhealthy character of the areas outside those limits, combined with a total lack of rapid and cheap communications. In the suburban municipalities malaria is prevalent, drainage is defective, the water-supply is inadequate, roads are few and bad, and the means of rapid communication with the centre of the city is for the greater part entirely absent. These disadvantages have almost entirely prevented a growing population from spreading out over the cheaper lands of the suburbs, with the inevitable result that the increased demand for buildings and land within the city has caused a gradual and continuous increase in the value of property, attended as it must be by an increase in rent. Further, the superior healthiness and attractions of the city, as compared with many of the mofussil districts, have led to immigration of the richer and leisured classes. We believe this immigration has also played a part in the increased demand for landed property within the city boundaries. The innate unwillingness of certain classes of the population to leave the area, in which their ancestors have lived for generations, and the immobility of certain classes of the population, while perhaps not major factors affecting the whole city, have undoubtedly contributed to high prices for landed property and high rents in the northern sections.

Fortunes made during the war.

4. We now deal with the causes which acting upon the conditions briefly sketched in the last paragraph have resulted in the recent remarkable rise in land values and rents. Sections of the commercial population of Calcutta have amassed very large fortunes during the war, and during the years 1918 and 1919, particularly the latter, have invested very largely in landed property. Apparently many people are able to pay prices, on which the rents even after development cannot give an adequate return. Past history has proved that prices paid for land in Calcutta, which at the time were considered to be of a speculative character, have soon been overtaken by the market, and the so-called speculative buyer within a comparatively short period of years has been able to sell at a profit. This historical fact is well known to the persons who are now paying what appear to be high speculative prices; and this, combined with the large amount of free money and the indications of a commercial boom in Calcutta, has no doubt led to the payment of very high prices. The desire to invest in landed property has also an accumulative effect; the contagion spreads, and instead of the high prices being limited to property, which is capable of increasing very greatly in value in the near future, speculative prices are paid for any property coming on the market irrespective of its possibilities.

Commercial activity.

5. Another cause which appears prominently in the opinions we have received, and to which we also attach considerable importance, is the "commercial boom" in Calcutta after the armistice. Since the close of the war there has been considerable commercial activity in Calcutta and its neighbourhood. Several English firms have decided to open works in or

near Calcutta and the market has been flooded with company flotations. This has led to a sudden and largely increased demand for office property and land suitable for the erection of manufacturing plant, with the natural result of a sudden increase in the price of such property and land. This industrial activity has probably not only affected the price of land and property of this description but has, by leading people to believe that land in Calcutta will appreciate greatly in value during the next few years, been one of the causes which have resulted in a general increase.

Increase in population.

6. We are advised that the population of Calcutta has probably increased considerably during the last few years, and particularly since the armistice. The industrial activity mentioned in the last paragraph must have been accompanied by an increase in the population. It is probable too that the fortunes made by certain classes of the commercial community during the war have attracted to Calcutta other members of those classes. The number of Japanese residents has increased to a considerable extent consequent on the increased volume of trade between India and Japan arising out of the war. Since the armistice there has, we believe, been a considerable influx of Europeans owing to the return of a number of former residents who left to serve with the forces, to the recruitment of the European staff for the new commercial ventures, and to the resumption of recruiting in old established firms. This increase in population has not, however, been accompanied by any corresponding increase in building operations. During the five years 1909-10 to 1913-14, 1,702 masonry buildings were sanctioned by the Calcutta Corporation, whereas, during the five years 1914-15 to 1918-19, practically the five years of the war, the number sanctioned was 1,628. Further, during these years, 1914-19, the Calcutta Improvement Trust demolished 643 masonry houses. During the war building operations were reduced to a minimum largely owing to the difficulty of obtaining certain materials and to their prohibitive price. It is, therefore, we think, evident that during the war the increase in the number of buildings was far below the normal pre-war average. In Calcutta the number of buildings has never been greatly in excess of the demand and the supply is now far short of the demand; a fact only too apparent to everybody who has been under the necessity of seeking accommodation. In the circumstances a sudden rise in the value of property and rents is not only not surprising but is inevitable.

The increase in the cost of building.

7. The increased cost of building has also been suggested as one of the causes. It is still 50 per cent. higher than the pre-war figure, and appears to be likely to be permanent for some time to come. This must affect the price of property in the very much freer market which has existed since the termination of hostilities. The increased cost of repairs may also have had some effect on the rise in rents, but it is doubtful whether it has warranted any large increase in rent. If 10 per cent. of the rent be taken as a reasonable allowance for repairs, a 50 per cent. rise in the cost of repairs would only warrant a 5 per cent. rise in the rent. But the increase in rent has frequently been very much greater than this figure, and hence we are of opinion that the increase in the cost of repairs has only been one of the contributory minor causes.

Delay in the development of the suburbs by the Improvement Trust.

8. A number of the opinions we have received emphasize the view that, if the Calcutta Improvement Trust had devloped the suburbs, either before or in conjunction with the scheme for the improvement of the city itself, the recent remarkable rise in land values and rents would have been very much less pronounced. We are in entire agreement with this view. At the same time it has been pointed out to us that the Board of Trustees for the Improvement of Calcutta were unable to carry through schemes for the development of the suburbs owing to causes beyond their control. So long ago as 1912, less than one year after the passing of the Calcutta Improvement Act, the Board of Trustees decided upon the development of Maniktala in order to provide for the expansion of the city. In May 1913 the Trustees applied to Government for the extension of the Act to the suburban municipalities. Government, acting on the opinion of the Advocate-General, replied that the proposed general extension was of doubtful legality. The Trustees then applied for the extension of the Act to the Maniktala Municipality, and

this was effected in February 1915. The Advocate-General had, in the meanwhile, given a second opinion to the effect, that the Trustees could not undertake drainage operations affecting the whole municipality in order to render an improvement scheme for a particular area effective. The Trust again approached the Government, who replied that the amendment of the Act was under consideration. Further correspondence ensued, and in December 1916 Government expressed the opinion, that as the drainage scheme for Manicktola was not directly connected with any improvement scheme in Calcutta it was not possible for the Trust to proceed with the execution of the scheme under the existing law. The Trust, however, decided to proceed with the preparation of an improvement scheme for Maniktala. This was submitted in June 1918 to Government, who in April 1919 sanctioned it, stating that, on a further examination of the question, they accepted the view that the Trust could undertake schemes in the suburbs, although such schemes were not connected with particular improvement schemes in Calcutta.

Sale of surplus land by auction

9. The practice of the Calcutta Improvement Trust and the Calcutta Corporation of selling their surplus lands by auction has been severely criticised by many persons, who have suggested that it has been one of the main causes of the recent abnormal increase in land values and rents. We do not altogether agree with this view, but we are of opinion that it has been a contributory cause in so far as it has demonstrated the great possibilities of land development in Calcutta. It has proved that, if land is developed and put to its best possible use, its value is greatly increased, and it has, in consequence, induced investors to pay higher prices for land, which although undeveloped is yet capable of development. Some statistics relating to the disposal of land by the Improvement Trust have been furnished to us. Hitherto surplus land covering an area of about 468 bighas has been disposed of in connection with the various schemes. Of this area 78 bighas or about 18 per cent. have been sold by auction, the remainder having been disposed of by one or other of the following means:—

(1) exemption, or sale at an agreed price to exempted owners of adjoining land;

(2) sale at an agreed price in exercise of the right of pre-emption;

(3) sale at special concession rates for re-instatement of owners dishoused by the operations of the Trust;

(4) sale by private treaty.

Of the 78 bighas sold by auction 45 bighas belonged to the first two schemes executed by the Trust. At that time owners hesitated to apply for exemption or pre-emption, as they were doubtful as to the fairness of the exemption fees or pre-emption prices. How opinion on this point has changed is illustrated by the Bhowanipore Improvement scheme, where up to date 221 bighas have been disposed of, of which only 3 bighas were sold by auction. We are informed that it is unlikely in future that so much as 5 per cent. of the surplus land will remain for disposal in the open market by the Improvement Trust, because at the present time exemption or the right of pre-emption is almost invariably claimed. Moreover, in cases where such claims are not substantiated it is the policy of the Trust to use the land—if suitable for rehousing persons displaced by the Trust—for purposes of re-instatement. We agree in the view that the auction system, even with its admitted disadvantages, is the only safe course which the Improvement Trust or the Calcutta Corporation can follow for the disposal of such land as remains for sale in the open market.

General increase in prices.

10. We are of opinion that the increase in the price of all articles of ordinary consumption, or, to express it in another manner, the depreciation in the purchasing power of money, has contributed to the rise in land values and rents. The index numbers of retail food prices as given by the Director of Statistics show that there has been a marked increase in the cost of living as compared with the period before the war, and further that the termination of hostilities instead of producing a fall in the prices of articles of food was

followed by a considerable further increase. The index numbers of retail food prices are quoted below:—

Port.	At the end of					
	July 1914 (pre-war level.)	August 1917.	August 1918.	September 1918.	August 1919.	September 1919.
Bombay ...	100	119	148	164	197	193
Madras ...	100	111	128	145*	174	179
Karachi ...	100	121	143	143	181	173
Calcutta ...	100	119	124	131	151	154
Rangoon ...	100	102	124	132	149	142
Average (unweighted) ...	100	114	133	143	170	168

* Relates to December 1918.

It would be easy to advance theories of doubtful soundness in regard to this point, but when the prices of the necessaries of life are found to have increased 54 per cent. in the last five years, and it is seen that people generally have to pay more for everything than formerly, the temptation to the landowner to adjust his income to his increased cost of living is no doubt a factor in his mind when fixing rents.

CHAPTER III.

The degree and extent of the rise in land values and rents.

The extent of the increase in land values.

1. We find as a fact that there is evidence of a considerable rise in the market price of land throughout the city and the suburbs, and that the rise has been specially marked in the commercial area, in the southern part of the city, and in the suburbs. The year 1918 experienced a considerable increase in the price of property in the Burra Bazar portion of the city, and this continued into the year 1919, when prices still higher were paid. In the remaining commercial portion of the town, the southern portion, and the suburbs signs of rising prices appeared shortly after the armistice, and during the year 1919 a large amount of property changed hands at prices considerably in excess of those prevailing in the years 1916 to 1918. The rise in values is clearly indicated by sale prices as well as by the demand for the Port Commissioners' land in Howrah and Kidderpore at rents twice or three times those demanded but not always obtained before the armistice.

The degree of the rise in land values.

2. It is impossible to give exact figures representing this remarkable rise, as sales vary considerably and the same or similar properties have been sold at divergent figures at short intervals. A rise of 50 per cent. is not uncommon, and in many cases the rise has been 100 per cent. and over. The rise has been particularly remarkable in the suburbs, where in some instances prices in 1919 were double or treble those prevailing in the years 1916-18.

Speculative prices.

3. In this connection we would point out that a certain amount of property has changed hands at obviously speculative prices in excess of the value which even the most optimistic views of development and demand would justify.

The collection of rent statistics.

4. In coming to a conclusion as to the degree and extent of the rise in rent we have been met by the difficulty of obtaining reliable statistics on which to base an opinion. We have already outlined the steps taken to obtain all possible information, and have pointed out that of over 1,000 forms distributed to tenants less than 250 have been returned. Most of the forms returned have been received from European and Anglo-Indian tenants living in the area between Park Street and Bow Bazar. A certain number has also been received from the southern portion of the town beyond Park

Street and from the commercial quarter, but very few relate to the northern residential quarter. The offer of the Committeee to treat replies as confidential appears to have had no effect. We think it probable that a large number of tenants has been unwilling to complain owing to the fear that complaints would be followed by the landlords taking steps to eject them. It has been definitely stated that this was the case in Bombay and Rangoon. Similarly we have stated our method of approaching landlords and public bodies and associations, on which landlords are well represented, and have pointed out that while the majority of public bodies and associations have favoured us with written opinions, only 33 opinions have been received from private individuals.

The collection of rent statistics.

5. We carefully considered the advisability and feasibility of obtaining figures by other means, but came to the conclusion that with the time at our disposal and the staff which we could employ, it would be impossible to obtain further reliable information. All expert opinion agrees in the view that the collection of figures on any large scale would require legal sanction and a specially trained and well-paid staff for a considerable period. The position is complicated by the fact that a very large number of tenants, through fear of ejectment, are unwilling to state the actual rent paid, and if pressed to do so are very liable to give incorrect figures. We have been struck during our enquiry by the fact that in spite of the publicity given to the subject there has been little response on the part of those interested or attempt to assist the Committee with definite information. In coming to a decision, therefore, we decided to rely upon the figures which we obtained in response to advertisements, and the forms distributed, and on the opinion of public bodies and private individuals, together with the opinions of our own members.

Conclusion as to the rise in rent

6. Our conclusion is that there is sufficient evidence to show that there has been a considerable general rise in rent throughout Calcutta, though different portions of the town have been affected in different degrees. In the northern residential part there is very little evidence to show that there has been an abnormal rise; in the southern and commercial portions of the town the rise appears to have been distinctly abnormal and in a considerable number of cases remarkable, the Anglo-Indian community being perhaps the worst sufferers.

CHAPTER IV.

Profiteering by Landlords.

We have been asked to examine the charge of profiteering by landlords. We have given this subject our very careful consideration, but have been unable to arrive at a satisfactory definition of the word "profiteering." In these circumstances we are not in a position to express an opinion on the general charge of profiteering by landlords. We may point out that under the provision of the existing law in India, increment in land value is the property of the land-owners. At the same time we would add that while unable to express an opinion on this question, many instances have been brought to our notice in which the existing dearth of accommodation has been used as a means of "squeezing" tenants unduly.

CHAPTER V.

Remedies of direct effect.

General.

1. We are of opinion that the only permanent solution of the problem of inflated land values and high rents lies in (*a*) the rapid development of the suburbs, (*b*) the improvement of communications and the means of transport within the city proper and between the city and its suburbs. Other

measures, which have for their object the modification of the effect of the law of supply and demand, may bring temporary relief, but they will only serve to perpetuate and render more acute the present unsatisfactory conditions, unless they are accompanied by drastic action designed to provide at the earliest possible moment large areas of land, ready for an ever-increasing population. At the very outset, therefore, of this portion of our report we wish to lay the greatest possible stress upon what we believe to be the true remedy, namely, the provision of more accommodation. The benefits to be derived from the measures, which we shall recommend for the permanent solution of the present problem, will not however accrue immediately; some time must elapse between the inception of these measures and the relief which they will bring. Hence we suggest that, in order to relieve the hardship which is undoubtedly being experienced, direct and immediate action should be taken, which, while not interfering further than is absolutely necessary with the ordinary law of supply and demand or with the erection of new buildings, will yet afford relief during the period which will elapse before the radical remedies can take effect.

A Rent Act inadvisable.

2. We are not of opinion that the enactment of a Rent Act on the lines of legislation in England, Bombay and Rangoon is advisable. Experience shows that as soon as attempts are made to control economic laws, it is impossible to restrict interference to a particular point. Even a minimum of control tends to produce conditions which create a demand for extensions not only in degree but in directions previously unthought of, until private enterprise in relation to the controlled article entirely disappears. Such control has been exercised in several countries during the war, but has been followed by the Government being obliged to go far beyond the fixing of maximum prices. They have been compelled to take charge of the entire available stocks of foodstuffs, to arrange for the purchase of supplies and for their distribution. The control of rents in England has been accompanied by Government undertaking on a very extensive scale, through municipal and local bodies, the erection of houses out of public funds. We cannot contemplate that Government or local bodies would be prepared to erect houses for the general public in Calcutta, and we regard this almost as a corollary of any proposal for a Rent Act.

The effect of a Rent Act on building operations.

3. It has been suggested that a Rent Act which is applicable to new property, as well as to old, by preventing the house-owner from reaping all the benefit that he otherwise would, must interfere greatly with building operations—the very remedy which offers a permanent solution. We are in agreement with this view. Further, we are not satisfied that the exclusion of new buildings in accordance with the provisions of the latest English Act would have the effect of removing this objection. We have direct evidence that landlords would be deterred from building by the fear that similar control would be extended within a short time to such buildings.

Standard rents.

4. We are also impressed by the difficulty of fixing "standard rents," a necessary feature of any Rent Act, and whatever standard may be fixed, either by the Act itself or by the decisions of a Rent Controller, there is a danger that the rents of all houses in Calcutta may be raised to that degree.

Proposed legislation.

5. For these reasons we are opposed to a Rent Act if a measure on the following lines can be passed. We suggest that an Act should be passed immediately, appointing an authority to whom all parties under notice to quit and admitting their liability to ejectment could apply for an extension of the date by which they will have to vacate, or an extension of the period of the notice to quit. The Act should have retrospective effect to the date of this report. Under the present law a tenant who has no lease is entitled to 15 or 30 days' notice. So long as the present scarcity of houses continues, this short period allowed by the law for the vacation of premises causes great hardship to those who are ejected unconditionally or who cannot afford to pay the higher rent demanded. The constitution of an authority, other than the ordinary courts, which could grant time to those tenants who admit that they are by the ordinary law due to leave the premises, would give considerable relief to a large number of persons. The proceedings before the

authority should be of a summary character. We would give this authority power to grant an extension up to one year, subject to the following right of appeal. No appeal should lie against the decision of this authority, unless the time granted be over six months, when the landlord should have the right of appeal to the courts.

We recommend that—

(*a*) the Act should apply to all property except property under construction at the time of, or built after, the passing of the Act;

(*b*) the Act should operate in the first instance for a period of three years, but should contain a provision empowering the Governor in Council to extend it by notification for a further period of two years;

(*c*) the Act should extend to the areas falling within the boundaries of the Calcutta Corporation, the municipalities of Howrah, Maniktala, Cossipore-Chitpur, Tollygunge, Garden Reach, and the South Suburban Municipality.

CHAPTER VI.

Remedies of indirect effect.

General.

1. There is one point in connection with our enquiry in respect of which there is absolute unanimity, namely, the necessity of immediate steps being taken to provide for further housing accommodation. In practically every case it was urged by witnesses as well as by those who favoured us with written opinions, that action should be taken forthwith to open up the suburbs, and to provide healthy lands for building at the earliest possible date. The reason for this is obvious. At present Calcutta is largely in the position of an island, owing to the unhealthiness of the surrounding districts, and few people, unless they are forced to do so, will take the risk of disease and death which residence in the undrained and malarious area makes all too real. The necessity of suburban development has been urged by every competent authority for the last generation, and when the Improvement Trust came into existence after years of delay, it was thought that they were provided with ample powers and funds to deal with this vital work; but it has taken seven years more to ascertain that the Act authorizes them to carry out independent suburban development schemes.

Suburban development.

2. We reiterate our opinion that if it had been possible to push forward the work of suburban development at the beginning of the Trust operations, the present state of affairs would probably not have occurred. As it is we think that steps ought to be taken at once to overtake arrears and to provide for the future, and we regard the action that we recommend under this head as the most important and the most urgent of our proposals.

The Development Board.

3. The main point from all aspects is the early opening up of suburban lands so as to provide reasonably healthy sites for building. A Town Planning Act, the enactment of which we advocate in a later portion of our report, must operate slowly; such an Act cannot give immediate relief, because it must provide for a lengthy procedure preparatory to the commencement of the actual work of development, and the passage of any scheme through the stages preceding actual execution must necessarily take considerable time. Further, the very novelty of the principles underlying an Act based upon the pooling system, combined with the fact that such an Act largely depends upon the co-operation of owners with the local authority, would at the outset render progress slow. The Trustees for the Improvement of Calcutta have the power to undertake schemes for the provision of building sites, but here again the commencement of work upon the ground is delayed by provisions in the Improvement Act similar to those in Town Planning Acts. We therefore consider that powers more drastic than those given by the Calcutta Improvement Act or a Town Planning Act are absolutely necessary, if any measure of immediate relief is to be obtained. We suggest that a body, which hereafter is referred to as

the "Development Board," should be created for the purpose of carrying out schemes for the provision of building sites, and that this authority should be untrammelled by the provisions already referred to. We would particularly urge that schemes initiated by this authority should not be subjected to the delay which is inevitable if they are published for criticism. It is also essential to success that the owners should not be given rights of exemption and pre-emption. We are aware that these rights are extremely popular, but we consider that the great urgency of obtaining immediate relief warrants some sacrifice of private rights for the general good. We would point out that the land to be dealt with by this authority will be for the most part sparsely populated and is at present used largely for garden and agricultural purposes, and that arguments for permitting exemption and pre-emption, which have considerable force in the case of residential property, do not apply to the circumstances under consideration. Further, the owners would receive the statutory allowance of 15 per cent. under the Land Acquisition Act.

Land which should be acquired for building sites by the Development Board.

4. Assuming that the Development Board is to be the authority for acquiring the land which we hold to be essential for the relief of the present situation, the next question that arises is where this land is to be and in what quantities should it be acquired. We think that if the remedy is to be effective, it is necessary that the areas should be chosen in and around the whole of the suburbs, and outside as well as within the present municipal boundary. We are not in a position to say what the actual areas should be, but we think that it is necessary for acquisition to be on a scale large enough to permit of the creation of more or less self-contained suburbs. This would probably mean in practice areas each approaching a thousand bighas or say half a square mile in extent. We propose that they should be chosen largely from the point of view of convenience of communications, particularly as they are intended for immediate occupation. We may, perhaps, without committing ourselves to any definite recommendations as regards locality, suggest that areas in Tollygunge, Ballygunge, Tiljala, the eastern half of Cossipore-Chitpur, Dum Dum, Howrah, and near to the more adjacent suburban stations on the railways serving Calcutta would all appear to be suitable for such operations.

Development of land by the Development Board.

5. It may be urged that before any of these lands can be of use in helping to solve the present difficulties, it would be necessary to drain them, and to provide sewerage schemes and water-supply. In part this is no doubt true, but we think it should be considered whether it is not possible to devise a temporary compromise between complete drainage and no drainage at all, and say some method of water-supply by means of artesian wells, so as to enable building operations to commence on the lands selected practically forthwith. What we have in mind is that the developing authority which acquires the lands should at once devise a lay-out for them, providing amply for open spaces and for main road communications in the future. The areas should then be staked out on this plan, and temporary surface drainage provided. At the same time some system of water-supply and of simple sewerage disposal should be installed, and then as much land as there was a demand for placed upon the market under suitable restrictions. These should provide stringently for the erection of buildings within a fixed period and for re-entry in case of default, and also should impose some limits as to the class of buildings which may be erected on each plot: otherwise the amenities of the whole could be imperilled by the action of one purchaser, who might erect a factory or some other unsuitable building if the lands were sold without restriction. The main point in this connection, however, is that the lands should be offered in such quantity as to satisfy the genuine demand for land on which houses can be erected, and this is the only limit, apart from financial considerations, which we would place on the amount of land that is to be acquired and offered.

Finance.

6. It has been repeatedly proved by experience that areas of land in Calcutta can be acquired and developed by a local authority at a gross profit. The main reason for this is that the subdivision of property is usually conducted in a manner most unsuitable from the point of view of building purposes. In the comparatively few cases in which large areas have been

held in one ownership their development has, we believe, always resulted in a substantial profit. We are convinced that the operations of the Development Board will in the same way pay for themselves in the end. We accordingly suggest that the Board should not be given any sources of income from taxation, but that it should be empowered to raise capital by means of loans. We cannot estimate the capital requirements of such a body; they must be large and might eventually amount to 2 crores of rupees. We think that this sum could be raised, particularly if a campaign were organised to that end. Interest on the loan should be guaranteed by Government, the Calcutta Corporation and the Calcutta Improvement Trust in equal shares, and the sinking fund could be suspended for the first five years. It is anticipated that by the end of that time the Board would be in a position to meet all loan charges from its own funds. The Board would also have some income almost from the outset, as it would be able to lease during development some of the land acquired to the previous owners or to other persons. Building plots would be put on the market as quickly as possible, and from the proceeds the Board would obtain funds for the payment of interest, for the development of fresh areas, and ultimately for the re-payment of capital.

Acquisition of land for building societies.

7. Another measure we recommend and to which we attach great importance is that Government should, under the provisions of the Land Acquisition Act, acquire land for bodies formed definitely for the provision of housing accommodation. This should be done on the recommendation of the Development Board, to whom all applications would be made. The only conditions we would impose would be—(*i*) the building society should guarantee the erection of a certain number of houses within fixed periods, and (*ii*) the reservation to Government of the right of re-entry on undeveloped land in case of default. Joint action between the Development Board and building societies would, of course, be possible.

Proposals for a co-ordinating authority.

8. Several witnesses have laid great stress upon the necessity of the co-ordination of public bodies dealing with questions affecting communications and development, and the provision of some authority that will ensure that their proposals will be considered in the light of all the requirements of the future. We are in entire agreement with this view. The obstruction of the outlets leading to the suburbs at the northern and southern ends of the city by large railway yards is an example of the harm which can be caused by the absence of any co-ordinating authority. We are informed that at the present and for some time past a conference of public authorities, whose operations affect the city and its development, has been meeting monthly in Calcutta. This conference meets under the presidency of the Secretary to the Government in the Public Works Department and comprises representatives of the Railways, the Corporation, the Improvement Trust, the Port Commissioners, and the Suburban Municipalities. Although the proceedings of this body have been informal and attendance at it has been optional, it has, we understand, had a good effect in permitting the criticism of schemes at a stage which enables modifications to be made where such seem to be desirable in the general interest. It appears to us that this body should be given statutory recognition, should meet at stated intervals, and should have the power to require all schemes to be brought to its notice and to make recommendations to Government.

Town Planning Act.

9. We understand that a Town Planning Act is under contemplation for Calcutta and its environs, and that such a measure would provide for the allocation of areas for particular purposes. We consider that such an Act properly administered would tend to the permanent solution of the housing problem, and we hope that it may be passed into law at an early date.

Other ameliorative measures.

10. In addition to the main recommendations there is a number of ameliorative measures which would assist in some degree in the solution of the present difficulties, and would tend to prevent a similar state of affairs from arising in the future. We propose to mention these, together with the line of action which we think should be taken in regard to each.

Development inside the city proper.

11. It was brought to our notice that if the whole of the building lands within the city were fully developed, the amount of housing accommodation would be very considerably increased, even if allowance were made for a more generous provision of open spaces and roads. It was also suggested before us that there should be an increase of taxation on open lands, vacant spaces, and compounds within the more central areas. We doubt the wisdom of any attempt to force owners by penal taxation to cover such open spaces, while the provisions of the existing law are not fully utilised to that end. So long as residential houses receive in practice low valuation assessments, whatever may be the desirability from other points of view, one of the normal spurs to economic development and user is removed.

Open lands in the central areas.

12. We think that the case of Government land calls for special consideration, particularly at the present time. We recommend to the serious attention of Government the desirability for a survey of the land in their hands, so that the possibility of utilising land such as that at Porabagan for buildings for their own servants or for offices may be fully considered. The question of the proper utilisation of the Strand Bank lands by the Port Commissioners is also a matter of great importance.

Housing of employés.

13. If houses were provided for Government servants a certain measure of relief would be afforded to the present situation. This responsibility does not rest with Government alone. Certain firms have already begun to take steps for the housing of their assistants, and we think that this example should be widely followed. It is beyond contention that in this country the rise in salaries has been far less than in nearly all other parts of the world, and if the cost of living remains at a new level corresponding adjustments will have to be made to meet the situation. This can be partly effected by the provision of house accommodation, and in this matter firms can exercise a much greater power than individuals and to an even greater extent by co-operation. We recommend action in this matter to Government and to firms in the city.

Removal of factories.

14. It was suggested that all factories should be removed outside the central area, and the land thus vacated used for housing. It appears extremely doubtful whether such a proposal would afford any relief in the near future having regard to the vested interests concerned; while the cost to public funds of such removals, if compulsorily enforced, would be enormous. We understand this matter is receiving the attention of the Corporation, which appears to be the proper body to deal with it, and we would recommend to their consideration the desirability of not licensing any more factories in the central areas.

Better utilisation of existing areas for buildings.

15. This suggestion falls under several heads, but none appears to cover steps likely to afford immediate relief. It is apparent throughout the whole city that there are considerable areas inadequately utilised by the existence of low *kutcha* or *pucca* buildings where overcrowding and rack-renting is inevitable if anything approaching a commercial return is to be obtained in the way of rent. A more open land market and measures designed for the improvement of title, possibly a measure of registration, might do much to effect improvement in time. It must be borne in mind, however, that low buildings and open spaces are frequently valuable ventilation areas, and if they become covered with high structures the provision of more public open spaces will be imperative.

Public Institutions in the city.

16. Another matter worthy of mention is the large areas which are being and have been taken up for educational and hospital purposes, as well as for public institutions and offices. We do not express any opinion in regard to the desirability or possibility of removing such institutions, as the University, from the centre of the town, but the necessity of developing at least an equal area in the suburbs for each area taken up in the city is one which we urge upon Government, with a view to this being imposed in every future case upon some competent authority.

The Mint.

17. In this connection we may also invite attention to the occupation of a large area by the Mint, which can only be described as extremely uneconomic and aggravating congestion. We urge immediate steps to remove it to a suburban site.

The "European" quarter.

18. The last comment we make in this section concerns the area "south of Park Street" with its unique compounds and general lay-out. The development of this upon the "flat" system is progressing, we think inevitably, and it behoves all who wish for open spaces around their houses to face the fact that, unless the suburban areas are opened up quickly, this type of residence will become extinct, except under old leases or on prohibitive rents.

The extension of the Municipal area.

19. One essential step towards the effective handling of the housing problem is the inclusion under one authority of the main part of the area that is occupied by persons who, for one reason or another, have to live in the city or in areas contiguous to it. We think this would be achieved to a desirable extent by the inclusion of Howrah and suburban municipalities within the jurisdiction of the Calcutta Corporation, and we accordingly recommend that this should be done at an early date.

Communications.

20. It is obvious that the development of the suburbs will be of little effect unless the present means of communication are very much extended, improved and cheapened. There are many indications that travelling to and from work is on the increase. We have no doubt that if there were better travelling facilities more people would be tempted at least to experiment in living in the outer districts, and it has to be remembered that the growth of commercial activity will tend to bring more people from the outlying districts to earn their living in the city. We are informed that the Improvement Trust has already laid down a system of main roads, which will afford communication from the outskirts of the present Corporation area to the centre of the town. It is obvious that all possible steps should be taken to push forward the construction of these, and at the same time to extend the system outwards through the areas which we have suggested for inclusion within the municipal limits. It is hardly necessary to point out in this connection the desirability of the execution of a scheme for the improvement of Howrah, which appears to us to be in fact an integral part of the city.

The Import Goods Sorting Yard.

21. We may here conveniently draw attention to the construction of huge railway yards across both the northern and southern ends of the town. In the south this has recently formed the subject matter of enquiry by Government, who have decided that in the interests of the port it is now too late for any change of plans to be made. In view of this decision it seems practically useless to suggest that any further consideration should be given to the matter, but we express the hope that the question of the necessary crossing will be considered in the light of the future, and that ample provision will be made for the inevitable increase in traffic.

The Chitpore Yard.

22. So far as the north of the town is concerned, the obstruction is caused by the Chitpur Yard of the Eastern Bengal Railway. This has already put back the question of the improvement of the northern suburbs some years by completely closing one of the main outlets and making a bottle-neck of the other by hopelessly inadequate bridges, cruelly steep in their approaches, and too weak for any but light traffic. We suggest that the question of the removal of the whole of this yard should receive the early consideration of Government with a view to its being established to the east of the main line, the future arrangements of the railway being made accordingly.

Electrification and extension of Railways.

23. We have also considered the question of railways and have examined a proposal for railways round the city, partly overhead. The need for an extension of the suburban railway system, for its electrification, and for railway communication with the centre of the city are, we believe, too well known to require comment, and we understand these matters are receiving consideration at the present time. We are advised that there are no insuperable difficulties in the way of constructing tube railways in Calcutta, and if this be so, we think they would be far preferable to overhead railways, which are bound to be a noisy addition to already overcrowded streets and might possibly interfere with private amenities to an undue extent. The question of the electrification of existing suburban lines, say within 25 miles of the city, might well be considered in conjunction with the possibility of

tube railways. We do not feel competent to suggest definite routes, but a possible programme has been laid before us of a line leaving the surface somewhere near Agarpara, passing under Sealdah, Dalhousie Square, the river, Howrah and coming to the surface again on the way to Lillooah. Connections were proposed with this from the south suburban line of the Eastern Bengal Railway, and an additional route was suggested passing right down the centre of the north of the town, say Central Avenue, and proceeding south to and beyond Tollygunge. These proposals require expert examination, but some measures of this kind appear to be essential even if they result in a loss in working which might have to be guaranteed for a time. The immense benefit to the city might well, we think, justify special local taxation.

Tramways and motor buses.

24. In regard to tramways and motor omnibuses, good roads are a necessary preliminary and we think that no more tramways should be laid in narrow streets. It is not for us to express an opinion as to the comparative advantages of these methods of traction, but we are impressed with the greater mobility of motor bus services in testing and opening new routes. The main point is that everything possible should be done to encourage the extension and cheapening of the present services.

River Steamer Services.

25 The river steamer service is an important branch of the city and suburban communications, and we understand that this could be extended if more landing stage accommodation were available, particularly between Chandpal Ghat and Ahiritola Ghat. We recognise the difficulty of providing this so long as the present import arrangements continue, but we think this point should be borne in mind and action taken as soon as circumstances render it possible.

Free ferries.

26. A proposal has been put before us for the provision of free ferry services directly across the river, one from Chandpal Ghat to Ramkrishtapore and one from near Sovabazar to the Howrah side of the river. Such services are common in other parts of the world, and it appears to us they offer an attractive and prompt solution of the question of further bridging the river. We are much impressed with this proposal and we recommend that it should be examined with a view to early execution. The costs of upkeep appear to us to be a legitimate charge upon the public funds.

Bridges.

27. Calcutta's position on a deltaic marsh makes it practically an island, and to its initial disadvantages in this respect must be added the fact that it has now become completely hemmed in by canals and railways, which have to be crossed by bridges for communication with the outer world. The matter would be serious enough if the authorities concerned had been compelled in the past to pay any attention to the inevitable growth of the town, and to the necessity of making such bridges, as they did construct, adequate even for a few years, but in practically every case we find the existing bridges ridiculously inadequate to present conditions without taking the future into consideration at all. Further isolation of the city should be strenuously opposed and the improvement of existing bridges should receive special and immediate attention. We desire to emphasize the urgent necessity of proceeding with the construction of the new Howrah bridge, which will be more adequate to traffic demands and will carry tramways. The inconvenience caused by the closing of the Kidderpore bridge is too well known to call for comment.

Grand Trunk Canal.

28. The delay in the final sanction of the Grand Trunk Canal scheme is hampering the preparation and execution of schemes for the development of Maniktala and the northern suburbs. We consider that the project and its consequences will be of material assistance in relieving congestion and helping the healthy expansion of the city. Moreover, it is essential that this scheme should be finally determined upon as soon as possible, as until the exact alignment is known development on the north and east of the town must be retarded. The canal will cross several important roads, and it is essential that the question of these crossings should be considered not only with reference to the requirements of to-day but also to those of the future.

Outer Suburban extension.

29. Projecting into the suburbs are wide areas of low-lying lands, marshes, and tanks which are capable of being raised, drained and filled,

and used for agriculture pending building development. Areas beyond the suburbs require similar treatment, and the question of garden suburbs in these outer areas can never become a practical one until some such steps are taken. We suggest that a special officer should be appointed at once to report and advise in this matter.

30. We feel that exception may be taken to some of the points we have raised on the ground that they are remote and have little bearing on the solution of present evils. We are not of this view, and if difficulties of practical working make the execution of such proposals a matter of years, these proposals are none the less urgent and they will wait and stand the longer as an advertisement of the result of past lack of foresight and indifference to the future. If this is not to be charged hereafter to the present day, it is essential that the whole question of the further extension of Calcutta should be examined *now* and steps taken to provide for its inevitable great expansion.

31. Finally we would urge on those who will be responsible for the consideration and possible adoption of the measures of amelioration proposed by us the extreme urgency of acting promptly and courageously.

We have made a number of recommendations, all of which will help, we believe, to improve the serious situation which has arisen. We wish, however, to emphasize the absolute necessity for—

(1) the development of the suburbs,
(2) the acquisition of land for building purposes,
(3) the improvement of internal and external communications,

and to press on the Government of Bengal the importance of the most complete and drastic action.

The map of Calcutta and its surroundings demonstrates the force of our arguments more clearly than anything we can write, and we are satisfied, if these three recommendations are accepted, and action is taken regarding them without delay, that there is sufficient suitable land available in the immediate neighbourhood of Calcutta to relieve the existing congestion and to provide for any expansion that is likely to occur in the near future. Not only will the excessive prices lately paid for land prove unjustified but encouragement will be given to the erection of houses as sound investments, and thus the people of Calcutta will obtain house accommodation on terms strictly commensurate with the cost of providing such accommodation.

Half measures in an emergency such as exists to-day cannot succeed, and the problem before the Government of Bengal must be tackled in a spirit of determination in order to achieve with the greatest possible despatch those results which are without doubt of the most vital importance to the inhabitants of Calcutta.

MINUTE BY THE HON'BLE Mr. W. H. PHELPS.

With some reluctance I have signed the report—not that I disagree with the recommendations which will take years to fructify, but that so little has been done for the real hardships suffered by present tenants by way of immediate and emergent relief.

In my original appeal in Council for the appointment of this Committee and during the sittings, I have urged that certain landlords are exploiting the Corporation and the tenants in a scandalous manner; but notwithstanding my iteration and re-iteration of this fact there is not the slightest allusion to it or to my proposals in the report.

The fact remains that so far as I have investigated these cases of preposterous demands for rent, which every one is aware of, the landlords are taking an undue advantage of the assessments holding good for six years by raising rents in a shameless manner, thus defrauding the Corporation on the one hand and "squeezing" the tenant on the other.

My voice in Committee was as of "one crying in the wilderness" and I could not get a proper hearing—consequently there was no discussion and no mention of my written representation in the report.

W. H PHELPS.

APPENDIX I.

THE ADVERTISEMENT PUBLISHED IN THE LEADING NEWSPAPERS.

The Committee appointed by the Governor in Council to enquire into the remarkable enhancement in land values and house rents, which has recently occurred in Calcutta, has commenced its sittings. Any person desirous of giving evidence before the Committee is requested to communicate with the Secretary, from whom a form giving details of the main points on which information is required can be obtained. Replies marked confidential will be so treated by the Committee. Forms should be sent to the Secretary by the 3rd December.

J. A. WOODHEAD.
Secretary.

2, COMMERCIAL BUILDINGS,
CLIVE STREET, CALCUTTA,
The 8th November 1919.

APPENDIX II.

Form for Tenants.

CALCUTTA RENT ENQUIRY COMMITTEE.

Questions.	*Answers.*
1. Name of tenant.	
2. Address of premises occupied.	
3. Are you the tenant of a house, a portion of a house or a room?	
4. The number of rooms, excluding bath-room and closet.	
5. Name of landlord or lessor.	
6. Address of landlord or lessor.	
7. (*a*) The rent paid in 1916. (*b*) The rent paid in 1917. (*c*) The rent paid in 1918. (*d*) The rent paid in 1919. (*e*) Has any further increase of rent been demanded? If so, state the increased rent demanded.	
8. Was any *salami* paid in any of the years mentioned in question 7? If so, state the amounts and dates of payment.	
9. Is any portion of the premises used for trade purposes? If so, what portion?	
10. Particulars of the existing or previous lease, if any.	*Signature*.....
11. Remarks	*Date*.....*19* .

APPENDIX III.

2, COMMERCIAL BUILDINGS,
Calcutta,.....*19* .

DEAR SIR,

1. I have the honour to enquire if you would be willing to assist the Committee appointed by the Government of Bengal to enquire into the "Causes of excessive land values and high rents in Calcutta and, if possible, to suggest remedies" by furnishing information on the following lines:—

(*i*) The extent of the rise in land values and house rents since 1916; concrete examples supporting any general conclusions will be particularly valuable.

(*ii*) The extent of the area over which the rise in land values and house rents has taken place, *i.e.*, is the increase limited to particular areas, or is it general over the whole of Calcutta?

(*iii*) The causes of this enhancement in land values and house rents.

(*iv*) The present cost of building and repairs as compared with pre-war rates.

(*v*) Facts bearing on the "Charge of profiteering made against landlords."

(*vi*) Is it both practical and desirable to control or limit the rise in rents by legislation?

(*vii*) If it is considered practicable and desirable to control rents by legislation, definite proposals as to the form which this control should take.

(*viii*) Are there in your opinion any means other than by legislative control, by which the enhancement of rents can be limited?

2. I would esteem it a favour if a note embodying the facts within your knowledge, your conclusions from those facts and your proposals as regards the extent and character of the control you may think desirable could be forwarded to me on or before the 1st December 1919. It would be of material assistance to the Committee if you would consent to give oral evidence. If you are willing to give evidence a time and date will be notified to you.

Yours faithfully,

J. A. WOODHEAD,

Secretary,

Calcutta Rent Enquiry Committee.

No. 200 R.C.

To

THE SECRETARY TO THE GOVERNMENT OF BENGAL,

MUNICIPAL DEPARTMENT.

Dated Calcutta, the 21st February 1920.

SIR,

In the Report which we have submitted it will be noted that the Hon'ble Mr. W. H. Phelps has added a minute of dissent in which he alleges that he was not given an adequate hearing and that his proposals were not considered.

2. With regard to the second allegation, Mr. Phelps' proposals were discussed and he was asked to formulate them in a note, which was then considered by a special Sub-committee. The Sub-committee found themselves unable to recommend the acceptance of Mr. Phelps' proposals. This opinion was confirmed by the Committee. Mr. Phelps draws attention to the fact that his proposals are not mentioned in the Report. We need only say with regard to this that it is certainly not necessary, and frequently not desirable, that all proposals made to a Committee and negatived should form part of a Report.

3. We are of opinion that Mr. Phelps was given ample opportunity of expressing his views. We would also suggest that the minutes of the meeting—extracts from which are forwarded herewith—confirm this opinion.

4. The Hon'ble Mr. W. E. Crum, the Hon'ble Mr. Abdur Rahim and Mr. R. C. Bonnerjee are out of town and hence have had no opportunity of considering this matter.

We have the honour to be,

SIR,

Your most obedient servants.

RESHEE KESH LAW.
RAMDEO CHOKANI.
A. D. PICKFORD.
A. GILLE, S.J.
J. H. RUNDLETT.
P. N. MUKHERJEE.
F. C. FRENCH.
A. DEBOIS SHROSBREE.
J. A. WOODHEAD.
J. F. GRAHAM.

Enclosures.—1. Extracts from the minutes of the meetings held on 16th, 19th, and 23rd January, 1920.

Extract from the proceedings of the seventh meeting of the Committee held on Friday, the 16th January 1920, at 3-30 P.M.

V. The next question taken up was the question of remedies and whether legislation was desirable.

Mr. Phelps said that legislation could be very cruel, but at the same time be felt that there should be some control. Rent should be based on assessment and it might be controlled in a simple way with due allowance for the normal rise in land values and the costs of repairs and buildings. His idea was not to appoint an outside Rent Controller like they had in Bombay, but to go upon the evidence afforded by the Assessment Book and to rely on the experience of the Assessor of the Calcutta Corporation. His idea was to give the tenants a court of appeal, the same as the landlords had hitherto enjoyed. If a landlord thought he was over-assessed he had a court of appeal in the Chairman who delegated his authority to the Vice-Chairman. These officers would investigate a particular case with the help of the Assessment Book and their decision would be based on officially recorded facts. Suppose the rent of a house which had been let for Rs. 200 was increased to Rs. 300 on the plea that a new assessment was being made. The tenant could appeal to the Chairman, the landlords would be asked to appear, the Assessment Book would be examined, and it would be for the landlord to justify the increase. Mr Phelps thought that that would be a very simple remedy and by adopting this they might be able to avoid legislation like the Bombay Rent Act, which operated very cruelly on the landlords. He recognised that as land values and the cost of building and repairs had risen, a certain reasonable rise in rents should be allowed. He thought that the Committee should be very careful in their recommendations about legislation and should take care to see that they did not discourage the building of new houses. He pointed out that the English Act of 1915 killed the building trade in England. If there was to be legislation, he hoped it would take the form of a simple amending Act. He would provide for re-assessment every year.

Extract from the proceedings of the eighth meeting of the Committee held on Monday the 19th January 1920, at 4-30 P.M.

IV. The President invited discussion as to the desirability or otherwise of legislation, and if legislation were deemed to be necessary, as to the form it should take, and whether they should recommend the appointment of an Assessor to decide disputes between landlords and tenants. . . . .

. . . . . .

Mr. Phelps was also asked to formulate his scheme (an outline of which was given at the last meeting) and to lay it before the Sub-committee.

Extracts from the proceedings of the tenth meeting of the Committee held on Friday, the 23rd January 1920, at 3 P.M.

I. . . . . .

As regards Mr. Phelps' scheme the Committee considered it to be unworkable and decided not to recommend it. Mr. Phelps was the only dissentient voter on this matter.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR JANUARY 1920.

I. **Character of the Season.**—There was practically no rainfall except some scattered showers in Jalpaiguri, Darjeeling, Dacca, Chittagong, Tippera, Noakhali and the Chittagong Hill Tracts. The usual rainfall statement is appended.

II. **Progress of Agricultural Operations.**—Reaping of winter paddy was completed and good progress was made with threshing. Preparatory tillage for the next autumn crops commenced. Transplanting of summer paddy, cutting and pressing of sugarcane, harvesting of potatoes, pulses and early oilseeds were also progressing.

III. **State of Standing Crops.**—The condition of standing crops was reported to be generally favourable.

IV. **Prospects and Probable Outturn.**—The prospects of standing crops were promising. Winter paddy yielded an outturn of 90 per cent.

V. **Damage to Standing Crops.**—The standing crops suffered no damage.

VI. **Condition of Agricultural Stock.**—The condition of live-stock was fair. Cattle-disease was found to be prevalent in parts of Murshidabad, Tippera, Noakhali and Jessore.

VII. **Failure of Pasturage and Fodder.**—The supply of fodder was sufficient all through the Province.

VIII. **Prices of Food-grains.**—During the second fortnight of the month under review the price of rice rose in eleven districts, fell in three and remained stationary in the rest, prices varying from 7 seers in Malda and the Chittagong Hill Tracts to 5 seers 5 chittaks in the 24-Parganas.

IX. **Condition of Agricultural People.**—The condition of the agricultural population was reported to be fairly satisfactory owing to the harvest of winter paddy crop.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA, *the 14th February 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 12th February 1920.

Summary.—Excepting light showers in North Bengal moderate rainfall was general in the rest of the province. The rain has generally helped the ploughing operations for jute and other autumn crops and has been favourable to the standing spring crops. Harvesting of spring crops and pressing of sugarcane continue. The average price of common rice for the province has fallen by about 0·34 per cent. as compared with that of the previous week.

PROPOSAL FOR THE ESTABLISHMENT OF A NAUTICAL INSTITUTE IN CALCUTTA.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 3RD FEBRUARY 1920.

RESOLUTION—No. 478Marine.

THE Government of Bengal have for some time past had under their consideration the question of establishing a school or nautical institute in Calcutta for the training of Indian seamen in the elements of the theory of navigation and for the training of Indians in the art of navigation on a

scientific basis. No facilities at present exist in this Presidency for Indians to qualify themselves for certificates of competency for higher posts in the mercantile marine. The Governor in Council is inclined to the view that an institute or academy on the lines of training institutions in European countries might prove beneficial to a section of Indians of average education who might be encouraged to take up the sailor's profession in future. Enquiries made by Government show that there is at present no actual demand for such an institution in Calcutta, but the Governor in Council thinks that the matter might be discussed with advantage at the present time. The question requires to be very carefully considered. It is necessary in the first place to ascertain definitely whether there is scope for such an institution in Calcutta. If so, the matter should be examined in fuller detail, viz., the course of training, the probable number of boys desirous of going to sea, the shipping companies willing to employ them, the educational and other qualifications required for such employment and any other relevant points. The Government of Bengal consider that the matter should be examined by a representative committee as in Bombay and Madras, where a similar question is already under consideration. The Governor in Council is accordingly pleased to appoint a committee, consisting of the following gentlemen to consider the question with special reference to the points mentioned above. The committee should report their conclusions to Government as early as practicable :—

(1) The Port Officer, Calcutta	*President.*
(2) Captain P. de St. Croix, Marine Superintendent, British India Steam Navigation Company, Limited.	*Members.*
(3) Captain G. R. Simpson, Marine Superintendent, India General Navigation and Railway Company, Limited.	
(4) Captain E Trott, Marine Superintendent, Asiatic Steam Navigation Company, Limited.	
(5) A representive of the firm of Messrs Sonaton Nittyanundo Roy, 2-1, Mission Row, Calcutta.	
(6) Munshi Abdool Rahaman, Dubash, of Chittagong ...	

The time and place for the meeting of the committee will be arranged by the Port Officer, Calcutta.

By order of the Governor in Council,

C. B. BAYLEY,

Deputy Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Wheat Crop of Bengal, 1919-20.

(Note.—On an average of the five years ending 1917-18, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acerage to total wheat acerage in (*a*) British India and (*b*) in the territory now reported on, has in the five years ending 1917-18 averaged (*a*) 40·7 and (*b*) 17·8 per cent., respectively.)

Character of the season.—The weather was generally favourable at sowing time; but subsequently the crop suffered through lack of soil moisture. Good showers of rain in the beginning of February improved the situation to some extent. The present condition may be reported as fairly favourable.

Area sown.—The total area under wheat according to the estimates of the district officers amounts to 116,300 acres against 110,600 acres and 114,600 acres shewn in the second and final forecasts, respectively, of last year.

Outturn.—According to the estimates of the district officers the provincial outturn works out at 78 per cent. of the normal, against 52 per cent. reported in the corresponding forecast and 61 per cent. in the final forecast of last year.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA,

The 28th February 1920.

APPENDIX I.

Second Forecast of the Wheat Crop of Bengal, 1919-20.

District.	Approximate normal area under the wheat crop.	Approximate area under wheat last year (1918-19).	Estimated area under wheat this year (1919-20).	Taking 100 to represent normal what would be the average outturn per acre cropped.		Date by which the sowings generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
				Last year.	This year.		
	Acres.	Acres.	Acres.				
Nadia ...	23,100	9,400	11,700	[illegible]	67	October to November.	Want of rainfall during the growing period has adversely affected the crop. Hence the outturn is estimated below the normal.
Murshidabad ...	69,300	23,600	24,400	50	67	Middle of October to November. Normal.	The increase in area sown as compared with the estimate in the first forecast is due to subsequent sowings in some parts of the Jangipur subdivision. Drought at the growing period damaged the crop. The recent rainfall is expected to improve the crop.
Jessore ...	2,300	1,100*	900	58	75	October. Normal.	The weather has been favourable, but absence of rainfall in November and December has injured the crop.
Burdwan ...	2,000*	2,000*	2,000*	58	67	End of October to November.	The weather has not been favourable. Some damage is reported from Kalna owing to drought. The recent rainfall is expected to improve the crop.
Birbhum ...	5,000	4,100*	4,100*	67	83	Beginning of November. Normal.	The weather has been favourable.
Bankura ...	3,600*	3,600*	3,600*	67	100	Third week of October. Normal.	The weather has been good and a normal crop is anticipated.
Midnapore ...	1,200*	1,200*	1,200*	70	67	First part of November. Normal.	The effects of weather have not been favourable. The absence of rainfall has damaged about 33 per cent. of the crop.
Hooghly ...	2,400	1,700*	1,700*	50	50	Beginning of November. Late.	The weather has not been favourable. Half the crop has been damaged by drought and untimely rainfall.
Rajshahi ...	8,500	6,800	6,900	70	67	End of November. Normal.	The weather has been fair. The outturn is however anticipated to fall below the normal for want of rain at the sowing time.
Dinajpur ...	1,000	1,300	1,200	40	57	End of October. Normal.	The weather has not been favourable. Some damage has been done to the crop by insect-pests. The outturn is expected to fall much below the normal for want of rainfall.
Jalpaiguri ...	800	800	600	83	83	End of November. Late.	The effects of weather have not been favourable. The absence of rainfal retarded the growth of the crop. The outturn is expected to fall below the normal owing to long continued drought.
Darjeeling ...	4,500	2,500	2,500	100	92	Last week of September. Normal.	The weather has been a fair one.
Rangpur ...	3,000	3,400*	3,400*	80	90	November. Normal.	Drought at the growing period has adversely affected the crop. The recent rainfall has however improved the situation.
Bogra ...	100	100	200	...	75	Middle of November. Normal.	The weather has been fair. The outturn is expected to fall below the normal owing to unfavourable weather conditions at the sowing time.
Pabna ...	16,000	12,000	10,000	60	58	Ditto ...	The weather was favourable at the outset. But long continued drought later on damaged about half the crops. The recent rainfall has however improved the prospects to some extent.
Malda ...	60,000	35,000	35,000	65	92	End of October. Normal.	The weather, though not very favourable since the sowing time onward has much improved in consequence of the recent rainfall.
Dacca ...	4,100	3,900	4,100	75	100	Middle of November. Normal.	The increase in area is due to the extension of cultivation in consequence of the high price of flour. The recent rainfall has done much good to the crop.
Faridpur ...	2,700*	2,700*	2,700*	67	100	November. Normal.	The weather has been favourable.
Total Bengal ...	209,600	114,600	116,300	61	78		

* Conventional area.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Spring Oilseed Crops of Bengal, 1919-20.

(*Note.*—On an average of the five years ending 1917-18, the area under linseed in Bengal has represented some 5·5 per cent. and that under rape and mustard 19·3 per cent. of the total respective areas under these crops in British India.)

Area sown.—Oilseeds are grown chiefly in Rajshahi, Dacca and the Presidency Divisions. In the other two divisions, the area is small. The estimated area under these crops (excepting sesamum for which separate forecasts are issued) for this year amounts to 1,294,200 acres, against 1,301,100 acres and 1,304,800 acres reported, respectively, in the corresponding and final forecasts of last year.

Character of the Season.—As reported in the first forecast, the season was generally favourable at the sowing time. But the total absence of rain during the months of December and January interfered with the growth of the crops generally. The rainfall in the early part of February was too late to ensure a normal crop. In certain districts insect-pests also caused some damage.

Outturn.—According to the estimates of the district officers the provincial outturn of the different oilseed crops works out at 77 per cent. of the normal, against 66 per cent. in the corresponding forecast of last year.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA,

The 28th February 1920.

APPENDIX I.

Second Forecast of the Spring Oilseed Crops of Bengal, 1919-20.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds.		Taking 100 to represent the normal what would be the average outturn per acre cropped.		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
			Last year (1918-19).	This year (1919-20).	Last year.	This year.		
		Acres.	Acres.	Acres.				
24-Parganas ...	Linseed	1,600	600*	600*	67	88	December to February. Normal.	The weather has been favourable. A fair outturn is expected.
	Rape and mustard ...	1,500	800*	800*	67	83		
	Other oilseeds (excepting *til*).	300	300	200	83	92		
	Total ...	3,400	1,700	1,600	70	84		
Nadia ...	Linseed	55,700	32,200	33,400	33	75	Beginning of February. Normal.	Want of rainfall at the time of growth has adversely affected the outturn to a great extent.
	Rape and mustard ...	25,600	14,400	16,300	33	75	Beginning of January. Normal.	
	Other oilseeds (excepting *til*).	16,900	3,300	3,700	33	75	End of December. Normal.	
	Total ...	98,100	49,900	53,400	33	75		
Murshidabad ...	Linseed	20,600	13,000	15,000	50	75	Not yet commenced except rape and mustard in some places from middle of January to February. Normal.	The increase in area over that of last year is due to extension of cultivation owing to high prices of oil and favourable weather conditions. Continued drought at the period of growth is likely to reduce the outturn much below the normal.
	Rape and mustard ...	16,900	12,300	14,700	50	83		
	Other oilseeds (excepting *til*).	8,700	3,100	3,800	58	75		
	Total ...	46,400	28,400	33,500	51	79		
Jessore ...	Linseed	24,000	9,400	9,500	75	75	January. Normal.	The increase in area over that of first forecast is due to more accurate estimate subsequently made. The weather has not been favourable. The outturn has fallen much below the normal on account of damage done by drought and insect-pests.
	Rape and mustard ...	49,600	18,000	18,000	67	66		
	Other oilseeds (excepting *til*).	3,300	1,900	2,200	50	58		
	Total ...	76,900	29,300	29,700	68	68		
Khulna ...	Linseed	900	100	100	31	50	End of January. Normal.	The increase in area is due to timely rainfall at the sowing time. On account of favourable weather, the outturn is expected to be normal.
	Rape and mustard ...	29,700	18,600	19,400	85	100	End of December. Normal.	
	Other oilseeds (excepting *til*).	100	500	500	92	108	Not yet commenced.	
	Total ...	30,700	19,200	20,000	77	100		
Burdwan ...	Linseed	22,500	7,700	8,300†	67	67	First week of February.	The decrease in area as compared with that of last year is due to want of moisture at the sowing time. The weather has not been favourable. The outturn is much below the normal owing to damage done by drought in the Kalna and Katwa subdivisions
	Rape and mustard ...	21,100	8,100	8,500†	58	67	End of January.	
	Other oilseeds (excepting *til*).	1,500	100	303†	50	75	First week of February.	
	Total ...	45,100	15,900	16,100†	63	67		
Birbhum ...	Linseed	800	800*	800*	58	75	Not yet commenced.	The weather has been fair.
	Rape and mustard ...	2,000	2,000*	2,000*	58	75		
	Other oilseeds (excepting *til*.)	200	200	300	50	75		
	Total ...	3,000	3,000	3,100	57	75		

* Conventional area.

† Revised since first forecast.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds.		Taking 100 to represent the normal what would be the average outturn per acre cropped.		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
			Last year (1918-19).	This year (1919-20).	Last year.	This year.		
		Acres.	Acres.	Acres.				
Bankura ...	Linseed	1,000	1,000*	1,000*	67	108	Not yet commenced.	The increase in area is due to favourable weather conditions. The outturn is expected to be slightly above normal owing to favourable conditions throughout.
	Rape and mustard ...	7,000	5,700	4,500	67	108	Last week of January. Normal.	
	Other oilseeds (excepting *til*).	8,000	3,600	4,000	67	108	Middle of January. Normal.	
	Total ...	16,000	8,300	9,500	67	108		
Midnapore ...	Linseed	15,000	11,500	12,300	50	92	End of January...	The increase in area is due to rise in prices. Want of rain has done some damage to the crops. Hence the outturn is anticipated to be much below the normal.
	Rape and mustard ...	31,000	11,000	11,400	50	92		
	Other oilseeds (excepting *til*).	14,500	14,000	15,200	50	92

Jalpaiguri ...	Rape and mustard ...	49,600†	51,400	48,300	92	92	Latter part of January.	Owing to extension of tobacco cultivation the area under rape and mustard has been reduced. The outturn has fallen much below the normal owing to damage done by drought and insect-pests.
	Other oilseeds (excepting *til*).	200	200	200	100	100		
	Total ...	49,800†	51,600	48,500	92	92		

* Conventional area. † Revised.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds.		Taking 100 to represent the normal what would be the average outturn per acre cropped.		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
			Last year (1918-19).	This year (1919-20).	Last year.	This year.		
		Acres.	Acres.	Acres.				
Darjeeling ...	Rape and mustard ...	7,000	2,800	2,800	100	100	January. Normal.	The weather has been favourable. A normal outturn is anticipated.
	Other oilseeds (excepting *til*).	200	200	200	100	100		
	Total ...	7,200	3,000	3,000	100	101		
Rangpur ...	Rape and mustard ...	160,000	118,000	124,000	80	90	Middle of January. Normal.	The weather has been favourable at the sowing time. Since then want of rain has caused the outturn to fall below the normal.
	Other oilseeds (excepting *til*).	1,100	200	200	100	90		
	Total ...	161,100	118,200	124,200	80	90		
Bogra ...	Linseed	1,000	1,600	1,800	65	80	Middle of March ...	The weather was not favourable at the sowing time. Absence of rain and floods in the eastern part of the district caused damage to crops. The recent rain did some good but no appreciable result is expected except in respect of linseed. Hence the outturn is anticipated to be much below the normal.
	Rape and mustard ...	60,000	12,000*	14,000	60	75	Middle of January.	
	Other oilseeds (excepting *til*).	...	200	300	40	50	End of December.	
	Total ...	61,000	13,800	16,100	61	71		
Pabna ...	Linseed	7,600	9,500	10,800	55	50	Not yet commenced	The increase in area under linseed and decrease in area under rape and mustard as compared with the last year is due to extension and shortage of cultivation respectively this year. The weather was favourable at the sowing time, but defective rainfall has retarded the growth and adversely affected the outturn.
	Rape and mustard ...	110,000	114,500	72,900	55	50		
	Other oilseeds (excepting *til*).	...	...	300	...	50		
	Total ...	117,600	123,000	84,000	55	50		
Malda ...	Linseed	6,000	3,500	4,000	45	66	January and February. Normal.	The weather has not been favourable throughout. The growth was retarded owing to want of moisture due to absence of rain since November. The outturn is therefore anticipated to fall much below the normal.
	Rape and mustard ...	30,000	10,000	11,000	45	75		
	Other oilseeds (excepting *til*).	2,500	1,200	1,200	40	66		
	Total ...	38,500	14,700	16,200	45	72		
Dacca ...	Linseed	1,300*	1,600	1,400*	75	100	Middle of February. Normal.	The weather has been seasonable. The rainfall at the end of January and beginning of February has greatly benefited the growth of the crops. The outturn is expected to be normal.
	Rape and mustard ...	88,600*	74,900	88,700*	65	100	January. Normal.	
	Other oilseeds (excepting *til*).	1,700*	...	1,700*	...	100	Beginning of March. Normal.	
	Total ...	91,600	79,500	91,800	66	100		
Mymensingh ...	Linseed	13,800	13,800	13,800	50	50	Middle of January. Normal.	The weather was not favourable throughout. The low outturn is due to want of sufficient rain during the latter part of November.
	Rape and mustard ...	430,700	472,300	472,300	70	75		
	Other oilseeds (excepting *til*).	300	300	300	75	100		
	Total ...	444,800	486,400	486,400	70	75		
Faridpur ...	Linseed	5,900	6,100	6,000	89	97	Middle of February and March. Normal.	The decrease in area is due to want of rain at the proper time. Want of rain has caused some damage to crops; hence the outturn will fall below the normal.
	Rape and mustard ...	25,700	25,700	25,400	82	88	Middle of January. Normal.	
	Other oilseeds (excepting *til*).	1,100	1,100	1,100	89	89	Not yet begun.	
	Total ...	32,700	32,900	32,500	84	87		

* Revised on the basis of settlement records.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds. REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF THE YEAR 1919-20.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Separate Revenue Branch (Salt).

No. 627S.R.

Dated Calcutta, the 27th February 1920.

THE following report on the state of the salt market for the third quarter of the year 1919-20, comprising the months of October, November and December 1919, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 3,433,050 maunds (including 2,970,110 maunds issued under the credit system), as compared with 2,892,168 maunds (including 2,275,152 maunds issued under the credit system) in the previous quarter and 1,723,634 maunds (including 1,251,101 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 38,09,929 (including Rs. 32,69,780 adjusted under the credit system), as against Rs. 39,68,466 (including Rs. 32,00,209 adjusted under the credit system) in the previous quarter, and Rs. 15,67,559 (including Rs. 9,84,751 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the Port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years :—

Total	2,274,612	1,511,331	1,492,840	1,420,427	3,836,885	3,246,988*

* Inclusive of 2,970,110 maunds of salt issued under the credit system.

Compared with the corresponding quarter of the previous year and the same quarter of 1917-18, importations were more by 157·0 and 68·6 per cent., respectively, and clearances were more by 128·6 and 114·8 per cent., respectively. As compared with the corresponding period of the previous year, the increased imports from the United Kingdom, Port Said, Spain, Aden, Massowah and Bombay are noticeable.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters :—

Table II.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published when they are available as usual in the *Calcutta Gazette* by the Director of Statistics with the Government of India

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to *nil*, as against *nil* in the previous quarter, and 306 maunds in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter amounted to 202 maunds as compared with *nil* both in the previous quarter and in the corresponding quarter of the previous year.

8. No information was available concerning the shipments of Liverpool salt during the quarter for the Port of Calcutta.

9. Table III shows the average wholesale prices* per 100 maunds of salt at the Port of Calcutta during each fortnight of the quarter :—

As compared with the corresponding quarter of the previous year, the quantities admitted into bond and cleared from bond and shipboard were more by 137·8 and less by 38·6 per cent., respectively.

By order of the Governor in Council,

A. MARR,
Secretary to the Govt. of Bengal.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF DISTRICT BOARDS IN BENGAL DURING 1918-19.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

LOCAL SELF-GOVERNMENT.

CALCUTTA, THE 23RD FEBRUARY 1920.

RESOLUTION No. 458 L.S.-G.

READ—

The Reports of Commissioners of Divisions on the working of District Boards in Bengal during the year 1918-19.

District Boards.—There was no change in the constitution of the Boards, except that the number of members was increased from 18 to 24 in Tippera and from 12 to 18 in Noakhali. Last year it was necessary to remind the non-official Chairmen of the District Boards of Murshidabad, the 24-Parganas and Jessore that more extended touring was necessary if the work of the Boards was to be properly carried out. It is satisfactory to note that during the year under review these Chairmen were on tour for 25, 23 and 32 days respectively. Having regard to the advanced age of these gentlemen and their other public and professional duties these tours do them credit. The non-official Chairman of the Bakarganj District Board was on tour for 54 days, and of the Burdwan District Board for 64 days. The latter is reported to have done very good work on his tours; the District Board appears to have exercised a wise discretion in electing a gentleman who has not only time to discharge the duties of his responsible office but also determination to have work done properly.

2. **Local Boards.**—The elective system was introduced during the year under review in the Local Boards of the Chittagong Division and in the Local Boards of Patuakhali and Bhola in the Bakarganj district. Sanction has also been given to the establishment of Local Boards in the subdivisions of the Chittagong district, where there are at present no Local Boards, and preliminary arrangements are being made for their establishment. General elections were held in five districts; they failed in seven thanas owing to the non-attendance of the prescribed proportion of voters. In the Asansol subdivision, where the roads are under the charge of the Local Board, the entire road cess receipts from the subdivision, after deducting the cost of collection and proportionate charges for office establishment, were made over to the Local Board.

It is hoped that the Village Self-Government Act by extending the sphere of the duties of Local Boards will infuse new vitality into them and stimulate their activity.

3. **Union Committees—(a) Constitution.**—The number of Union Committees actually at work at the end of the year increased from 174 to 269 with a population of over two millions. In addition to these, 127 new Union Committees had been sanctioned but had not been actually constituted before the end of the year. The elective system is being introduced in all unions where the members are nominated as their term of office expires, and the proportion of elected members has consequently been largely increased.

(b) **Income.**—The total income of Union Committees (excluding opening balances) increased from Rs. 2,00,000 to Rs. 2,39,000, of which Rs. 1,28,000 was contributed by District Boards. The number of committees imposing union rates rose from 86 to 105, of which 49 were in the Dacca district: the amount realised rose from Rs. 52,000 to Rs. 58,000. As a contrast to the Union Committees of the Dacca district it is noticeable that in the 24-Parganas no assessment was levied by the Union Committees, which relied on grants from the District Board as their chief source of income. The latter district is regarded as advanced, and the unwillingness of the people to raise funds for the improvement of their villages is to be regretted.

(c) **Expenditure.**—The total expenditure amounted to Rs. 2,34,000, of which Rs. 1,03,000 was spent on roads, Rs. 52,000 on sanitation and Rs. 55,000 on water-supply. Union Committees in Birbhum, Murshidabad, Jessore and Dacca devoted part of their funds to education and in Birbhum, Jessore and Dacca to dispensaries. In the 24-Parganas the tendency of the committees, if left to themselves, is to devote the greater part of their income to roads and to spend as little as possible on water-supply, sanitation, education or medical relief.

(d) **Balances.**—The number of Union Committees that disposed of the whole of their funds was 31, while 35 others were left with balances of less than Rs. 10. In two Union Committees in Birbhum the closing balances exceeded the total expenditure. One Union Committee in Dacca, which had a total income, of Rs. 3,935 spent only Rs. 1,511 and is responsible for a balance of Rs. 2,424; another in Noakhali kept a balance of Rs. 2,725 out of its income of Rs. 3,677.

4. **General remarks.**—Although some districts seem to be making little or no progress, the Union Committees generally continued to do good work. In the Chittagong Division for instance it is reported :—"The Union Committees are gradually realizing the advantages of self-taxation and their activities, zeal and enthusiasm will go on developing with the expansion of work entrusted to them." In Faridpur these bodies are genuinely desirous of improving local conditions and are alive to the fact that self-taxation is an essential necessity. The Chairman of the Birbhum District Board writes :—"The steady increase in the number of Union Committees, all willing to impose self-taxation, has been a remarkable feature of the year of report. Some idea of their activities may be gathered from the fact that the funds administered by the Union Committees almost doubled during the year of report and that only a very small percentage of this amount (23·8 per cent.) represents the contributions made by the District Board, the remainder being their income from funds raised by themselves from self-taxation. Under the sympathetic guidance of the District Board, the Union Committees of this district continue to display a steadily increasing measure of self-help, administrative capacity and zeal for the execution of works of sanitation, conservancy, water-supply and medical relief". In Dacca the value of the work accomplished by the Union Committees is enhanced by the fact that it is done economically. The policy of the committees is to avoid the expense of contractors by delegating one of their members to engage and supervise labourers while another member is deputed to inspect the work. The Chairman usually saves the expenses of a clerk by doing the accounts and correspondence himself. Administrative expenses thus become insignificant in comparison with the work done and in many unions they are nil. Similarly in Hooghly where different members are placed in charge of different works the people get very good value for their money.

A dislike of taxation is not peculiar to the villages of Bengal and it is only natural that taxation should not appeal to villagers who have not yet seen the benefits that will result from their contributions. In this connection the Chairman of the Howrah District Board reports :—"As a result of my local inspections I am convinced that taxation is highly unpopular among the villagers and a committee that imposes it knowingly faces unpopularity. The villagers are anxious that Union Committees should improve amenities of life in the village but they expect that all the necessary cost will be provided by the Board or Government. In some cases the fear of taxation leads to opposition to the establishment of Union Committees". In other districts also

the committees are apt to rely on the District Board contributions but it is scarcely necessary to point out that as Union Committees and Union Boards increase in number, till there is a network of them in each district, the amounts the Boards will be able to give to each will be so comparatively small that they must be supplemented by adequate local taxation if local needs are to be met.

5. **District Board Receipts.**—During the year under review the total receipts from all sources (excluding opening balances) increased by over 6 lakhs. viz., from Rs. 1,10,22,000 to Rs. 1,16,57,000 : the receipts from local rates rose by 1½ lakhs, while the educational receipts rose by nearly 3½ lakhs.

6. **Incidence of Taxation.**—The incidence of taxation averaged 2½ annas per head for the whole Presidency and varied from 3 annas 2 pies in the Burdwan Division to 1 anna 11 pies in the Dacca Division.

7. **District Board expenditure.**—The decrease of expenditure in relation to current income to which Government drew attention last year is still more noticeable in the year under review. Last year the expenditure exceeded the current income by less than Rs. 5,000 in contrast to the previous three years when there was an excess of by 5½, 7½ and 2½ lakhs respectively. In this year the high price of materials and the difficulty of obtaining them led to a curtailment of expenditure, the result being that the current income exceeded the expenditure by 4½ lakhs. Many districts were left with large surpluses, and the aggregate closing balance at the end of the year was 23 lakhs—an increase of 3 lakhs on the previous year.

8. **Loans.**—It is somewhat anomalous that whereas the municipalities with an income of 65 lakhs have taken loans totalling 69 lakhs, the aggregate of the loans of the District Boards of Bengal, with an income of over a crore of rupees, is only 20 lakhs, of which 16 lakhs is on account of the loan taken by the 24-Parganas District Board for the Magra Hât Drainage Scheme. The District Boards are constantly complaining of the inadequacy of their income, but it is their usual practice to finance capital works from current revenue. They have not apparently realized that by so doing they are not taking advantage of their strong financial position to obtain funds for the development of their districts and that they are at the same time unfairly burdening the present generation with the whole capital cost of works of which the benefit will to a large extent be reaped by posterity.

9. **Education.**—In spite of Government giving the Boards further grants amounting to 3½ lakhs, the expenditure on education rose by only Rs. 1,69,000. It aggregated 26½ lakhs, about three-fifths of which represented Government grants placed at the disposal of the Boards. The percentage of their income spent on primary education was over 20 per cent. in all but nine districts and varied from 10 per cent. in Burdwan to 30 per cent. in Noakhali and Bogra : the district last named is in advance of other districts of the Rajshahi Division in respect of both male and female education. The total number of Board and aided primary schools rose from 35,278 to 36,654, of which 28,647 were boys schools and 8,007 girls' schools ; altogether 2,866 were maintained by the Boards.

It is satisfactory to note that there has been an increase of 592 in the number of girls' schools. The number of night schools organised in the district of Birbhum for the education of artizans and the labouring classes rose from 113 to 144 with an attendance of 2,936 pupils. Weaving schools are being assisted by one or more District Boards in each division, while technical schools are maintained by the District Boards of Burdwan, Khulna, Mymensingh, Tippera, Rajshahi and Pabna : the District Board of Midnapore has also decided to establish one at Jhargram.

10. **Medical Relief and Public Health.**—These two heads are grouped together for this review as it is impossible to distinguish the expenditure under each. The outlay under the head of Medical increased by 1¾ lakh and that shown under the head of Sanitation by about half a lakh. The increases are due mainly to the establishment of new dispensaries, the temporary employment of special doctors to cope with outbreaks of influenza and other epidemics, the free distribution of medicines during diseases, the rise in the price of medicines owing to the war and the more general adoption of sanitary measures.

In nearly all districts definite programmes have been laid down for the gradual extension of dispensaries, and 15 new dispensaries were established during the year. The number would have been still greater had it not been for the high cost of materials and the difficulty of getting them. There was generally greater activity in providing for the needs, both medical and sanitary, of rural areas. In Birbhum for instance five temporary dispensaries were opened and were retained almost throughout the year, the influenza epidemic being succeeded by small-pox and cholera epidemics. The District Board of Hooghly employed five peripatetic Sub-Assistant Surgeons who visited villages and markets (*hâts*) to give free medical relief and instruct the villagers in matters of hygiene and public health. The Mymensingh District Board maintained a lady doctor and five midwives and also employed two sanitary officers for work during epidemics. In this district 11 extra doctors and 16 compounders were engaged to cope with the epidemic of influenza. In Bakarganj the services of 43 extra medical men (in addition to 30 doctors and 25 compounders attached to the Board's dispensaries) were utilized during the outbreak in October 1918. The Board opened 72 centres, each in charge of a medical man, and freely distributed medicines to the affected persons. In this district the doctors attached to some of the dispensaries visit the neighbouring village markets (*hâts*) and render medical aid to those attending them. In Rajshahi the system of treating with quinine children in primary schools suffering from malaria was extended. Medical officers of the Board's dispensaries treated school children within a radius of 1 mile from their dispensaries in addition to their dispensary work, and it was arranged that the medical officers of private dispensaries should give similar treatment in the neighbouring schools, the Board supplying the quinine. The results are said to be promising and the experiments will be continued. Two supernumerary doctors were also deputed at Nator and Naogaon as whole-time officers to do similar work in schools within a radius of 5 miles, but this work was interrupted by the floods, as the officers had to be employed on flood duty.

In Jessore a scheme for affording medical relief by subsidizing medical practitioners is said to have worked fairly well, but it does not appear that the doctors subsidized by the Board have as yet opened dispensaries of their own, and the Chairman is not yet sure that they will eventually settle down in the locality, which was one of the main conditions on which the subsidies were granted.

Useful public health propaganda work was done in several districts. In Jessore the non-official Chairman personally delivered lectures on malaria and cholera with the help of a magic-lantern. In Rajshahi one of the Board's Sub-Assistant Surgeons went on a lecturing tour for about one month. Lectures were given at zemindars' cutcherries, high English schools, *melas* and other places. It is reported that large audiences of all classes, both men and women, attended and showed the liveliest interest. Lantern-lectures given by the Sanitary Inspector of the Mymensingh District Board in villages and primary schools were much appreciated, and the Board has under consideration the appointment of two regular lecturers for the dissemination of knowledge of simple sanitary facts. Elsewhere also, *e.g.*, in Bogra and Malda, Sanitary Inspectors gave magic-lantern lectures and instructed the villagers in the principles of hygiene and the means of protecting themselves against epidemics.

11. In the Asansol mining settlement the system of free and compulsory vaccination has for some time been in force under the supervision of the Mines Board of Health. It was introduced by the District Board in the remainder of the district during the year under review. A first class Health Officer was appointed by the Board for the purpose as well as for general public health work, and four Health Inspectors and 32 Sanitary Assistants were appointed to help him. In Bakarganj a scheme of free vaccination which was in force last year in the Sadar subdivision, was extended to the Perojpur subdivision with satisfactory results, 20 per cent. of the population being vaccinated. Free vaccination was also continued in the Jalpaiguri and 24-Parganas districts and in certain parts of the Bogra and Tippera districts.

12. Ordinary sanitary measures, such as the clearing of jungle, filling up of ditches and disinfection of tanks and wells are generally carried out

through the agency of Local Boards and Union Committees. The District Board of Dacca organized three special sanitary gangs for the Manikganj subdivision. The Local Board of Meherpur in the district of Nadia continued to clear jungle on village sites through the agency of special local committees, who took leases from the owners on small rents or free of rent and cleared the plots with the help of Local Board contributions. Crops were then grown which prevented the jungle growing again and yielded a small profit to the committees. The idea is to form a village sanitation fund out of the sale-proceeds of the crops and to undertake other sanitary works, independently of the contribution of local bodies. The scheme is said to be working successfully so far and the number of such village committees is increasing.

13. **Veterinary.**—The veterinary assistants continue to do useful work, the itinerant officers visiting villages affected by its cattle disease and treating the cattle, while the stationary assistants treat in-door and out-door patients at their hospitals. The building of a veterinary hospital and dispensary at Jalpaiguri was completed during the year. An epidemic or rinderpest broke out in the Sunderbans during the cold weather. A large quantity of serum was obtained for inoculation, and the Chairman of the District Board of the 24-Parganas reports that the effect of the treatment was satisfactory and highly appreciated by the people. The Commissioner of Burdwan states that the people in his division now have a firm faith in the efficacy of inoculation.

14. **Civil Works.**—The expenditure on original works on buildings was approximately the same as last year, but the outlay on communications decreased by over two lakhs. In some districts the scarcity of labourers owing to the prevalence of influenza and cholera epidemics partially explains the decrease, but the main reason throughout the Presidency was the dislocation of railway goods traffic, which interfered with the transport of road metal and of coal for the manufacture of bricks. In consequence there were large lapses, the percentage of which in the Province as a whole increased from 11 to 12·5 per cent. In Burdwan the amount that lapsed exceeded the expenditure.

15. **Water-supply.**—Expenditure on water-supply amounted to Rs. 7,83,000 or nearly one-quarter of the net public works cess receipts. The District Board of Nadia spent nearly half of those receipts, the Dacca and Faridpur Boards over two-fifths and the 24-Parganas and Mymensingh Boards one-third; the outlay in the district last named was double what it was in the previous year. The Chittagong District Board spent only Rs. 4,435, or 3·4 per cent. of the public works cess receipts. The failure to do more is attributed to difficulty in securing sites for tanks, and the District Board is considering the possibility of encouraging the use of wells in preference to tanks. In Rangpur, where only Rs. 11,000 was devoted to this purpose, it is reported that drinking water is available at a small cost by digging *katcha* wells and that the necessity for expenditure of funds on a large scale is not therefore keenly felt. The Governor in Council is pleased to observe that, with few exceptions, District Boards are realising their responsibility in this important matter, but he has read with concern the remarks of the Chairman of the Mymensingh District Board that the efforts of the Board to supply water are resulting in a diminution of private efforts.

16. **Drainage.**—The expenditure incurred under this head was confined chiefly to clearing roadside drains, re-excavating and deepening *khals* and petty surface drainage. The Dinajpur Board spent a large sum in constructing new culverts and extending the waterways in bridges so as to drain off water quickly and obviate damage to crops from floods. The District Boards of Jessore, 24-Parganas and Nadia agreed to undertake with funds contributed by them and Government three large schemes under the Sanitary Drainage Act for improving the drainage of the Arool Bil and the Nawi-Sunthi and Jaboona rivers.

17. **Closing balances.**—In the previous three years the District Boards had been gradually reducing their large accumulated balances, but in the year under review the actual closing balances showed an increase of three lakhs. The explanation is generally that expenditure on capital works was curtailed owing to the difficulty of getting materials, the result of transport conditions,

and also owing to their high cost. As in the previous year, the largest balance was retained by the Burdwan District Board : its actual amount was 5 lakhs which approximates to its total ordinary expenditure. It is explained that owing to war conditions and the ravages of influenza among labourers, one of its Local Boards (Asansol) was not able to utilize fully the public works allotment, which resulted in a savings of more than 2½ lakhs. The disproportionately large balances at the credit of the 24-Parganas and Jessore and Nadia District Boards (viz., Rs. 3,90,000, Rs. 1,43,000 and Rs. 56,000 respectively) were mainly due to the receipt of large grants from Government on account of the Jaboona, Nawi-Sunthi and Arool Bil drainage schemes, the execution of which could not be taken up during the year. Other District Boards with a closing balance of over one lakh are Midnapore, Hooghly, Tippera and Bakarganj. No explanation has been given in the first three cases : in Bakarganj it is due to the collection of arrear cesses amounting to Rs. 34,000 and to the wrong credit to the District Board of Government land revenue amounting to Rs. 40,000. On the other hand the Noakhali and Mymensingh Boards cleared off the accumulations of previous years ; the latter retaining an actual balance of Rs. 63,000 against a current expenditure of about 9 lakhs. Bankura closed the year with a cash balance of Rs. 4,000, which represents only 2 per cent. of its current expenditure. An extreme case is that of Dacca where the year closed with an actual balance of only Rs. 1,845, which is much below the minimum working balance necessary.

18. The Governor in Council desires to express his appreciation of the good work done by the following gentlemen :—

VICE-CHAIRMEN OF DISTRICT BOARDS.

Burdwan Division.

Babu Tara Prasonna Mukherji, Burdwan.
Khan Bahadur Maulvi Muhammad Shamsuzzoha, Birbhum.
Babu Atal Behari Singh, Midnapore.
Rai Bejoy Narayan Kundu Bahadur, Hooghly.
Rai Ashutosh Bose Bahadur, Howrah.

Presidency Division.

Babu Sasi Sekhar Basu, 24-Parganas.
Rai Biswambhar Ray Bahadur, Nadia.
Babu Bijoy Krishna Mitra, Jessore.
Rai Amrita Lal Raha Bahadur, Khulna.

Dacca Division.

Babu Sarat Chandra Chakravarty, Dacca.
Khan Bahadur Mahammad Ismail, Mymensingh.

Chittagong Division.

Rai Upendra Lal Roy Bahadur, Chittagong.
Khan Sahib Maulvi Abdur Raschid Khan, Noakhali.
Maulvi Syed Abdul Jabber, Tippera.

Rajshahi Division.

Maulvi Emaduddin Ahmad, Rajshahi.
Babu Jagindra Chandra Chakravarty, Dinajpur.
Rai Kali Pada Banarji Bahadur, Jalpaiguri.
Rai Mritunjoy Ray Chaudhuri Bahadur, Rangpur.
Maulvi Syed Riazuddin Quazi, B.L., Bogra.
Khan Sahib Maulvi Kader Baksha, Malda.

MEMBERS.

Burdwan Division.

Rai Nalinakshya Bose Bahadur, Burdwan.
Babu Satis Chandra Mukherjee, Hooghly.
Rai Mati Lal Haldar, Howrah.
Rai Joykali Chakravarty Bahadur, Howrah.

Presidency Division.

Babu Kali-Das Mitra, Jessore.

Dacca Division.

Babu Khetra Gopal Sarkar, Faridpur.
,, Debendra Nath Dutt, Bakarganj.
,, Rohini Lal Roy, Bakarganj.

Chittagong Division.

Babu Durgadas Dutta, Chittagong.

Rajshahi Division.

Babu Jatindra Mohan Sen, Dinajpur.
Messrs W. L. Travers, O.B.E., J. A. Polwhele, R. McLean and W. I. Milne. Jalpaiguri.
Babu Radha Raman Majumdar, Rangpur.
,, Bhabani Prosad Lahiri, Rangpur.

By order of the Governor in Council,

L. S. S. O'MALLEY,

Secretary to the Government of Bengal.

FORM I(*a*).

Statement showing the constitution of District Boards in the Bengal Presidency during the year 1918-19.

Serial number.	NAME OF DISTRICT BOARD.	Act under which constituted.	Area in square miles.	Population within the area.	PARTICULARS ABOUT CHAIRMAN.				NUMBER OF MEMBERS. * Purandarpur, Kirnahar, Labpur, Sultanpur and Gangpur Union Committees in the Birbhum district, Mallara Union Committee in the Bankura district, Suttangauj, Khilgaon, Jhujira, Mograpara and Nagaon Union Committees in the Dacca district and Gopalganj Union Committee in the Faridpur district were sanctioned but not constituted during the year.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 26th February 1920.

Summary.—Except for slight showers in Darjeeling the week was rainless. Rain is wanted for agricultural operations generally. Harvesting of spring crops and ploughing of fields continue. Standing crops are in fair to good condition. The average price of common rice for the province has fallen by about 2·18 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

N.B.—This is an abstract of prices at the following markets :—

Wholesale—Chetla Hat, Ramkrishnapur Hât, Sealdah Fish and Milk Markets, Posta Bazar.

Retail.—Sir Stuart Hogg Market, Orphangunge Market, Sobha Bazar, Nutun Bazar, Raja Babu's Bazar, Bow Bazar, Taltolla Bazar, Jogu Babu's Bazar.

S. C. GHOSH,
for *President, Advisory Food Committee.*

CALCUTTA, *the 28th February 1920.*

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA TRADE FLUCTUATIONS

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the nine months, April to December, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the nine months, April to December, 1919, amounted to 17,160,000 maunds, as against 10,902,000 maunds in the corresponding period of the preceding year—an increase of 57 per cent. There was an increase of 16 per cent in the imports of coal and coke (73,959,000 maunds as against 63,798,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piece goods showed an increase of 79 per cent, the total value amounting to Rs. 7,81,99,000 as against Rs. 4,37,00,000 in 1918. The quantity of indigo imported during the nine months, April to December, 1919, increased from 13,803 maunds to 14,110 maunds. The imports of raw jute amounted to 3,858,000 bales as against 4,005,000 bales—a decrease of 4 per cent. The importation of gunny bags also showed a decrease of 14 per cent (303 million bags as against 351 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) decreased by 16 per cent from 5,956,000 maunds to 5,024,000 maunds. The imports of sugar decreased by 17 per cent from 509,000 maunds to 421,000 maunds, and those of tea increased by 5 per cent from 2,579,000 maunds to 2,720,000 maunds.

Exports.—The exports of cotton piece goods, foreign, from Calcutta by all routes during the nine months, April to December, 1919, increased by 28 per cent (Rs. 22,86,81,000 as against Rs. 17,88,73,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 999 million to 805 million bags in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 3,693,000 maunds to 4,421,000 maunds, or by 20 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles in the nine months, April to December, 1919, compared with the corresponding months of 1918.

*New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal again 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 it April 1919 it is 56·319 ft. above M.S.-L.

†To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. October 1909).

(*a*) A new gauge fixed at Monghyr on 16th July 1914.

(*b*) From the 1st November 1915 the zero of gauge was 2·48 ft. above M.S.-L. Previous to that the zero was at M.S.-L. zero is 1·509 ft. above M.S.-L.

(*c*) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 30·99 ft. above M.-S.L. From

(*d*) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919 the zero is 1·51 ft. above M.S.-L.

(*e*) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1920.

The 2nd March 1920.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 4th March 1920.

Summary.—Moderate to heavy rain fell in several districts, mostly in Eastern Bengal. Some damage is reported from Pabna, Dacca and Noakhali. Preparation of lands for jute and autumn paddy is progressing and sowing of these has commenced in the low-lying tracts of Eastern and Northern districts. Standing crops on the whole are doing well. The average price of common rice for the province has fallen by about 2·27 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	Nil	$5\frac{5}{16}$	5	Prospects of standing crops are good. Harvesting of *rabi* crops and sugarcane in Baraset and Basirhat continues. Water is sufficient.

LIBERALITY OF BABU RAKHAL CHANDRA CHATTERJEE.

No. 568 Edn., dated Calcutta, the 11th March 1920.

From—THE HON'BLE MR. L. S. S. O'MALLEY, Secretary to the Government of Bengal, General Department,

To—The Commissioner of the Burdwan Division.

WITH reference to your letter No. 86J.G., dated the 21st February 1920, I am directed to request that you will be so good as to convey the thanks of Government to Babu Rakhal Chandra Chatterjee, of Birbhum, a pleader now practising at Chaibassa, for his liberality and public spirit in making a donation of Rs. 18,000 towards the cost of the construction of a high English school building at Suri.

FINAL REPORT ON THE CYCLONE RELIEF OPERATIONS, 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture Branch.

CALCUTTA, THE 12TH MARCH 1920.

MEMORANDUM—No. 2731 Agri.

THE final report written by Mr. S. G. Hart, I.C.S., Additional Commissioner, Dacca and Presidency Divisions, on the operations for the relief of the distress caused by the cyclone of the 24th and 25th September 1919, is published for general information.

His Excellency in Council has much pleasure in taking this opportunity of thanking the public both for their prompt and generous response to his appeal for donations to the Cyclone Central Relief Fund and for their willing help in the actual work of relief. In particular, the Governor in Council acknowledges the valuable assistance of the non-official associations and persons mentioned in the report and of the officials who co-operated with Mr. Hart in the efficient organisation and administration of the relief measures.

By order of the Governor in Council,

M. C. McALPIN,
Secy. to the Govt. of Bengal.

FINAL REPORT ON THE CYCLONE RELIEF OPERATIONS, 1919.

SECTION I.—The Storm.

The cyclone developed in the Bay of Bengal and struck the coast of the Sundarbans about 9 o'clock on the morning of the 24th September 1919. It swept in a direct line across Khulna district, the north-western portion of Bakarganj, the Narail subdivision of Jessore and the greater part of Faridpur and Dacca districts. Then, with diminishing force, it passed over the western part of Tippera and the eastern portions of Mymensingh and Sylhet districts and ultimately dissipated itself in the Khasia Hills.

2. The cyclone can be pictured as a violent whirl moving across the map of Bengal. The whirl is a ring of hurricane winds blowing, not directly but with a tendency, towards the centre of the whirl. Strange to say, at the centre of the whirl there is absolute calm. The centre, however, is not stationary but moving at an average rate of 11½ miles an hour. The actual experience of any place in the path of the storm was a hurricane gradually becoming more and more furious, then a sudden lull lasting only a short time but perfect while it lasted, then the hurricane in all its former fury but with wind from an altogether different direction. Two or three hours after the lull the storm began to gradually abate and finally ceased about 12 hours after it commenced.

3. Meteorologists connect together by a curve on a map all the places where, at a specified time, the barometric pressure was the same. Such curves they call "isobars" and they depict a cyclone by a diagram of isobars. In this storm, as with all cyclones, it was found that the direction of the wind at any place was not truly tangential to the isobaric curve at that place but had a deflection towards the centre of the cyclonic whirl. As in all cyclones north of the equator the direction of the winds at various points on an isobaric curve was counter-clockwise.

4. On crossing the coast the storm was travelling almost due north, gradually it veered towards the east and ultimately, on leaving Mymensingh district, it was moving north-east. It is reported that the lull was experienced at various places at the following times, but several of these reports can only be regarded as approximately correct, viz.—Oura Sipsa 3 to 4 P.M., Pratapnagar 4 P.M., Dakop 5 P.M., Baitaghata 8 P.M., Khulna 8-35 to 9 P.M., Mollahat 10 P.M., Gopalganj 10-30 to 11-30, Bhanga midnight, Goalundo 1 A.M., (only a change in direction of wind), Mashurikhola 2-15, Bhairab 6, Kishorganj 6-30 A.M.

5. The cyclone was remarkable for its small dimensions and its great intensity. Though the Bakarganj cyclone of 1876 was far more destructive of human life, the value of property destroyed in 1919 was probably greater than in any storm in Bengal for the last 200 years. Yet, if places where the wind did not attain very great force are omitted, the diameter of the storm area was not more than 25 miles.

6. In Narail and Gopalganj subdivisions and in the north-eastern corner of Khulna district an additional terror was added to the hurricane and the storm wave by a vivid red glow appearing in the sky during the period of the lull. In Narail Subdivision this fiery glow came from the western horizon and was so bright that it is said to have illumined the surface of the earth for some time. In Gopalganj subdivision the red glare came from the south.

7. The country over which the cyclone swept is a land of great rivers. Immediately after the lull the hurricane winds drove the waves furiously along until they dashed like solid walls of water against the banks. The height of the waves was generally from 3 to 6 feet. By their violence they caused great destruction to all floating craft, river embankments, crops and all other property near the banks. The most serious damage was done on the Padma, especially in the neighbourhood of Lohajang; on the Meghna, especially at Narayanganj and Bhairab; on the Madhumati in Gopalganj, Khulna

and Pirojpur and on the Passur, Rupsa and other big rivers of Khulna. Storm waves were formed also on the *bils*. On the Arial *bil* between the Dhaleswari and the Padma and on the Kotwalipara *bil* the violence of the waves was so great that many houses and fields were engulfed and totally disappeared.

8. The storm lasted for about 12 hours at each place and left Mymensingh district about 11 A.M. on the 25th. It was accompanied in most places by heavy rain. There are not many Government rain-gauges in the affected tract, but taking them as fairly representative, they showed a general average of 5·93″ in Khulna district, 3·96″ in Narail subdivision, 6·33″ in Faridpur, 7·40″ in Dacca and 3·97″ in Mymensingh district.

9. Selections from various reports on the cyclone are given in Appendix A.

10. There are many people who still remember the last big cyclone in Bengal. It occurred on the 27th October 1909 and affected Khulna, Jessore and parts of the 24-Parganas, Nadia, Bakarganj, Faridpur, Dacca and Mymensingh districts. At Goalundo 22 steamers and flats were almost totally destroyed, the damage being estimated at 30 lakhs of rupees. The number of human lives lost in the 1909 cyclone was 996 as compared with 3,203 in 1919. The tidal wave or storm wave was higher in 1909, and the loss of cattle was returned as 96,317, as compared with 38,951 in 1919, but the accuracy of the figures of the earlier year is questionable. In 1919 the figures compiled at thanas were checked by the relief agency, but in 1909 there was no such agency and no check. In Khulna district alone it was reported in 1909 that 70,654 cattle were drowned or killed. The loss of such a large number must have told heavily on the district, yet it was not found necessary to give any relief. In that same district 582,602 houses were reported to have been blown down, yet the Collector, touring through the worst affected part of the district a fortnight after the cyclone, found that most of the houses had been re-erected. It is probable that the houses, though damaged, had not really been demolished. In short, no reliance can be placed on the figures of 1909, except perhaps those of loss of human life. So far as can be judged from the statements of persons who experienced both storms, the violence of the wind, the dimensions of the storm and the total damage done were far greater in 1919 than in 1909, though the damage done by storm waves was less.

SECTION II.—Loss of life.

(*a*) Loss of human life.

11. The latest enquiries show that the total number of persons known to have lost their lives in the cyclone was 3,203. As it was Puja time, many persons besides those whose business required them to be on the river were travelling to their homes from other districts. The drowning of such persons would not be reported unless the bodies were found. On *chars* where every habitation was swept away it would also be improbable that every death would be known. It is therefore certain that the total mortality was greater than that reported. It may be estimated at approximately 3,500.

12. Most of the deaths from drowning were due to the storm waves which tore boats away from their moorings and dashed them to pieces against the banks or against one another. These waves also caused the sudden erosion of the sites of dwelling-houses on the banks of rivers and *bils*; and many people were drowned in this way. Many others were killed by trees falling on them or on the houses in which they were.

13. In Khulna district 432 deaths were recorded, of which about 240 were due to drowning. Sixty-four persons were drowned in one union of Dakop thana and 27 in one union of Paikgacha. Both of these unions are on the banks of the Sipsa. It is reported that most of the deaths took place after the lull in the storm. The victims were nearly all of the cultivator classes—Muhammadans, Namasudras and Pods. Twenty-one deaths were ascribed to exposure.

In Jessore district, Narail subdivision, only 7 persons were drowned, but 20 were killed by houses or trees falling on them.

In Bakarganj also the loss of life from drowning was much less than that caused by falling trees. The latter numbered 52 and the former only 3.

Six hundred and twelve deaths occurred in Faridpur district, of which 395 were due to drowning and 193 to falling trees and houses. The mortality from drowning was greatest in the *chars* of the Padma and on the banks of the Kotwalipara *bil*. In Kotwalipara thana alone 110 persons were drowned. Though the houses are built on mounds raised to provide safety, the storm waves of the *bil* carried away not only houses but also the mounds on which they stood. The storm waves also caught and submerged some persons who during the lull were hurrying for shelter from one mound to another. At Olpur, two teachers of the high school, hearing cries for help from neighbouring houses, went in a boat to render help. This was during the lull. They never returned and must have been drowned when the hurricane winds began afresh. The Collector reports that a special fund has been raised for the relief of their widows. An extraordinary occurrence reported is that in Kotwalipara a *bebejia* (river gipsy) was killed by a flying corrugated-iron sheet, his head being severed from his body.

In no other district was the loss of human life so great as in Dacca. One thousand nine hundred and twenty-eight deaths were reported, of which 90 per cent. were due to drowning. No less than 1,199 deaths occurred within Lohajang thana, most of them being residents on the *chars* of the Padma. The people had taken refuge on the roofs of their houses and were precipitated into the water when the houses were smashed by the force of the waves. For days afterwards passengers by the Goalundo-Narainganj mail steamer met the gruesome spectacle of many dead bodies floating in the river. By some set of the current many other corpses were thrown up on the river bank at Lohajang where, on a stretch of land about 5 miles in length, 550 corpses were found and buried. Other deaths occurred in the *bil* areas of Srinagar and Nawabganj thanas and were due to the sites of the houses being swept away by storm waves. The weather during the day of the 24th was boisterous and most boats were tied up for the night; but many were carried away from their anchorage and dashed on the shore or overturned in the stream. One family in a village of Nawabganj thana took refuge in their boat at their ghat from their falling houses. The boat was carried off into the Dhaleswari and most of the family drowned. There were instances of marvellous escapes. One man was carried away by the current from Mewa *char* opposite to Lohaganj; he lost consciousness and recovered to find himself washed up 5 miles away in Bahar bazar, having been carried across the Padma, several village sites and a *bil*. The vagaries of the current gave rise to such anomalies as people starting on the same roof finding themselves separated and carried some up and some down stream.

In Tippera district 30 persons were drowned and 10 killed by falling houses or trees. A lady going home for the Pujas with her children, her father and servants, nine persons in all were drowned in the Meghna; only the two boatmen and a maidservant were saved.

In Mymensingh the number killed was 123, of whom about one-half were drowned and the remainder crushed under falling trees or buildings.

(*b*) Loss of cattle.

14. The total number of cattle reported to have been killed in the cyclone was 38,951. Most of the deaths were due to drowning and occurred on the banks of rivers and *bils*. Some cattle also were killed by trees falling on the cowsheds.

15. A mature cow is worth about Rs. 40 and a bullock about Rs. 50. Making allowance for young or worn-out stock and for the fact that, in Khulna, goats were included with cattle, the average value per head may be taken as Rs. 10 or 11, and the total loss due to destruction of cattle may be estimated roughly at 4 lakhs of rupees.

16. The heaviest mortality was in Khulna where 28,029 cattle were reported to have been killed. These figures include goats; but it may be estimated that about 14,000 cattle perished. The mortality was greatest in Rampal, Morrelganj, Dakop, Paikgacha and Shyamnagar where many people, fearing the subsidence of the sheds, let loose their cattle and they were drowned in the floods. For many days after the cyclone the rivers in the south of the district were teeming with corpses of cattle.

In Bakarganj district 970, and in Jessore 434 cattle were killed. Nearly all the deaths were due to falling trees, very few to drowning.

In Faridpur the number of cattle lost was 3,639. On the *chars* and in the *bil* areas where the greatest human mortality occurred, there also the largest number of cattle perished.

Five thousand five hundred and thirty head of cattle were killed in Dacca district. On the Padma *chars* practically all the cattle were swept away and drowned. The total number drowned in the whole district was about 4,000.

Only 12 cattle in Tippera district were reported to have been killed. All the deaths ware caused by falling trees.

Mymensingh district lost 732 cattle. In Mitamain and Tarail, where the fields were under deep water, most of the deaths were due to drowning. In other places most of the casualties were caused by falling trees.

17. In Appendix B, a statement will be found showing the loss of human life and of cattle, district by district and subdivision by subdivision.

SECTION III.—Other damages.

(*a*) Private Buildings.

18. Residential buildings were destroyed wholesale. The bulk of the raiyats' houses are *kutcha*, with thatched or corrugated iron roofs. When even masonry structures were blown down it would have been a matter for surprise that any *kutcha* houses were left standing, were it not for the dense growth of trees and bushes by which most of them were screened from the wind. It is not possible to express in figures the number, and still less the value, of the buildings blown down. Local officers were asked to report the number of dwelling houses and shops demolished in each subdivision, and the figures given by them will be found in Appendix B. No great reliance can be placed in those figures, for it is known that some officers reckoned cowsheds, kitchens and other outhouses as separate buildings, and, while some included even houses only partially unroofed as demolished, others omitted all except houses which had entirely or almost entirely lost their walls and their roofs. For instance, the local officers in Narail subdivision at first reported that 66,357 houses had been demolished. The Collector pointed out that the population of the area affected was about 216,000, that the average number of persons per house was about 5 and that probably not more than 60 per cent. of the dwelling houses had been demolished. The local officers were therefore ordered to revise their reports, and their final estimate is that 14,152 dwelling houses and shops were demolished. It is of course true that the reconstruction of an out-house involves expense, but such expense is far less than when a dwelling house has to be rebuilt. Instead of relying on imperfect figures, an idea of the damage suffered can best be conveyed by a general descriptive account.

19. In the most affected parts of Khulna district scarcely a single *kutcha* house was left standing, and several entire bazars were levelled to the ground. At Bagerhat and other places substantial *pucca* pillars were torn out and thrown down.

Bakarganj suffered less severely, but thousands of houses lost their roofs and many were damaged beyond repair.

In Narail subdivision the raiyats in Naraganti, Kalia, Alfadanga and Lohagara thanas lost at least 75 per cent. of their buildings of all kinds. The bazars at Naraganti, Kalia, Bandia, Dighalia, Lakhipasha, Chachuri-Purulia and Siddhipasha were badly shattered.

The Collector reports that, in the affected area of Faridpur, practically all the thatched huts and corrugated iron sheds were either levelled to the ground or torn till only the posts were left standing. In the *bil* areas of Gopalganj, especially, the scene of devastation was almost indescribable.

In Dacca district the Collector estimates that about 50 per cent. of the raiyats' dwelling houses were unroofed or blown down. The *chars* in Lohajang thana were completely denuded of houses by the storm waves. In other places much damage was done by falling trees, and corrugated iron sheets were often either blown away or so twisted as to be useless. Even masonry buildings suffered severely. No more striking proof of the extreme violence of the storm could be offered than the demolition of the substantial *pucca* godowns of Messrs. Birkmyre Brothers and Messrs. R. Sim & Co. at Narayanganj. One godown of the latter firm had walls buttressed by brick pillars 2½ feet square, with a skeleton of cast iron, and sunk 4 feet in the ground; yet not only the walls but also all the pillars were blown down.

The Narayanganj Chamber of Commerce has not been able to furnish estimates of damage because some of the members prefer that such information should be kept confidential. The Collector estimates roughly that the loss caused by the cyclone to jute firms in Dacca amounted to 15 lakhs and in Narayanganj to 150 lakhs of rupees.

In the affected parts of the Tippera district no damage was done to masonry buildings, but most of the *kutcha* houses with corrugated iron or tin roofs were blown down or unroofed. The Deputy Superintendent of Police counted some 400 fallen houses in a sample area of one square mile.

In the worst affected parts of Mymensingh most of the houses were blown down, and in other parts no village entirely escaped injury. The unfortunate people had to take refuge under collapsed roofs or any other remnants of their houses which could be propped up to give some shelter.

20. With the subsidence of the buildings, furniture and utensils were smashed, clothes and other property were blown away and completely disappeared and stocks of grain, seeds and other produce were greatly reduced in value or entirely spoilt by the rain. One of the heaviest items of this kind of loss was the damage done to bundles of jute waiting to be sold. Much good quality fibre was reduced to the class of "rejections." Raiyats keep their own stocks of seed of most of the *rabi* crops, and the loss of these seeds was a serious matter, because traders who had stocks immediately raised their prices. District officers have had estimates made of the loss sustained by the damage to property kept in houses; but where conditions vary so greatly from house to house, it is a practical impossibility to make reliable estimates. It seems better to avoid quoting figures which may only give misleading impressions and to state simply that the damage was enormous and amounted to many lakhs of rupees.

(*b*)—Public Buildings.

21. The damage done to public buildings of all kinds was exceptionally severe, probably because many of them occupy conspicuous and exposed positions.

22. In Khulna 14 post offices, 19 dispensaries, 2 veterinary dispensaries, 14 forest offices and 13 inspection bungalows were damaged. The police lines at Khulna and Bagerhat were wrecked and many thana buildings completely demolished. The total cost of cyclone repairs to police buildings is estimated at Rs. 3,81,300. In the jail and the excise buildings also very extensive repairs will have to be carried out. The damages to such public offices as kanungos', tahsildars' and sub-registry offices will be borne by Government, while the District Board has to provide Rs. 11,150 for repairs to dispensaries, Rs. 2,900 for inspection bungalows, besides grants for Board schools and aided schools and repairs to roads. The Khulna Municipality also has to repair its buildings at an estimated cost of Rs. 2,500.

In Bakarganj district public buildings did not suffer very much, except at Pirojpur, where several *kutcha*, and a few *pucca* houses were damaged. The heaviest losses fell on the village primary schools and on the Police Department. In the northern thanas of the district many mosques or

jumaghars and temples were demolished and images of the goddess Durga were shattered with the fall of the temples.

Several police buildings in Narail subdivision were levelled to the ground, and others were badly damaged; the total cost of reconstruction and repairs is estimated at Rs. 19,400. Schools, post-offices, dispensaries, inspection bungalows, etc., also suffered just as in other districts.

In Faridpur the cost of repairs to buildings of the Public Works Department is estimated at Rs. 7,300, of the Police Department at Rs. 20,900, of the District Board at Rs. 4,900 and of the Khas Mahal Department at Rs. 7,700. Three Munsifs' courts at Chikandi and the subdivisional offices at Gopalganj were blown down. Schools suffered severely and so also did the *kutcha* mosques of the Muhammadans.

The severity of the storm in Dacca district can be judged from the fact that for 155 buildings maintained by the Public Works Department, nearly all of which are *pucca* or semi-*pucca*, the average damage was Rs. 1,300 per building. The roofs of Government House and of the staff quarters were blown off and the porch collapsed, while servants' quarters, out-offices, hospitals, etc., were laid flat with the ground. The avenues and many other fine trees which adorned the new and the old cities were overthrown and, in falling, did immense damage to electric light, telegraph and telephone wires as well as to houses and to compound walls. The Military Police officers' quarters and married men's lines at the Pilkhana were shattered and so were also the semi-permanent civil court buildings at Munshiganj. At Singair, where the thana buildings had only been constructed a year before, brick-nogged walls were badly cracked. Repairs to Public Works Department buildings and electric installations in Dacca district alone are estimated to cost Rs. 2,16,000 besides Rs. 65,000 required for repairs to buildings maintained by the Police Department. No less than 96 post offices were demolished and 66 badly damaged. The District Board fared worst of all; all the 16 inspection bungalows in the district were damaged more or less, and the out-houses of the Sabhar bungalow which had only just been completed, were totally wrecked. Five dispensaries will have to be rebuilt at a cost of Rs. 31,000; Rs. 10,000 will be required for repairs to the remaining 15 and the replacement of medicine destroyed will cost Rs. 5,000 more.

In some parts of Tippera district, the residences of Government officers and public buildings, such as thanas, schools, dispensaries, sub-registry offices and post offices were damaged, but not to a very serious extent.

At several places in Mymensingh district most of the public buildings were wrecked. This was very noticeable at Gafargon, Iswarganj, Barhatta, Kendua, Netrakona, Kishorganj and Bajitpur. The repairs to Public Works Department buildings are estimated to cost about Rs. 13,000 and buildings maintained by the Police Department Rs. 83,000. The damage to dispensaries and inspection bungalows will cost the District Board Rs. 30,000.

A special feature of the cyclone is the enormous number of school buildings which suffered serious damage. The extent of the loss can be gauged from the following figures which have been carefully revised by the Inspectors of Schools :—

District.	Number of primary schools damaged.	Minimum cost of repairs.	Number of middle schools damaged.	Minimum cost of repairs.
		Rs.		Rs.
Dacca	1,901	1,17,980	87	38,639
Mymensingh	483	84,576	87	36,000
Faridpur	1,395	44,000	56	27,219
Bakarganj	391	18,134	69	11,989
Khulna	Separate figures not supplied.			
Jessore				

District.	Number of high schools damaged.	Minimum cost of repairs.	Total of schools damaged.	Minimum cost of repairs.
		Rs.		Rs.
Dacca	46	1,57,821	2,034	3,14,440
Mymensingh	28	50,925	598	1,71,501
Faridpur	29	60,669	1,480	1,31,888
Bakarganj	2	1,050	462	31,173
Khulna	Total for all schools except high schools and junior madrassas and schools altogether unaided.			28,956
Jessore				7,169
			Total ...	6,85,127

The above are all boys' schools. In Dacca Division 282 girls' schools were also damaged and the cost of repairs is estimated at Rs. 16,333.

24. Towards the cost of reconstructing and repairing the school buildings Government has sanctioned liberal grants, and the District Boards have given special grants to the schools aided by them. The local people are expected to contribute the remainder of the cost, which will probably be not less than 3 lakhs of rupees. For unaided primary schools, of which there are large numbers, it has not been possible to give any grant from State or District Board funds, but to assist the local people in restoring their primary school buildings, the Central Cyclone Relief Committee has given a special grant of Rs. 60,000 and smaller grants have also been made from district relief funds.

(*e*) Communications.

25. Extensive damage was suffered by the Bhairab-Mymensingh Railway. A large percentage of the stations and staff quarters was blown down. These were only temporary structures; but the force of the wind was so great that it capsized two trains and overturned many wagons stabled at wayside stations. Most of the pontoons and landing stages of the wagon ferry at Bhairab were sunk, and damaged. Two of the steamers were also sunk of which one has been refloated, but the other became a complete wreck. Traffic across the river from Bhairab to Ashuganj was stopped for a month, and the train services between Bhairab and Kishorganj were completely disorganized. The damages to this railway will cost about 3 lakhs of rupees. On the Bhairab-Tangi and Dacca-Mymensingh lines the damage to quarters and stations was less serious, but two wagons blown over at Dacca blocked the line for several hours, and the cutting of the embankment by storm waves made travelling from Narayanganj to Dacca very slow for some days. On the Khulna-Bagerhat line damage was done by storm waves cutting away the approaches to bridges; a jetty also fell into the river; but repairs will not be very expensive.

26. District Board roads were damaged by storm-waves in Khulna district, and it will cost Rs. 14,000 to repair them. The Madaripur Bil Canal was very severely damaged. The greater part of the embankment from Haridaspur to Gopalganj was washed away, and along the canal proper there are many breaches and scours in the embankments. Most of the buildings on the banks were unroofed and some boats were sunk. At Narayanganj a portion of the *pucca* embankment and several jetties were smashed by flats pounding against them. At Bhairab also the *pucca* embankment on which some godowns stood was destroyed. In the south of Khulna district large areas of rice land are protected by embankments, and it is estimated that the repair of the damage caused by the cyclone to these embankments will cost about Rs. 27,000. In Faridpur district the embanked road along the Madhumati was so extensively damaged that it will have to be entirely reconstructed. In Dacca town the Buckland Bund, which is faced with brick and cement, was breached in several places and repairs will cost at least Rs. 6,000. The embanked road from Mirpur to Fulbaria was also severely damaged, and the District Board will

have to spend Rs. 10,700 on repairs of this and other embanked roads. In Bakarganj the District Board road passing through the *bil* area was damaged to the extent of about Rs. 5,000.

27. The Director of Telegraph Engineering reports that—"This was the worst cyclone that ever affected the working of the telegraph lines. For miles and miles the telegraph and telephone lines were levelled to the ground. Rail posts were twisted round and broken; tubular masts 60 to 80 feet in height with *sal* supports were destroyed beyond recognition. One of the rail masts, 90 feet high, near Narayanganj was twisted round and broken in two. The section of line between Manikganj and Dacca suffered the most. The entire length was brought down by the storm and covered by large fallen trees. To aggravate the situation this section was inundated to a height of 3 to 4 feet. The main lines between Dacca and Baider Bazar practically suffered the same fate. Similar damage was done in the Barisal and Khulna districts. The entire telephone systems at Dacca and Narayanganj were practically levelled to the ground; the exchange at Dacca was unroofed. Two cables across the Meghna near Baider Bazar failed during the storm; so did the cables at Narayanganj and near Munshiganj. The failure of the cables is attributable to their having been dragged by the anchors of boats and steam launches that were sunk during the storm. This is the principal damage done to the lines of the Dacca Division. As a matter of fact, 80 per cent. of the total mileage of lines and wires was down."

28. The officers of the Telegraph Department rose to the occasion, promptly organized parties to make temporary arrangements and, by dint of unsparing toil under conditions of great difficulty, communication between Dacca and Comilla was restored by midday on the 1st October, and all lines were working again by the evening of the 8th. The restoration of the telegraph and telephone lines cost the department over Rs. 20,000 in cash and about Rs. 50,000 in stores. The replacement of the cables that failed will involve a further expenditure of Rs. 40,000.

(d) River Craft.

29. An enormous amount of damage was done by wind and waves to river craft. Vessels of all kinds, large and small, owned by Indians and Europeans, suffered equally. Omitting boats which were refloated without serious damage it is reported that altogether 11,999 boats were irretrievably lost or so shattered that they could not be used again without being repaired at considerable expense. The greatest loss naturally fell on the India General Navigation Railway and Rivers Steam Navigation Companies; but to hundreds of petty traders and boat owners the cyclone must have caused the loss of practically all they had in the world. Many of the country boats lost were of considerable capacity and contained valuable cargoes of jute, rice, and other commodities. It would be impossible to obtain a reliable estimate of the total losses, and no useful purpose would be served by an attempt to express them in figures.

3 . At Khulna, at the point where the three rivers join, the SS. "Arjuna" sank. Eleven lives and all the cargo were lost. The flat "Bellona" sank in the Sundarbans. Six other steamers and 9 flats were badly grounded and 7 steamers and 14 flats suffered damage to vessels and cargoes. All of the above belonged to the two big river steamer companies. In addition, other companies also lost or sustained damage to their steamers and flats. The country boats irretrievably lost numbered 1,269, of which no less than 800 were in Khulna thana, where the steamer companies also incurred the greatest part of their loss.

In Bakarganj 25 large native cargo boats and 66 smaller boats sank, One of these was a boat carrying 1,000 maunds of salt which was lost near Gaurnadi and another sank near Barisal with 200 maunds of rice.

In Narail subdivision 68 country boats sank; some of them were recovered, but their cargoes, which were mostly rice and paddy, were lost.

In Faridpur district one flat loaded with Burma rice was sunk near Palong and some 22 other flats at various places were damaged. The SS.

"Vayu", conveying piece-goods and sugar, was wrecked near Naraganti. One thousand three hundred and twenty-two cargo boats with property valued at 2¼ lakhs of rupees were lost. It may be mentioned that the Collector has taken special care regarding these statistics and has excluded all boats which were subsequently recovered or which had no cargo. In the *bil* area of Gopalganj subdivision over 900 out of 1,200 boats sunk were recovered and made serviceable again.

Of the shipping owned by the India General Navigation and Railway and Rivers Steam Navigation Companies at Narayanganj, 6 flats were sunk, 11 were unroofed and 12 others took in water by which the cargoes were damaged. Three of the jetties at Narayanganj Railway Station were practically destroyed and pontoons sunk. Boats of all sizes were piled up against them by the wind, the effect being to crush the jetty girders which collapsed. Half of the roof of the Steamer Company's flat "Tegra" was lifted bodily by the wind, and blown over the station buildings and the railway tracks and deposited on a vacant space without doing any damage in its flight. A small country boat caught fire in the Sitalakhya khal and the fire spread to two jute-laden flats which broke from their moorings and were driven against the boat and close to a bungalow which was also burnt. The blaze attained great proportions, and ultimately the flats had to be sunk to prevent the fire spreading further. Every flat in the river at Narayanganj was damaged by collision either with other flats or with masonry structures on shore. The "Ganges" had her bows staved in and the "Rajkot" a hole 11 feet long in her side. The flats "Passar" (coal-laden) and "Puddah" (jute-laden) were driven first from Gopchar where their moorings broke into the Sitallakhya khal. Here they collided with the "Nudwa" (flat) and drove her through two of Messrs. M. David & Co.'s jetties. These are made of teak wood (solid 14 inches square). The "Nudwa" was finally driven into the verandah of the Company's assorting shed; her name-plate and *chapper* being left plastered on the wall of the factory. With a change of the wind the "Passar" and "Pudda" were carried clear of the khal and stranded on the east bank of the Lakhya by the Angus Press. Sitallakhya point, jutting out into the face of the storm, was a natural landing place for wreckage and in the morning the flats "Rajkot," "Hilsamari," "Nudwa," a Bengal and Assam Company's barge, the "Tumsar" and many smaller craft were stranded on it.

In other parts of Dacca district the Steamer Companies sustained the following damages; viz:—15 flats, 3 steamers, 9 barges, 1 steam launch and 1 pontoon damaged, one steamer sank. The SS. "Bombay" had a very bad experience. The second serang was blown away with the cabin on the upper deck in which he was sleeping and no trace of him was ever found. The steamer grounded about 5 miles above Lohajang and up till February it had not been possible to refloat her. At Dacca four launches were sunk, including the "Diana" of the Police Department, and 5 launches owned by jute firms were sunk at Narayanganj. The number of country boats sunk with cargoes is reported as 7,513 for the whole district, of which more than a third were in Narayanganj subdivision. The number would have been greater but for the fact that the foul weather during the day warned the boatmen to take shelter before the storm assumed serious proportions.

About 60 boats are reported to have been lost in Tippera district, but probably many of these were recovered. At Ajabpur, on the Meghna, a steam launch and 7 boats laden with jute sank.

Four flats laden with jute were sunk at Bhairab. In the whole of Mymensingh district, the number of country boats sunk while conveying jute, rice and other goods is reported as 1,425; but this probably includes some which were empty or were not lost beyond recovery.

31. It was at first reported that raiyats had suffered much loss by jute, which was steeping in the rivers, being carried away by storm waves. On enquiries being made it was found that the amount of jute lost in this way was comparatively insignificant, and most of it was ultimately recovered. The storm waves did, however, carry away not only steeping jute but also bundles and bales of jute. Some persons gained and some lost. There were many

disputes ; but a bundle of jute is not an article that can be identified with certainty.

(e) Standing crops and trees.

32. The only jute still standing at the time of the cyclone was the portion left for seed. This was a total loss ; for all the seed was blown away. Fortunately, the largest seed-producing areas were not within the area severely affected by the cyclone ; but the demand for seed this year will be so much greater than usual that there may be a shortage in some places. The Agricultural Department has arranged for a considerable stock to supply the needs of those who lost their seed crop and cannot get good seed in the market. The areas where it seems likely that there will be the greatest need for seed are Mollahat in Khulna, Gopalganj subdivision, Sibchar in Madaripur; Harirampur and Singair in Manikganj subdivision ; Rupganj thana and other places on the banks of the Lakhya.

33. The cyclone occurred at a time when the paddy crop was generally well established and able to stand rough treatment. There was only one variety in flower at the time, which was the early variety of broadcast paddy usually known as *Lakhidigha*. The damage done to this variety was very great ; perhaps as much as 75 per cent. of the crop was lost ; but fortunately the area occupied by this variety is very small in comparison with the later kinds of *aman*.

34. The rain and the flood caused severe damage to late transplanted paddy in Khulna ; but in other parts of the district the crop was improved by the sweet water. In Bakarganj there was no appreciable damage, and the cyclone was very beneficial to the paddy crop, both transplanted and broadcast. Faridpur district and Narail subdivision produce only the broadcast varieties of paddy. The storm uprooted and carried away a large portion of the crop in the *bils* and, where the land was higher, damage was done by masses of water-hyacinth and other weeds being driven on to the paddy which they choked and killed. So far as Narail and Gopalganj subdivisions are concerned, the paddy crop is reported to have proved light in the ear, and the subdivisional officers estimate the damage caused by the cyclone at a half of the paddy crop. These estimates seem however to be somewhat pessimistic. In the other subdivisions of Faridpur less damage was done, and the crop was not much below normal. In Dacca district some broadcast paddy in *bil* land was uprooted ; but the crop in those areas is always precarious, and in Bil Belai the raiyats reaped the best crop they have had for a decade. North of the Dhaleswari where transplanted paddy is grown the crop was benefited greatly by the rain which accompanied the cyclone. In Tippera the little damage to broadcast paddy was more than compensated by the gain to the transplanted crop. In Mymensingh even broadcast paddy was improved on the whole, for rain had been badly needed ; and to transplanted paddy the gain was very great.

35. On the whole the outturn of paddy appears to have been at least as good as it would have been if the cyclone had not occurred.

36. The cyclone caused great havoc among trees. According to custom, the raiyat is entitled to the fruit of a tree, but the timber belongs to the landlord. The destruction of fruit trees is a loss to the raiyat which it will take many years to replace. Few date and cocoanut palms were blown down, but many *supari* (betel-nut) trees fell or were broken and killed. In those parts of Khulna, Bakarganj and Jessore districts where the storm was most intense it is estimated that at least one-half of the *supari* trees were destroyed, and in some places entire groves were swept to the ground. The loss of the betel-nuts and cocoanuts blown away by the wind fell heavily on poor raiyats who at that time of the year depend on the sale of fruit to buy their daily food. In the northern half of Dacca district raiyats rely largely on the sale of jack fruit to pay their rent. Though, perhaps, not more than 10 per cent. of the jack fruit trees were blown down, even that is a serious matter for the raiyats and their landlords.

37. The *pan* (betel leaf) plantations represent the most costly form of cultivation in the province. These rows and lines of carefully nurtured

creepers, on their slender supports, lightly screened above and around, were thrown violently to the ground and most of the plants were killed. Excepting those in specially sheltered positions, the cyclone spared hardly any and the loss inflicted was enormous. Fortunately the *barois*, who carry on this form of cultivation, are better able than most classes of the community to bear a heavy loss.

38. The raiyats were deprived of another valuable source of food by the wholesale destruction of plantain trees. Clumps of bamboos also suffered severely, most of them were broken, but many were even uprooted. Timber trees and trees of all kinds fell or were shattered and broken. Those that fell were very useful for the rebuilding of houses. In fact, the demand was so great in many places that for some days a single bamboo could not be bought for less than a rupee. In the *gazari* forests in the north of Dacca district it is estimated that from 10 to 20 per cent. of the trees fell. This however was no loss; for the forests needed thinning and the royalty on the fallen timber in the Bhawal Wards' estate alone is expected to yield 11½ lakhs of rupees. Not much damage was done to the Sundarbans forest, and it was mostly confined to trees on the water's edge. The blasting effects of the storm were shown by the leaves of the bamboos which still stood turning yellow. At many places, particularly Narayanganj, all the leaves were stripped off the trees; but never was the enormous recuperative power of nature shown more strikingly. Within 10 days the trees, even many of those which had fallen, had put on new leaves. Within a month a casual traveller would have found little in the general appearance of the country to make him realize that there had ever been a cyclone.

SECTION IV.—Organization of Relief.

(a) General conditions.

39. The situation created by the sudden destruction of houses and property was complicated by the economic conditions prevailing at the time. The already existing problems of providing food and clothing were greatly intensified and problems of providing shelter and preventing disease were added. Early in June the price of rice had begun to rise from causes connected with the war and failure of crops in India. So far as the agricultural population was concerned this was counterbalanced by the high prices ruling for jute (Rs. 14 to Rs. 20 per maund), so that, in spite of the dearness of cloth, kerosine oil, sugar and condiments, cultivators were sufficiently well off. The high prices bore most hardly on the industrial and middle class population with small incomes and, after these, on the landless labourers; these classes constitute considerable sections of the population, more particularly in the towns and in the subdivisions of Munshiganj and Madaripur.

40. Early in August it was apparent that supplies of rice were short and consequently prices rose enormously, probably a good deal more than the situation justified. This was met by the introduction of a system of importing rice from Burma to Calcutta and Chittagong, where it was bought by traders or agents approved by District Magistrates, conveyed by them to the districts and sold at controlled rates. Prices of common *balam* went up as high as Rs. 13, but gradually came down, as Burma rice got into the local markets, to between Rs. 9 and Rs. 10 per maund just before the cyclone. At various places committees had been formed to supply Burma rice at controlled retail prices to poor people; these committees did very useful work afterwards in connection with cyclone relief.

41. As already said, the prices of jute in the early part of the season were extraordinarily high, but traders were not inclined to take more than enough to cover their immediate requirements, and many raiyats also held back hoping for still bigger prices. Early in September, instead of rising, prices of jute suddenly fell by about 50 per cent. and have remained practically steady at about that level. Disappointed in their hopes of extraordinary profits, and no longer able to meet the enhanced cost of food and other

commodities, the raiyats were crushed by the disaster of the cyclone, but without the very high prices prevailing in the early part of the jute season, their condition would have been far worse. It is calculated that the area under jute in the cyclone-affected tract is about 872,000 acres and that the crop obtained in 1919 was 136 lakhs of maunds, out of which the raiyats had, by the 31st December, sold 85 lakhs of maunds for about 8 crores of rupees, while 51 lakhs of maunds, worth about 255 lakhs of rupees, still remained in their hands (*vide* Appendix C).

42. With the collapse of the market, all jute business came to a standstill early in September and was not resumed to any extent until the end of November. Having nothing to sell except their jute, cultivators were pinched for money and credit was unobtainable. Money however was imperatively required to rebuild their houses and to buy food. For their relief it was necessary to distribute agricultural loans on a large scale. Still worse was the condition of non-cultivators, especially infirm people, widows and orphans. For these it was necessary to organise gratuitous relief in rice to keep them from starvation, in cash to help them to re-erect their houses and in cloth to enable them to appear decently in public. Something also had to be done for the preservation of life among professional beggars whose needs could not at such a time be met by private charity. For poor *bhadralok* some special form of relief had to be devised which would not expose their misery to the public and take away their self-respect. For the people in general who suffered from the cyclone and who could not afford to buy local rice it was necessary to make cheap Burma rice available at all the principal markets.

(*b*) Immediate Relief.

43. The cyclone had disorganized all telegraphic, postal, river, rail and road communications and in any case it was absolutely necessary to give some immediate relief before Government orders could be obtained. The District Officers rose to the occasion. The Collector of Dacca temporarily appropriated a fund of which he was trustee and distributed Rs. 70 in each of the 325 unions in the district. This relief was distributed within a week after the cyclone through gazetted officers, all of whom were actively employed on relief work throughout the Puja vacation. At the same time relief circles were formed and constituted the basis of the complete organisation subsequently developed.

On the 1st October Government gave by telegram *carte blanche* authority to all Collectors to do all that was essential to relieve distress. Unfortunately full advantage of this could not be taken immediately because the treasuries did not reopen for business until the 11th October. In the Madaripur and Gopalganj subdivisions of Faridpur district a network of relief committees was organized within a week after the cyclone by the Collector and Subdivisional Officers, enthusiastically supported by non-official gentlemen. The funds immediately necessary were procured by taking temporary advances from loan banks and the District Board.

In Mymensingh the Collector came to the conclusion that the most important and urgent need was to bring down the price of rice while at the same time he gave relief in cases of destitution. The energies of the district staff were concentrated chiefly on measures to make Burma rice available at a low uniform price throughout the district. Money was borrowed from a Court of Wards estate, and rice was taken on credit from importers at Bhairab.

The District Board of Khulna made a grant of Rs. 5,000 with which rice, *dal* and salt were bought and supplied for sale at police and forest stations. Rice and cash were also given away gratuitously in necessitous cases. Some relief committees were constituted in those early days and were followed by the formation of local committees of the Bengal Relief Fund on the 8th and 9th October.

The Subdivisional Officer made a tour throughout the affected area of Narail subdivision immediately after the cyclone and formed ten relief committees, each of which realized local subscriptions and gave doles of rice

to the most necessitous cases. Unfortunately the Officiating Collector was ill and the Subdivisional Officer's reports were not communicated to Government nor was any action taken on them until the permanent Collector (Mr. Manooch) returned from leave on the 20th October. In Bakarganj district the Collector received contributions of Rs. 200 from the Bidyasagar Memorial Fund and of Rs. 150 from the Bengal Relief Fund. This money was distributed through Government officers and missionaries working in the affected tract. In Tippera district a grant of Rs. 3,000 was made from a relief fund previously inaugurated by Mrs. K. C. De and with this money rice and cloth were distributed through Subdivisional Officers.

44. From the 4th to the 11th October the Hon'ble Mr. J. G. Cumming, Member of the Executive Council, Bengal, toured in the districts of Mymensingh Dacca, Faridpur and Khulna. He saw the damage done by the cyclone, inspected the relief measures already at work and discussed with local officers the lines on which the further relief still required should be given. On returning to Calcutta he drew up a note of instructions to me containing a complete scheme of relief organization. Mr. Cumming's visit had greatly encouraged the local officers, inspired them with confidence and helped them with advice as to methods of organization. A copy of his instruction to me was also sent to each Collector. On my return from leave on the 10th October I was placed in general charge of all relief operations in Dacca Division and subsequently also in Khulna and Jessore districts. In Tippera district the relief work remained under the Commissioner of the Chittagong Division.

45. On the 3rd October an appeal over the signature of His Excellency the Governor of Bengal was issued for help to the people in distress owing to the cyclone and on 15th October a meeting was held to inaugurate the Cyclone Central Relief Committee, of which His Excellency became president.

46. The Hon'ble Mr. Cumming was Chairman of the Executive Committee which administered the Cyclone Relief Fund, and he also superintended the relief provided from State funds. Throughout the operations I received from him constant instructions and advice and am greatly indebted to him for help and encouragement.

(*c*) Systematic Organisation.

47. The first step in the development of systematic operations was to divide the whole of the affected area into relief circles, each of which was placed under a Circle Relief Officer, assisted by one or more other officers according to the size and importance of the circle. To co-ordinate relief work and prevent overlapping, non-official relief agencies were persuaded, as far as possible, to take entire responsibility for the relief of entire unions. Circle Relief Officers were instructed and supervised by Subdivisional Officers who, in their turn, were directed and inspected by the Collector. The relief circles formed in each district are recorded in Appendix D.

48. Within each circle various committees were formed to assist the Circle Relief Officer with information, to prepare lists of persons in need of the various forms of relief and to distribute gratuitous relief under the supervision of the Circle Relief Officer. Where the system was fully developed a relief committee was formed for each union and was constituted with the members of the union committee and panchayat as the nucleus and additional members co-opted or appointed for the purpose. The members of any non-official relief agency working in the union were asked to join the union relief committee. Throughout Dacca district, the Sadar and Bagerhat suddivisions of Khulna and in Narail subdivision, union relief committees were formed. Thana relief committees were established in Faridpur district and also subsidiary committees, but the latter did not take the local panchayat as their nucleus nor was there a separate relief committee for each union. The main work of thana relief committees in Khulna and Faridpur was to arrange for the distribution and sale of supplies of Burma rice. In Mymensingh little, and

in Tippera and Bakarganj no help was received from local committees, but relief lists were prepared by presidents or tahsil panchayats. In all districts it was the duty of the Circle Relief Officer to check in each union the relief lists prepared by the local agency, to see that they were not only complete but also that they did not include persons to whom relief should not be given and that the form of relief recommended in each was appropriate to the circumstances. When the Circle Relief Officer had checked the relief lists and ordered the form and amount of relief to be given to each person, one day in the week was notified on which relief was distributed according to the sanctioned list. All disbursements were entered in a relief statement in form E-1 and in a ticket given to the recipient in form E-2. It was the duty of the Circle Relief Officer to arrange to furnish the relief committees with the necessary supplies of cash, rice and cloth for the weekly distributions. The Circle Relief Officers reported their requirements to the subdivisional officer who informed the Collector. The number of official relief committees formed in each district is shown in Appendix E.

49. The preparation and checking of relief lists took a long time because the officers deputed to relief work were inadequate in number, and many of them were juniors and strangers to the district. People could not be left without food or shelter ; so, in the beginning relief was disbursed as well as it could be done on the basis of unchecked lists.

50. During the Puja vacation all available executive officers were employed solely on relief work, but when the courts reopened the ordinary work of administration had to be carried on and a special corps of relief officers had to be organised from officers deputed from the Settlement, Co-operative, Agricultural and Excise Departments and from other districts. Ultimately 38 sub-deputy collectors, 14 kanungos, 13 co-operative department officers, 46 agricultural officers and 5 excise officers joined for relief work ; but many of the sub-deputy collectors and kanungos did not join until November.

51. To provide Circle Relief Officers with the necessary supplies of rice, cloth and seeds depôts were established at the places mentioned in Appendix F.

52. To convey materials to the depôts and from depôts to distributing centres, boats were hired or borrowed and launches were employed to tow them. For this purpose and to enable the superior officers to travel quickly when inspecting and directing relief work 12 large Government launches and 12 river police patrol launches were placed at my disposal and allotted to Collectors and other officers according to their needs.

(*d*) Relief from private funds supplementing State relief.

53. The principles determining the division between the relief to be given from State funds and that to be provided by public charity were laid down by the Hon'ble Mr. Cumming in a memorandum which was adopted by the Executive Committee of the Cyclone Central Relief Fund. The conclusion arrived at is briefly as follows :—

"While Government will pay for gratuitous relief to the absolutely needy, for the cloth which is given free to the needy, for the initial purchase of rice supplies which are specially imported by Government and sold at cheap rates and for any loss thereon, for loans for all purposes to agriculturists, for all the incidental charges and for most of the transport charges, and while District Boards may pay for all the medical help required, charitable relief funds should meet the charges of all that is given beyond these Government contributions and of all that is given to persons other than the recipients of Government relief."

SECTION V.—Gratuitous relief in rice.

54. Food was provided for those unfortunate people on *chars* who lost their all, for widows and orphans and for adults too ill or infirm to work and having no earning member in the family and no other means of support. Some provision also had to be made for professional beggars, but as soon as it became apparent that this class were again able to look after themselves,

they were excluded. So far as possible gratuitous distribution was made in the form of weekly doles of Burma rice, but in some parts of Dacca district where the relief agency was insufficient to cope with the heavy task of providing weekly doles in every union, persons under relief were given orders for free supply of specified quantities of rice from specified depôts.

55. The standard scale of distribution was 3½ seers of rice a week for an adult and 2 seers for a child; but variations were made according to local circumstances. The minimum was ½ seer and the maximum ¾ seer per head per diem.

56. Doles were continued in most places up to the 13th December when a final distribution was made, thus combining cyclone relief with Peace celebration. Where the winter rice crop is early, all relief work terminated at the end of November, but in a few small areas doles had to be continued until the end of December. Doles were distributed by union relief committees at weekly parades and care was taken to deliver at their doors the rice intended for *pardanashin* women and persons who were too ill or weak to attend the parade.

57. The total quantity of rice given for cyclone relief from State funds was 8,243 maunds, worth Rs. 59,268. The Central Relief Fund gave 27,475 maunds, worth Rs. 1,85,280. The amounts given by other funds are shown in statement XI. The amount given in each subdivision from State funds is shown in statement VII.

58. The free distribution of rice was the most indispensable form of cyclone relief. Owing to the care with which the work was done by relief agencies and the thoroughness of the supervision exercised by Collectors and Subdivisional Officers, not a single death from starvation has occurred in the area devastated by the cyclone.

SECTION VI.—Gratuitous relief in cash.

59. Gratuitous relief in cash was given to widows and infirm people who were unable themselves to rebuild their houses and had not means to pay for labour or material. It was not contemplated that the loss anyone had sustained would be made good, but the idea was to help everyone to put up at least one house where he and his family could get shelter from wind and weather. People joined together to help one another, and in this way thousands of houses were restored without any expense. Women and infirm men who could not take part in the work themselves required some money for replacing broken posts and for a little new thatch and a few annas for labour. At first it was thought that nothing less than Rs. 5 would be of any use for rebuilding a house, but it was found in actual experience that hundreds of houses had been rebuilt with only a grant of Rs. 2; instructions were then issued that cash grants should generally be limited to Rs. 2 or Rs. 3. In practice this was already being done, for the people who received grants of Rs. 5 to Rs. 7 had spent most of the money on food. The reason was that until November, District Officers and relief committees, not having sufficient Burma rice to satisfy the immediate needs of all the people in distress, had to give them money to bring rice in the local market. As soon as sufficient Burma rice was obtained cash relief ceased to be given except to those people who had not been able to restore a single dwelling-house to its previous condition. By the beginning of December it was estimated that 75 per cent. of the necessary houses had been restored. It is interesting to note that many people deferred the reconstruction of their houses till after the 17th December, the day on which many people believed, on the strength of the prophecy of a Professor Porta, that the whole world would be devastated by a cataclysm. On that day few people left their houses, but when it passed safely, they took up the work of rebuilding with renewed confidence.

60. The total amount disbursed by the State in gratuitous cash relief was Rs. 54,700; the Central Relief Fund spent Rs. 2,14,935. The expenditure

by other funds is shown in statement XI, and the expenditure in each subdivision from State funds is shown in statement IV.

Paddy-husking schemes.—At ordinary times poor widows in villages generally support themselves by paddy-husking. After the cyclone, it was found that in many villages no one required paddy-husking to be done, for every family was either doing its own husking or was living on the cheap Burma rice which is already husked. An excellent form of relief was to provide work for these poor widows in the form to which they are accustomed. The scheme followed was that an advance of about Rs. 150 was given to a president-panchayat or other person of similar standing. With this he purchased local paddy and distributed it among suitable widows for husking. For each maund of paddy they had to return to the president 22 seers of husked rice and they retained as their remuneration the surplus of 4 or 5 seers of husked rice. The president sold the 22 seers of husked rice and invested the proceeds in more paddy and so the scheme continued. Certain losses always occur in practice and when the market is falling, as it was on this occasion, the fund soon becomes exhausted. In Dacca district, where this form of relief had been practised on the occasion of previous calamities, paddy-husking schemes were taken up by many of the best presidents and gave a great deal of relief in a very economical way. The expenditure incurred in Dacca district was Rs. 5,537. Other districts were not previously acquainted with paddy-husking schemes and public spirited men to superintend such schemes are not readily found in rural areas.

Forest concessions.—For the rebuilding of houses the resources of the Sundarbans Forest Reserve were thrown open. From the 5th October any householder of the affected area was allowed to take free 50 *kutcha* maunds of *golpatta* for rethatching his houses. From the 25th November this concession was extended to 200 *kutcha* maunds of *golpatta* and 50 *kutcha* maunds of *goran* posts. The free issues made up to the 31st December were 346,300 maunds of *golpatta* worth Rs. 12,120, 13,000 maunds of *gewa* and and *goran* poles worth Rs 1,800. The concession was of considerable value to raiyats living in the south of Khulna district.

SECTION VII.—Gratuitous gifts of clothing.

63. Ordinarily gifts of free cloth were restricted to absolutely destitute widows, orphans and infirm persons whose garments were so inadequate that they could not appear in public without shame. On the Padma *chars*, where the entire population was left destitute, the scale of distribution was wider. Some blankets were also added to the wearing apparel given away in that area and in certain parts of Khulna district. The demand for cloth was so great and so general that a somewhat severe standard had to be observed for this form of relief. The task of selection was performed by the union relief committees and other local committees, whose knowledge of the condition of the people in their areas could be utilized very advantageously. Their lists were subsequently checked by circle relief officers in the presence of the committee and of the general public.

64. Originally it had been intended to give relief by selling cloth at less than cost price to people who could afford to pay something but could not afford the market rates. It was, however, found practically impossible with the organization available to draw up, not only lists of persons who should get cloth free, but also separate lists of those who should get cloth at 40 per cent. below cost price. Concession sales were therefore stopped and a more extended free distribution of cloth was decided upon. It is more satisfactory to give one cloth than two permits to buy at concession rates where there can be no assurance that the recipients will be able to use the permits in the manner intended. The change of policy is therefore believed to have been beneficial.

65. The amount spent from State funds on cloth was Rs. 1,61,206 (see statement IX); the Cyclone Central Relief Fund spent Rs. 33,160 in

clothing and Rs. 14,071 on blankets and shirts. The amounts spent by other agencies are shown in statement XI.

SECTION VIII.—Special relief of *bhadralok*.

66. The country devastated by the cyclone is the home of a very large number of families of highly respectable standing—in particular, the famous Vikrampur pargana was swept from end to end by the storm. Many of these families have fallen on bad times and are greatly impoverished. As soon as cyclone relief work was taken up systematically it was realized that special measures were necessary to ensure that relief should reach indigent *bhadralok* sufferers from the cyclone in such a form that their self-respect would not be destroyed. It was decided that people of this class should be granted loans without security or interest or bonds and that it should be left to their honour to repay the money when they could. Funds for this purpose were provided by the Central Relief Committee and similar action was taken by the Bengal Relief Fund Committee.

67. The method of selection usually adopted was the preparation of lists of distressed *bhadralok* families by the local relief committees, and the checking of those lists by the circle relief officer. All enquiries were made and relief given quietly and confidentially.

68. For this occasion the term "*bhadralok*" was held to include all persons of good social standing, Hindu or Muhammadan, belonging to higher strata of society than labourers, menials, cultivators and handicraftsmen. It was not exclusively a caste distinction nor one of occupation alone, but while caste and occupation did influence the decision to some extent, so far as Hindus were concerned, social standing and respectability were really the determining factors.

69. Relief was given only to *bhadralok* families whose houses had been destroyed, who had no land yielding any appreciable income and no resources except perhaps the precarious charity of friends or distant relatives.

70. The selection and the disbursement of relief to *bhadralok* was work requiring delicacy and tact. In every district it was the most difficult of all forms of relief. In Dacca Rai Sahib Lalit Mohan Sen, Excise Superintendent, was placed on special duty solely for *bhadralok* relief. Being himself a member of a Vikrampur family and knowing the district thoroughly, the Rai Sahib was specially well qualified for this work. With the help of a special staff of assistants recruited by himself, by constant exercise of intelligence and tact, and by unsparing toil the Rai Sahib made a complete success of the *bhadralok* relief work of Dacca. In Faridpur also *bhadralok* relief was a big problem. Owing to the special care given to it by the Collector, the work was carried out in a most satisfactory manner. It is recorded by one circle relief officer that "no money was better spent and no help so gratefully received as these loans to *bhadralok*."

71. Recipients of this form of relief either signed receipts promising to repay the loans or signed their names on the back of the relief lists or on the application, the signatures being regarded as implied promises to repay.

72. The Cyclone Central Relief Committee has decided that all recoveries in any district on account of *bhadralok* loans shall be credited to a fund to be known as the District Relief Fund, of which the Collector will be trustee and from which grants will be made in the case of any future widespread calamity.

73. The total number of *bhadralok* families who took this special form of relief at the expense of the Central Relief Committee was 8,148 and the total amount disbursed was Rs. 1,01,339. The amounts given in each district by the Central Relief Committee are shown in statement XI. Similar figures for the Bengal Relief Fund have been promised, but are not yet forthcoming.

SECTION IX.—Provision of Cheap Rice.

74. The rice situation up to the time of the cyclone has been described in section IV. After the cyclone local rice markets got more or less out of hand. To regain control it was absolutely essential for the Collectors to have at their disposal adequate quantities of Burma rice. On the 28th September the Collector of Dacca telegraphed for 50,000 maunds on Government account and similar action was taken by other Collectors. Government also was quick to grasp the situation and to take action. Even before full information regarding the disaster had arrived the Director of Civil Supplies was given by telegram *carte blanche* authority to purchase and despatch by the most rapid means procurable, the rice required by the district officer of Dacca, Government undertaking to meet all expenses incurred. Five thousand maunds of Burma rice were despatched immediately *viâ* Goalundo to Lohajang. Unfortunately the capacity of the rail and steamer services between Calcutta and Eastern Bengal, which is always meagre, was greatly reduced and disorganised by the cyclone and was unequal to the strain imposed by the suddenly enhanced demand for food transport. Delivery from the docks in Calcutta also is a complicated and tedious process and efforts to accelerate it did not produce any very appreciable improvement; but officers of the railway and steamer companies responded with good will to requests of district officers for special facilities to be given to despatches of rice and, by dint of hard work on the part of all concerned, the necessary supplies were ultimately delivered in the affected districts.

75. The local rice market was extraordinarily sensitive. On the arrival of a consignment of Burma rice the prices of local rice at that place immediately fell, and when supplies of Burma rice were approaching exhaustion, prices of *balam* and local rice rose to heights previously inconceivable. In the month succeeding the cyclone *balam* sold at Rs. 14, Rs. 15, Rs. 18 and even at Rs. 22-8 per maund at places where Burma rice was not available; but the maintenance of a stock of Burma rice at Dacca and Narayanganj had the effect that *balam* there was generally below Rs. 11 and always below Rs. 11-8.

76. The Collector of Dacca was fortunate in enlisting the services of merchants who had not been engaged previously in the rice trade. They alone were willing to import Burma rice which, having to be sold at controlled rates, brought little or no profit and frequently involved much harassment. In addition to 50,000 maunds supplied by the Director of Civil Supplies, the Collector of Dacca obtained 63,170 maunds from private importers, and the total quantity sold by official agency in that district was 83,089 maunds. The sale of such a large quantity of cheap rice was itself an undertaking of great magnitude, and the relief it afforded to the general condition of the inhabitants of the district is beyond computation.

77. In Mymensingh the difficulty regarding supplies of Burma rice was largely solved by procuring through Bhairab traders large stocks of rice from Chittagong. For want of more suitable agencies, the cheap rice shops were managed chiefly by police officers. In Faridpur and Dacca districts, depôts were opened, and arrangements for sale of cheap rice were made by circle relief officers and depôt officers, working in co-operation with relief committees. Not having any president panchayats and still less any union committees, Mymensingh district is greatly handicapped in dealing with matters of detail affecting the whole population.

78. The controlled retail price for Dacca district varied from 5½ to 5¾ seers per rupee. This was arrived at by adding 12 annas to the ex-godown rate in Calcutta to cover wharfage dues, handling charges, wastage and freight. On this basis the landed price of "big mills special" came to Rs. 6-10. Importers were allowed a profit of 4 annas per maund and were required to sell the rice with bags at Rs. 6-14. The retail controlled prices were watched by the union relief committees and were generally adhered to except in some small outlying markets. In Faridpur the controlled price at first was Rs. 6-14, but was afterwards reduced to Rs. 6-4. The Collector and his Subdivisional Officers were active in pushing out Burma rice to *hâts* where local prices were excessive. In Khulna local officers were slow in realizing

the necessity of seeing that cheap rice was actually on sale in the *hâts*; but ultimately the Collector effectually impressed this point on the subdivisional and other relief officers with excellent and immediate results. The price fixed for Government rice was Rs. 6-4 up to the 19th November, after which date it was reduced to Rs. 5-10. Private importers were not tied down to a controlled rate, but the presence of large stocks of Government rice ultimately compelled them to sell at or below the Government prices.

79. The total quantity of rice taken up on Government account in each district and the manner of its disposal is shown in Statement VI: 2,12,970 maunds of rice were purchased for Rs. 14,34,266, including freight and all incidental expenses; 8,243 maunds were given away as gratuitous relief; 1,58,552 maunds were sold, partly in open market, partly to the Central Relief Fund and other non-State relief agencies. The existence of a large surplus at the close of operations was unavoidable, for prices can only be controlled so long as reserve stocks are retained. The surplus would have been less but for delay in the arrival of consignments from Calcutta; but the balances are now being sold locally and in Calcutta where even now it is likely that the prices realized will be higher than those originally paid in Calcutta. In any event, the total loss will be small compared to the enormous benefit derived from the provision of cheap rice to the cyclone districts at the time of their greatest need.

SECTION X.—Agricultural Loans.

80. Government loans amounting to Rs. 12,55,09 were issued to agriculturists under the Loans Act (XII of 1884). They were usually granted only to persons who lost their houses or cattle in the cyclone, but in a few instances persons who had lost their boats, or stocks of grain or jute or whose paddy crops had been seriously damaged were included. Rules 19 to 25 of the Statutory Rules under the Agriculturists Loans Act were extended to the whole area under cyclone relief. Loans were issued only on the joint bond system to groups of co-villagers. In accordance with the instructions of the Hon'ble Mr. Cumming, the number of persons in a group was generally 10, but variations were allowed as, *e.g.*, where there were only 6 applicants for loans in an isolated village. Loans for house-building were usually Rs. 10 per individual, but for the purchase of cattle or boats Rs. 20 was often granted and in exceptional cases Collectors sanctioned loans of Rs. 25, Rs. 30 and Rs. 35. The total number of persons to whom agricultural loans were granted was 120,942 and the average amount per head was Rs. 10-6 (*vide* Statement I).

81. The joint and several liability of the borrowers associated in a joint bond was impressed on the people and in places where the joint bond system was previously unknown the raiyats were at first reluctant to execute joint bonds; but where the system had been worked previously there was no hesitation and after a few days raiyats everywhere acquiesced. Loan officers were instructed to take care that in each group of borrowers a *mathar* or leading man of the village was associated. This will facilitate the recovery of the loans.

82. The interest chargeable on these loans is only 6¼ per cent. per annum. The Collector of Khulna remarks that it was a curious anomaly that members of co-operative societies were not permitted to borrow from Government at 6¼ per cent., but had to borrow from their own banks at 15¾ per cent. This anomaly was removed in part of Dacca district by the Dacca Central Bank allowing members of affiliated societies to take Government loans; but the Munshiganj Central Bank refused to pass similar orders. It is reported that landlords' agents encouraged their tenants to apply for Government loans in order to facilitate the collection of rent.

83. The dates on which instalments of principal and interest are payable were fixed by Collectors with reference to the dates of the money-producing harvests. In jute-growing areas instalments have generally been made payable in November. It will be necessary to depute special officers for the

recovery of loans in Khulna, Faridpur, Bakarganj and Dacca districts as instalments fall due.

SECTION XI.—Seed Loans.

84. In the cyclone large quantities of *rabi* seeds in raiyats' houses and and local bazars were lost or destroyed and much of the remainder was so damaged by rain as to be useless for sowing. What was available was being sold at high prices. It became evident that unless large quantities could be imported from other places the sufferings of the people would be enhanced by a very poor *rabi* harvest. Many raiyats who bought bazar seed had to resow their fields and this accounted for a renewed demand late in the season.

85. With the approval of the Hon'ble Mr. Cumming, it was decided that the Director of Agriculture should import large quantities of *rabi* seeds to meet the shortage and to stop profiteering. The following quantities of seed were purchased in Calcutta at favourable rates from Messrs. Ralli Brothers :—

		Mds.			Mds.
Mustard	...	10,514	Mung	...	3,000
Matikalai	...	2,100	Mushur	...	6,150
Linseed	...	400	Green peas	...	750
Khesari	...	3,203	Barley	...	1,500
			Wheat	...	1,000

The seed left Calcutta on the 11th October in two flats and arrived at the main distributing centres—Narayanganj, Lohajang and Madaripur—with a rapidity in striking contrast to the delay invariably associated with consignments of Burma rice. Delivery was completed by the 19th October, and the quantities required for the seed depôts were despatched as rapidily as possible. Twenty-three seed depôts were opened in Dacca district, 7 in Faridpur, 11 in Bakarganj and 4 in Khulna. As soon as the cyclone occurred all agricultural officers on leave had been recalled and all officers from unaffected districts of Bengal were temporarily deputed to the affected area. Thus the entire strength of the department was for the time concentrated on the work of *rabi* seed distribution.

86. In consultation with the Hon'ble Member, it was decided that the methods adopted in the *rabi* seed distribution in Rajshahi in the preceding cold weather should be followed. Under that system loans of seed were given to cultivators on their individual security. Subsequently, finding that raiyats were no longer averse to taking cash loans on joint bonds, I gave instruction that, where possible, joint bonds should be taken for seed loans also. Where joint bonds were insisted on, it was found that raiyats soon ceased to object. When the time comes for realization of loans, money due on joint bonds can be recovered more quickly and with far more certainty than loans on individual security. In Bakarganj 328 and in Faridpur 502 joint bonds were executed. Although the circle relief officers were instructed to generally supervise seed loan work in addition to all other relief work in their circles, seed loan work was generally left to agricultural officers who were empowered to grant such loans. Under my personal instruction, the circle relief officer of the Padma Relief Circle in Dacca took over for two days the work of granting seed loans and was successful in introducing the joint bond system, which the seed loan officers had up till then considered to be impossible. The Rajshahi forms proved to be unsuitable in other respects also, notably in that they contained no place for entering the dates on which the loan is repayable. This defect was subsequently remedied by manuscript entries of the dates and by proclamation by beat of drum.

87. Seed loans were generally made repayable in one instalment in October 1920. To encourage prompt repayment, the Government of Bengal subsequently decided that on all seed loans repaid before the 31st March 1920 no interest would be charged. This is a valuable concession of which it is

desirable that raiyats should take full advantage. Arrangements have been made for special officers to be deputed to recover seed loans during February and March.

88. When distribution commenced it soon became evident that the crop statistics on which estimates had been made of the quantities of seed necessary were far from being reliable. There was a great demand for khesari, and all stocks were quickly exhausted. Peas and mashur (lentils) were also greatly in demand in some places and the demand could not be met. Matikalai unfortunately arrived too late for sowing. Stocks of mustard were greatly in excess of requirements, and the areas under wheat, barley, mung and linseed are now known to be less than the estimates given in the statistics.

89. No seed was issued until its germinating power had been tested. All officers agree in reporting that the quality of the seed was excellent and far superior to that of bazar seed.

90. Some raiyats preferred to buy seed rather than take it on loan, and of course their wishes were met. The total value of seed sold was Rs. 2,928.

91. The total quantities of seed issued on loan and seed sold were—

	Mds.		Mds.
Mustard	2,527	Mushur	5,871
Matikalai	707	Green Peas	560
Linseed	80	Barley	940
Khesari	3,110	Wheat	455
Mung	1,016		

The surplus stocks have been sent to Calcutta to be sold by the Director of Civil Supplies.

92. The number of raiyats to whom seed was given on loan or sold was 31,881. From this operation the raiyats derived enormous benefit in two ways : (1) they obtained seed at a time of great need when supplies were much less than requirements ; (2) the local traders had to reduce their prices to those charged by the Agricultural Department and even in many cases to less.

93. The season has fortunately proved favourable, and the excellent crops now on the fields and being gathered will be a substantial relief to those who suffered in the cyclone.

94. Figures are given in statement II for seed loans in each subdivision and each district.

SECTION XII.—Medical and sanitary relief.

95. In Khulna district for a month after the cyclone malaria was prevalent ; but there was no increase in mortality from diseases in general. In November and December cholera broke out in the southern parts of Satkhira subdivision affected by the cyclone, and dysentery in a serious form occurred in Dumuria, Rampal, Bagerhat and Kachra thanas. Fever had been virulent in 1918, when it accounted for 11,538 deaths in the two months, November and December. In 1919 it was still worse and in the corresponding two months it carried off no less than 13,212 people. In 1919 all classes of the population were affected, rich as well as poor, Europeans as well as Indians. It is therefore doubtful whether the increased virulence can be ascribed to the cyclone, though doubtless some fever cases were aggravated by exposure.

The District Board appointed 11 epidemic doctors and took steps to make temporary repairs and to replace medicines in dispensaries destroyed or seriously damaged by the storm. Honorary Lieutenant-Colonel Sarbadhicary, I.M.S., as president of the medical committee of the Bengal Relief Fund, sent three parties, each of two epidemic doctors liberally equipped with medicines, disinfectants and medical comforts. The Surgeon-General, Bengal, deputed five sub-assistant surgeons for epidemic duty and an assistant surgeon to supervise and co-ordinate the work of all the epidemic doctors. Dr. Roy,

Deputy Sanitary Commissioner, carried out a scientifically thorough anti-cholera disinfection campaign in the south of Satkhira subdivision. The District Board met all the expenditure for disinfection, medicines and medical comforts except what was provided by the Bengal Relief Fund and Rs. 1,000 granted by the Cyclone Relief Fund. To what extent the epidemics were due to the cyclone and what exactly is the measure of the good effects of the vigorous measures adopted are matters of uncertainty, but it is at any rate satisfactory to record that the epidemics had abated considerably by the end of December and the weekly mortality from cholera had fallen to 48, of which three-fourths occurred in areas not much affected by the cyclone.

96. In Bakarganj, Tippera, Mymensingh and Jessore districts no special medical or sanitary relief was required, as sickness and mortality were not in excess of the normal. In fact, in Narail subdivision the cyclone probably improved public health by thinning out the dense growth of trees and other vegetation in which most of the villages and houses were buried.

97. In Faridpur district there were slight outbreaks of cholera in Kotwalipara, Kasiani, Sibchar and Matbarerchar thanas, but no other mortality from disease due to the cyclone. The total mortality from all causes during October, November and December 1919 was far less than in 1918 and not much more than in 1917. A special staff was engaged to deal with any outbreak immediately on its being reported and to carry out such sanitation work as the people would submit to. The Surgeon-General, Bengal, deputed an assistant surgeon and three sub-assistant surgeons; the medical committee of the Bengal Relief Fund also sent three epidemic doctors with equipment of medicines, etc., and two temporary hospital assistants were engaged by the Civil Surgeon. Excluding the expenditure of the Bengal Relief Fund, the cost of the special measures carried out was Rs. 2,783, which was covered by a grant from the Cyclone Central Relief Committee.

98. In Dacca district, more than any other, there was reason to apprehend a serious epidemic. To prevent this occurring, officers of all departments combined their efforts and received most useful assistance from private individuals and representatives of the Bengal Relief Fund, the Ram Krishna Mission and other voluntary agencies. The personal interest and sympathy shown by the Collector (Mr. Lambourn) inspired everyone to do his utmost and was the most valuable asset of the relief organization. Mr. Lambourn's report is as follows :—

"*Disposal of dead bodies.*—Owing to the breakdown of communications information as to the extent of the mortality requiring special measures in particular places to prevent outbreaks of epidemic disease was slow in coming through. It was not until late on September 27th that information was received of heavy mortality in the neighbourhood of Lohajang and the growing accumulation of dead bodies and carcases in that neighbourhood. Steps were immediately taken to collect *domes* and arrange for doctors to be sent to Munshiganj subdivision. It was difficult to find *domes* in Dacca, but on September 30th I was able to leave with three *domes* and some members of the Ram Krishna Mission for Lohajang. A beginning was made with the interment of bodies on that day.

"In section II I have already mentioned the numbers of dead bodies picked up on the banks of the river near Lohajang and a journey through the *bil* area in the vicinity on the night of 30th September convinced me that a large number of corpses lay entangled in the deep-water paddy and mainland as well as on the *chars*.

"I went to Goalundo on 1st October to procure *domes* and *kodalies*. Dr. Marsden, the Health Officer of Goalundo, gave me invaluable assistance in securing 13 more *domes*, who were despatched to Lohajang and arrived on the morning of the 2nd. On the 3rd October six more *domes* were despatched from Dacca and a few more later, making a total number at work in that neighbourhood 24. They were divided up into parties under volunteer workers and doctors deputed from Dacca and were employed for about three weeks in disposing of dead bodies and carcases.

It was comparatively simple to clear up the vicinity of villages and river banks where dry land was available for interment, but difficulty was experienced in the case of bodies lying half exposed in shallow water in the *bil* over an area of 6 or 7 square miles and this accounts for the time taken.

The only other place in the district where it was considered advisable to despatch *domes* was to the *bil* area between Srinagar and Nawabganj. It was found, however, that most of the people drowned were local people whose bodies were recovered and disposed of by their relatives, leaving only the corpses of a few foreign boatmen to be dealt with.

On 30th September, four Sub-Assistant Surgeons were sent to Munshiganj subdivision with orders to report to the Subdivisional Officer at Lohajang. They were provided with

cholera outfits. A fifth Sub-Assistant Surgeon was sent to Calcutta to fetch chlorinated lime and to wire to Kasauli for anti-cholera vaccine.

A further Sub-Assistant Surgeon was sent on 3rd October to Lohajang with cholera outfit and on the 5th October the Sub-Assistant Surgeon who had returned from Calcutta was sent to Lohajang with chlorinated lime. On the same day three Deputy Sanitary Commissioners and another medical officer of the Health Department arrived in the district and went to Lohajang. The staff deputed there with the addition of another Sub-Assistant Surgeon sent on the 6th were placed under the orders of the Deputy Sanitary Commissioners who divided areas to be protected between themselves. Subsequently the supernumerary medical officer of the Health Department left for Mymensingh and another Deputy Sanitary Commissioner was sent to the Lohajang area.

The result of the protection given in those areas was that suspected cases of cholera were quickly treated and disease generally was kept under control.

Special assistance was also given to the towns of Narayanganj and Dacca.

In Dacca where the streets were blocked by fallen trees and houses, preventing the removal of dead animals and refuse and the circulation of the night-soil carts, the services of convicts from the jail were placed at the disposal of the Health Officer and the municipality were able to get their sewage service going within 15 days.

In Narayanganj the District Board assisted in removing trees blocking the road to the trenching-ground. This municipality was caught by the cyclone when its funds were at a very low ebb owing to collection being deferred as the result of assessment appeals and Rs. 10,000 was lent to it by the firm of Messrs. Chamaria & Co. through the District Magistrate to enable the municipality to rebuild their sweeper lines and repair the damages to sanitary carts and losses of cattle required to maintain their sanitary services. Owing to the matter being urgent and the bank being closed, it was necessary to have recourse to private assistance.

In the third week of October it was decided to allocate the Deputy Sanitary Commissioners with their staffs of doctors in the following manner :—

Dr. Sufi, Deputy Sanitary Commissioner, Munshiganj subdivision, with five doctors under him ;

Dr. Roy, Deputy Sanitary Commissioner, Manikganj subdivision, with one doctor under him ;

Dr. Brahmachari, Deputy Sanitary Commissioner, Sadar and Narayanganj, with one doctor under him.

By the end of October all the three Deputy Sanitary Commissioners were recalled by the orders of the Sanitary Commissioner and temporary Assistant Surgeon Chandy Charan Mitter relieved Dr. Sufi, the Deputy Sanitary Commissioner in charge of Munshiganj subdivision.

Special measures.—In Narayanganj subdivision there was an outbreak of cholera in a mild form towards the end of November in the Narsingdi and Rupganj areas, but it was in no case directly attributable to the cyclone, nor was there any abnormal increase in seasonal disease or mortality. This was also true of North and South Sadar : as in Narayanganj subdivision the circumstances were not such as to render necessary special measures on an extensive scale.

It was only in Manikganj, which bore a bad reputation for disease, and in Munshiganj, where the presence of large numbers of dead bodies of men and animals made an epidemic probable, that special precautionary measures were essential.

In Manikganj the District Board sanctioned Rs. 550 for chlorogen and bleaching powder. Seventeen parties of two men each, under the supervision of voluntary workers, disinfected 191 wells and 8 tanks in Manikganj, Singair and Harirampur thanas ; the effect of these measures was that incipient cholera in the latter two thanas subsided to a great extent.

In Munshiganj more elaborate measures were taken. Apart from the disposal of dead bodies, the following precautionary steps were taken :—

(1) establishment of temporary dispensaries ;

(2) disinfection of sources of water-supply ;

(3) anti-cholera inoculation ;

(4) arrangements for free vaccination in the Lohajang area ; and

(5) propaganda of simple sanitary rules.

A floating dispensary with necessary medicines and equipment was established in a green boat, which was to move amongst the Padma *chars* off Lohajang. The effect was to prevent the spread of cholera and small-pox which began to appear gradually, though a considerable time after the cyclone. This dispensary with one of the relief officers in charge visited almost all the islands in the *chars* for about four weeks in early November. The *char* people were found to be very conservative and were not easily persuaded to avail themselves of the advantages offered and as its movements were also curtailed by the decreasing water in the *chars*, with the permission of the Civil Surgeon, it was removed to Lohajang where it was more appreciated.

Another dispensary with two Sub-Assistant Surgeons was started by the medical unit of the Bengal Relief Fund at Gram Wari opposite the Lohajang *chars*. They gave medical relief to 1,662 persons. The main disease and number of patients treated by the dispensaries and Assistant Surgeons are noted below :—

Number of cases treated by the two special dispensaries and Assistant Surgeons up to 3rd January.

	Cases of various kinds.		Number of deaths.
(A) Floating dispensary ...	1,024		Not reported.
(B) Assistant Surgeon and doctors under him.	Cholera ...	268	51 from cholera.
	Malaria ...	1,267	
	Influenza ...	192	
	Total ...	1,727	
(C) Medical unit of Bengal Relief Committee.	Cholera ...	19	Not reported.
	Influenza ...	109	
	Other cases	1,534	
	Total ...	1,662	
	GRAND TOTAL ...	4,413	

Disinfection of water-supply.—Seventy-three tanks were treated with chloride of lime This, with the disinfection measures taken in Manikganj, brought up the total to 191 wells and 81 tanks treated. In some cases the owners refused to allow disinfection, but special efforts were made to ensure thorough treatment of villages where cholera occurs yearly, in Lohajang, Srinagar and Tangibari thanas.

Cholera inoculation.—Early efforts to introduce inoculation failed owing to the mistrust of the people, and it was not until an epidemic of cholera broke out in Brahmangaon village in Lohajang circle that its utility was recognized. Two hundred and thirteen persons were inoculated and only 10 cases of the disease occurred among inoculated persons, with the result that the demand for inoculation greatly increased and led to a shortage of vaccine. All doctors were supplied with a travelling box containing medicine for treatment of cholera, including Sir L. Rogers' apparatus for saline transfusion.

Mortality.—The figures for mortality in the district from 1st October, to 1st January are given below. The area described as unaffected are the thanas Shibalay, Gheor and Daulatpur. The remainder of the district is regarded as affected—

Affected area.

Cholera	1,258
Small-pox	398
Other diseases	22,552

Non-affected area.

Cholera	111
Small-pox	14
Other diseases	1,238

The part of the district affected by the cyclone was roughly 11 times the area of the part unaffected, and as the density of population in the latter is about half that in Srinagar and Munshiganj thanas it does not appear that there has been any serious increase in the number of deaths from disease in the area visited by the storm.

Value of the measures.—The fact testifies to the value of the measures adopted. Such natural calamities as the cyclone are not infrequently followed by the outbreak of epidemics scarcely less formidable than the calamity they follow. It was not without reason that the outbreak of such an epidemic was apprehended in the Lohajang and other affected areas, and the benefit of the measures should be judged rather by what they averted than by what occurred.

It is also probable that the introduction of special measures did something to popularize sanitary precautions among the people. The cholera inoculation and the disinfection of water-supplies were accepted with the increasing readiness as operations continued.

Cost of measures.—Although the floating dispensary has been withdrawn, the Civil Surgeon as a precautionary measure has advised the retention of a doctor and compounder together with the necessary medicine in Lohajang. It is not therefore possible to give a final statement of the total cost ; but up to the end of December the figure for all special medical and sanitary measures is Rs. 5,336-13-7.

SECTION XIII.—Finance.

99. For the relief of distress caused by the cyclone, expenditure from State funds has been incurred under the following heads :—

(1) agricultural loans ;
(2) seed loans ;
(3) gratuitous distribution of cash ;
(4) payments under paddy-husking scheme ;
(5) gratuitous distribution of rice ;
(6) provision of cheap rice ;
(7) gratuitous distribution of cloth ;
(8) provision of cheap cloth ;
(9) establishment ;
(10) contingencies and miscellaneous ;
(11) travelling allowances.

Expenditure under heads (1) and (2) is recoverable, but expenditure under all other heads forms a final charge against State funds. The Government of India have sanctioned the debiting of charges under heads (3) to (11) to the general head "33—Famine Relief." The effect of this sanction is that three-fourths of the charge will be met from Imperial and the remaining one-fourth from Provincial revenues.

Agricultural loans.

100. The total amount distributed as agricultural loans was Rs. 12,55,090, of which Rs. 8,17,050 was spent in Dacca district alone. Loans were given to 120,942 men forming 11,808 groups. Statement I shows the amount distributed as loans in each district and each subdivision and the number of persons to whom loans, have been given. Government sanctioned a total grant of Rs. 19,70,000 for agricultural loans including seed loans, but it was not found necessary to issue the whole amount. The total actual expenditure was as follows :—

	Rs.
Agricultural loans	12,55,090
Seed loans	1,01,641
Total ...	13,56,731

Seed loans.

101. Seed loans to the value of Rs. 1,01,641 have been issued. Statement II shows the amount of seed loans issued in each district and each subdivision and the number of men who have been given loans.

Some cultivators preferred to purchase seed instead of taking it on loan. Seed worth Rs. 2,928 was sold to them.

Twenty-eight thousand six hundred and seventeen maunds of *rabi* seed, worth Rs. 2,80,175, was purchased by Government and a further sum of Rs. 32,029 was incurred as freight and other incidental charges, including temporary establishment and contingencies, in connection with distribution of seed. Owing to the great difficulty of estimating needs, the whole quantity of seed purchased was not issued. In particular, mustard appears to have been purchased much in excess of requirements. The surplus has to be sold off and the major portion has been sent to Calcutta, where it is expected to fetch a fair price, and a small portion is being disposed of locally. It is estimated that Government will incur a loss of Rs. 82,756, including Rs. 11,788 for establishment and contingencies in connection with seed transactions, as the price of seed has fallen since the date of purchase (*vide* statement III).

To meet all expenses in connection with seed loans, the Director of Agriculture was given an allotment of Rs. 3,00,430 from the reserve of

Rs. 7,00,000 placed at my disposal for agricultural loans. When all receipts and charges are adjusted by the Accountant-General, Bengal, the net loss incurred by Government will have to be transferred by him from the head "Agricultural Loans" to "33—Famine Relief."

Gratuitous relief in cash and under the paddy-husking scheme.

102. The sum of Rs. 54,700 has been spent on gratuitous relief in cash and Rs. 5,543 under the paddy-husking scheme. Statements IV and V show districts and subdivisions in which relief was given in these forms and the amount spent in each and the number of persons relieved. The average cost per head varies from Re. 1-0-7 per week in Khulna to Rs. 2-8-11 in Tippera. The variation is due mainly to the fact that in some districts lump sums varying from Re. 1 to Rs. 5 were given at the beginning of operations instead of regular weekly or fortnightly doles.

103. The cyclone occurred just before the Puja holidays and by the time when the magnitude of the calamity was known, the treasuries were closed. The district officers had therefore no alternative but to borrow money for distributing immediate relief to the people in greatest distress. Thus the District Officer of Dacca borrowed about Rs. 32,000 partly from a fund in his charge and partly from a private gentleman. The money was repaid shortly after the treasury reopened.

104. The calamity was so sudden and its magnitude so great that there was no time to form even approximate estimates of the amount of relief necessary from State funds and to obtain proper sanction before incurring expenditure. At the beginning of October the Government of Bengal with laudable courage granted district officers *carte-blanche* authority to incur expenditure on immediate relief in urgent cases, cautioning them at the same time that the *carte-blanche* authority should be resorted to only to the extent of real necessity. In some districts, the treasury was opened on the 6th October in order to draw money for cyclone relief. The *carte-blanche* authority was withdrawn on the 8th November, when all previous expenditure was regularised by Government according sanction thereto.

Provision of cheap rice and gratuitous distribution at Government expense.

105. Statement VI shows quantity and value of rice purchased, the quantity distributed free or sold and the loss incurred by Government in each district. Of the rice purchased, the following quantities were sent by the Director of Civil Supplies, and the remainder was purchased from local dealers who were permitted to import Burma rice into the district :—

		Mds.		Rs.
Dacca	...	81,440	worth	4,88,215
Faridpur	...	25,102	,,	1,59,105
Khulna	...	12,525	,,	77,399

The quantity shown against Faridpur excludes 7,565 maunds of rice worth Rs. 45,999 sent by the Director of Civil Supplies to that district, but paid for direct by the Cyclone Central Relief Committee and 936 maunds worth Rs. 6,370 sent to Rajbari, a part of the district which was not affected by the cyclone

106. The Director of Civil Supplies obtained a grant of 7 lakhs of rupees for payment of the value of rice purchased by him and the Collector of Mymensingh obtained a grant of two lakhs of rupees for a like purpose. In other cases payments for rice and incidental expenses were made either from the grants sanctioned for gratuitous relief, by drawing money from the treasury on the *carte-blanche* authority given by Government or from the sale-proceeds of rice obtained from the Director of Civil Supplies or purchased locally. It was irregular to utilize the sale-proceeds of rice to purchase further quantities of rice, but the circumstances were special and the necessity urgent and it was not always possible to form an approximate estimate of the amount of grant required and to obtain sanction thereto before

making any payment. In obtaining formal sanction, delay is often necessarily involved. Thus the Collector of Dacca asked for sanction to an advance of one lakh of rupees to pay for rice purchased locally, but Government sanction could not be given for want of full particulars. In the meantime sale-proceeds of rice accumulated and payment was made from the sale proceeds. In the special circumstances, the irregularity may be overlooked.

107. Eight thousand two hundred and forty-three maunds of rice worth Rs., 59,268 was distributed free as shown in detail in statement VII. The remainder of the rice purchased was either sold or remained in stock at the end of the operations. The average cost per head on account of gratuitous distribution of rice varies from Re. 0-6-11 per week in Bakarganj to Re. 1-12-11 in Khulna. This variation is due mainly to the fact that a uniform system of counting the number of men relieved has not been followed. If a man has received gratuitous rice doles for five weeks, he has been counted as one man relieved in some districts and as five men in others. This diversity of practicewas not noticed until it was too late to call for revised figures.

The whole of the rice distributed free at the expense of the Cyclone Central Relief Committee, except 7,565 maunds in Faridpur which was paid for direct, was taken from the Government stocks in the districts. The price charged to the Committee was the same as was charged to the public.

108. On the provision of cheap rice Government incurred a loss of Rs. 90,571 as shown in Statement VI. Considering the volume of transactions, the loss in Dacca district is comparatively small, being 5·3 per cent. only. The shortage and wastage in that district amounted to 2·7 per cent. only. In Khulna the loss attributed to that head was no less than 7 per cent. and the total loss 9·5 per cent. In Jessore district the total cost of rice purchased was only Rs. 7,478, but the accounts show a loss of 18 per cent. This is due to rice having been taken from the Government stock at Gopalganj at a high cost price at a time when the price of common rice was falling and to the surplus stock having to be sold at Rs. 5-8, which was much below the cost price. The total loss on rice transactions in all districts taken together amounts to 6·3 per cent., and is mainly due to the surplus stock having to be sold off at a loss. The value of the surplus stock has been taken at Rs. 5-8 in Dacca, Rs. 6 in Faridpur, Rs. 5-12 in Mymensingh and Rs. 5-10 in Khulna. If the net prices actually realized are better than the estimates the loss to Government will be reduced. Out of the surplus stock in Dacca, 21,966 maunds have been sent to the Director of Civil Supplies at Calcutta where Burma rice still commands a high price and the balances remaining in that and other districts are being disposed of locally.

Distribution and sale of cloth.

109. Statement VIII shows quantity and value of cloth purchased, quantity distributed free or sold and loss incurred by Government in each district. The Registrar of Co-operative Societies obtained a grant of 6 lakhs of rupees from Government and purchased cloth from Bombay mills, the Bankura District Co-operative Industrial Union, Limited, and the Naogaon Supply and Sale Society supplied 505 bales to Dacca, 28 bales to Faridpur, 90 bales to Mymensingh and 1 bale to Khulna. Nine hundred and eight pieces, worth Rs. 1,836, were purchased locally in Faridpur. Of the stock at Dacca portions were transferred to Faridpur, Mymensingh, Jessore and Khulna. After distribution and sale, a large stock of about 225 bales of cloth remained at Dacca. This has been taken over by the Registrar of Co-operative Societies and sold to the Naogaon Ganja Cultivators' Co-operative Society, Limited. For this surplus stock taken over, deduction at cost price has been allowed and the net cost has been shown in the accounts. The stock of cloth in each district after transfers and disposal of the surplus at Dacca is shown in statement VIII.

Eighty-one thousand three hundred and thirty-six pieces of cloth (including some half pieces called *tabon*), worth Rs. 1,61,206, have been distributed free, of which 38,123 pieces have been distributed in Dacca district (*vide* Statement IX). Sales shown in statement VIII represent sales to the Cyclone

Central Relief Fund except in the district of Dacca, where in addition 18,315 pieces were sold at concession rates (which were about 40 per cent. less than cost price) to the deserving poor and 824 pieces to the Bengal Relief Committee also at concession rates. Sales to the Cyclone Central Relief Fund were at the current market rates. The value of 14 pieces of cloth lost in transit by the railway has been made good by them and is shown in columns 9 and 10 of Statement VIII against Mymensingh.

On sales at concession rates in Dacca district, Government incurred a loss of Rs. 14,553.

Total State expenditure.

110. The net expenditure incurred by Government under various heads in each district is shown in statement X. It will be seen that the total irrecoverable expenditure under all heads amounts to Rs. 5,39,057. The Government of India have acceded to the request of the Government of Bengal that this should be treated as expenditure on Famine Relief. Accordingly, three-fourths of the total, viz., Rs. 4,04,293, will be borne by Imperial revenues and the remaining one-fourth, viz., Rs. 1,34,764, will be borne by Provincial revenues.

Expenditure from funds other than State funds.

111. Besides money spent from State funds a large sum viz., Rs. 7,29,845, as shown in Statement XI, has also been spent for the relief of distress caused by the cyclone from other funds either through the official agency or by non-official organizations. The Cyclone Central Relief Fund heads the list of these funds with an expenditure of Rs. 4,63,686. All money granted by the Cyclone Central Relief Fund was distributed through the official agency except the sums of Rs. 34,700 and Rs. 6,060 distributed in the towns of Dacca and Narayanganj, respectively, by the municipal agencies of those towns. The official agency was also the medium of distribution of a grant of Rs. 4,250 contributed by the Bengal Relief Fund to the district of Jessore. The money realized by the various relief committees under official auspices from local subscriptions in each district forms a separate fund and is called the District Relief Fund of that district. All such funds distributed relief through the official agency.

For want of definite information from the officers of the Bengal Relief Fund the figures in Statement XI are defective. While this report was in the press approximate totals of the expenditure under various heads have been received but the officers of the fund are not yet able to furnish accurate figures district by district.

Total Expenditure of all Kinds.

112. Expressed briefly, the important figures regarding cyclone relief expenditure are as follows :—

	Rs. Lakhs.
Amount expended from State funds	5·39
Amount advanced from State Funds	13·57
Amount expended on relief under official control ...	4·98
Ditto non-official control ...	2·32
Total ...	26·26

SECTION XIV.—Relief given by non-official organisations.

113. The widespread sympathy aroused by the havoc and distress caused by the cyclone led to the organisation of a number of funds for the relief of the suffering which the calamity had produced; among those the Bengal Relief Fund, with Mr. C. R. Das as president and Mr. B. Chakravarty,

as Secretary of the General Committee, was the most prominent. Other organisations were the Social Service League, the Ram Krishna Mission, the Servants of India Society and the Sadharan Brahmo Samaj. All of these had their headquarters at Calcutta. In the affected districts many other funds were organised.

114. The Central Relief Fund was established by His Excellency the Governor with a view to co-ordinating and systematising the work of all relief organisations, and by preventing overlapping to secure to the sufferers the utmost benefit from the practical sympathy and generous donations of the public. All the leading associations and public bodies in Bengal were represented on the Cyclone Central Relief Committee which was formed with His Excellency the Governor as president and the Hon'ble Mr. J. G. Cumming as Chairman. The response to the appeal for funds was generous and by the 27th February a sum amounting to Rs. 5,82,984 was subscribed. The allotment of grants by the Cyclone Central Relief Committee and the manner in which they were spent in the various districts are shown in Statement XI.

115. The efforts to obtain co-ordination were successful to a considerable extent; but the various organisations continued to devote their energies and resources separately to separate portions of the field of work which was so vast that many organisations could work side by side in separate areas without clashing. The division of work between the various relief agencies operating in each district is briefly described in the following paragraphs:—

116. The following are the agencies which worked in Khulna district :—

Bengal Relief Fund Committee.
Social Service League.
Mohilia Samiti.
Brahmo Samaj.
Servants of India Society.
Ram Krishna Mission.

In no case was there any overlapping with official agency. The Bengal Relief Fund at first distributed miscellaneous urgent relief in thanas Paikgacha, Dumuria, Batiaghata, Terokhada, Palerhat, Daulatpur and Phultala of the Sadar Subdivision to the extent of Rs. 1,205. This was distributed in cash, rice and cloth. From 20th October 1919 they confined their operations to the thanas of Phultala and Daulatpur in the Sadar Subdivision and 8 unions of Bagerhat thana. Subsequently on the advice of the District Magistrate they agreed to reduce their area in Bagerhat to 4 unions. The Social Service League assisted the Bengal Relief Fund in unions Nos. 1, 2 and 3 of Daulatpur and distributed rice there from 8th November 1919 to 6th December 1919 to the amount of 112 maunds 37 seers 8 chettaks. In Bagerhat Subdivision they worked in No. 1 union of Bagerhat thana. The Mohila Samiti distributed cloth in Daulatpur and Terokhada thanas. The Brahmo Samaj worked in Nos. 1 and 2 unions of thana Bagerhat., but no report has been received of their work. The Servants of India Society worked in unions 1, 2 and 4 of Bagerhat thana and in Svalpa Baherdia union in Sadar. They were helped by 3 medical volunteers of the Uriya Samaj who treated over 3,000 cases, including cholera, dysentery, fever, pneumonia, etc. They rebuilt houses and supplied free clothing and rice. They also sold rice below cost price. The total cost of the relief given by them was Rs. 3,600. The Ramkrishna Mission worked in union No. 1 of Mollahat thana of Bagerhat. At first this union was under official agency, but from 15th November 1919 it was made over to the Mission for independent relief. (Rice distribution on Peace celebration day was made from State funds in this union.)

In the Sadar Subdivision the work of the Bengal Relief Fund was inspected by the District Magistrate and Subdivisional Officer and found to be systematic and well organised. The recipients were well selected though the standard of relief was more generous than that laid down in the Famine Code.

This is not, of course, objectionable. Rai Bahadur Amrita Lal Raha and Babu Kunja Behari Mukharji, the Secretary, are to be congratulated on the efficiency of their organisation. The Calcutta Committee and the local committee are to be congratulated on the prompt way in which urgent relief was distributed at the outset.

The other organisations in Sadar were the Social Service League and Mohila Samiti. The former worked satisfactorily assisting the Bengal Relief Fund with which it was inspected. The latter distributed casual relief and was not inspected.

In Bagerhat Subdivision the work done by the Servants of India Society and the Ram Krishna Mission was sustained, comparatively thorough and satisfactory. Inspections were made by the Subdivisional Officer. The work of the Ram Krishna Mission was also inspected by the Additional Commissioner and District Magistrate. The other organisations did not welcome the idea of Government inspection. The work of the Bengal Relief Fund in Bagerhat was spasmodic and rather unsatisfactory. It was inspected by the District Magistrate and the Additional Commissioner.

In addition to the above, four doctors were provided by the Bengal Relief Fund, as stated in section XII above.

117. In Bakarganj, the Bengal Relief Fund Committee and the Ram Krishna Mission rendered some help to the cyclone-affected area by distributing small amounts in cash and rice. They stopped their operations as soon as Government started relief work in the affected quarters. No portion of the affected area could therefore be made over to them. The local Secretary of the Bengal Relief Committee says that relief was given to 5,730 people and that Rs. 1,103 in cash, 99 maunds of rice and 448 pieces of cloth were distributed, but most of this was distributed in places outside of the cyclone-affected area. The Ram Krishna Mission distributed in the affected area 25 maunds of rice and the Social Service League rice, cash and cloth to the value of Rs. 307. It is also reported that the Bakarganj Mahila Samiti distributed some pieces of cloth. When the cloth of the Central Cyclone Relief Fund was distributed, care was taken that those who had already received cloth from the above agencies did not get cloth again.

There was no relief organisation which amalgamated its funds with those of Government though the local relief committees formed under the above private agencies assisted by their personal exertions and energies at Bagdha and Goila.

118. In the Narail Subdivision of Jessore, the local branch of the Bengal Relief Committee amalgamated their energies and their funds with those of the official relief agency (*vide* section IV). The Central Committee of the Bengal Relief Fund, however, made a direct grant of Rs. 1,000 to the Sidhipasa union through Professor Khagendra Nath Mitra. A local committee administered this grant, but the relief given was neither sufficient nor systematic. It is reported that the committee distributed 115 maunds of rice among 2,860 persons and Rs. 200 as lump sum relief. They are further reported to have given loans of Rs. 300 among 54 persons and to have spent Rs. 50 on medical relief. They sold 386 pieces of cloth and 479 maunds 31 seers of rice at reduced prices and distributed 62 pieces of cloth free. When I, accompanied by the Collector and the Subdivisional Officer, inspected the relief work of this union we came to the conclusion that relief funds were being frittered away to little advantage. The Subdivisional Officer inspected the union again some time later and brought necessitous cases which had not been relieved to the notice of the local committee. The Secretary of the local committee pleaded inability to relieve those persons because his funds were exhausted. The Subdivisional Officer then addressed a letter to the member of the Bengal Relief Committee in charge of Jessore district requesting him to give relief to those persons, but as no reply had come by the 9th January when relief operations had to be brought to a close, the Subdivisional Officer, under my instructions, directed the Circle Relief Officer to give the necessary relief. The Circle Relief Officer, Kalia, distributed Rs. 227 in cash, and 50 pieces of cloth among the necessitous cases who had got no relief from the local committee.

The only organisation which gave relief apart from the official agency was the Bengal Social Service League which took charge of two unions in Naragaiti police-station. The amount of relief given by official agency in these two unions before they were made over to the Social Service League was Rs. 280. The total quantity of (*a*) rice given by the representative of the League was 147 maunds worth Rs. 1,031 ; (*b*) cash Rs. 1,746, (*c*) clothes. 86, ganjees 38 and blankets 15 pieces-total value Rs. 278, (*d*) medical relief Rs. 120. On the 30th December in response to a request from the Secretary of the League 200 pieces of cloth were handed over under my orders to the representative for free distribution in the two unions under his charge. The work done by the representative of the Social Service League was good.

119. The Collector of Faridpur reports as follows regarding the non-official relief organisations started at different times and at different places in that district :—

"Of these, the biggest and by far the most important was the Bengal Relief Fund. The following were the other bodies which were at work in this district, but with the exception of the Ram Krishna Mission, their scope of activities was extremely narrow :—

(1) The Ram Krishna Mission.
(2) The Sadharan Brahmo Samaj.
(3) The Social Service League.
(4) The Mahila Samiti, Faridpur.
(5) The Kotwalipara Sahajya Sabha.
(6) The Timber Merchants' Association, Calcutta.
(7) Maulvi Leakat Hossain's Fund.
(8) The Anjumani Waizine of Calcutta.

In order to avoid overlapping and waste, it was intended from the beginning to assign to each organization a specified area consisting of a certain number of chaukidari unions, and to make it solely responsible for all the forms of relief necessary in such an area, consistently with the general principles of relief approved by Government. But these bodies came into existence long after the Government Relief Committees had been organized, and, even when they started, they had neither sufficient money to take over whole unions, nor were they, with the exception of the Social Service League, willing to amalgamate, although they were anxious to co-operate. The result was that Government relief could not be entirely withdrawn from the areas administered by these agencies. Their activities are described in detail below.

Bengal Relief Fund.—With regard to this organization, Babu Purna Chandra Maitra, B.L., the Vice-President of the Fund, reports as follows :—

"At the instance of Mr. B. K. Lahiri,' Bar-at-law, and under the auspices of the Bengal Relief Fund, a representative branch committee was formed on the 11th October 1919 at Faridpur with the Hon'ble Babu Ambika Charan Mazumdar, M.A., B.L., as president, myself and Babu Mathura Nath Maitra, B.L., as Vice-Presidents, Babu Satis Chandra Mazumdar, B.L., and Babu Jnanendra Nath Lahiri as Joint Secretaries, and Babu Nalini Kanta Sen, B.L., as Accountant and Treasurer. The Hon'ble Babu Ambika Charan Mazumdar, on account of ill health, wanted to resign the presidentship. The Committee, however, on the 29th October 1919, by their resolution, did not accept his resignation, but relieved him from the onerous duty and made over the entire charge of the President to the Vice-Presidents, and since then myself and Babu Mathura Nath Maitra have been doing all the works of the President.

"The Committee at once provisionally divided the affected area into several circles, a member of the committee being deputed to each circle to form representative circle committees and to arrange for distribution of relief. Mr. Lahiri placed Rs. 3,000 at the disposal of the Committee and workers at once started to different centres with certain sums of money allotted to each tentatively.

"In the beginning of the operation the workers distributed relief both in rice and in cash. It was, however, arranged that relief should be given side by side with the official District Relief Committee that had already been formed, taking care that there might be no overlapping between the two organisations.

"Sixteen circles, consisting of 227 villages more or less in three-subdivisions—Sadar, Madaripur and Gopalganj - were formed. Out of the sixteen, Kajulia circle in Gopalganj subdivision, of which neither the number of villages nor that of the people is known, was abolished on the report of the President. So altogether 15 circles consisting of 227 villages distributed relief in food, raiment and house building or house repairing somewhere up to 7th December 1919, and somewhere else up to the 15th December 1919. Altogether 5,125 people, excluding those of Kajulia circle, were relieved by this committee at the total cost of Rs. 12,837-6-3.

"The operation was conducted by purely non-official agencies. But I am informed that official inspecting agency visited the areas under the charge of this fund from time to time and gave valuable instructions to our local agents. Our best thanks are due to this official agency."

It being impossible for the committee, as stated above, to take up entire unions owing to the inadequacy of funds, they were asked to accept responsibility for a group of compact villages, but even this they did not venture to undertake as they did not know how much money would be allotted to them, and received their funds in several instalments at long intervals. The Government relief organizations were, therefore, instructed to extend to such villages such forms of relief as could not be provided at all or sufficiently by the Bengal Relief Committee. In this connection the attitude of the people of one centre in Gopalganj is significant. "I was," says the Subdivisional Officer, "struck by the attitude of the people in Ghagor (Kotwalipara) centre who were extremely cut up when they heard that the Bengal Relief Committee was taking up the relief work in their area and we were making over the villages to their charge. They were consoled only when I assured them that I would see that their wants are adequately met if the funds in the hands of the Bengal Relief Committee proved insufficient." This officer, however, characterises the quality of the work of this committee in his subdivision as fairly good. In Madaripur, their own local sub-committees complained of the meagreness of funds, while, in Sadar, the Subdivisional Officer reports that their work was not systematic and seemed to display a lack of interest Although there can be no doubt that, had the Bengal Relief Committee amalgamated their resources with those of the centres already started in the district, their funds would have been better utilised, still, on the whole, their operations afforded real relief to the people of the area in which their work was carried on, and to this extent they are entitled to gratitude.

Next in order of importance comes the Ram Krishna Mission, which worked at Kuarpur in thana Palong. They gave relief in the shape of free distribution of rice, cloth, and cash and also made some arrangements for medical relief. The following table will show the number of persons benefited and the amount spent under each head :—

	Persons	Cost
		Rs.
Relief in rice	1,201	2,892
Do. in cash	159	1,202
Do. in cloth	451	682
Medical relief	1,085	72
Total ...		4,848

The Brahmo Samaj worked both in Sadar and Gopalganj. In Sadar, they gave away Rs. 90 to 25 persons in thanas Bhanga and Nagarkanda, and Rs. 104 to 36 persons in the Kotwalipara thana. In the latter subdivision they extended their operations to all the villages of Ghagor centre and at Unasia in Kotwalipara. They distributed Rs. 858 in cash and 12 pairs of cloths worth Rs. 40, but their work does not appear to have been carried out here in that spirit which ought to animate such philanthropic institutions. The Subdivisional Officer remarks :—

> "I asked them to work in the distant *bhil* area where we could find scarcely any suitable person, but their representative was not anxious to undergo the trouble of staying in the *bhils*. He distributed the money he had mostly amongst the *bhadralog* at Paschimpar and Unasia and finished his work by the 9th of November."

The "Anjumani Waizine" of Calcutta assisted some poor respectable persons, helpless widows and orphans of some villages in the thanas of Kalkini and Madaripur at a cost of Rs. 400. In the former place they also distributed 500 influenza tabloids, chlorodyne, spirit camphor and other medicines. This organization appears to have worked in the Kasiani and Muksudpur thanas of Gopalganj as well, but its work there did not attract any notice whatsoever.

The "Mahila Samiti" is an organization conducted entirely by the ladies of Faridpur. They devoted their attention to the grant of relief to women who could not be reached by any other organisation. In addition to Rs. 75 which they collected locally, they received the following donations :—

	Rs.
(*i*) The Bhagni Samiti, Calcutta	100
(*ii*) The Nari (woman) Samiti, Ranchi	100
(*iii*) The Mahila Samiti, Calcutta	100
(*iv*) The Bengal Relief Fund	100

Of the amount thus collected, viz., Rs. 475, they distributed Rs. 431 in cash. Twenty pairs of *saris* and 9 *thans* or 72 pieces of cloth were also sent to them by the Mahila Samiti at Calcutta. Of these all but one *than* or 8 pieces have been given away.

Their activities were not confined to any particular area, but extended over the whole district. Some of the secretaries of the Government committees were of great help and supplied them with the names of persons who were really in distress and needed assistance.

All the other charitable societies enumerated above directed their attention exclusively to the Gopalganj subdivision, and, with the exception of the Social Service League, their work was done in an extremely unsystematic manner and most of the money spent was wasted.

The Social Service League confined its operations to the Pinjuri centre of Kotwalipara circle in Gopalganj. Their funds were practically amalgamated with those of the Government committees, their secretaries being given seats in the latter. They spent Rs. 1,106 for the erection of huts and distributed 4 pairs of cloth, 42 vests, 256 blankets and 20 pieces of old cloth as well as some medicine. The arrangements for the other kinds of relief in this centre were made by the local committee. Amongst the non-official agencies at work in Gopalganj, the work of the League was the best as the relief organized by them was carried out more systematically.

The Kotwalipara Sahayya Sabha was started by some inhabitants of the Kotwalipara thana residing in Calcutta. They gave Rs. 300 for the erection of huts to 115 persons, most of whom belonged to the *bhadralok* class.

Maulvi Leakat Hussain sent Rs. 100 to a teacher of the Baliabhanga High English School. The amount was distributed by this gentleman amongst 47 persons in Ghagor and Unasia centres for the erection of huts.

The Timber Merchants' Association, Calcutta, is composed of some merchants hailing from East Bengal. They are mostly residents of Fukra and Ghritakandi in Kasiana thana. They came with about Rs. 2,000, and distributed it amongst some persons in Fukra, Ghritakandi and Tarail.

To all these organizations my thanks are due for the help, however small, which they rendered to the distressed in the areas devastated by the cyclone."

120. As regards Dacca district, the Collector reports as follows :—

"The principal non-official organizations for relief in the district were—

(1) The Bengal Relief Fund.
(2) The Bengal Social Service League.
(3) The Ramkrishna Mission.
(4) The Servants of India Society.
(5) The Sadharan Brahmo Samaj of Calcutta.
(6) The Eastern Bengal Brahmo Samaj.

The first was the most important. It took over the independent administration of relief in 52 unions in the district, of which 28 were in Munshiganj, 10 each in Sadar and Narayanganj and 4 in Manikganj subdivisions. The relief allotted to each union as reported by the Secretary of the Bengal Relief Fund will be found in the statement below; the unions were taken over about the middle of October when, through official agency, relief had already been given to the extent of Rs. 70 in cash, 80 pieces of free cloth, 20 maunds of rice for beggars' doles in each union. Subsequently Rs. 3,654 in cash and 37 pieces of cloth were given at the expense of the Central Cyclone Relief Fund to *bhadralok* in Kalma, Panchgaon, Dhipur, Amtali, Paman, Hashail and Keyain unions.

The total cost of the relief administered by the Bengal Relief Fund would appear to be Rs. 44,170, but detailed accounts have not yet been received.

Relief was administered in consultation with union relief committees in each union and in most unions the work went on smoothly. In Sadar subdivision the Subdivisional Officers are satisfied with the quality and quantity of relief given, and the officers of the fund worked in co-operation and harmony with local panchayats.

The Subdivisional Officer, Manikganj, reports that there was a paucity of willing workers and that work suffered for want of money at the proper time.

The Subdivisional Officer of Narayanganj thinks that the local workers of the fund in some unions were inclined to depart unnecessarily from the principles of relief as adopted by the Cyclone Central Relief Committee.

The Subdivisional Officer, Munshiganj, in whose jurisdiction most of the Bengal Relief Committee work was done, says generally that the workers of the fund were sensitive in the matter of supervision by Government officers and there was friction in some unions under their charge on the ground of the local estimates of requirements not being sufficiently met.

On the whole, I am of opinion that the work done was generally appreciated and a fair apportionment of resources was made. Many of the workers were professional men who could not remain more than a few days at a time in a union, money was received by the committee in instalments so that it was perhaps natural that the local representatives of the fund should arrange with the local union committees to give something to every person on the relief list, so far as funds permitted, rather than follow the amounts indicated on the lists. Their readiness to make themselves responsible for definite areas was of the greatest service to the district and they worked well with the district relief committee and the Subdivisional Officers. I may mention here that the Secretary reports that it took him six weeks to get a consignment of rice from Calcutta to Lohajang.

The Bengal Social Service League worked in the Lohajang *chars* and in Bajrajogini and Munshiganj unions and altogether spent Rs. 4,327 in cash and 226 maunds of rice worth Rs. 1,626-8-6. The League also gave away 446 pieces of cloth and 24 blankets.

The Ramkrishna Mission workers gave relief in Kalma, Bajrajogini and Shyamshidhi unions. They also did extremely good work in assisting in enquiries for the

purpose of *bhadralok* relief. Messrs. Chamaria & Co. distributed 460 maunds of Rangoon rice through them. They erected 133 houses, treated 910 patients and gave away altogether 2,487 maunds of rice and 2,268 pieces of cloth.

The Servants of India Society worked with the official agency in Tarki, Mullakandi, Adhera, Silai and Letabdi unions of Munshiganj subdivision where it was difficult to establish efficient relief committees. The Subdivisional Officer writes in high terms of Mr. Lakhan Narain Saha, the local leader of the bank. This party gave relief chiefly in the form of clothing and blankets. Another party of the Society under Mr. W. K. Roy, B.Sc., gave relief in the Lohajang *chars* where they built about 200 huts costing about Rs. 20 each for people who had been rendered houseless. They also gave free rice doles. The total amount of the relief given by the two parties working in Munshiganj subdivision was Rs. 6,300 in addition to the value of the huts.

The Sadharan Brahmo Samaj of Calcutta administered relief in Mograpara, Baidyer Bazar, Pirizpur and Sambhupura unions of Narayanganj subdivision and gave some relief at Kaoraid. The total relief given was Rs. 5,525 in cash. Government cloth was distributed in all these unions. Rai Saheb Raj Mohon Das was the representative and work was well done.

The Eastern Bengal Brahmo Samaj took over four unions in Parjoar on which they spent Rs. 838 out of their own funds and Rs. 2,400 from the Central Cyclone Relief Fund. Eighty pieces of cloth and 20 maunds of rice had previously been given in each of these unions through official agency. There were no complaints from any of these unions and the work was satisfactory.

Besides the above, Rs. 5,235 was spent by the Dacca Municipality out of the Sir Abdul Gani Distress Fund within the city of Dacca, Rs. 2,491 was given out of the Nawab Sir Abdul Gani Relief Fund by its trustee Khan Bahadur Saiyid Aulad Husain as relief to poor residents of the city.

Rupees 5,000 provided from the Mukherji and Law Trust Funds was expended within the Dacca city in cloth and rice for the relief of distressed *bhadralok*.

As already mentioned, the Chairmen of Dacca and Narayanganj Municipalities distributed Rs. 34,700 and Rs. 6,060, respectively, in gratuitous relief granted by the Cyclone Central Relief Fund. They also gave away 4,530 and 967 free pieces of cloth provided by the Government.

Mention may be made here of the committee formed by Khan Saheb Hafiz Mohamed Husain of Zinzira immediately after the cyclone to grant relief in the Zinzira and adjoining unions. Rupees 13,800 was subscribed by the local people, the Khan Saheb himself heading the list with Rs. 5,000. Two thousand five hundred families were relieved by the committee. It may not be out of place to mention that the Khan Saheb imported 40,000 maunds of Burma rice and sold it to the public at cost price.

Many committees were organised throughout the district for the sale of rice at or below cost price to the poorest section of the community. Mention has already been made of the philanthropic rice committee of Dacca town. This was originally organised in June to purchase rice at low prices for sale to the poor as prices rose, but subsequently it was decided to sell *balam* and Burma rice to the poor at Re. 1 below market rates or below cost price, the loss to be met by subscription. The committee succeeded in securing rice at cost price through the generosity of Messrs. Chamaria & Co. and Khan Saheb Hafiz Mohamed Hossein of Zinzira. Lists of recipients were made as the result of house-to-house visits and other enquiries by members of the committee. Between August 1st and November 30th rice was sold to 32,969 persons at 6, 6½ and 7 seers per rupee, whilst 500 maunds were distributed free.

The loss incurred was about Rs. 10,000 in spite of the work being largely done gratuitously and the godown being lent free.

Another organisation which did good work in selling rice at cost price in Dacca town was the Bar Library shop which sold large quantities at cost price, the shop work being done by local pleaders under the leadership of Babu Surja Kanta Banarji."

121. In Tippera district an allotment of Rs. 10,190 received from the Central Cyclone Relief Committee was distributed in the three subdivisions. Grants were also obtained from the Bengal Relief Fund and Mrs. K. C. De's Relief Fund and other local contributions were also added. Cyclone relief was administered along with the funds for the relief of the famine existing previously to the cyclone and detailed separate accounts have not been submitted.

122. In Mymensingh district the Social Service League gave relief to the amount of Rs. 510. The Bengal Relief Fund has only furnished incomplete returns of two weeks' work. The Collector reports that the representatives of that fund were repeatedly asked to take over a definite area for relief, but did not comply.

The Revd. J. G. Franklin of the Pentecostal Church of the Nazarene distributed 69 maunds of rice free to 2,237 persons; the value of the rice was Rs. 468. The distribution was made in the two chaukidari unions of Kalma and Adampur, remote places on the eastern side of Kishorganj subdivision in Astagram thana.

Besides the above, Raja Jagat Kishore Acharji Chaudhuri gave away 1,859 prices of cloths, worth Rs. 2,500, to 1,859 persons from his Bhairab cutcherry.

The Hon'ble Babu Brajendra Kishore Ray Chaudhuri organised the sale of cheap rice from his cutcherries at Birganj, Tetulia and Rajendrapur.

SECTION XV.—Miscellaneous.

(*a*) Help given by zamindars.

123. Early in October zamindars were asked by the Collectors of districts to do all in their power to relieve the distress of their raiyats who had suffered in the cyclone. It is my duty, and a pleasant duty, to acknowledge the help rendered by the following zamindars :—

Rai Sri Nath Ray and his brothers Rai Janaki Nath Ray Bahadur and the Hon'ble Rai Sita Nath Ray Bahadur of Bhagyakul contributed substantially to the Central Relief Fund and gave relief in cash to their tenants and to needy persons generally.

Maharaja Sashi Kanta Acharjya Chaudhuri Bahadur gave Rs. 5,000 to the Mymensingh District Relief Committee at the time when any contributions were most valuable, that is, when relief work was just starting.

The Hon'ble Babu Brajendra Kishore Ray Chaudhuri was president of the committee which supervised the sale of controlled rice at Gauripur. He opened shops for the sale of cheap rice at three bazars in the more remote parts of Netrokona subdivision and his manager materially helped the relief officers.

Rai Satindra Nath Chaudhuri of Satkhira fed about 300 persons daily for about a month from the day after the cyclone and also helped his tenants in other ways.

Babu Promod Chandra Ray Chaudhuri of Atharabari in Mymensingh was president of the local rice committee. He gave away cloth and rice and his manager and other officers did great service in the relief of four unions.

Raja Jagat Kishore Acharjya Chaudhuri distributed 1,859 pieces of cloth among his tenants in and near Bhairab.

Some other zamindars helped in various ways, showing that they felt it their moral and social duty to assist their suffering tenants ; but it must be regretfully admitted that the majority of the landowners were completely apathetic. Some even took advantage of their tenants' helpless condition to lend them money at excessively high rates of interest.

(*b*) Chaukidars.

124. The village chaukidars, who are poorly paid officers, were badly hit by the cyclone. Their pay fell into arrears because for some time it was impossible to collect the chaukidari assessment. Meanwhile they were called to assist in every branch of relief work and were often required to work by night as well as by day. For those who rendered specially good service a bonus of half a maund of rice was sanctioned ; this being considered as justly debitable to expenses of relief administration. Government sanctioned the grant of advances to panchayats unable to collect the assessment to pay the wages of chaukidars and by the end of February practically all arrears of chaukidars' wages had been cleared.

(*c*) Village schools.

125. In the cyclone some thousands of village primary school buildings were demolished. Many of these have been reconstructed in a temporary manner ; but the flimsy structures will not stand the rains, and it is feared that many schools will have to be closed until the villagers can afford to reconstruct them in a sufficiently substantial manner. The Bengal Relief Fund and the Central Cyclone Relief Committee were moved to sanction special grants to assist the early reconstruction of these buildings ; and the Central Relief Committee has given a sum of Rs. 60,000 for this purpose. Government also has made substantial grants for the rebuilding of schools of all kinds recognized by the Education Department. District

Relief Committees realised the needs of the situation and have contributed all that could be spared from their funds after actual physical distress had been adequately relieved. It is hoped that with this help the villagers will now show energy and self-sacrifice enough to complete the restoration of the school buildings and thus prevent the set back to primary education which otherwise would inevitably occur.

(*d*) Services of Officers.

126. When the catastrophe occurred it brought out the qualities of the Government officers and showed that they were fully equal to the occasion. The three districts most seriously affected were particularly fortunate in having as their Collectors Messrs. Lambourn, Roy and Dash. Mr. Lambourn by his deep and generous sympathy captivated the hearts of the people of Dacca district. Mr. J. N. Roy in Faridpur fully maintained his reputation for patient broad-minded administrative ability, and the prolonged tours made by Mr. and Mrs. Roy shortly after the cyclone and the example they set of devotion to the relief of the distressed made a profound impression and stimulated all classes to do their utmost. Mr. Dash in Khulna showed exceptional organising ability and on his taking charge of the district at the end of October, his vigorous and capable administration galvanised into activity the flagging energies of all officers and relief workers who had been feeling the lack of guidance and control owing to the officiating Collector being incapacitated by illness.

127. It may truly be said that with very few exceptions every Government officer responded to the call of duty and did his best to relieve the suffering. Under the circumstances, it may seem invidious to make any distinction, but it is my duty to mention specially those who rendered most conspicuously good service. Others would probably have done equally well if they had had the same opportunity.

128. Among subdivisional officers the first place must be assigned to Maulvi Tabibur Rahman of Narail. Within a few days after the cyclone he had visited every part of the subdivision where the cyclone had done serious damage. In every union he had established a relief committee and realised local contributions from which immediate relief was given to those in greatest distress. On his own initiative also, he effected in his subdivision the most complete co-ordination of official and non-official relief agencies. Among other subdivisional officers deserving of high commendation are Babu Amal Krishna Mukharji in Faridpur, Babus Suresh Chandra Basu and Dwijendra Mohan Sen in Dacca district, Babu Nava Gopal Chaki in Khulna, Babu Radhika Lal De in Bakarganj, Babu Niranjan Roy and Rai Anath Bandhu De Bahadur in Mymensingh and Rai Suresh Chandra Sinha Bahadur and Babu Basanta Kumar Das in Tippera. Mr. A. H. Kemm, I.C.S., who worked as special cyclone relief assistant to the Collector of Dacca, and Mr. A. C. Bose, my financial assistant, should also be mentioned.

129. Among Deputy Collectors, special praise is due to Maulvi Afzalur Rahman and Babu Rash Behari Mukherji in Dacca, Babus Madhu Sûdan Das and Hriday Ranjan Sen in Mymensingh and Babu Sachindra Nath Mukharji in Jessore.

130. Among the Munsiffs who did active relief work, by far the most conspicuous was Babu Jogesh Chandra Sen of Bhanga in Tippera. As Chairman of the local Union Committee he showed remarkable foresight in providing material for the rebuilding of houses and preventing excessive profiteering. His devotion to the public welfare was very remarkable. Subsequently he was given entire charge of the Bhanga relief circle and the Collector records that he was by far the most efficient Circle Relief Officer in the district and showed excellent powers of organisation. Babu Pasupati Mukharji, Munsif of Iswarganj, is also warmly commended by the Collector of Mymensingh. In this connection I desire to acknowledge the generous sympathy and help accorded by the District Judges, especially Messrs. Macnair and Stinton as presidents of the District Relief Committees of Faridpur and Dacca.

131. As regards police officers, the Hon'ble Mr. Cumming has recorded the following note :—"The Police everywhere have with few exceptions shown a splendid spirit. Much of the early work fell on the rank and file in giving immediate relief and in collating information ; yet they themselves were living under circumstances of great discomfort and privation, owing to loss of shelter, clothes, cooking utensils and food." The readiness to help which they continued to show throughout the relief operations is equally commendable. Of the police officers whose services were most conspicuous the following may be mentioned :—Maulvi Azizul Haq, Deputy Superintendent of Police; Offg. Inspector Maulvi Khabiruddin and Sub-Inspectors A. K. Khabibullah, Sarat Chandra Ganguli, Raj Kumar Das and Md. Idris, all of Mymensingh, Sub-Inspectors Chandra Kanta Mukherji, Joy Kumar Chakrabarti, Khalilur Rahman and Ramendra Nath Nandi, and Head-Constable Ramendra Nath Nandi, all of Khulna district ; Md. Rasiduddin and Babu Harendra Nath Chakrabarti, two head-constables of Lohagara police-station, who at great personal risk rescued some men during the cyclone. In Khulna district the Superintendent of Police, Mr. P. Leo Faulkner, rendered services of the very greatest value.

132. Of Excise officers Rai Saheb Lalit Kumar Sen who carried out the special relief of *bhadralok* in Dacca cannot be praised too highly for his tact and unsparing devotion to duty. Conspicuously good services were also rendered by Excise Sub-Inspectors Charu Chandra Sen and Aftabuddin Ahmad in Khulna and S. N. Bose in Dacca.

133. Of Circle Officers, those who distinguished themselves most were probably Babus Mahatap Chandra Ghosh, Sachi Kanta Ghosh, Hem Chandra Sen, Ajit Kumar Bose and Jogesh Chandra Sen in Dacca, Maulvi Kakihuddin Ahmad and Babus Sarat Kumar Guha and Upendra Chandra Narayan Chaudhuri in Tippera. In this category may also be included Sub-Deputy Collectors Janaki Bhusan Singh, Azizur Rahman and Nripendra Kumar Sen in Dacca, Maulvi Bazlur Rahman in Mymensingh and Maulvi Mir Hosain in Tippera district ; also Kanungos Satis Chandra Bose, Ashutosh Ganguli and Benoy Bhusan Chaudhuri in Khulna.

134. Sub-Registrars had special opportunities of rendering valuable services. The following have been commended by Collectors :—

> Maulvi Sheik Nakitulla and Babus Bankim Chandra Das Gupta and Bhupendra Nath Das Gupta in Khulna, Babu Kaulendra Kumar Mazumdar in Bakarganj, Maulvi Naziruddin Mahmed and Syed Afzal Ali in Jessore, Babu Atul Chandra Sen in Tippera, Maulvi Dilwar Hosain Ahmad in Faridpur and Babu Profulla Kumar Ghosh and Sarat Chandra Lahiri in Mymensingh.

135. We are greatly indebted to Mr. R. S. Finlow, officiating Director of Agriculture, for the zeal with which he devoted himself to relief work. Mr K. MacLean, Deputy Director who controlled the major part of the *rabi* seed distribution, showed organising ability of high order combined with exceptional tact. The following officers of the Agricultural Department have been commended by Collectors, viz :—Babus Surendra Nath Sen in Bakarganj and Devendra Nath Mitra in Faridpur.

136. Mention must be made of the vigour and resourcefulness shown by the officers of the Public Works Department, Eastern Division.

The rapidity with which debris was removed and all the most urgently necessary repairs were carried out were highly commendable. For this credit is due to Mr. W. J. Kerr, Executive Engineer, Rai Saheb Ashutosh Guha, Honorary Assistant Engineer, Babus Sris Chandra Guha and Girija Prasanna Basu, Subdivisional Officers, and Babu Akhil Chandra Chakrabarti, Station General Overseer.

137. Of officers of other departments the following are specially deserving of commendation, viz :—Babus Banka Behari Pandit, Assistant Head Master, and Nanda Lal Chaudhuri, teacher of Khulna Zilla School ; Babu Kiran Chandra Sen, Co-operative Inspector in Dacca district, and Babu Bhupal Chandra Tarafdar, Forest Officer in Khulna.

138. Among clerks commended by Collectors for exceptional devotion to relief work duties are Babus Hari Das Chatterji, Atul Chandra Sen and Gangadhar Chakrabarti and Maulvi Janab Ali in Faridpur, Babu Barada Kanta Das in Bakarganj and Babus Hem Kumar Mitra, Shiva Prasad Lahiri, Sashi Bhusan Ghosh and Kailash Chandra Chakrabarti in Khulna district.

(e) Non-official relief workers.

139. I fully agree with Mr. Roy, Collector of Faridpur, in his remarks that—

"The members of all the relief committees throughout the affected area took a lively interest in their work and for the most part ungrudgingly accepted the burden that was laid on their shoulders. They had to sacrifice a great deal of personal comfort and interest but they did so cheerfully."

Mr. Roy mentions one young pleader who, when taken to task by his relations for neglecting his professional work, retorted—

"Such a chance of doing good comes only once in a man's lifetime, and I would rather do it than make money."

The spirit which animated this reply imbued all the voluntary relief workers, and it is due to this that the success which attended the District Officers' efforts was attained.

140. Out of the vast numbers in every district who have deserved commendation, the following are mentioned as having rendered conspicuously meritorious public service :—

In Khulna district—

(1) Babu Kunja Behari Mukherjee, B.L., pleader, did particularly good work as Secretary of the Bengal Relief Fund Local Committee and of the District Relief Committee.

(2) Rai Amrita Lal Raha Bahadur did good work in arranging supplies of rice, in pushing the sale of rice and in obtaining speedy grants from the District Board for relief work.

(3) Munshi Jainal Sardar, president-panchayat of Vekatmari, police-station Paikgacha.

(4) Babu Surendra Nath Rai Mandal, president panchayat of Loudob, police-station Dacope.

(5) Pandit Bhaba Nath Banerjee, member of panchayat, Union No. III, police-station Palerhat.

(6) Babu Rajani Kanta Banerjee, Station Master, Bagerhat, Khulna-Bagerhat Railway.

(7) Babu Banawari Lal Chatterjee, Station Master, Mulghar, Khulna-Bagerhat Railway.

(8) Babu Kamakshya Charan Nag, M.A., Principal, Bagerhat College.

(9) Babu Somarendra Kumar Nag, B.A., of Basabati.

(10) Dafadar Raj Charan Mandal, Secretary, Union Relief Committee, Char Basiary.

(11) Babu Hem Chandra Banerji, president panchyat and Secretary, Union Relief Committee, Raripara.

(12) Babu Upendra Nath Bose, president panchayat and Secretary, Mowbhog Union Relief Committee.

(13) Babu Surendra Nath Banerjee, Secretary, Bishnupur Relief Committee, police-station Bagerhat.

(14) Munshi Tofel Sardar, Secretary, Bashtali Relief Committee.

(15) Munshi Abdul Gafur, Secretary, Srifaltala Union Relief Committee.

(16) Babu Sita Nath Mandal, Secretary, Hurka Relief Committee.

(17) Munshi Sadan Chaudhuri, Assistant Secretary, Thana Relief Committee, Mollahat.

(18) Babu Chandra Kanta Chakrabarty, Secretary, Maghia (Kachua) Relief Committee.

(19) Babu Basanta Kumar Ghosh, president panchayat of Union No. IV, police-station Dumuria.

(20) Babu Satish Chandra Mitra of Sahash, police-station Dumuria.
(21) Babu Hari Mohan Roy, president panchayat of Union No. III, police-station Dacope.
(22) Babu Surendra Nath Roy Mandal, president panchayat of Union No. V, police-station Dacope.
(23) Munshi Jaynal Sardar, president panchayat of Union No. V, police-station Paikgacha.
(24) Svami Jotirmoyananda of the Ram Krishna Mission, Mollahat.
(25) Babu Nagendra Nath Bose, Secretary, Gotapara Union Relief Committee, police-station Bagerhat.

141. In Bakarganj district—

(1) Babu Kailash Chandra Sen, Head Master, Goila High English School.
(2) Babu Rajendra Lal Sen, of Fulsri.
(3) Babu Sasi Kumar De, Tahsil Panchayat of Sujankati.
(4) Babu Chandra Kanta Somadder, Tahsil Panchayat of Bagdha.
(5) Babu Ramesh Chandra Bose, of Bakaj.
(6) Babu Keshab Lal Samajpati, Head Master, Malikhali High English School.
(7) Babu Suresh Chandra Chatterji, of Bagdha.

These gentlemen helped the Sadar Additional Subdivisional Officer and the Subdivisional Officer of Pirojpur in selecting cases for help and rendered help in various ways in the distribution of agricultural loans and gratuitous relief.

142. In Jessore district—

Rai Jadu Nath Mazumdar Bahadur, Chairman of the District Board. He toured the affected area with the Subdivisional Officer, Narail, and was largely instrumental in promoting the most complete co-eperation between the Bengal Relief Fund and the official relief agency.

Mr. B. K. Bose looked after Narail subdivision on behalf of the Bengal Relief Fund.

143. In Faridpur district—

(1) Babu Hem Chandra Sen, B.A., Head Master, Palong High English School, and President, Palong Relief Committee.
(2) Babu Manindra Chandra Mazumdar, President, Bajitpur Relief Committee.
(3) Babu Amrita Lal Mukharji, B.A., Secretary, Chaygaon Relief Committee.
(4) Manindra Chandra Sen, B.A., Secretary, Panchar Relief Commitee.
(5) Munshi Abdul Mannan, Post Master and Secretary, Kabirajpur Relief Committee.
(6) Kazi Abdul Aziz, President, Gopalpur Relief Committee.
(7) Babu Devendra Nath Sen, Sub-Registrar, Sibchar, and President, Sibchar Relief Committee.
(8) Babu Nalini Kanta Mukherji, B.A., Sub-Registrar, Palong, and Secretary, Palong Relief Committee.
(9) Babu Probodh Chandra Mazumdar, Inspector of Police, Palong, and Member, Palong Relief Committee.
(10) Babu Bepin Behari Ghosh, Pleader, Bhanga (Brahmandi Relief Committee).
(11) Babu Mohini Mohan Ghosh, Pleader, Bhanga (Brahmandi Relief Committee).
(12) Babu Chandra Bilas Mukherji, Honorary Magistrate, Gopalganj.
(13) Maulvi Abdul Quader, Gopalganj.
(14) Pandit Chandra Kanta Nayalankar, Daharpara (Kotwalipara).
(15) Babu Ananta Lal Sen, B.L., Kajulia (Gopalganj).
(16) Babu Binode Lal Ghose, Pleader, Madaripur.
(17) Babu Surendra Nath Biswas, Pleader, Madaripur.

The two gentlemen last named rendered extremely valuable services as joint secretaries of the Subdivisional Relief Committee. They arranged the details of all relief work, despatched supplies to relief centres, attended to the requirements and gave instructions to subsidiary local committees. Full advantage was taken of Babu Surendra Nath Biswas' special facility in matters of account.

(18) Babu Khetra Gopal Sarkar, Pleader, Faridpur.
(19) Maulvi Abdul Wahed, Auditor, Co-operative Societies.
(20) Khan Sahib Abdul Gani, Chairman, Sadar Local Board.
(21) Munshi Shahajuddin Mandal of Saldha.
(22) Babu Mati Lal Bose, Talukdar, Pailampatty, police-station Nagarkanda.
(23) Munshi Jahural Haque, Supervisor, Co-operative Societies.
(24) Babu Purna Chandra Guha, collecting panchayat of Brahmandi.
(25) Munshi Gaher Sikdar, collecting panchayat of Char Dubail.
(26) Babu Jnanendra Nath Guha, B.A., Secretary, Gosairhat Relief Committee.
(27) Babu Barada Kanta Mukherji, B.A., Secretary, Lonsing Relief Committee.
(28) Babu Harish Chandra Sen, President, Panchar Committee.
(29) Babu Janki Nath Banerjee, President, Bhedarganj Relief Committee.
(30) Babu Manoranjan Bhattacharji, Medical Practitioner, and Secretary, Mahendradi Relief Committee.
(31) Babu Digendra Nath Biswas, President-panchayat and Secretary, Hoshenpur Relief Committee.
(32) Miss Tuck, Widows' Home, Orakandi.
(33) Babu Girish Chandra De, Head Master, M. N. Institution, Gopalganj.
(34) Babu Gati Lal Chakravarti, Bajunia, police-station Gopalganj.
(35) Babu Beni Madhab Pal, Ghritakandi, police-station Kasiani.
(36) Maulvi Abdul Hasib Chaudhury of Kushtia, Kotwalipara police-station.
(37) The Hon'ble Babu Ambika Charan Mazumdar, M.A., B.L.
(38) Babu Purna Chandra Maitra, B.L., Pleader, Faridpur.
(39) Babu Mathura Nath Maitra, B.L., Pleader, Faridpur.
(40) Mr. N. J. Bose, Gopalganj.
(41) Babu Jogesh Chandra Roy Chaudhury, Daharpara, Kotwalipara.
(42) Babu Suresh Chandra De, Pleader, Ganganagar.
(43) Babu Nibaran Chandra Bhattacharji, Fatehjangpur.

144. In Dacca district—

(1) the firm of Messrs. H. R. Chamaria through Babu Rampratap Chamaria, Director, Tata Bank, and their local representative, Babu Ram Ballabh Gadia : they were the largest importers of Burma rice into the district and were always ready to accept prices fixed and to help in distribution by lending boats and the time of their employés : gave 650 maunds of rice for free distribution and financed the Dacca Town Rice Committee without profit.

(2) Babu Jagesh Chandra Gupta, B.L., pleader, did excellent work in connection with distribution and control of rice in the district and supervised a branch of the Dacca Rice Committee in Dacca town : was a very useful and energetic member of the Executive Committee of Dacca Cyclone Relief Fund.

(3) Nawab Khajeh Muhammad Yusuf Khan Bahadur, Chairman, Dacca Municipality.

(4) Babu Dhirendra Chandra Ray, Vice-Chairman, Dacca Municipality ; and

(5) Mr. A. L. Godden, Chairman, Narayanganj Municipality, should be specially mentioned for organization and control of relief in the towns of Dacca and Narayanganj.

Mr. Godden as Joint Agent of the India General Steam Navigation Company afforded much assistance in helping the distribution of seeds and rice.

(6) Babu Keshab Chandra Banerji did much hard work as Honorary Secretary of the Dacca Cyclone Relief Committee.

(7) Khan Sahib Muhammad Husain subscribed liberally to the relief of his union and sold large quantities of rice at cost price.

(8) Mr. P. K. Bose, Bar-at-law, worked hard to raise funds for relief committee of the district.

(9) Babu Debendra Chandra Mazumdar, pleader, Narayanganj, worked in direct relief work during the Pujahs and afterwards.

(10) Babu Ashutosh Bhattacharji, pleader, Narayanganj, for direct relief work and help in preparation of lists of *bhadralok* relief.

(11) Babu Rajani Mohan Basak, mukhtar, Manikganj, for relief work and management of rice market at Manikganj.

(12) Babu Monmatha Nath Chakravarti of Gaodiya, Lohajang, 4th-year student; Babu Jogesh Chandra Mukherji, pleader, Dacca; Babu Kali Prasanna Mukherji, student, Sanitary Training class, and Babu Jatindra Mohan Banerji, 4th-year student, and Babu Hemendra Nath Brahmachari of Ramkrishna Mission for assistance in supervising interment of corpses in Lohajang area and in the case of Babu Jogesh Chandra Mukherji for assistance in investigations of *bhadrolak* relief.

(13) Mr. Lakshmi Narayan Saha of Servants of India Society for relief work in Munshiganj subdivision.

(14) Rai Bahadur Pyari Lal Das, M.B.E., Babu Satyendra Nath Das and Babu Ajit Kumar Das for work in connection with the Dacca Rice Committee.

(15) Babu Surja Kanta Banerji, B.L., pleader, for his work in directing the sale of rice by the members of the Bar Library.

(16) Babu Dhirendra Nath Das Gupta, B.A., teacher, Panam High School, and Assistant Secretary, Sonarang Ramkrishna Sevasram.

(17) Babu Sashi Bhusan Bhattacharji, Secretary, Ramkrishna Sevasram, Sonargaon.

(18) Babu Bidhu Bhusan Sen Gupta, Secretary, Ramkrishna Sevasram, Dhuptara.

(19) Babu Anath Bandhu Bhattacharji, President panchayat of Khilgaon.

(20) The late Babu Apurba Chandra Sen, Head Master, Sonarang, and Babu Suresh Chandra Das Gupta, President-panchayat of Sonarang-Tangibari Unions.

(21) Babu Bhupati Chandra Das Gupta, zamindar-proprietor and teacher, Kamala School.

(22) Babu Benodeswar Das Gupta, B.A., teacher, Kalma School.

(23) ,, Pramatha Nath Das Gupta, B.A., Head Master of Kalma School.

(24) ,, Durga Prasanna Mullick, President panchayat of Kalma Union.

(25) Swami Arupananda of the Calcutta branch of the Ramkrishna Mission for assistance in *bhadralok* relief.

(26) Professor S. C. Sarkar for organisation of *bhadralok* relief.

The following presidents and members of panchayats and Chairmen, Union Committees, for assistance in relief work in their respective unions :—

(27) Babu Hirendra Kumar Shome, president panchayat of Kumarbhog.

(28) ,, Bhuban Mohan Bose, president panchayat of Teotia.

(29) Babu Lalit Mohan Chatterji, president panchayat of Haldia.
(30) ,, Abani Mohan Barori, president panchayat of Dhankunia.
(31) Rai Ramesh Chandra Guha Bahadur, president panchayat of Bajrajogini.
(32) Babu Ramesh Chandra Chakravarti, Chairman of Rasunia Union Committee.
(32) Babu Jatindra Nath Banerji, pleader, member of panchayat, Munshiganj.
(34) Munshi Kazimaddi Ahmad, president panchayat of Panchasar Union.
(35) ,, Ahamad Dalal, president panchayat of Rampal Union.
(36) Babu Debendra Kumar Bose, president panchayat of Dhipur.
(37) ,, Suresh Chandra Das Gupta, president panchayat of Sonarang-Tangibari.
(38) ,, Akshoy Kumar Bose Chowdhury, president panchayat of Sologhur.
(39) ,, Debendra Nath Tagore, president panchayat of Bhagyakul.
(40) ,, Bankim Chandra Guha Mustafir, president panchayat of Srinagar.
(41) ,, Revati Mohan Sarkar, assistant panchayat, Shyampur.
(42) ,, Pramatha Nath Bose, president, Teghoria.
(43) ,, Nripati Ranjan Ray, president, Subhadya.
(44) Maulvi Mauswral Karim, president, Jantrail.
(45) Babu Sris Chandra Choudhury, president, Kalakopa.
(46) Maulvi Naimuddin Kabiraj, president, Kusumhati.
(47) Babu Madhu Sudan Bose, president panchayat, Chandhar.
(48) ,, Prafulla Kumar Nag, president panchayat, Gopinathpur.
(49) ,, Mon Mohan Guha, president panchayat, Lotakhala.
(50) ,, Jogesh Chandra Chakravarty, president panchayat, Baira.
(51) ,, Lal Mohan Banerji, president panchayat, Sutalori.
(52) ,, Mathura Kanta Banerji, president panchayat, Dhankora.
(53) M. Hazi Easin Dewan, member, Union Committee, Baira.
(54) Babu Akrur Chandra Sen, Chairman, Union Committee, Baira.
(55) ,, Mohini Mohan Datta, member, panchayat of Baldhara.
(56) ,, Nishi Mohan Ghosh, president panchayat of Garpara.
(57) ,, Rakhal Chandra Datta, Kabiraj of Sabhar.
(58) ,, Ramesh Chandra Sen, president, Tetaljhora Union Committee.
(59) ,, Umesh Chandra Dhar, Chairman, Kaliganj Union Committee.
(60) Rai Saheb Jogesh Chandra Datta, Kaliganj.
(61) Babu Jogindra Nath Banerji, Ulushara.
(62) ,, Akshay Kumar Karmakar, Chairman, Kapasia Union Committee.

Of the gentlemen directing voluntary aid organisation financed from outside the district may be mentioned :—

(63) Babu Srish Chandra Chatterjee, B.L., Honorary Secretary, Bengal Relief Fund, and
(64) Rai Sahib Raj Mohan Das, Worker of the Sadharan Brahmo Samaj, Calcutta.

Mention should also be made of the services of gentlemen who lent godowns for rice storing and of jute firms of Narayanganj and Baira in arranging for boats.

145. In Tippera district—

(1) The Hon'ble Babu Akhil Chandra Datta, Pleader.
(2) Mr. Indubhusan Datta, Zamindar.
(3) Babu Sarat Chandra Chakravarty, B.L., Pleader.
(4) ,, Abani Mohan Mazumdar, Head Master, Bangora High English School.

(5) Babu Satish Chandra Singh, President of Aurail Union.
(6) „ Ambika Chandra Sen, President of Chunta Union.
(7) „ Mahim Chandra Ghose, Ditto.
(8) „ Nalini Nath Banerjee, Government Pleader.
(9) „ Kumudinikanta Mukhuti, Pleader.
(10) „ Upendra Nath Ghose, Do.
(11) „ Kalikumar Bhowmik, Do.
(12) „ Bepin Chandra Guha, Do.

146. In Mymensingh district—

(1) Babu Barindra Kar of Bajitpur.
(2) „ Suresh Chandra Chakravarti. Secretary, Kishoreganj Subdivisional Relief Committee.
(3) Babu Jamini Mohan Das, Auditor, Co-operative Societies.
(4) Raja Bijóy Singh Dudhoria, six weeks before the cyclone, commenced to import and sell cheap rice, wholesale and retail, practically at cost price. His large stocks were of the greatest use in supplying cheap rice shops when the cyclone came. The Raja and his manager co-operated enthusiastically with Government officers throughout relief work.

The names of other zamindars who did conspicuously useful work are mentioned in sub-section (*a*) above.

(*f*) Conclusion.

147. It will be seen from what is recorded above that, although the distress caused by the cyclone was very great, the relief rendered was by no means unequal to the needs of the situation. It was given with an unstinting hand thanks to the generosity of the subscribers to the Central and other Relief Funds and to the Government represented by His Excellency and the Hon'ble Mr. J. G. Cumming. At the same time, by the adoption of systematic organisation and by adherence to the general principles of relief laid down by the Hon'ble Member, relief officers were guarded from allowing their anxiety to afford succour to the distressed to lead them to indiscriminate benevolence or to forgetfulness of the fact that what was being given was public money.

148. I fully endorse the following remarks of Mr. J. N. Roy, Collector of Faridpur :—

"The direct benefit derived by the people for whom the various measures were intended was immense. It has been noted under the respective heads, and we may, on the whole, congratulate overselves on the results. But when we consider for a moment what impression the undertaking has left on the minds of the people in the area affected, we have still greater cause for congratulation. The masses had hitherto associated Government solely with police and magisterial work. 'When distress broke out in Kotwalipara' says the Subdivisional Officer of Gopalganj, 'on account of the high price of rice and cloth, people used to tell me of the help rendered them by Babu Debi Prasana Rai Chaudhury of the Brahmo Samaj and the apathy shown by Government officers to their miseries.' When, therefore, Government stepped forward with generous help after the disaster, they were agreeably surprised. The manner in which the Government gave practical proof of their sympathy at once evoked grateful appreciation. As one of the non-official Secretaries remarks, 'people are convinced of the fact that the Government not only administer civil and criminal justice but also look to the amelioration of the people when in distress."

So far as the people of higher strata of society, I mean the *bhadralogs*, are concerned, the cry has been for some time past that Government was unsympathetic and indifferent to their interests. The result was a great deal of discontent which the disaffected were not slow to take full advantage of. It is my full conviction that it is among these *bhadralogs* that they secured their largest number of recruits. The assistance given to them has brought about a change of attitude, and dispelled any possible feeling previously entertained that their condition was a matter of indifference to Government."

S. G. HART.

The 6th March 1920.

APPENDIX A.

1.—Note by the Meteorologist, Calcutta.

A depression had formed in the centre of the Bay on the 22nd September 1919, and by the morning of the 23rd it had apparently developed into a storm with its centre roughly 400 miles to the north-west of the Andamans. It moved rather rapidly in a northerly direction, concentrating and increasing in violence, so that by eight hours on the morning of the 24th the storm had become one of small extent but of great severity. At this time it was not far from the Sandheads, somewhat to the east-north-east. It caused a fall of the barometer of ·6 of an inch at the Sandheads and it gave winds of hurricane force for a few hours there and tremendous seas. Passing the Sandheads, it began to change its course to the north-east and finally took up a north-easterly direction of motion. Its centre passed to the south-east of Calcutta, Jessore and Mymensingh and to the north-west of Barisal, Narayanganj and Srimangal during the day and night of the 24th and the early morning of the 25th. At eight hours on the 25th it had diminished considerably in intensity and its centre was about 80 miles east of Mymensingh. It moved into the Assam hills and broke up there. From the morning of the 23rd to the morning of the 25th its forward motion was about 12½ miles per hour.

From the meteorological point of view the chief characteristic of this storm was the small area occupied by it and the intense nature of the storm within that area. From the special observations taken during the course of the passage of the storm through South-East Bengal the diameter of the region of severity must have been less than 20 miles, but within this diameter the winds were of destructive violence. The centre of the storm passed within forty miles of Calcutta without giving more than a few strong gusts, and at 4-45 P.M. on the 24th September when the storm centre was almost at its closest to Calcutta, the sun was shining brightly in Calcutta.

The highest velocities of wind recorded during the passage of the storm were :—

74-80 miles at the Sandheads at eight hours of 24th.
19 miles at Barisal at two hours of 25th.
15 miles at Noakhali at two hours of 25th.
12 miles at Alipore at 20 hours of 24th.

2.—Report of W. J. H. Ballantine, Esq., Superintendent of Police, Sylhet.

Mr. Ballantine had taken over his launch *Kotwal* from the dockyard authorities in Calcutta and was proceeding in her up to Sylhet. He met the storm in the Sipsa (in Khulna district) where the river is over a mile wide, and the launch which is a stern wheeler soon became unmanageable. She staggered and rolled in the high sea that was running, so Mr. Ballantine was constrained to run her ashore. This he did, and fortunately the place selected was covered with *Sundri* saplings which gave way before the onslaughts of the *Kotwal*. He spent a terrible night in the heart of the Sunderbans attended by a huge crocodile which refused to be driven away. He and his party were not able to leave the launch till the afternoon of the 26th when he hailed a passing steamer to convey them to Khulna. They had been marooned for two days and nights and would have suffered much from thirst but for a welcome shower when they were able to collect some rain water. On his way from Khulna every few yards he passed dead cows and buffaloes and not infrequently human beings and pigs. The odour was too horrible for adequate description. Vultures and crows were rarely to be seen, and it is sure that the inhabitants of the air suffered no less than the residents on the land below.

The market places at Batiaghatta, Jalma, Chalna and Dacope had been levelled to the ground and the Dacope police-station simply exists no longer.

Mr. Ballantine has recorded in his tour diary a very vivid account of his perilous adventures. Room can only be found here for the following extracts :—

24th September 1919.—

* * * * * * * *

At 11 A.M. we weighed anchor and proceeded up to Oura-Sipsa. Up to this the weather was monsoonish in character with nothing to suggest anything out of the ordinary. We proceeded to cross the Sipsa, which is over a mile wide, in a north-easterly direction with the wind dead ahead and had got to within 200 yards of the opposite bank when the wind instantly changed to north-west and set up a big cross sea which left us in the trough of the waves. As the steamer has very little free-board and could not stand the rolling, we were obliged to change her course to again head the wind which had begun rapidly to increase in strength ; as it was only by keeping her bow on to the waves that we could hope to keep her afloat in the very high seas which had now arisen. We kept on this course to very nearly across the river to its western bank where I hoped to make a small jungle *khal* that I knew of, for a safe anchorage ; but this was not to be. The wind which was now blowing with hurricane violence shifted instantly to the east, and we were again caught in the trough of the waves. The river is very deep, over 15 fathoms, and the waves which sprung up, were of extraordinary height. The cross wind had caught the steamer's roof, so that it was found impossible to turn her

to face it, and the only thing left to be done was to quarter the waves diagonally down wind and prevent her foundering before we reached the bank.

* * * * * * * * *

The bank at this point and *only this* was covered with thin sapling jungle right up to the water's edge, and these saplings had to be pressed down and the larger trees cut before the vessel could ride over them. Fortunately the cyclone had banked up the water which was now 3 or 4 feet deep in the jungle, and the violence of the wind and waves materially assisted the weakening effort of the steam capstan and drove the vessel on to the bank a bare 18 feet (her extreme breadth). Then one or two waves swamped and filled her. The vessel was now sunk with about 4 feet of water over her lower deck and the storm blowing with intense violence and driving huge waves right over the vessel.

* * * * * * * * *

It was now about midday, but as dark as midnight, and for the next two hours we were subjected to the pounding of the waves and the full fury of the storm. I confess that I entertained no hopes of surviving and had made such preparations as were possible for leaving the ship for the jungle in case she broke up.

* * * * * * *

At about 3 P.M. the wind stopped dead and a most unnatural calm resulted. There was not a breath of air and the waves which till then had been mountainous fell to absolute stillness and the surface of the river remained unruffled by even a ripple.

* * * * * * *

The still interval lasted an hour and then immediately the storm began to blow with equal violence but from due west.

* * * * * * *

26th September 1919.—In the afternoon another Andrew Yule & Co.'s steamer, the *Ireland* proceeding up from Calcutta, came alongside. She had met the cyclone in the western portion of the 24-Parganas, Sunderbans and reported numerous vessels driven ashore or total wrecks along the route including the *Shinwari* which had driven bodily into the jungle with her flat.

* * * * * * *

We anchored that night just outside of Khulna as the serang did not venture to go in, there being so many wrecks in the river. All along the route the devastation of the cyclone was pitiful. Every house and tree had been blown flat and the rivers were covered with the carcases of cattle, interspersed with human bodies and deer. We passed several flats wrecked on the bank and not a single country boat was visible, almost all having been sunk and most of them hopelessly wrecked.

* * * * * * *

3.—Extracts from report of A. J. Dash, Esq., Collector of Khulna.

The storm. The time it began and warnings received.—On the 24th September at dawn the sky was overcast and rain was falling. The force of the wind was light. Wind and rain increased during the morning and afternoon until the full force of the cyclone was experienced at about 4 P.M. to 7 P.M. at different places. At Khulna (town) at 8-30 P.M. a lull took place for a period of about half an hour and the storm continued until after midnight. In places to the south of Khulna the storm occurred two or three hours earlier. A warning signal was received at Khulna at 12-58 on the 24th September 1919 and was hoisted at 2-30.

The directions of the wind.—The general direction of the wind at the beginning of the storm was from the east. At all places in the Satkhira subdivision, at Paikgachha and at Fultala the wind backed through north to west as the cyclone progressed showing the centre of the storm passed south-east of these places. At Fakirhat, Rampal, Bagerhat and Kachua the wind veered through south to west, the centre thus passing to the north-west of these places.

The time and places where a lull occured.—Khulna, Dumuria, Dacope, Batiaghata, Rampal, Kachua and Mollahat report a lull in the middle of the cyclone period. The lull at Mollahat, Bagerhat and Kachua was for ten minutes. The lull at Khulna was for half an hour and at Rampal for one hour and these places may therefore be considered on the track of the centre. Mr. Ballantine, Superintendent of Police, Sylhet, was on board the *Kotwal* police launch and was caught in the cyclone and stranded in the Sunderbans at the northern junction of the Ura Sipsa with the Sipsa river and observed that a lull took place at 3 P.M. The centre therefore passed over this point. At Khulna, Rampal, Batiaghata, Dumuria and Mollahat the lull took place at about 8-30 or 9-30 P.M. It can be inferred from these observations that the storm entered the district from the south at about 9 A.M. on the 24th September and left the district at its north-east corner at about 10 P.M. The general direction of the wind after the cyclone was from the west.

In places where the lull occurred it was noticed that the west wind rose with great suddenness and violence after the lull.

The time the storm ended.—The violence of the storm abated between 1 A.M. and 2 A.M. of night of the 24th-25th September and on the morning of the 25th the weather was clear. Its duration was about 12 hours.

* * * * * * *

Little damage was done in the southern part of the Morrelganj thana and in the Sarankhola thana of the Bagerhat subdivision on the east and in the Kalaroa, Satkhira, Tala, Debhatta, and Kaliganj thanas of the Satkhira subdivision on the west. The rest of the district suffered heavily. The course therefore lies between these areas. The width of the damaged areas appears to be about 30 miles.

* * * * * * *

Places in or near the track of the centre naturally suffered more severely, but the actual damage caused varied considerably in places quite close together, the amount of damage depending on the extent to which the place was exposed to the full force of the cyclone. It was noticed that in the Sadar subdivision all the trees fell from north-east to south-west. In Bagerhat subdivision most fell from south-east to north-west. The direction of the wind which was most violent can thus be inferred.

* * * * * * *

The height of the storm wave.—One of the features of the cyclone was the storm wave which accompanied it. The water in the rivers rose 3 or 4 feet above high water level and in some places even higher. This caused considerable floods in localities near rivers. The flood in most places subsided within a few hours, but in the low and exposed paddy lands bordering on the Sunderbans considerable damage to embankments and crops resulted. In the Bagerhat subdivision little damage was done to embankments of which there are few. But the flood topped the high bank of the river (and embankment if any) and the flood water could not escape from the paddy fields.

In the Sadar and Satkhira subdivisions many embankments were destroyed by the flood. Crops were damaged by the rush of water and not by prolonged submergence. Observations on the height of the flood by various officers are appended below :—

Sadar subdivision.	Ft.	Bagerhat.	Ft.	Satkhira.	Ft.
By Sadar Subdivisional Officer—					
In south of subdivision ...	5	Mollahat ..	3	Shyamnagar ...	4
„ north ditto ...	4	Do ...	4		
„ extreme south ...	3	Kachua ...	7

* * * * * * * *

4.—Extracts from the report of the Superintendent of Police, Khulna.

By 5-45 P.M. it was as dark as a baker's oven and the velocity of the wind began to increase. It blew practically due east and at 7 P.M. the storm was so intense that glass doors and venetians could no longer stand the storm.

* * * * * * * *

At 8-20 P.M. there was an obvious lull.

* * * * * * * *

5.—Extract from further report by the Superintendent of Police, Khulna.

* * * * * * * *

The big Assam Despatch steamer *Shinwari* was blown ashore about 4 miles south of Kabbaduk forest station, i.e., to say, 4 miles south of the junction between the Kalpetua, Kabbaduk and Sheikbaria rivers. She was driven across the river which is 1¼ miles wide and deposited in the jungle. This place is 21 miles south-west of the place where Ballantine went ashore and is the most southerly point of which we have complete knowledge of the cyclone's strength and havoc.

6.—Extract from the report of the Deputy Inspector of Schools, Khulna.

* * * * * * * *

First the cyclone began from the north-east and continued from 4 P.M. to about 8 P.M. Then after an interval of about half an hour it was again blowing from the west with

greater force and continued till 1-30 A.M. of the next day. There was heavy rainfall during the whole period of the cyclone. It was slight during daytime.

* * * * * * * *

7.—Extract from the report of Babu Banku Behari Pandit, Circle Officer, Dumuria.

On the morning of the 24th September rain set in and there was very little indication of the coming storm. By noon the condition of the weather changed and in the afternoon storm raged with great violence attended with rain. At 8 P.M. its force was great and up to this time its direction was mainly north-east. After 9 P.M. it stopped for half an hour and again blew with great velocity and continued up to about 2 A.M. on the 25th when the wind changed into southward.

* * * * * * * *

8.—Extract from the report of Babu Digendra Prosad Nag, Circle Officer, Batiaghatta.

From the morning of the 24th September 1919 the atmosphere became gloomy and it became drizzling from 7 A.M. and wind was blowing from the east. Gradually the fury of the east wind increased, which continued up to 2 P.M. There was a complete cessation of the cyclone at about 8 P.M. and it lasted for an hour. Again from 9 P.M. it continued with greater velocity than before from the west.

9.—Extract from the report of Babu Harendra Narayan Bose, Circle Officer, Shyamnagar (Satkhira).

Very early on the 24th September morning indications of monsoonish weather appeared. The skies were overcast and a fairly strong east wind began to blow. It was drizzling the whole of that morning. From about midday the clouds thickened, and the course of the wind deflected towards the north-east with developing intensity and rain began to pour in torrents. Gradually as the day wore on, the intensity of the wind increased as well as the accompanying downpour. From about 4 P.M. it developed into a violent storm accompanied by heavy rainfall and continued with unabated fury till 8 P.M., the wind in the meantime gradually veering round to north-west. A very few terrible blasts came from this. Along with the cyclone a tremendous storm-wave rose up from the rivers.

10.—Extract from the report of Babu Bankim Chandra Gupta, Circle Officer, Mollahat (Bagerhat).

* * * * * * * *

At nightfall on the 24th the wind began to blow with greater fury and, continued thus till 8 P.M. when it suddenly reached its culminating point and the storm began to blow in a way never before known. After 10 P.M. there was a lull for an hour and again the storms appeared from the opposite direction with less force. First the course of the storm was from the south-east to north-west and latterly from the north-west. There was a rise of tidal waves up to 2 cubits, and their course was from the south-east to north-west. The terrible visitation disappeared with the dawn of the following day. It is rumoured among the villagers that a red glow was noticeable in the firmament during the interval of the first visitation and the second attack.

11.—Extract from the report of Babu Jogendra Nath Dey, Circle Officer, Bagerhat.

The storm actually began at 4 P.M. It grew furious from the evening of the day. The direction of the wind was from south-east up to 9-30 P.M. There was then a lull for about 12 minutes when the direction of the wind changed and the storm blew from south-west. The height of the storm-waves was about 6 feet.

12.—Extract from the report of the Circle Officer, Badhal.

From the early morning of the 24th September threatening clouds were seen and winds were blowing with downpour at times. Conditions became positively dangerous at about 4-30 P.M., and the storm proper began a little before dusk when the wind was blowing from the east. Its direction gradually changed to south-east and at about 9 P.M., when it began to blow from a point between south and south-east, the fury reached its height and most of the damages were done at that time. It lasted for a long time and, gradually reaching the south, the storm abated at about 1-30 to 2 A.M. of the 25th instant. There was comparatively a lull for some 15 or 20 minutes between 10 to 11 P.M. The height of the storm-waves on the river was estimated to be from 2 to 3½ feet.

13.—Extract from the report of Circle Officer, Rampal.

The storm began at 3 P.M. of the 24th September 1919.

Duration.—From 3 P.M. to 9 P.M in full force. Rest for one hour and after 11 P.M. to 3 A.M. (25th September) in greater force.

Course.—During cyclone—First-half from east, second-half from south, and reverse after the cyclone.

14.—Extract from the report of Babu Narendra Nath Mukherjee, Circle Officer of Unions I, X and XII, police-station Rampal.

The storm began at 3 P.M. of the 24th September 1919 and it blew furiously up to 9 P.M. At first the direction of the wind was from the east and then after the lull, which was for an hour and a half after 9 P.M., the course of the storm changed and it blew from south with greater force up to 3 A.M. The height of the storm-waves varied from 2 to 4 cubits.

15.—Extracts from the report of the Collector of Bakarganj.

* * * * * * *

At dawn of the 24th September the sky was clouded and on the east was coloured with an unusual redness. Drizzling rain fell with slow gusts of wind from the east at 8 A.M., the direction of the wind changed a little, and there was a heavy and almost incessant downpour with occasional gusts of strong south-east wind. There was a comparative lull from 4 to 6 P.M. After 6 P.M. the violence of the wind increased and a regular storm began to blow from the south-east. It gradually increased in fury and reached its maximum about 10 P.M. The greatest damage was done between 10 to 12 P.M. The course of the wind appears to have changed a little during these hours, gusts coming from the south. The fury of the storm began to abate after midnight when the direction of the wind changed from south to south-west. The storm was over by 3 A.M. of the 25th September and after dawn there was fine unclouded weather. No lightning was seen or thunder heard during the whole of the day and night of the 24th September.

* * * * * * *

A similar or more disastrous cyclone took place on the 31st October 1876. It passed over the Dakhin Shabazpur island and Baufal and Golachipa thanas in the Patuakhali subdivision. In that cyclone it was not the wind which proved the greatest instrument of destruction. It was the storm-wave, sweeping along to a height from 20 to 40 feet, which did the most damage. In some places, where the wave met with resistance, it mounted even higher than that. In that storm and inundation the total loss of human life by drowning amounted to 105,000 as shown below :—

	Total population.	Probable number drowned.
Dakhin Shabazpur island	221,000	70,000
Baufal thana	118,000	15,000
Golachipa „	98,000	20,000
Total ...	437,000	105,000

* * * * * * *

16.—Extracts from the report of the Subdivisional Office of Narail (Jessore).

* * * * * * *

As the day advanced there were heavy showers, and the high easterly wind grew stronger and stronger. After midday the showers continued and the weather became gradually threatening, and at evening there was a cyclone of unusual severity which raged furiously from about 8 P.M. up till 3 A.M. The direction of the wind changed gradually to the north-east and subsequently when it was most intense it blew from the north.

It is reported that there was a lull during the storm and that the direction of the wind changed from north-east to due north after the lull. It is further reported that during this lull the western horizon looked bright red and fiery, so much so that persons who witnessed it reported that it illumined the surface of the earth for a short time. The lull, however, was of such a short duration that it was only noticed by persons who were out at the time rescuing people and running to places of safety. The storm ended altogether by 4 A.M.

* * * * * * *

The height of the storm-waves was, roughly speaking, 4 feet only.

* * * * * * *

Never within living memory was there another cyclone of this type in this subdivision. Much has been said of the cyclone of 1909, but people are unanimous that the

present cyclone was far more intense and that it cannot be compared with the cyclone of 1909. The latter, as report goes, was of greater duration, but of much less intensity, while the damage it caused was not even one-tenth of the damage caused to life and property by the present cyclone and was not accompanied by any storm-waves.

* * * * * * *

17.—Extracts from notes, dated 30th September 1919 by Rai Amar Nath Das Bahadur, Superintending Engineer, South-Western Circle, on his inspection of the Madaripur bhil route.

The gauge reading at Takerhat (on the Madaripur bhil canal) indicated a rise of about 1 foot in level as found on the morning of the 25th. During the storm the waves were so high that the level could not be fixed by the Sub-Overseer, who went out of his quarters during the period of the lull at 11-30 P.M.

* * * * * * *

As regards the storm itself, it appears that from what I could gather from the departmental subordinates, that the first direction of the wind was from the north east and then a period of lull and then the direction changed. It is uncertain whether it was abruptly from the north-east to its opposite south-west, but I think the change was against the hands of the watch, indicating the centre of the storm to the east, but very close to all the places, Khulna, Haridaspur and Takerhat. Mr. Woodward, Chief Engineer of dredger *Foyers*, lying near the 6th mile post of the bhil route, told me that he noticed the ship's aneroid barometer indicated a fall to 28·5 inches which remained stationary for the period of lull.

The period of lull is given at Khulna at about 10 to 10-30 P.M.; at Haridaspur it is given by the Sub-Overseer at 10-30 to 11 P.M. At Futteypur it is given at 11 to 11-30 P.M.

18.—Extracts from the report of the Collector of Faridpur.

* * * * * * * *

In the Sadar subdivision, the cyclone began in right earnest at about 10-30 P.M., when it was blowing from the south-east. There was a temporary lull for 15 minutes at midnight, after which it resumed its course from the west-south-west and raged furiously till about 4 o'clock in the morning. The highest intensity was reached between 12-30 and 2 A.M. Thanas Bhanga, Nagarkanda and Sadarpur and *chars* Salepur and Harirampur in thana Bhadrasan were the biggest sufferers. In these *chars* it is reported that the height of the storm-waves varied from 6 feet to 9 feet. The rainfall recorded in Faridpur next morning was 7·7 inches. Madhukhali and Bhusna thanas were practically left untouched.

In the Madaripur subdivision, the storm was very severe between 9 P.M. and 3 A.M., and it was at its highest between 11 and 2. The wind blew at first from the south-east, after which it came from the south and gradually veered round to the south-west. It began to subside about 3 o'clock in the morning, and at daybreak there was no gale worth the name. The brunt of the blow fell on thana Sibchar, where iron posts of 8" × 4" were bent and twisted, and on the northern and eastern portions of thana Matbarerchar. Next in order come thanas Rajoir, Madaripur and Palong. Throughout this area the waves were high and overtopped the banks at several places, but nowhere did they penetrate any appreciable distance inland. The readings on the following day at 8 A.M. in the two rainfall gauges at Madaripur and Palong were 9·16 and 6 inches, respectively.

At Gopalganj the storm began at 5 P.M. and blew steadily from the north-east with increasing violence till 9-30 P.M. A quarter of an hour later there was a complete lull. What followed has thus been described by the Subdivisional Officer :—

"People thought that the storm was over and came out of the places where they had crouched for shelter. I went over to the office to find it blown down completely. Mathuranath Institution building was also a total wreck. The road was littered with blocks of tin and fallen trees. I then came back to my house and was just going out again to inspect the damage done when the storm broke out afresh. It was then about 10-30 P.M. At 11-30 P.M. it was blowing with all its former fury from the south-west. With the change in the direction of the wind the river water began to rise and overflood the bank. At about 1 A.M. my compound and the fields adjoining were one vast sheet of water at one with the river. (The Subdivisional Officer estimates that the waves must have risen from 4 feet to 6 feet in various parts of the subdivision.) A red glare was also noticed at this time towards the south. I thought at the time that a fire had broken out in some neighbouring villages towards the south, but as it was visible from all over the subdivision it must have been connected in some way with the storm. This red glare in the sky and the rise in the river water struck a fresh terror in the hearts of the people. The storm, however, began to die down gradually after 3 till it ceased completely at 4 A.M.

* * * * * * * *

19.—Extracts from the report of the Cyclone Relief Officer of Shanga, Faridpur.

* * * * * * * *

It was raining during the whole day and a strong south-easterly wind was also blowing.

* * * * * * * *

Later on in the evening however and as the night advanced the wind began to blow more and more severely and the rain fell in torrents.

* * * * * * * *

Strong cyclonic gusts of wind went on till midnight when there was a temporary lull for about 15 minutes. After this the wind veered round and began to blow in wild fury from the west-south-west and continued with unabated violence till daybreak.

* * * * * * * *

20.—Report of the Meteorological Reporter, Goalundo.

Goalundo, 24th September 1919 (A.M.)	...	Slight showers during the morning increasing towards afternoon. Squally wind north-east.
„ „ (P.M.)	...	Squalls gradually increasing in violence, wind east north-east.
„ 25th September 1919 (midnight)...		Weather cyclonic. Wind force equal to that of cyclone of 1909. Wind shifted at 1 A.M. to north-north-east. Unable to stand on deck. All stem moorings cast off and vessel riding head to wind, windows, doors, etc., blown in. Cabins flooded.
„ „ (4-30 A.M.)	...	Storm abated rapidly. Clear sky. Sea smooth. Clearing rapidly.

* * * * * * * *

21.—Extracts from the report of the Collector of Dacca.

* * * * * * * *

It was at 8 P.M. that the first warning of an approaching cyclone was received at Narayanganj. By 9 P.M. the wind was blowing hard, but had scarcely developed into a storm.

After a careful comparison of the various reports received the following time-table has been prepared :—

Munshiganj, Narayanganj, and Manikganj give practically identical times for each phase of the storm.

9-11 P.M. Strong east wind.
11 P.M. The storm became cyclonic in violence.
1 A.M. Storm at its climax for first period.
2-3 A.M. A partial lull during which the wind began to blow from south and south-west.
4-30 A.M. The cyclone proper had passed, leaving a high wind blowing which continued to about 8 or 9 A.M.

Observations for South Sadar were taken from the neighbourhood of the Agla Bhil, Nawabganj police-station, and may be considered roughly correct for Srinagar thana as well. The general description tallies with that given by Munshiganj, Narayanganj and Manikganj, save that in the case of the country round Agla each phase in the storm took place half an hour earlier.

All reports except for Manikganj are in agreement on one point, namely, that the wind started blowing from the east, that in the course of the storm, usually about the time of the lull it changed round through south and during the latter part blew from the south-west and west. In Manikganj the winds changed from east to west through north. The easterly wind betokened the passage of the front, the lull of the centre and the westerly wind of the rear of the cyclone. The lull was partial at Narayanganj, Munshiganj and Manikganj, but complete at Dacca and Fulbaria, near Sabhar. It is probable therefore that the former places lay between the centre and the outside of the cyclone, and the latter roughly in the centre of its path. The time of the lull at Fulbaria was the same as at Munshiganj, Narayanganj and Dacca, *i.e.*, half an hour later than at Agla. The latest hour of subsidence of the cyclone is reported to be 10 A.M. in the northernmost parts of the district. It subsided at Dacca at 8 A.M. From the above facts it is conjectured that the centre of the cyclone entered the district about the junction of Srinagar and Nawabganj thanas on the Padma; that it moved in a direction slightly north of north-east and that its rate of travel was between 20 and 25 miles an hour.

The width of the storm was roughly 45 miles. The western boundary of the area of devastation is a line through Jaigir in Manikganj subdivision, almost parallel to the course of the Meghna river which formed the eastern boundary.

An aneroid reading at Narayanganj showed a fall from 28·75 to 27·50.

The rainfall recorded at 8 A.M. on 25th September was 7 inches at Narayanganj, 7·63 at Dacca and 8·12 inches at Munshiganj. The average rainfall in the month of September is 9 inches. There is no indication that there was any distinct storm-wave such as devastated Bakarganj and Chittagong in 1876 and 1897. It was, however, new moon and consequently the tides were high and the current strong. The wind blowing against the stream at the beginning of the cyclone and the heavy rainfall combined to raise the water level by 4 to 6 feet while on the large and more open expanses of water ; the ordinary waves raised by the wind attained a height of 6 or 7 feet. It was observed at Srinagar that the rise of the water coincided with the change of direction of the wind to the west. When the wind veered to the west, the violence of the wind and waves swept away innumerable huts, and most of the casualties in the Padma chars must have occurred then.

* * * * * * * *

The intensity of the storm decreased as it moved north, though it was still sufficient to cause widespread destruction among the jack trees and mangoes of Manahordi.

It was of extreme violence on a 25-mile front centreing on Lohajang at its entry into the district and continued so for a distance northwards of 30 miles, the northern limit of greatest intensity being a line approximately from Sabhar to Gopaldi. Some bighas of land in Lohajang were completely washed away by the waves engulfing a number of houses, whilst of the two flats at Lohajang, one was driven ashore and the other foundered in deep water. In Dacca town the Buckland Bund made of brick and cement was badly breached, while two railway trucks were blown over at the railway station yard. Massive electric light standards and telegraph posts were blown down in every direction.

The wind acted however with curious fitfulness ; groups of houses were left untouched while others in their immediate vicinity were destroyed. This has been observed to occur at several places in the district.

* * * * * * * *

2. *Barometric readings.*—The figures given in my former report, viz. a fall from 28·75 to 27·50, were taken from an aneroid reading at Narayanganj. Mr. Godden now reports as follows :—" The glass was steady on the 24th at about 29·30 till 7-30 P.M. when it began to drop and fell to 28·40. These readings were taken at Netaiganj."

* * * * * * * *

22.—The Commander of the India General Navigation Company's flat "Varuna" at Lohajang recorded as follows.

24th.—18-20 hours noticed weather, looked very suspicious.
Wind east-north—east.
Wind freshening 22 hours.
Wind increasing about midnight and turned round to the southwards.
25th.—1 A.M. Wind shifted to south east and blew in terrific squalls with a very strong rush of tide which I have since realised was a storm wave. It rose from appearances on the bank to 6 feet above the level of the bank.

23.—Extract from a letter of the Rev. H. Bridges, Dacca.

* * * * * *

"On the night of the cyclone September 14th last I was anchored in my motor boat off the village of Dayapur (or Musharikhola) on the river Buriganga about 2 miles below its junction with the Dhaleswari During the evening there was a fresh south-east breeze blowing with occasional bursts of rain. By 9 P. M. the wind had increased considerably and there was quite a rough sea running in the river. Soon after 11 o'clock the wind was blowing very strongly indeed and veering round a little towards the south ; at the same time there was a continual downpour of rain. By 1-30 most of the villagers had lost their houses and were gathered in the church. At about 2-15 A. M. the wind dropped almost suddenly and it became possible to see the stars through breaks among the clouds. So complete was the calm that the villagers were able to move about among the ruins of their *baris* with naked lights for a short time. After about half-an-hour, however, the wind began to blow again, this time from the north-west and very soon it appeared to be even more violent than before. Many trees which had withstood the first onslaught came crashing down. At 3-15 A. M. two men who said they were police constables came in telling that their boat with two companions had just sunk close by. The bodies were recovered in the morning. The direction of the wind gradually changed in a northerly direction, and when it began to abate about 6 A. M. it was blowing as near as I could tell from north-north-west. The rain ceased at 8 o'clock and by 9 atmospheric conditions were about normal.

I may mention that when the storm was at its height the river rose very quickly some 3 or 4 feet, subsiding again in the early morning. On the wind veering round

after the calm interval my motor boat was washed or blown on to the shore and there left as the water receded high and dry some 10 yards from the river's edge.

* * * * * *

24.—Extracts from the report of Babu Mahatop Chandra Ghosh, Circle Officer, South Sadar, Dacca.

* * * * * *

At 8-30 we reached Sibrampur. * * * At 10-30 P. M. regular storm began directly from the east and the fury increased every moment.

* * * * * *

The fury of the storm began to slacken and a little after there was a perfect calm, the rain abated, and we saw lights were passing at a distance which indicated that the villagers were moving about.

The lull lasted for about half-an-hour and then the second phase of the storm began accompanied by rain. This time the wind blew directly from the west and it seemed as if the west was replying to the east. It continued till about 7 A.M. when it showed signs of abatement.

* * * * * * * *

The place where our boat capsized is about 4 miles from the place where we anchored. It is known as the Agla bil.

Immediately after the cyclone I went round the whole of the Nawabganj thana. It became at once apparent that the damage on the western side of the thana (*i.e.* in Sikaripara and Joykrishnapur unions) was far less than the damage suffered by the eastern unions (viz., Agla, Kailail, etc.).

In Kushumhati and Nyabari unions people experienced that the cyclone began from the south-east, and it subsequently veered to the north-west, but my personal experience at Agla was a little different. I am quite certain the wind was easterly at first and after the lull it blew from the west. The change took place counter-clockwise.

25.—Extract from the report of the Collector of Tippera.

* * * * * * * *

At about 10 P.M. the wind developed into severe storm. It first took its course from the south-east and then from the south and south-west and continued till the next morning.

* * * * * * * *

26.—Extracts from the report of the District Economic Intelligence Officer, Mymensingh.

The storm began to blow rather violently at about 2 A.M. of the 25th September 1919. It grew in intensity at about 4-30 A.M. and was most violent between 4-30 and 6-30 A.M., at Kishoreganj side a lull was noticed between 6-30 and 8-30 A.M., but after 8-30 A.M. it again became violent till 11 A.M. when it altogether ceased.

* * * * * * * *

At Bhairab Bazar the storm began at 8 P.M. of the 24th September 1919 accompanied by drizzling. It then grew in intensity till 3 A.M. and was most severe between 3 and 5 A.M. and stopped at 6 A.M. The direction there was at first from south-east to north-west and in its period of severity it blew from the south to north with a little inclination towards west.

* * * * * * * *

In the Meghna the height of the waves was 10 feet to 15 feet above the water level. In the Brahmaputra too they rose from 7 feet to 8 feet.

The rainfall was between 3 to 4 inches on the average. At Netrokona it was 5·55 inches. At 9 A.M. of the 25th September the rainfall reading was 3·21 inches at Mymensingh.

* * * * * * * *

27.—Extract from a letter from the Commissioner, Surma Valley, Assam.

* * * * * * * *

The cyclone passed into Sylhet, its strength diminishing as it went. A certain amount of damage to houses was done in the Sunamgnaj and Habiganj subdivisions, but I understand that practically no damage was done to the rice crop and no loss of life among human beings has been reported.

* * * * * * * *

GRANT OF CONCESSIONS IN THE MATTER OF SECURING CIVIL APPOINTMENTS UNDER GOVERNMENT TO THOSE PERSONS WHO HAVE RENDERED SERVICE IN A WAR BOARD OR IN AN EMPLOYMENT AND LABOUR BOARD IN CONNECTION WITH THE PROSECUTION OF THE WAR.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Political Branch.

CALCUTTA, THE 15TH MARCH 1920.

RESOLUTION—No. 3512P.

THE question has recently been under consideration whether service rendered in a War Board (including a Publicity Board) or in an Employment and Labour Board can be regarded as service for the purposes of paragraph 1 (c) of this Government Resolution No. 2706P.D., dated the 22nd September 1919. It has been decided that service of the sort in question shall be so regarded.

ORDERED.—That a copy of the resolution be published in the *Calcutta Gazette* and that copies be forwarded to the other departments of Government for information and for communication to the officers subordinate to them.

By order of the Governor in Council,

H. L. STEPHENSON,

Offg. Chief Secy. to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR FEBRUARY 1920.

I. **Character of the season.**—During the month under review the rainfall was in excess of the normal throughout the province, except in the districts of Birbhum, Midnapore, Hooghly, Jalpaiguri and Darjeeling, where the fall was a little in defect, and in Howrah, where the fall was just the normal. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Pressing of sugarcane was nearly over. Harvesting of spring crops and preparatory tillage for jute and other autumn crops were proceeding. Sowings of jute and autumn paddy commenced in some Eastern Bengal districts.

III. **State of standing crops.**—The condition of standing crops was reported to be generally favourable.

IV. **Prospects and probable outturn.**—The prospects of standing spring crops were much improved by the rainfall in the first part of the month, and the outturn is expected to be satisfactory.

V. **Damage to standing crops.**—No damage to standing crops was reported from any district.

VI. **Condition of agricultural stock.**—The condition of live-stock was fair. Cattle disease was found to exist in parts of Nadia, Murshidabad, Bankura, Hooghly, Rajshahi, Rangpur, Dacca, Mymensingh, Tippera and Noakhali.

VII. **Failure of pasturage and fodder.**—The supply of fodder was sufficient throughout the province.

VIII. **Prices of food-grains.**—During the second fortnight of the month under review the prices of common rice rose in three districts, fell in fifteen, and remained stationary in the rest of the province It varied from 5 seers in the headquarters of the 24-Parganas and Darjeeling to 7 seers at Bakarganj.

IX. **Condition of agricultural people.**—The condition of agricultural population is fairly satisfactory.

R. S. FINLOW.

Offg. Director of Agriculture, Bengal.

DACCA, *the 15th March 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 11th March 1920.

Summary.—During the week the rainfall was general. In some places excessive rainfall has caused damage to the standing crops, though it has facilitated the ploughing operations generally. The harvesting of spring crops continues. The average price of common rice for the province has fallen by about 0·63 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE, IN SEERS, PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

	Tamluk ...	8·88	5 9/11	5⅞ 6†	
	Contai ...	1·14	5 9/11	6 6½†	
10	HOOGHLY ...	4·60	5½	5	Effects of weather on the growth of the crops are not favourable. Fodder is sufficient.
	Serampore ...	3·38	5½	6	
	Arambagh ...	(*n*)	(*n*)	5¾	
11	HOWRAH ...	3·22	6⅛	6	Weather seasonable. Harvesting of sugarcane is almost over. The recent rainfall has been beneficial to ploughing. Prospects of *rabi* crops are fair. Fodder is sufficient.
	Ulubaria ...	2·73	5¾	5¾	
12	RAJSHAHI (RAMPUR-BOALIA).	2·76	6	6 3/16	Prospects of standing crops are favourable. Harvesting of *rabi* crops and sowing of jute and *aus* paddy continue. Fodder is sufficient. Cattle-disease is reported from thanas Lalpur and Bagatipara.
	Naogaon ...	0·77	6½	6½	
	Nator ...	2·74	6⅝	6	
13	DINAJPUR ...	0·54	6 3/16	6 3/16	Weather seasonable. Price of common rice is stationary.
	Thakurgaon	0·54	6½	6½	
	Balurghat ...	0·68	7½	7½	
14	JALPAIGURI	0·00	6	6	Prospects of standing crops are fair. Fodder and water are sufficient.
	Alipur ...	20·15	5½	5½	

† Coarse rice. (*n*) Not reported.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
15	Darjeeling	0·26	5	5	Potatoes and maize are growing. Wheat and barley are progressing. Stocks of rice, fodder and water are sufficient. Cattle-disease is reported from some places.
	Kurseong ...	1·83	5½	5½	
	Siliguri ...	0·77	5½	6	
	Kalimpong...	0·00	5½	5½	
16	Rangpur ...	0·04	5½	5½	Weather seasonable. Harvesting of potatoes is almost finished. Sowing of jute and paddy has commenced in places. Prospects of standing crops are good. Fodder and water are sufficient.
	Nilphamari	0·55	6 5/16	5 11/16	
	Kurigram ...	Nil	5½	5½	
	Gaibandha ...	0·31	5½	5½	
17	Bogra ...	0·61	6½	6½	Ploughing of lands and sowing of jute continue.
18	Pabna ...	1·79	5½	5½	Prospects of standing crops are not good. Fodder is sufficient. Cattle-disease is reported from Sirajganj.
	Sirajganj ...	0·92	5	5	
19	Malda ...	0·39	6½	6½	Transplantation of *boro* paddy is nearly finished and sowing of *bhadoi* paddy has commenced. Prospects of standing crops are good. Fodder and water are sufficient.
20	Cooch Behar	9·26	5 11/16	6½	Sowing of *bitri* paddy, *chuna* and *kaon* and harvesting of mustard continue. Fodder and water are sufficient.
21	Dacca ...	4·97	5½	6	Weather moist with high wind. The rainfall has caused some damage to the standing pulses and the young jute plants and temporarily hampered agricultural operations. Prospects of *boro* paddy are good. Rice market shows an upward tendency.
	Manikganj ...	3·25	5½	(*a*)	
	Narayanganj	4·23	5½	6½	
	Munshiganj (*a*)	3·11	5½	6½	
22	Mymensingh	1·58	5½	5 11/16	There has been slight rainfall, otherwise the weather is seasonable. Preparation of soil for *aus* paddy and jute continues. Sowing of jute and *aus* paddy has commenced in the char lands. Prospects of standing crops are fair. Water and fodder are sufficient. Rice market is steady.
	Jamalpur ...	0·67	5 5/16	5 5/16	
	Tangail ...	1·80	5 7/16	5 7/16	
	Netrakona ...	1·09	5½	5½	
	Kishorganj...	3·93	5½	5½	

(*a*) Not reported.

(*a*) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kapasia thana are reported here.

CALCUTTA, *the 20th March 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 18th March 1920.

Summary.—Excepting a few districts of the Burdwan and Presidency Divisions light rain fell generally throughout the province. Preparatory tillage for paddy and jute and their sowings are progressing favourably. Harvesting of spring crops is proceeding. Prospects of standing crops are generally reported to be fair. The average price of common rice for the province has fallen by about 0·66 per cent., as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	Nil	$5\frac{13}{16}$	$5\frac{5}{16}$	Prospects of standing crops are favourable. Harvesting of sugarcane in places in Baraset and Basirhat still continues. Lands are being prepared for the next season's crops Fodder and water are sufficient.

RESOLUTION ON THE BUDGET ESTIMATE OF INCOME AND EXPENDITURE OF THE HOWRAH BRIDGE FOR THE YEAR 1920-21.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 29TH MARCH 1920.

RESOLUTION—No. 1204Marine.

READ—

The Budget Estimate of Income and Expenditure of the Howrah Bridge for the year 1920-21.

Receipts.—The total receipts during the year are estimated at Rs. 3,90,448, being the same as the revised estimate for the year 1919-20. The receipts from East Indian Railway traffic to and from Howrah, which form the main source of revenue of the Bridge, have been estimated at Rs. 2,80,000, which is also the revised estimate for the year 1919-20.

Expenditure.—The total expenditure is estimated at Rs. 3,57,714, the revised estimate for 1919-20 being Rs. 3,57,614.

The anticipated surplus of Rs. 32,734 will be utilised as usual in reducing the debt of the Bridge to the Port Commissioners, which it is estimated will stand at Rs. 4,39,384 on the 31st March 1921, as against Rs. 4,67,118 on the 31st March 1920.

2. The Governor in Council approves the Budget estimate under section 21 of the Howrah Bridge Act, 1871.

By order of the Governor in Council,

C. B. BAYLEY,

Deputy Secy. to the Govt. of Bengal.

N.B.—This is an abstract of prices at the following markets :—

Wholesale—Chetla Hât, Ramkrishnapur Hât, Sealdah Fish and Milk Markets, Posta Bazar.

Retail—Sir Stuart Hogg Market, Orphangunge Market, Sobha Bazar, Nutun Bazar, Raja Babu's Bazar, Bow Bazar, Kareya Bazar, Taltolla Bazar, Mullick Bazar, Jogu Babu's Bazar.

S. C. GHOSH,

for *President, Advisory Food Committee.*

CALCUTTA, *the 27th March 1920.*

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA TRADE FLUCTUATIONS

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the ten months, April, 1919, to January, 1920, as compared with the corresponding period of 1918-19 and 1917-18. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the ten months, April, 1919, to January 1920, amounted to 18,943,000 maunds, as against 12,675,000 maunds in the corresponding period of the preceding year—an increase of 49 per cent. There was an increase of 12 per cent in the imports of coal and coke (81,284,000 maunds as against 72,370,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 76 per cent, the total value amounting to Rs. 8,72,50,000 as against Rs. 4,94,63,000 in 1918-19. The quantity of indigo imported during the ten months, April, 1919, to January, 1920, increased from 15,170 maunds to 16,765 maunds. The imports of raw jute amounted to 4,269,000 bales as against 4,283,000 bales—a decrease of 14,000 bales in the period under report. The importation of gunny bags also showed a decrease of 7 per cent (341 million bags as against 366 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) decreased by 19 per cent from 6,492,000 maunds to 5,252,000 maunds. The imports of sugar decreased by 13 per cent from 573,000 maunds to 497,000 maunds, and those of tea increased by 12 per cent from 2,724,000 maunds to 3,040,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the ten months, April, 1919, to January, 1920, increased by 24 per cent (Rs. 25,77,77,000 as against Rs. 20,86,92,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 1,066 million to 900 million bags in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 4,017,000 maunds to 4,878,000 maunds, or by 21 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles in the ten months, April, 1919, to January, 1920, compared with the corresponding months of 1918-19.

Dacca;
The 25th March 1920.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 25th March 1920.

Summary.—The rainfall was light and scattered. The weather condition was beneficial to standing crops and to agricultural operations generally. Ploughing of lands for and sowing of autumn crops and harvesting of late spring crops are progressing satisfactorily. The average price of common rice for the province has fallen by about 0·81 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

*New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal again 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 it April 1919 it is 56·319 ft. above M.S.-L.

†To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. October 1909).

(*a*) A new gauge fixed at Monghyr on 16th July 1914.

(*b*) From the 1st November 1915 the zero of gauge was 2·43 ft. above M.S.-L. Previous to that the zero was at M.S.-L. zero is 1·509 ft. above M.S.-L.

(*c*) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 30·99 ft. above M.-S.L. From 3rd June 1919. From 4th June 1919 the zero is 1·61 ft. above M.S.-L.

(*d*) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at

(*e*) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1920.

The 26th March 1920.

DEPARTMENT OF AGRICULTURE, BENGAL.

Forecast of the *Rabi* Crops of Bengal for 1919-20.

(***NOTE.—On an average of the five years ending 1917-18, the area under summer rice in Bengal has represented some 6·5 per cent. of the total area under rice in British India.***)

Character of the Season.—On account of sufficient moisture in the soil, the weather was generally favourable at the sowing time. Subsequently, the long spell of drought that prevailed in December and January greatly interfered with the growth of the crops and caused damage, especially in parts of Nadia, Jessore, Hooghly, Howrah, Rajshahi, Dinajpur and Pabna. But the February rainfall, though too late, was on the whole beneficial to the late crops, especially to summer paddy. Damage by insects is also reported from Jessore and Jalpaiguri. On the whole, the seasons, though not altogether favourable, was better than last year.

Acreage.—The normal area under the different *rabi* crops in the province dealt within this forecast is estimated at 3,830,200 acres. The area actually sown this year is reported to be 2,930,900 acres against 2,915,100 acres last year. Of this, the area under summer (*boro*) rice is returned at 372,300 acres against 369,700 acres of last year.

Outturn.—According to the estimates of district officers, the outturn of the different *rabi* crops for the province as a whole works out to 82 per cent. of the normal against 72 per cent. of last year, the returns from more important *rabi* districts being as follows :—Nadia 59, Murshidabad 76, Jessore 53, Burdwan 73, Midnapore 83, Rajshahi 68, Jalpaiguri 84, Rangpur 90, Pabna 60, Malda 74, Dacca 88, Mymensingh 100, Faridpur 88, Bakarganj 101, Tippera 85, and Noakhali 83.

Summer rice crop.—The outturn of summer rice according to district estimates in 89 per cent. of the normal against 72 per cent. last year. The gross yield of the crop for the province, on the basis of a normal yield of $14\frac{1}{8}$ maunds of clean grain per acre, is thus estimated at 174,500 tons against 140,100 tons last year, or an increase of about 25 per cent.

ROBERT S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA,
The 31st March 1920.

NADIA.	Barley	5,500	2,300	2,200	42	58	Middle of October; normal.	Beginning of February; normal.	The increase in area as compared with last year is due to high prices of grains. The weather was favourable at the time of sowing, but subsequently want of rain considerably affected the growth of the crops. The recent rainfall also has been slightly harmful to some of the crops. The outturn is consequently expected to fall much below the normal.

MURSHIDABAD.	Barley	20,200	10,800	11,300	75	83	October to January; generally normal.	Not yet commenced, except some pulses. Harvesting will be normal.	The increase in area was due to favourable weather at sowing time. The weather was favourable at the beginning, but subsequent drought retarded the growth of the crops. The casual showers in February, however, had a beneficial effect on the crops excepting those in flowers. The outturn is expected to fall below the normal owing to drought after sowing.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 1st April 1920.

Summary.—The rainfall was general. Some damage by hailstorm is reported from parts of Northern and Eastern districts. Preparatory tillage for jute and paddy and planting of sugarcane are proceeding in West Bengal. The average price of common rice for the province has risen by about 2 per cent. as compared with that of the previous week.

		Statement of weekly gauge readings on the rivers in Bengal	493—494

DEPARTMENT OF AGRICULTURE, BENGAL.

Special Forecast of the Wheat Crop of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the territory now reported on has, in the five years ending 1917-18, averaged (a) 40·7 per cent. and (b) 17·8 per cent., respectively).

Explanatory.—This special forecast shows the final estimates of acreage and yield of the wheat crop of the province and is published under orders of Government. The usual final forecast will be published in May as in previous years.

Character of the Season.—Since the issue of the second forecast, excessive rain accompanied with hailstorm in the beginning of March has caused damage in parts of Nadia, Murshidabad, Jessore, Pabna, Dacca and Faridpur. In the districts of Hooghly, Rajshahi and Bogra, however, the recent rain has improved the crop a little. On the whole, the season may be regarded as fairly favourable.

Area sown.—The total area sown this year is estimated at 116,300 acres against 114,600 acres (revised) reported in the corresponding and final forecasts of last year.

Outturn.—The estimated percentages of outturn as returned by the district officers in the important wheat-growing districts are as follows :— Nadia and Murshidabad each 67, Pabna 50 and Malda 90.

The provincial outturn works out to 77 per cent. of the normal against 61 per cent. reported in the corresponding and final forecasts of last year.

Taking the normal yield to be 8½ maunds per acre, the total yield for the province is estimated at 28,000 tons against 21,800 tons in the corresponding and final forecasts of last year.

ROBERT S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA,

The 8th April 1920.

APPENDIX I.

Special Forecast of the Wheat Crop of Bengal, 1919-20.

District.	Approximate normal area under the wheat crop.	Approximate area under wheat last year (1918-19).	Estimated area under wheat this year (1919-20).	Taking 100 to represent normal what would be the average outturn per acre cropped.		Date by which the harvesting of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
				Last year.	This year.		
	Acres.	Acres.	Acres.				
Nadia ...	23,100	9,400	11,700	33	67	End of February. Normal.	Want of rainfall during the period of growth has adversely affected the crop. The recent rain has not affected the outturn, though the quality of the crop has deteriorated to some extent.
Murshidabad ...	60,300	23,600	24,400	50	67	March. Normal...	The increase in area as compared with last year was due to favourable weather condition at sowing time. Drought at the period of growth and subsequently heavy showers and hailstorm in March are expected to cause damage to the extent of about 33 per cent.
Jessore ...	2,300	1,100*	900	58	50	Ditto ...	Since the submission of the second forecast, the crop has been damaged to the extent of about 25 per cent. by the excessive rain in March.
Burdwan ...	2,000*	2,000*	2,000*	56	67	Second week of March. Normal.	Some damage has been done to the crop in the Kalna subdivision by drought and by hailstorm in the Katwa subdivision.
Birbhum ...	5,000	4,100*	4,100*	67	83	End of March. Normal.	The weather has been fair.
Bankura ..	3,600*	3,600*	3,600*	67	100	Middle of February. Normal.	The weather has been good and a normal crop is anticipated.
Midnapore ...	1,300*	1,300*	1,300*	70	67	Middle of March. Normal.	Since the submission of the second forecast, the weather has been favourable. The absence of rainfall has damaged about 33 per cent. of the crop.
Hooghly ...	2,400	1,700*	1,700*	50	83	End of March. Normal.	The weather has been favourable since the submission of the second forecast. The outturn is likely to fall below the normal owing to want of timely rainfall.
Rajshahi ...	8,500	6,500	6,900	70	75	Middle of March. Normal.	The weather has been fair. The recent rain is likely to improve the outturn of the crop.
Dinajpur ...	1,400	1,200	1,200	40	61	First week of March. Normal.	The outturn is expected to fall much below the normal for want of rainfall. The recent rain has improved the crop to some extent.
Jalpaiguri ...	800	500	600	85	83	End of March. Normal.	The effects of weather have not been favourable. The absence of rainfall retarded the growth of the crop. The outturn is expected to fall below the normal owing to long continued drought.
Darjeeling ...	4,500	2,500	2,500	100	93	Second week of April. Normal.	The weather has been a favourable one.
Rangpur ...	3,000	3,400*	3,400*	80	90	Beginning of March. Normal.	The weather was favourable at the time of sowing, but subsequently want of moisture owing to drought affected the crop unfavourably. Afterwards the light rains that fell improved the prospects of the crop. Recently a little damage has been done by rain and hail.
Bogra ...	100	100	300	...	80	Middle of March. Normal.	Since the submission of the second forecast there has been some rain which helped the growth of the crop. The outturn is therefore expected to be a little better than what was anticipated in the second forecast.
Pabna ...	16,000	12,000	10,000	60	50	Ditto ...	The decrease in area as compared with last year was due to defective rainfall at the sowing time. About half the crop has been damaged by drought and subsequent heavy rain with hailstorm.
Malda ...	60,000	35,000	35,000	65	90	First week of March. Normal.	The weather has been favourable. Slight damage has been done by hailstorm. The outturn is below the normal owing to unfavourable weather at sowing time.
Dacca ...	4,100	3,900	4,100	75	75	Middle of March. Normal.	Damage to the extent of about 25 per cent. was caused by excessive rainfall and hailstorm in the first part of March.
Faridpur ..	2,700*	2,700*	2,700*	87	96	Not yet commenced	The weather has been favourable to the growth of the crop, but owing to excessive rain and hailstorm since the submission of the second forecast the crop is likely to be affected to the extent of about 4 per cent.
Total Bengal ...	210,000	114,600	116,300	61	77

CALCUTTA, *the 10th April 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 8th April 1920.

Summary.—The rainfall was moderate to heavy in some eastern districts and light and scattered elsewhere. Harvesting of spring crops is well advanced. Ploughing of lands for and sowing of jute, paddy and other autumn crops continue but the progress was hampered in parts of eastern districts owing to excessive rain which also caused some damage to standing crops. The average price of common rice for the province has risen by about 0·34 per cent. as compared with that of the previous week.

REVISED SCALES OF PAY OF THE PROVINCIAL EXECUTIVE SERVICE.

GOVERNMENT OF BENGAL.

APPOINTMENT DEPARTMENT.

CALCUTTA, THE 14TH APRIL 1920.

RESOLUTION—No. 3281A.

THE recommendations of the Public Services Commission on the question of pay of the Provincial Executive Service have been under discussion for some time with the Government of India and the Secretary of State. The Governor in Council now directs that in place of the present graded

system of pay, the future emoluments of the service in Bengal shall be as follows :—

Year of service.	Scale of pay per mensem.
	Rs.
1st year (Probationers) ...	250
2nd „ (Probationers)	275
3rd „ (On confirmation)	300
4th „	300

23rd „	800
24th „	800
25th „ and over..	850
Selection grade for 3 per cent. of the total cadre	1,000

2. The present probationary grade will be abolished and the existing members thereof absorbed in the cadre. Persons directly appointed as Deputy Magistrates and Deputy Collectors will be full members of the service from the beginning of their career, but will remain on probation for a period of two years, their increment of pay in the second year of probation depending on their passing the departmental test by the lower standard, and their confirmation on their passing that test by the higher standard coupled with general fitness. If confirmed, their service for leave and pension will be reckoned from the date of their first appointment.

3. Promotion to the Rs. 1,000 grade will be made strictly by selection.

4. The above orders will have effect from the 1st December 1919.

5. Ordered that this resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

H. L. STEPHENSON,

Offg. Chief Secy. to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR MARCH 1920.

I. **Character of the season.**—During the month under review the rainfall was much in excess of the normal throughout the province. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Planting of sugarcane continued. Harvesting of spring crops was in full swing. Preparatory tillage for jute, paddy and other autumn crops was taking place in Western and Northern Bengal. Sowing of jute and *aus* rice was proceeding briskly in Eastern Bengal, but was suspended at times owing to excessive rain during the first part of the month.

III. **State of standing crops.**—The standing crops suffered in some places from excessive rain and hail during the first two weeks of the month, but were, excepting in two or three districts, reported to be satisfactory.

IV. **Prospects and probable outturn.**—Except in two or three districts the prospects of standing crops were from fair to good. The spring crops for the province are on the whole yielding a satisfactory outturn.

V. **Damage of standing crops.**—During the first part of the month excessive rain accompanied with hail did some damage to the standing crops in parts of Nadia, Murshidabad, Jessore, Khulna, Pabna, Dacca, Faridpur, Tippera and Noakhali.

VI. **Condition of agricultural stock.**—The condition of live-stock was on the whole fair. Cattle-disease existed in parts of Nadia, Murshidabad, Khulna, Hooghly, Rajshahi, Darjeeling, Rangpur, Pabna, Cooch-Behar, Mymensingh, Faridpur, Tippera and Noakhali.

VII. **Failure of pasturage and fodder.**—The supply of fodder was sufficient throughout the province.

VIII. **Prices of food-grains.**—During the second fortnight of the month under review, the prices of common rice rose in nine districts, fell also in nine, and remained stationary in the rest of the province. It varied from $5\frac{5}{16}$ seers per rupee in the head-quarters of Tippera to 7 seers at Birbhum

IX. **Condition of agricultural population.**—The condition of agricultural population was fair.

ROBERT S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA, *the 16th April 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 15th April 1920.

Summary.—During the week there was practically no rain excepting some light scattered showers mostly in parts of the Dacca and Chittagong Divisions. Harvesting of spring crops is approaching completion. Preparatory tillage for jute, paddy and other autumn crops is in full swing and their sowings are proceeding. Prospects of standing crops are reported to be generally fair. The average price of common rice for the province has risen by about 1·07 per cent. as compared with that of the previous week.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 22nd April 1920.

Summary.—Excepting light and scattered showers in parts of North and East Bengal practically there was no rain in the rest of the province. Rain is needed in some western districts. Sowing of jute and paddy is progressing briskly. Weeding continues in Eastern Bengal. The newly planted sugarcane crop is doing well. The outturn of *boro* paddy is expected to be fairly good. The average price of common rice for the province has risen by about 1·93 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA TRADE FLUCTUATIONS

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the eleven months, April, 1919, to February, 1920, as compared with the corresponding period of 1918-19 and 1917-18. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the eleven months, April, 1919, to February, 1920, amounted to 20,740,000 maunds, as against 15,973,000 maunds in the corresponding period of the preceding year—an increase of 30 per cent. There was an increase of 16 per cent in the imports of coal and coke (91,692,000 maunds as against 79,294,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 80 per cent, the total value amounting to Rs. 9,45 lakhs as against Rs. 5,24 lakhs in 1918-19. The quantity of indigo imported during the eleven months, April, 1919, to February, 1920, increased from 17,309 maunds to 17,667 maunds. The imports of raw jute amounted to 4,732,000 bales as against 4,635,000 bales—an increase of 97,000 bales in the period under report. The importation of gunny bags also showed a decrease of 8 per cent (369 million bags as against 399 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) decreased by 18 per cent from 6,832,000 maunds to 5,579,000 maunds. The imports of sugar decreased by 10 per cent from 650,000 maunds to 588,000 maunds, and those of tea increased by 10 per cent from 2,933,000 maunds to 3,238,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the eleven months, April, 1919, to February, 1920, increased by 16 per cent (Rs. 28,02 lakhs as against Rs. 24,24 lakhs last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 1,189 million to 994 million bags, but the shipments of gunny bags to other Indian ports increased from 37 millions to 40 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 4,407,000 maunds to 5,370,000 maunds, or by 22 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

RESOLUTION ON THE FINAL REPORT ON THE FAMINE RELIEF OPERATIONS IN THE DISTRICT OF BANKURA DURING THE YEAR 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agricultural Branch.

DARJEELING, THE 3RD MAY 1920.

RESOLUTION—No. 87T.—R.

READ—

Letter No. 5R.G., dated the 23rd April 1920, from the Commissioner of the Burdwan Division, submitting with his remarks the final report by the Collector of Bankura on the famine relief operations, in the district of Bankura, during the year 1919.

THE district of Bankura which comprises an area of 2,621 square miles and has a population of 1,138,000, enjoys the unenviable notoriety of being more susceptible to famine than any other district in the Presidency. It

suffered from famine in 1866, 1874, 1897 and 1916 and from scarcity in 1885 and 1908; it suffered again from famine in 1919. The causes for its liability to famine are peculiar to itself. The whole of the Sadar subdivision on the west in addition to a large area of the Vishnupur subdivision in the south and west, is an undulating rocky and jungly tract. Owing to the rocky nature of the soil only a little over one-third of the district is cultivated. On 83 per cent. of the cultivated area winter rice is grown and on 7 per cent. autumn rice. Except, however, in the valleys or furrows in the undulating country, much of the soil is not very fertile, and, as it lies on the slopes or uplands, cannot be properly irrigated except from reservoirs, called *bandhs*, which are, however, both inadequate in quality and quantity. If the rainfall fails or is not properly distributed, the cultivators of these lands suffer. The cultivating classes represent 74 per cent. of the total population of the district and consist largely of aboriginals and semi-aboriginals. They are mainly dependent upon the rice crop for their livelihood and subsistence. In normal times this is more than sufficient for their needs; but they are still far from acquiring the habit of thrift, so that when a failure of the crops occurs they have nothing to fall back upon. Moreover, owing to their improvident habits the best lands have been sold for their debts and thus concentrated in a proportionately small number of hands. The three main causes for famine in the district of Bankura are therefore (1) the unfertility of the upland soil, (2) the thriftlessness of the inhabitants, and (3) the unequal distribution of the soil amongst the different classes.

2. The above three causes operated to bring about the famine of 1919. It must not, however, be supposed that there was at any period of the famine an insufficiency of foodstuffs in the district. Such was not the case, though arrangements were made for the supply of Burma rice in local areas in which there was a temporary shortage, or where local dealers attempted to inflate prices. In normal times the district produces more rice than it requires for its own consumption; and last year sufficient rice remained in the district from the harvests of the previous years for its needs. The trouble was the unequal distribution of the surplus and the fact that the distressed classes had not the wherewithal to purchase it. During the two years following the famine years of 1915-16 there were bumper harvests; but before the people could entirely recover from its effects the rains again failed. In the months of July and September 1918, the rainfall was 50 per cent. in defect of the normal over the greater part of the district and practically failed towards the end of the latter month, with the result that the outturn of the autumn and winter rice crops was only 53 per cent. of the normal. Further, the situation was aggravated by the epidemic of influenza which levied a heavy toll on the people in the months of November and December, removing many of the bread-winners from amongst the poor.

The situation was moreover complicated by the high prices for the necessaries of life caused by the war, in particular by the high price of cloth. It was these two extraneous factors which made the distress as keenly felt as in 1916, otherwise the famine neither in point of duration, extent or numbers compared in magnitude with that of 1916. The classes affected by the distress were landless labourers, small cultivators, the poorer *bhadralog*, lepers and mendicants; of the latter two categories there is an unduly large proportion in the district. The industrial classes with the important exception of cotton weavers were hardly affected at all. No deaths occurred from starvation.

3. The first indication of distress was the lack of sufficient water for man or beast; for the improvement of this the District Board made arrangements by the provision of cheap wells. But the situation rapidly developed into a difficulty of food and raiment as well as of water. It was, however, carefully watched and timely preparations were made so that relief operations were started immediately they were required at the end of January 1919. Owing to the increase in the area affected and the intensity of the

distress the existence of famine was formally declared with effect from the 15th May 1919. The distress reached its zenith at the end of July and began to abate at the end of August; relief operations were closed in the middle of October 1919 when the harvesting of the early autumn rice-crop restored normal conditions. The area affected in varying degrees was 2,364 square miles and excluded the three most eastern thanas, in the district, of Kotalpur, Indas and Seromanipur. The whole expenditure met from public funds on the relief operations, including the relief work organised by the District Board, was borne by the State.

4. For the purpose of relief, the distressed area was divided into 17 circles. With few exceptions each circle was placed in charge of a special relief officer, who was responsible for the supervision of (*a*) gratuitous relief, (*b*) relief on works, and (*c*) the actual distribution of loans, the three main forms of Government relief. But the initial preparation of lists of persons entitled to gratuitous relief was entrusted to non-official local committees; and both this relief and the wages to persons employed on relief works were distributed by honorary agencies, ordinarily belonging to the chaukidari panchayat. The relief works included 26 reservoirs, 2 irrigation channels and 71 roads. They were village works selected so as to be near the home of the workers with a view to the completion of work left unfinished at the previous famine, to the very necessary provision of irrigation works and sources of water-supply and, lastly, to the development of internal and inter-district communications. Almost all the works have been completed and steps have been taken to complete those remaining unfinished at the close of the relief operations. The total expenditure incurred in wages was Rs. 2,62,907; the daily average of persons employed was 5,408, whilst the largest number employed at one time was 12,364 or 1·27 per cent. of the affected population. The average daily wage per head was annas 2-11 against annas 2-2·8 in the previous famine. This higher average is attributed to the higher scale of wages fixed under the piece work system on the basis of prevailing prices. The price of common rice which had been 7 seers to the rupee in January rose to 4¾ seers in September, though it was at no time high in comparison with the prices prevailing in the rest of the province. The wages given were sufficient to maintain the dependants of the workers.

Gratuitous relief was given chiefly in the shape of cash doles weekly at the rate of 5 pice daily for a man, 3 pice for a woman and 2 pice for a child. During July and August when the price of rice rose to 5 seers or less a rupee the rate was enhanced by a pice in each case. No kitchens or poor houses were opened. The cost of gratuitous relief amounted to Rs. 1,19,680; the average cost per head was 10·18 pies against 9·16 pies in 1915-16, the higher cost being due to the higher range of prices. The daily average of persons relieved was 9,769 being 1·008 per cent. of the population affected. The numbers on gratuitous relief were in excess of those relieved on works; but the Governor in Council is satisfied that this was inevitable owing to the presence of a large number of physical wrecks from poverty and disease in the lower strata of the population.

A certain amount of special relief was given by Government on light work of paddy-husking, net-bag making and the collection of *ghutin*, whilst cloth was provided by Government for free distribution through the District Relief Committee.

Loans under the Agriculturists' Loans Act were advanced to 50,655 persons to the extent of Rs. 5,70,193, and under the Land Improvement Loans Act to the amount of Rs. 25,951. The Governor in Council endorses the opinion of the Collector that these loans were beneficial to the recipients and preserved their morale. The percentage of the cost of the establishment to the total cost of relief was 6 per cent. against 6·5 per cent. in the previous famine. His Excellency in Council, therefore, notices with satisfaction that the relief works were conducted in such an economical manner.

5. Charitable relief from private funds was given mainly through the District Relief Committee of which the District Judge was the president, and several charitable societies some of which had co-operated during the previous famine. Relief was also afforded by means of private works. Amongst other activities the District Relief Committee gave relief to those cotton weavers who could not be formed into registered co-operative societies by the distribution of yarn to them for conversion into cloth which was subsequently in its turn used for gratuitous relief. They manufactured cloth valued at Rs. 11,198 and made a free distribution of 21,642 pieces of cloth valued at Rs. 31,434 including standard cloth supplied by Government. To the different charitable societies were assigned areas in which to distribute relief. This was mainly given in the form of doles of rice, cooked food or cash. They relieved 1,551 persons daily on an average, but were handicapped by lack of funds. They worked throughout in harmony with the official organisation. Some 872 works, including 153 irrigation works and 102 tanks and wells, were conducted by private agencies with or without Government aid. The total expenditure on such works was Rs. 1,67,558. The Marwari community opened useful kitchens in Bankura and Vishnupur.

6. The problem of relieving cotton weavers was satisfactorily solved by the timely formation of the Bankura Industrial Co-operative Union, Limited. The Bengal Provincial Co-operative Federation gave to the union credit for a lakh of rupees, while Government gave a guarantee against loss to the extent of a quarter of a lakh. This union rapidly extended its operations and had at the end of October 1919, 41 societies affiliated to it with a membership of 555 individuals. It gave employment to 500 families. Those cotton weavers who could not be formed into societies were relieved, as already mentioned, by the District Relief Committee.

7. Though it cannot be expected that the district of Bankura can be made proof against famine in any short time, remedial measures are being adopted, or being investigated, by Government. Indeed the report contains some indications of the directions in which an advance has been made for the economic regeneration of the district which will provide an insurance against future famine. In the resolution on the famine relief operations of 1915-16 a hope was expressed that amongst honorary workers of the district there would be found men who would undertake the task of introducing co-operation and thrift, and thereby prepare the people to meet future famines. His Excellency in Council is gratified to notice that since then the co-operative movement has begun to take a hold on the district as indicated by the good work done by the Bankura co-operative industrial union amongst the weavers. The union is now organising credit societies to promote the habit of thrift, and several co-operative granaries have already been registered. An effort is also being made to organise irrigation co-operative societies. It is obvious that the problem of irrigation is of the utmost importance in Bankura; and it is hoped that by the passing of the Agricultural and Sanitary Improvement Bill into an Act, greater facilities will be afforded to agriculturists for the execution of irrigation works. The Agricultural Department have taken up the problem of evolving a drought-resisting variety of autumn rice capable of germinating even in years of comparatively small rainfall; and it has been decided, in accordance with the general policy of expansion in the Agricultural Department, to establish an agricultural farm in the district headquarters where experiments on the agricultural problems peculiar to the district will be undertaken and demonstration of the results of experiments made.

8. The Hon'ble Mr. Cumming, Member-in-charge, visited the district in December 1918 and in March and August 1919 made extensive tours with the Commissioner and Collector and gave necessary instructions for the guidance of the officers employed on the work of relief: he found that the operations were conducted with economy and efficiency. The Governor in Council desires to place on record his appreciation of the services rendered

by Mr. Lees and Mr. Gupta, the Commissioners of the Burdwan Division, and Mr. Vas, the Collector of Bankura. Mr. Vas worked with great zeal, and displayed energy, tact, foresight, and resourcefulness in conducting the relief operations. The thanks of the Governor in Council are also due to the Rev. A. Brown and the other members of the District Relief Committee, who rendered highly valuable assistance. Among the officers serving in the district Rai Sahib Suresh Chandra Chatarji, District Engineer, and Babus Satish Chandra Ghosh and Prafulla Chandra Ghosh, sub-divisional officers, deserve special mention. His Excellency in Council is also pleased to notice the efficient work done by the panchayats, and the spirit of civic service with which they were imbued, and has decided to have tangible marks of recognition of their labours presented to those who were conspicuous in this respect. The thanks of His Excellency in Council are also due to the numerous charitable organisations and to all private persons who generously gave material assistance in the efficient and successful working of the relief operations.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE RELIEF OPERATIONS CARRIED OUT IN THE BRAHMANBARIA SUBDIVISION OF THE TIPPERA DISTRICT DURING THE YEAR 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agricultural Branch.

DARJEELING, THE 1ST MAY 1920.

RESOLUTION—No. 82T.R.

READ—

Letter No. 619G., dated the 7th February 1920, from the Commissioner of the Chittagong Division, submitting the final report on the relief operations in the Brahmanbaria subdivision of the Tippera district during the year 1919.

THE report deals with the operations for the relief of distress which prevailed in the Brahmanbaria subdivision of the Tippera district during a period of nine months from February to October 1919. There was also some distress in local areas of the Sadar and Chandpur subdivisions of the district which was of short duration and promptly relieved. The total area of the subdivision is 769 square miles and the population is 385,996 ; out of this area 300 square miles with a population of 250,000 were affected. During the previous distress of 1915-16 the whole of the subdivision except one thana was affected. The duration and extent of the distress on the present occasion was not such as to necessitate at any stage of the operations the declaration of scarcity or famine ; but a report under section 59 and and periodical returns under section 66 of the Bengal Famine Code were submitted to the Government of India.

2. The subdivision has come into unfortunate prominence within recent years on account of its floods. The north of the subdivision is low and marshy ; it lies in the fairway of the effluent from Sylhet, which is fed by the rainfall in Cherrapunji and Silchar, which is the highest in India. It is inevitable that simultaneous heavy rainfall over a large catchment area in comparatively flat country must produce temporary floods. The result of a special examination made in 1919 was to show that the Assam-Bengal Railway embankment through the subdivision does not, as a matter of fact, aggravate the floods. The earlier history of the district indicates the occurrence of floods in the district in the years 1887 and 1907. The floods of 1915, however, combined the evils of untimeliness and unusual height. Then again in 1918 there was a high flood in the month of July which had a most detrimental effect on the autumn rice, the jute and also on the broadcast winter paddy. As the flood water subsided very late, the transplantation of winter paddy and the sowing of the winter crops was impeded. Furthermore, there was a drought which lasted from the middle of October 1918 to the end of June 1919. The floods caused damage to crops in the season 1918-19 to the extent of 70 per cent. of winter rice, 60 per cent. of autumn rice and 30 per cent. of jute, whilst the prolonged drought brought about a lack of drinking water and retarded the sowing of jute and *aus* paddy in the year 1919. The jute crop in that year was, however, on the whole successful ; but not even half of the normal early *aus* crop was obtained. The people in the affected areas were also hard hit by the high prices of foodgrains and by the contraction of credit which is a marked feature of any distress in this subdivision. Further, there was some physical deterioration of the cultivating and labouring classes owing to outbreaks of influenza and cholera. The relief measures extended over a period of nine months from February to October 1919. The intensity of the distress was probably not half that of the distress in the years 1915 and 1916, except in the months of June, July and August 1919, when the distress was at its height.

3. The distress mainly affected cultivators, landless labourers, beggars and indigent widows. The principal measures adopted by Government were

directed towards the restoration of credit and the grant of relief on works or of gratuitous relief. Loans under the Agriculturists' Loans Act were advanced to the extent of Rs. 2,44,953 against Rs. 9,69,148 in the years 1915-16; and Rs. 1,803 was spent for the distribution of seed by the District Board with the help of the Agricultural Department. Apart from gratuitous relief in the shape of cash and rice and salt doles it was found necessary to distribute standard cloth; and a total sum of Rs. 99,056 was spent on gratuitous relief as compared with Rs. 1,59,407 in the years 1915-16. Employment was also provided for able-bodied persons seeking relief on test works, such as the excavation or re-excavation of tanks and *khals* and the construction of roads, which were opened by the District Board. These works were largely attended in spite of a strong local prejudice against earth-work. All the works are reported to be of public utility. The eradication of water-hyacinth also provided some work when earth-work became impossible. The expenditure on test works amounted to Rs. 83,992 against Rs. 1,57,516 in the years 1915-16: this has been met by the District Board.

The Brahmanbaria a Central Bank also advanced Rs. 1,25,959 to its affiliated societies during the period from October 1918 to October 1919, thus relieving 3,175 persons.

4. The average monthly percentage of persons relieved to the total population of the affected area from February to October 1919 was 1·7. The workers were paid in small gangs by piece work at rates varying from Rs. 3 to Rs. 8 per 1,000 cublic feet; these rates are reported to be generally lower than the rates allowed by the District Board. The price of common rice ruled high throughout the year; but it was the highest in the months of July, August and September, when the price of local rice at Brahmanbaria was approximately 5, 4 and 4½ seers per rupee, compared with 6¾, 6 and 5½ seers per rupee in the corresponding months of 1915. There was an increase in the number of petty thefts and burglaries; but strong preventive measures checked the occurrence of violent crime. There was a decrease in the number of suits of all kinds except money suits, which increased slightly. The number of mortgages increased considerably over those of the previous year, whilst the sales of land showed only a slight increase on the whole. The distress had also a deterrent effect on general education in the affected areas: the number of pupils and the amounts of subscriptions and fees decreased. There were no deaths from starvation, but the distress affected the public health as indicated by a fall in the birth-rate and an increase in deaths as compared with the figures of 1918.

5. The Hon'ble Mr. J. G. Cumming, Member-in-charge, visited the affected areas in March and July 1919: during his visits he examined the measures and organisation of relief with the local officers. The Governor in Council is satisfied that the measures taken for the relief of distress were successful and were conducted with economy. His Excellency in Council appreciates the services rendered by Mr. De, the Divisional Commissioner, Messrs. Wares, Spry and Rai Ramani Mohan Das Bahadur, who carried on the relief operations as Collectors, Babu Basanta Kumar Das, the subdivisional officer, the two circle officers, Babu Sharat Kumar Guha and Babu Upendra Chandra Narayan Chaudhuri, who were in immediate executive charge of the relief operations, and by Mr. M. M. Halliday, manager, Sarail wards' estate. His thanks are also due to the subdivisional officer for his lucid and interesting report. The services of these officers will be brought to the notice of the Appointment Department. The Governor in Council notices with pleasure the assistance given by non-official agencies and associations and by non-official gentlemen to whom his thanks are also due. The services of the latter have already been recognised by the local officers through the grant of certificates and rewards.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 977Edn.—The 27th April 1920.—The following report of the Bruce Institution for the year 1919 is published for general information.

L. S. S. O'MALLEY,

Secy. to the Govt. of Bengal.

REPORT ON THE BRUCE INSTITUTION FOR THE YEAR 1919.

I. **Control.**—(1) During the year under review, the Rev. Father T. Van der Schueren, S.J., and the Rev. G. Henderson, whose terms of office had expired, were re-appointed to be Governors.

(2) The following new Governors were appointed:—

The Hon'ble Mr. Justice H. Walmsley, I.C.S., *vice* the Hon'ble Mr. Justice T. W. Richardson, I.C.S., resigned.

The Ven. W. K. Firminger (Archdeacon of Calcutta), *vice* the Rev. C. W. Stokoe, resigned.

Maurice Remfry, Esq., *vice* F. J. Robins, Esq., resigned.

(3) The Hon'ble Mr. W. W. Hornell, C.I.E., who was placed on special duty by Government, returned in September, relieving Mr. T. O. D. Dunn as Honorary Secretary.

(4) The following were the Governors at the end of the year:—

The Hon'ble the Chief Justice of Bengal ...
The Most Rev. the Lord Bishop of Calcutta ...
The Surgeon-General with the Government of Bengal ... } *Ex officio.*
The Chairman of the Calcutta Municipality ...
The Director of Public Instruction (Hony. Secy.) ...
The Hon'ble Mr. Justice H. Walmsley, I.C.S.
The Ven. W. K. Firminger (Archdeacon of Calcutta).
The Rev. Father T. Van der Schueren, S.J.
The Rev. J. Henderson.
James Wyness, Esq.
A Mercer, Esq. (Inspector of European Schools).
Maurice Remfry, Esq.

II. **Capital and Income.**—The capital of the Institution stood, as in the previous year, at Rs. 10,59,400, of which Rs. 10,46,200 are in the form of a 3½ per cent. stock certificate of year 1865. The balance, viz., Rs. 13,200, is in Government securities. The annual interest on the capital amounts to Rs. 37,079, which is kept in the Bank of Bengal. The year opened with a balance of Rs. 28,311-11-5 and closed with a balance of Rs. 30,180-0-9.

III. **Election to Vacancies, &c.**—(1) The Governors having found it necessary for financial reasons to reduce the number of wards, there was no election during the year.

(2) Of the 18 girls who left during the year, 14 had attained the age of 17 years, the limit ordinarily allowed under the rules, and 4 were withdrawn for various reasons before they had attained that age.

(3) Of the girls who were withdrawn during the preceding year, and in respect of whom reports have been received during the year under review, one was working as a steno-typist, one as a typist and one was learning shorthand and typewriting. Another is teaching Latin in the lower classes in the school where she was educated, and one is employed as a child's nurse. Two girls have married.

(4) At the close of the year, there were 79 girls on the fund against 97 in the previous year. They were distributed as follows:—

Loreto Convent, Entally ...	Boarding School—11 Orphanage — 8	...	19
Calcutta Girls' High School	.. ...	...	21
Pratt Memorial School ...	... ...	...	10
La Martinière for Girls ...	... ...	...	6
Calcutta Free School ...	... ...	...	3
St. Paul's Mission Home ...	... ...	...	2
St. Agnes' School, Howrah	... ...	...	1
St Vincent's Home, Kidderpore	... ...	...	1
Loreto Convent, Asansol ...	... ...	...	11
St. Andrew's Colonial Homes, Kalimpong	...	..	1
Protestant European School, Cuttack	..	...	1
The Good Shepherd Training School, Bangalore		...	1
Wynberg School, Mussoorie	... ...	...	1
Temporarily at Home ...	... ...	...	1
	Total	...	79

(5) The following table affords particulars as to the class and denomination of the foundationers at the close of the year:—

Class.	Roman Catholics.	Church of England.	Non-Conformists.	Total.
1. Orphans, or deserted by their parents	8	5	7	20
2. Fatherless or motherless, or deserted by their fathers or mothers	24	14	11	49
3. Those who have both parents alive	3	5	2	10
Total ...	35	24	20	79

(6) The health of the wards was on the whole satisfactory. One girl who was ailing was sent temporarily under medical advice to Pine Mount School, Shillong. Another girl who was subject to epileptic fits was placed in St. Vincent's Home, Kidderpore.

IV.—**Education and Maintenance.**—(1) The nature of the education given to girls on the fund was generally that prescribed for Elementary and Higher Elementary Schools under the Code of Regulations for European Schools in Bengal, and in a few cases, that for secondary schools.

(2) The Governors are anxious that their wards should not be allowed to drift until they leave school, and they have accordingly asked the school authorities and the Visiting-Governor to let them know with reference to each girl who attains the age of 15, what her capacities and prospects are, and to advise them in the light of these, how the last two years or so of their school-life should be spent to the best advantage. They have also prepared and distributed to schools a pamphlet showing what appointments are open to Anglo-Indian girls.

(3) Three girls were sent up for the Cambridge Local Examinations held in December 1918, of whom one passed the Junior Cambridge. Four girls were presented for the Elementary School Certificate Examination, of whom three passed. One girl was presented for the Supplementary School Examination but failed. Several girls appeared at the Cambridge Local Examinations held in December 1919; the results are not yet known.

(4) Under the rules, a girl is not ordinarily allowed to remain on the fund after she has attained the age of 17 years, when an outfit grant of Rs. 100 is generally given, on application, to enable her to make a start in life. In cases where a girl wishes to be trained as a teacher, or where some other special training is recommended, or they are preparing for

higher examinations, some extension of the period of benefit is generally allowed. One girl was granted an extension to enable her to undergo training as a teacher, and two girls were granted short extensions of few months to enable them to finish their course in shorthand and type writing.

(5) The monthly average cost for the education and maintenance of each girl on the fund amounted to Rs. 27-12-8 against Rs. 19-3-4 in the preceding year. The increase is due to the rate in Elementary Schools being raised from the beginning of the year, from Rs. 16 to Rs. 25, and in secondary schools from Rs. 21-8 to Rs. 35 per ward.

(6) The amounts paid under the different heads of expenditure were as noted below :—

	1919.			1918.		
	Rs.	A.	P.	Rs.	A.	P.
Education and maintenance ...	32,245	8	0	26,738	3	0
Office establishment ...	891	12	0	864	0	0
Contingencies ...	82	5	0	65	9	0
Advertisement and printing ...	285	5	0	45	12	0
Cost of outfits ...	1,382	3	0	560	0	0
Other charges ...	232	3	0	127	15	0
Total ...	35,119	4	0	28,401	7	0

V. **Inspection.**—Mr. W. C. Wordsworth was appointed Visiting-Governor for the first half, and Mr. Maurice Remfry the second half, of the year.

Mr. Wordsworth reported that he had visited almost all the schools and interviewed all the Bruce wards with the exception of some half dozen. Also that he had seen them at work and at play, and generally had been kept in touch with their condition by the principals of the schools concerned. His general impression was that the wards were well looked after, and compare not unfavourably with their class-fellows. It was evident to him that a number of them were girls of distinct promise, both intellectually and morally, and that they were being given every opportunity by the authorities of their schools. Mr. Remfry reported that he had visited all the schools in Calcutta in which Bruce wards had been placed, and that (with the exception of a few who were absent when he called) he personally interviewed all the wards, no school-mistress or teacher being present. The general health of the wards seemed to him to be above the average of the class from which the girls were drawn, and that generally speaking the girls were bright and apparently happy, and, so far as he could gather, the fact, that they were Bruce wards, made no difference in their treatment by the school-authorities. He found that, in one institution, they had no form of physical training; the matter has been referred to the Inspector of European Schools. Mr. Remfry stated that from the school-reports it appeared that some of the wards had defective eye sight. The school authorities have been asked to have the eye sight of all Bruce wards tested, and where necessary, glasses supplied at the expense of the fund.

VI. Meetings.—Three meetings were held during the year, and among the various resolutions passed the following may be recorded :—

"That any question of importance arising, which requires immediate attention be circulated to the Governors for their opinion, and that the Honorary Secretary should act in accordance with the opinions expressed thereon, and bring up the matter at the next meeting for confirmation."

CALCUTTA.
The 12th March 1920.

W. W. HORNELL,
Honorary Secretary to the Governors.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 29th April 1920.

Summary.—During the week the rainfall was generally light in West Bengal and moderate elsewhere. More rain is needed in some West Bengal districts. Sowing of jute and paddy is progressing satisfactorily; the operation is well advanced in Eastern Bengal. The average price of common rice for the province has risen by about 1·07 per cent. as compared with that of the previous week.

DEPARTMENT OF AGRICULTURE, BENGAL.

Third and Final Forecast of the Spring Oilseed Crops of Bengal, 1919-20.

[***Note.—On an average of the five years ending 1917-18, the area under linseed in Bengal has represented some 5·5 per cent. and that under rape and mustard 19·3 per cent. of the total areas respectively under these crops in British India.***]

Character of the season.—In the preceding two forecasts, the season was reviewed up to the first part of February. Since then excessive rain, accompanied in some places with hail, is reported to have caused damage to mature crops in the districts of Murshidabad, Jessore, Bakarganj, Noakhali and Tippera. Elsewhere the rain did not materially affect the outturn, as most of the crops were already harvested. On the whole the season may be regarded as having been fairly favourable.

Acreage.—The total area under oilseed crops (excepting sesamum for which separate forecasts are issued) is estimated at 1,265,800 acres this year against 1,304,800 acres last year.

Outturn.—According to the estimate of District Officers, the outturn of different kinds of oilseed crops (excepting sesamum) for the Province works out at 76 per cent. of the normal this year against 66 per cent. last year.

Taking 5¼ maunds as the normal rate of yield per acre for linseed, 6 maunds for rape and mustard and 4¼ maunds for other oilseeds, the total yield for the Province is estimated at 207,700 tons against 187,000 tons last year.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA;

The 7th May 1920.

APPENDIX I.

Third and Final Forecast of the Spring Oilseed Crops of Bengal, 1919-20.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
			Last year (1918-19).	This year (1919-20).	Last year.	This year.		
		Acres.	Acres.	Acres.				
24-Parganas	Linseed	1,600	600*	600*	67	83	End of December to February. Normal.	The weather has been favourable on the whole. A satisfactory outturn is expected.
	Rape and mustard	1,500	800*	800*	67	100		
	Other oilseeds (excepting *til*).	300	300	300	83	83		
	Total	3,400	1,700	1,600	70	92		
Nadia	Linseed	55,700	22,300	23,400	33	58	Beginning of February. Normal.	The increase in area was due to favourable weather at sowing time and to high prices of oil. Want of rainfall at the time of growth adversely affected the outturn to a great extent.
	Rape and mustard	23,600	14,400	15,300	33	58	Beginning of January. Normal.	
	Other oilseeds (excepting *til*).	18,900	3,300	3,700	33	68	End of December. Normal.	
	Total	98,100	42,000	52,400	33	58		
Murshidabad	Linseed	20,800	13,000	15,000	50	67	February to March. Generally normal.	The increase in area over that of last year is due to extension of cultivation owing to high prices of oil and favourable weather conditions. Continued drought at the period of growth and heavy showers in February, when the crops were mature have reduced the outturn.
	Rape and mustard	18,900	12,300	14,700	50	83		
	Other oilseeds (excepting *til*).	3,700	3,100	3,800	58	75		
	Total	43,400	28,400	33,500	51	75		
Jessore	Linseed	24,000	9,400	9,500	75	63	End of January. Normal.	The weather has not been favourable. The outturn has fallen much below the normal on account of damage done by drought and insect-pests in December and January and by excessive rain in February.
	Rape and mustard	49,600	18,000	18,000	67	66	Second week of January. Normal.	
	Other oilseeds (excepting *til*).	3,300	1,900	2,200	50	63	.....	
	Total	76,900	29,300	29,700	63	66		
Khulna	Linseed	900	100	100	31	50	End of January. Normal.	The increase in area is due to timely rainfall at the sowing time. On account of favourable weather, the outturn is expected to be normal.
	Rape and mustard	29,700	18,800	19,400	85	100	End of December. Normal.	
	Other oilseeds (excepting *til*).	100	500	500	92	100	February. Normal.	
	Total	30,700	19,300	20,000	77	100		
Bardwan	Linseed	23,500	7,700	6,900	67	67	End of January to end of February.	The decrease in area as compared with that of last year is due to want of moisture at the sowing time. The weather has not been favourable except in the Sadar subdivision. The outturn is much below the normal owing to damage done by drought in the Kalna subdivision.
	Rape and mustard	21,100	8,100	8,500	58	67		
	Other oilseeds (excepting *til*).	1,500	100	200	58	58		
	Total	45,100	15,900	15,100	62	67		
Birbhum	Linseed	800	800*	800*	58	75	March. Normal	The weather has been fair.
	Rape and mustard	2,000	2,000*	2,000*	58	75		
	Other oilseeds (excepting *til*).	200	200	300†	50	75		
	Total	3,000	3,000	3,100	57	75		

* Conventional area.

† Includes the area of 100 acres under groundnut.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.*		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers
			Last year (1918-19).	This year (1919-20).	Last year.	This year.		
		Acres.	Acres.	Acres.				
Bankura	Linseed	1,000	1,000*	1,000*	67	108	End of February. Normal.	The increase in area is due to favourable weather conditions. The outturn is expected to be slightly above the normal owing to absence of any damaging influences.
	Rape and mustard	7,000	3,700	4,800	67	108	End of January. Normal.	
	Other oilseeds (except *til*).	8,000	3,600	4,000	67	108	Middle of January. Normal.	
	Total	16,000	8,300	9,800	67	108		
Midnapore	Linseed	4,800†	11,800	1,600†	50	92	End of January...	The normal and this year's areas have been revised on the basis of revised settlement figures. The weather has not been very favourable. Want of rain has done some damage to the crops.
	Rape and mustard	13,200†	11,000	4,200†	50	92		
	Other oilseeds (except *til*).	8,000†	14,000	4,700†	50	92		
	Total	26,000†	36,800	10,500†	50	92		
Hooghly	Linseed	800	700*	700*	84	67	End of February. Normal.	The decrease in area compared with the normal area was due to unfavourable weather conditions at sowing time.
	Rape and mustard	7,900	3,800	3,800	55	67	Middle of February. Normal.	The outturn is below the normal owing to want of timely rainfall.
	Other oilseeds (except *til*.)	2,700	700	700	84	67		
	Total	11,400	5,200	5,200	55	67		
Howrah	Linseed	2,000	200	200	50	55	Beginning of February. Normal.	The weather was not favourable except in the case of rape and mustard.
	Rape and mustard	1,100	400	800	50	92		
	Other oilseeds (except *til*).	100	100	100	50	67		
	Total	3,200	700	1,200	50	81		
Rajshahi	Linseed	23,000	14,200	14,100	50	67	First part of March. Normal.	Since the submission of the second forecast, the weather has been fair. Some damage was caused to the crops by insect-pests and drought as reported in the second forecast. Hence the outturn is much below the normal.
	Rape and mustard	74,000	57,800	43,400	50	67	Latter part of January. Normal.	
	Other oilseeds (except *til*).	400	2,000	1,000	38	58	First part of March. Normal.	
	Total	102,400	74,100	63,500	50	67		
Dinajpur	Linseed	(40)	(30)*	(30)*	70	50	Middle of January. Normal.	Owing to unfavourable weather the outturn is much below the normal.
	Rape and mustard	70,000	50,500	57,500	50	63		
	Other oilseeds (except *til*).	...	100	100	60	50		
	Total	70,000	50,600	57,600	50	63		
Jalpaiguri	Rape and mustard	49,600	51,400	46,300	92	92	Latter part of January. Normal.	Owing to extension of tobacco cultivation, the area under rape and mustard has been reduced. The outturn has fallen much below the normal owing to damage done by drought and insect-pests.
	Other oilseeds (except *til*).	200	200	200	100	100		
	Total	49,800	51,600	46,500	92	92		

* Conventional area. † Revised.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
			Last year (1918-19).	This year. (1919-20).	Last year.	This year.		
		Acres.	Acres.	Acres.				
Darjeeling ...	Rape and mustard ...	7,000	2,800	2,800	100	92	January. Normal.	The increase in area by 100 acres was due to new cultivation in the Terai. The weather has been favourable but want of rain in the Terai has caused the outturn to fall below the normal.
	Other oilseeds (excepting *til*).	200	200	300	100	92		
	Total ...	7,200	3,000	3,100	100	92		
Rangpur ...	Rape and mustard ...	160,000	118,000	124,000	80	90	Middle of January. Normal.	The weather was favourable at the sowing time. Since then want of rain has caused the outturn to fall below the normal.
	Other oilseeds (excepting *til*).	1,100	200	200	100	90		
	Total ...	161,100	118,200	124,200	80	90		
Bogra ...	Linseed	1,000	1,800	1,800	68	80	Middle of March ...	The weather was not favourable at the sowing time. Absence of rain and floods in the eastern part of the district caused damage to crops. The rain in February did some good but it was too late to be of much benefit. Hence the outturn is much below the normal.
	Rape and mustard ...	60,000	12,000	14,000	60	80	Middle of January.	
	Other oilseeds (excepting *til*).	...	200	300	46	...	End of December.	
							The dates are normal.	
	Total ...	61,000	13,800	16,100	61	79		
Pabna ...	Linseed ...	7,600	8,500	10,900	55	50	Middle of March. Normal.	Since the submission of the second forecast, heavy rainfall with hailstone damaged the crop considerably in some parts of the district.
	Rape and mustard ...	110,000	114,500	72,900	65	60	Middle of January. Normal.	
	Other oilseeds (excepting *til*).	...	...	300	...	50		
	Total ...	117,600	123,000	84,000	65	60		
Malda ...	Linseed	6,000	3,500	4,000	45	67	January and February. Normal	The weather has not been favourable throughout. The growth was retarded owing to want of moisture due to absence of rain since November which caused slight damage. The outturn has therefore fallen much below the normal.
	Rape and mustard ...	30,000	10,000	11,000	45	75		
	Other oilseeds (excepting *til*).	2,500	1,200	1,200	40	67		
	Total ...	38,500	14,700	16,200	45	72		
Dacca ...	Linseed	1,800	4,600	1,400	75	75	Middle of February. Normal.	Since the submission of the second forecast, the weather was rainy accompanied with hailstorm which caused damage to linseed.
	Rape and mustard ...	88,600	74,900	88,700	65	100	January. Normal.	
	Other oilseeds (excepting *til*).	1,700	...	1,700	...	100	Beginning of March. Normal.	
	Total ...	91,600	79,500	91,800	66	100		
Mymensingh	Linseed	13,800	13,800	13,800	50	50	Middle of January. Normal.	Since the submission of the second forecast, about 25 per cent. of the crops was damaged by untimely heavy rain in the Kishorganj subdivision. The outturn would have been better if there had been no heavy showers.
	Rape and mustard ...	430,700	472,200	472,200	70	75		
	Other oilseeds (excepting *til*).	300	300	300	75	100		
	Total ...	444,800	486,400	486,400	70	76		
Faridpur ...	Linseed	6,000	6,100	6,000	89	96	February. Normal.	Since the submission of the second forecast, the growth of the crops was affected owing to continued rain and the outturn has therefore fallen below the normal.
	Rape and mustard ...	25,700	25,700	24,300	82	85		
	Other oilseeds (excepting *til*).	1,100	1,100	1,100	60	84	March. Normal.	
	Total ...	32,700	32,900	31,400	84	87

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 6th May 1920.

Summary.—Light to moderate rain fell in North and East Bengal; elsewhere there was practically no rain. Rain is urgently needed for ploughing and sowing of jute and paddy in West Bengal. Weeding of jute and autumn paddy is proceeding satisfactorily in East and North Bengal. Prospects of standing crops are generally reported to be favourable. The average price of common rice for the province has risen by about 1·09 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	Nil	5½	5½	Sowing of *aus* paddy and jute crops continued. There has been slow progress in ploughing for want of rain in Basirhat subdivision. Fodder and water are sufficient.
	Diamond Harbour.	(*a*)	(*a*)	(*a*)

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the wheat crop of Bengal, 1919-20.

(Note.—On an average of the five years ending 1917-18, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the territory now reported on has, in the five years ending 1917-18, averaged (a) 48·7 per cent. and (b) 17·8 per cent, respectively).

Character of the season.—In the special forecast issued on the 8th April last, the weather was reviewed up to March, when most of the crop was harvested. The subsequent dry weather has been favourable for threshing.

Area sown.—The total area sown this year is estimated at 116,100 acres against 114,600 acres (revised) last year.

Outturn.—The estimated percentages of outturn as returned by the district officers in the important wheat-growing districts are as follows :— Nadia 67, Murshidabad 75, Pabna 50 and Malda 90.

The provincial outturn works out to 78 per cent. of the normal against 61 per cent. last year.

Taking the normal yield to be 8½ maunds per acre, the total yield for the province is estimated at 28,300 tons against 21,800 tons last year.

At the end of April, the average wholesale price of wheat at the principal marts of the province was Rs. 6-15 per maund or about the same as at the corresponding period of last year and about 38 per cent. higher than at the same period in 1918. The average wholesale price of common rice at the principal marts, on the other hand, was Rs. 7-6 per maund at the end of April this year or about 15 and 114 per cent. higher than the prices ruling at the corresponding period last year and in the year preceding respectively.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA,
The 14th May 1920.

APPENDIX I.

Final Forecast of the Wheat Crop of Bengal, 1919-20.

District.	Approximate normal area under the wheat crop.	Approximate area under wheat last year (1918-19).	Estimated area under wheat this year (1919-20).	Taking 100 to represent normal what would be the average outturn per acre cropped.		Date by which the harvesting of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
				Last year.	This year.		
	Acres.	Acres.	Acres.				
Nadia ...	23,100	9,400	11,700	33	67	End of February. Normal.	The weather has not been favourable. Much damage was done by drought during the period of growth and subsequently by rain.
Murshidabad ...	69,300	29,900	24,400	50	75	March. Normal.	Drought at the period of growth and subsequently heavy showers and hailstorm in March caused damage to the extent of about 25 per cent. Since the submission of the special forecast, the weather was favourable.
Jessore ...	2,200	1,100*	900	58	50	Ditto ...	Drought in December and January and heavy rain in February and March have reduced the outturn by about 50 per cent. Harvesting was completed in March.
Burdwan ...	3,000*	2,000*	2,000*	58	67	Middle of March. Normal.	Great damage has been done to the crop in the Kalna subdivision by drought and by hailstorm in the Katwa subdivision.
Birbhum ...	5,000	4,100*	4,100*	67	83	End of March. Normal.	The weather has been fair.
Bankura ...	3,600*	3,600*	3,600*	67	100	Middle of February. Normal.	The weather has been good and a normal crop has been reaped.
Midnapore ...	900†	1,200*	1,000†	70	75	Middle of March. Normal.	Since the submission of the special forecast, the weather has been favourable. The absence of rainfall at sowing time damaged about 25 per cent. of the crop.
Hooghly ...	2,400	1,700*	1,700*	50	67	End of March. Normal.	The weather has not been favourable owing to heavy rain during the harvesting. Droughts and heavy rain in the Arambagh subdivision damaged about 33 per cent. of the crop.
Rajshahi ...	8,500	6,500	6,900	70	67	Middle of March. Normal.	The weather has not been favourable. The outturn is much below the normal owing to drought.
Dinajpur ...	1,400	1,300	1,300	40	61	First week of March. Normal.	Since the submission of the special forecast, the weather has been fair. The outturn has fallen much below the normal for want of sufficient rainfall.
Jalpaiguri ...	800	500	900	85	75	End of March. Normal...	The effects of weather have not been favourable. The crop was damaged by the hailstorm in the Alipur subdivision. The outturn is below the normal owing to long continued drought and to damage by hailstorm.
Darjeeling ...	4,500	2,500	2,500	100	100	15th April. Normal.	The weather has been a favourable one.
Rangpur ...	3,000	3,400*	3,400*	90	90	Beginning of March. Normal.	The weather was favourable at the time of sowing, but subsequently want of moisture owing to drought affected the crop unfavourably. Afterwards the light rain that fell improved the prospects of the crop. A little damage was also done by rain and hail.
Bogra ...	900	100	300	...	85	Middle of March. Normal.	The outturn was a little better than what was anticipated in the special forecast.
Pabna	16,000	12,000	10,000	80	80	Ditto ...	Since the submission of the special forecast, the weather was favourable on the whole. About half the crop has been damaged by drought during the period of growth and by subsequent heavy rain with hailstorm.
Malda	40,000	35,000	35,000	65	90	First week of March. Normal.	The weather has been favourable. Slight damage has been done by hailstorm. The outturn is below the normal owing to unfavourable weather at sowing time.
Dacca	4,100	3,900	4,100	75	70	Middle of March. Normal.	Damage to the extent of about 30 per cent. was caused by excessive rainfall and hailstorm in the last part of February and first part of March.
Faridpur ...	3,700*	3,700*	3,700*	67	96	Beginning of April	The weather has been favourable to the growth of the crop, but owing to excessive rain and hailstorm after the submission of the second forecast the crop was affected to the extent of about 4 per cent.
Total Bengal ...	209,700	116,600	116,100	61	78		

* Conventional area. † Revised on the basis of settlement figures.

Bengal ...	116,100	110,600	132,000	136,100	+1·3	−12·6	−14·7	26,300	21,800	39,200	38,400	+20·7	−37·3	−36·3

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR APRIL 1920.

I. **Character of the season.**—Excepting in the districts of Rangpur and Mymensingh, where it was a little in excess of the normal, the rainfall during the month was in defect throughout the Province. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of spring crops was almost finished. Preparatory tillage for jute, paddy and other autumn crops was proceeding in some West Bengal districts, the progress being slow in places owing to want of sufficient rain. Sowings of jute and lowland paddy were progressing satisfactorily; the operation was well advanced in Eastern Bengal during the latter half of the month where weeding had also commenced.

III. **State of standing crops.**—Summer rice and other standing crops suffered from rain, accompanied in places with hail, in the districts of Midnapore, Rangpur, Dacca, Mymensingh, Tippera and Noakhali: elsewhere the standing crops were in fairly good condition, though a little more rain would have much facilitated their growth in the West Bengal districts.

IV. **Prospects and probable outturn.**—The prospects of standing crops were generally hopeful. The spring oilseed crops for the Province have yielded an outturn of about 76 per cent. of the normal and the wheat crop about 78 per cent.

V. **Damage to standing crops.**—Some damage to summer rice and other standing crops by rain and hail was reported from parts of Midnapore, Rangpur, Dacca, Mymensingh, Tippera and Noakhali.

VI. **Condition of agricultural stock.**—Excepting in the districts of Jessore, Burdwan, Bankura, Howrah, Bogra, Dacca, Faridpur, Chittagong and the Chittagong Hill Tracts, cattle-disease was reported from most parts of the Province.

VII. **Failure of pasturage and fodder.**—The supply of fodder was sufficient throughout the Province.

VIII. **Prices of food-grains.**—During the second fortnight of the month under review, the prices of common rice of the cheapest quality rose in nineteen districts, fell in one only and remained stationary in the rest of the Province varying from 5 seers at Darjeeling, Tippera and Noakhali to 6 seers 12 chittaks at Birbhum.

IX. **Condition of agricultural population.**—The condition of agricultural people was fair.

CALCUTTA, *the 15th May 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 13th May 1920.

Summary.—The rainfall during the week was generally heavy in the Dacca and Chittagong divisions and light to moderate elsewhere. It has improved the prospects of standing crops especially in the Eastern and Northern Bengal districts and has facilitated the ploughing and sowing of jute and autumn paddy in the Western Bengal districts. Weeding of jute and autumn paddy is proceeding satisfactorily in the Eastern Bengal districts. The average price of common rice for the province has risen by about 2·67 per cent. as compared with that of the previous week.

LIBERALITY OF BABU CHHATU LAL AGARWALA OF BHUSHIRBANDAR.

No. 70T.-M., dated Darjeeling, the 15th May 1920.

From—THE HON'BLE MR. L. S. S. O'MALLEY, C.I.E., I.C.S., Secy. to the Govt. of Bengal, Municipal Department.

To—The Commissioner of the Rajshahi Division.

WITH reference to your letter No. 191P.W., dated the 14th April 1920, reporting that a *Dharmasala* has been constructed by Babu Chhatu Lal Agarwala of Bhushirbandar, police-station Chirirbandar, district Dinajpur, at Ganeshtala, in the town of Dinajpur, at a cost of Rs. 22,000, I am directed to request that the thanks of Government may be communicated to him for his liberality and public spirit.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FOURTH QUARTER OF THE YEAR 1919-20.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Separate Revenue Branch (Salt).

No. 1575S.R.

Dated Calcutta, the 18th May 1920.

THE following report on the state of the salt market for the fourth quarter of the year 1919-20, comprising the months of January, February and March 1920, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 2,983,385 maunds (including 2,006,703 maunds issued under the credit system), as compared with 3,433,050 maunds (including 2,970,110 maunds issued under the credit system) in the previous quarter and 3,476,150 maunds (including 2,816,033 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 34,20,812 (including Rs. 26,02,253 adjusted under the credit system), as against Rs. 38,09,929 (including Rs. 32,69,780 adjusted under the credit system) in the previous quarter, and Rs. 33,64,657 (including Rs. 25,81,104 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the Port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years :—

Total	2,256,076	2,726,884	3,152,631	3,135,740	29,54,595	2,981,313*

* Inclusive of 2,006,703 maunds of salt issued under the credit system.

Compared with the corresponding quarter of the previous year and the same quarter of 1917-18, importations were less by 6·02 and more by 30·9 per cent., respectively, and clearances were less by 14·5 and 1·66 per cent., respectively. The increased imports from the United Kingdom, Spain, Aden and Bombay, are specially noticeable.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters :—

Table II.

Where stored.	Fourth quarter of 1918-19.	First quarter of 1919-20.	Second quarter of 1919-20.	Third quarter of 1919-20.	Fourth quarter of 1919-20.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director of Statistics with the Government of India when they are available.

6. No salt was despatched during the quarter by the East Indian Railway to stations beyond Buxar as against *nil* in the previous quarter, and in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter was *nil*, as compared with 202 maunds in the previous quarter and *nil* in the corresponding quarter of the previous year.

8. No information was available concerning the shipments of Liverpool salt during the quarter for the Port of Calcutta.

9. Table III shows the average wholesale prices* per 100 maunds of salt at the Port of Calcutta during each fortnight of the quarter :—

As compared with the corresponding quarter of the previous year, the quantities admitted into bond and cleared from bond and shipboard were less by 12·5 per cent. and 11·2 per cent., respectively.

By order of the Governor in Council,

A. MARR,
Secretary to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 20th May 1920.

Summary.—The rainfall was light and scattered. More rain is needed for agricultural operations and for standing crops, especially on high lands. Sowing of jute and low land paddy is still proceeding in West Bengal districts, while it is nearly finished in North and East Bengal. Sugarcane is doing well. The average price of common rice for the province has risen by about 2·34 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

Sanitary Commissioner for Bengal.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA TRADE FLUCTUATIONS

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the twelve months, April, 1919, to March, 1920, as compared with the corresponding period of 1918-19 and 1917-18. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary

Imports.—The imports of rice, including paddy†, into Calcutta* by rail river, canal, road, and sea (coastwise) during the twelve months, April, 1919, to March, 1920, amounted to 21,960,000 maunds, as against 19,973,000 maunds in the corresponding period of the preceding year—an increase of 10 per cent. There was an increase of 15 per cent in the imports of coal and coke (100,772,000 maunds as against 87,731,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 60 per cent, the total value amounting to Rs. 9,83 lakhs as against Rs. 6,14 lakhs in 1918-19. The quantity of indigo imported during the twelve months, April, 1919, to March, 1920, increased from 17,811 maunds to 18,631 maunds. The imports of raw jute amounted to 5,119,000 bales as against 4,867,000 bales—an increase of 5 per cent in the period under report. The imports of gunny bags showed a decrease of 8 per cent (408 million bags as against 446 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) decreased by 16 per cent from 7,250,000 maunds to 6,080,000 maunds. The imports of sugar decreased by 8 per cent from 725,000 maunds to 666,000 maunds, and those of tea increased by 7 per cent from 3,095,000 maunds to 3,321,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the twelve months, April, 1919, to March, 1920, increased by 13 per cent (Rs. 30,49 lakhs as against Rs. 27,03 lakhs last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 1,275 million to 1,101 million bags, but the shipments of gunny bags to other Indian ports decreased from 49 millions to 45 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 4,684,000 maunds to 5,778,000 maunds, or by 23 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles in the twelve months, April, 1919, to March, 1920, compared with the corresponding months of 1918-19.
